

Terminal Aeronautical Charts (TACs)

- Provide a large scale portrayal of selected metropolitan complexes.
- Intended for use by pilots operating from airfields within or near a Class B or Class C airspace.
- Portrays more details than the Sectional Aeronautical Chart, satisfying pilotage and local control requirements.
- Coverage of Terminal Area Charts are indicated by shaded boxes on the Sectional Chart index.
- Scale: 1: 250,000
- Updated: Every six months
- Available in digital format
