What is a Center of Innovation?

The Georgia Centers of Innovation are the critical link between strategic industries, research universities, financial resources, and the regulatory community.

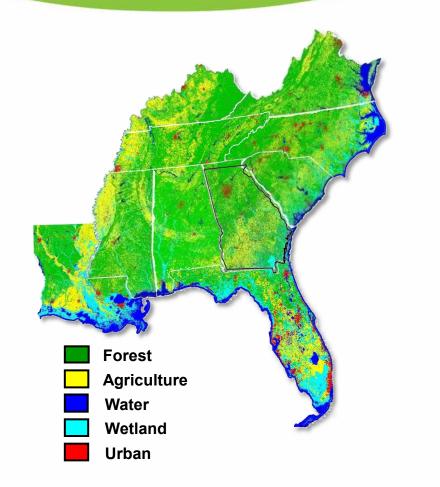

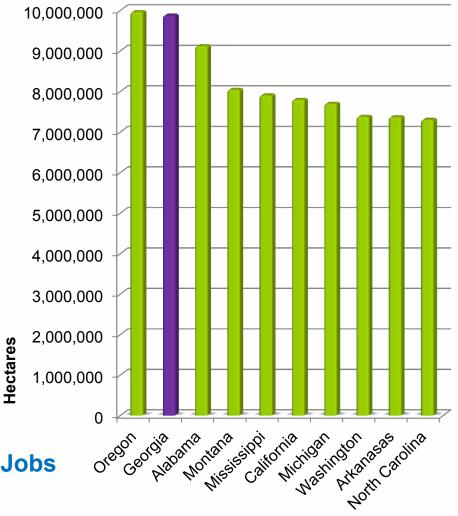

Drivers

From an Economic Development Standpoint

- **Economy** Forest Industries
- Mandates Europe- creating jobs in the US
- Environment It's cleaner
- Energy Security Supply disruptions, Middle East

Southeast Forestry = Biomass Energy = Jobs

Georgia Wood Removals

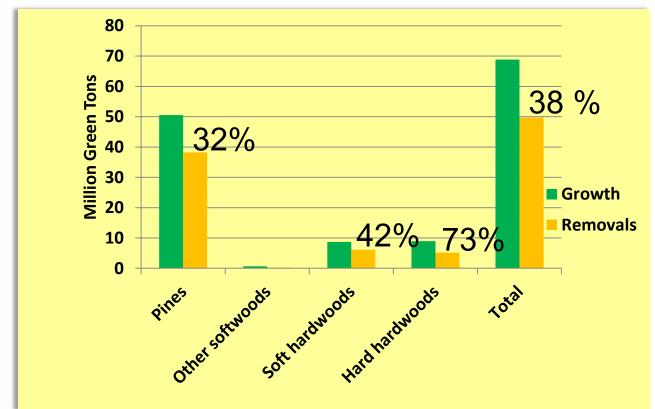

- 1995 51.4 million green tons harvested
- 2009 39.2 million green tons harvested

12.2 million green tons to get back to where we were...

Growth and Removals of Merchantable Trees

Between 1998 and 2008 the growth of growing stock on timberland in the state has exceeded removals by an **average of 38.5%** annually or 546,086,970 cubic feet per year

Giant Miscanthus

- Herbaceous, Deciduous, Perennial
- Rhizomes rather than seed
- 11 25 Dry tons/acre/year
- Height up to 15 feet
- Low environmental inputs
- Alternative non-food use for marginal Land
- Drought tolerant, crowds out weeds
- Carbon neutral

101 in Economic Development

- 1. Don't trash the other guy, too much.
- 2. Don't throw out high numbers.
- 3. Don't throw out low numbers.
- 4. Don't tell me your going to give 30% of the profits to poor children.
- Don't tell me you have all the money you need and aren't looking for anything from the Feds, State County, or City
