Subject: Changes to Malt liquor beverages - Stop Interfering

What on earth makes anyone at the TTB think that looking into formulations of these or any beverages for taste (not alcohol content) is not an absolutely frivolous waste of taxpayer money??? Not to mention an unlawful intrusion into private business!

It is absolutely none of your affair. The amount of money that you have already expended on this matter is outrageous and without merit.

Stop interfering in the private sector. Your Bureau should be monitored much more carefully.
