To: Alcohol and Tobacco Tax and Trade Bureau
Attn: Notice #4

Dear Sirs:

I am writing you to voice my opinion in favor of the option #2 -51-49 standard of flavored malt beverages, several reasons for my reasoning are as follows:

1. These products were approved and taxed and priced as malt beverages. To move to the spirit segment at this point make no sense to me.
2. Reformulation of these products would only favor large producers and creates financial problems for small producers also the 90-10 would also create higher pricing for consumers.
3. The ability of all current producers to keep the same taste as they have now.

I strongly urge you to support option #2 in fairness to these products and their producers.

Thank you,

Dave Hornik
Sales Supervisor
Beer Capitol Distributing Inc.
