ATTN: Notice No.4

Dear Sir or Madam:

We understand from your March 20, 2003 release that you are requesting comment on whether legislative changes would be required if the one-half of one percent threshold regulation is adopted with respect to flavored malt beverages. In the State of Missouri, the adoption of such a standard would not require any subsequent legislative change, as our state regulations simply adopt the TTB standard without specifying what the standard is.

If you need further information, please let me know.

Very truly yours,

Keith F. Fuller

State Supervisor
