August 12, 2003

Chief,

Regulations and Procedures Division,

Tax and Trade Bureau,

Washington D.C.

As someone who is concerned about product integrity and an orderly marketplace I strongly support the Alcohol and Tobacco Trade Bureau's March 2003 proposed "0.5% standard" for the composition of flavored malt beverages. This is an important clarification of federal alcohol beverage categories as established in TTB notice number 4, and your approval is very much encouraged in the interest of fairness in this industry.

Sincerely,
