

Compliance Statement

1. Preparation of the compliance statement benefits the applicant by systematically ensuring all applicable regulatory aspects are appropriately addressed during the certification process. It serves as a master index to your system documentation.
2. To develop the Compliance Statement:
 - a. List all applicable regulations contained in Title 14 CFR, parts 119 and 121 that apply to your proposed operation.
 - b. Reference any relevant subpart and each relevant section, paragraph, and subparagraph of the subpart.
 - c. Next to each subparagraph, provide a specific reference to a manual or other document. You could also provide a brief narrative description of how you will comply with each regulation, although this description is not required. The location of each reference should be as specific as possible and should contain the name of the manual, chapter, section and paragraph number(s). Using manual page numbers in the Compliance Statement may produce inaccurate reference locations due to repagination problems. There may be multiple reference locations for one regulation found within one manual, or there may be multiple reference locations found in several different volumes. It is not acceptable to enter references such as “ABC Airlines will comply with this requirement”, “ABC Airlines understands this regulation and will comply” or “Noted.”
 - d. The compliance statement is an important source document during the certification process. After the certification process is completed, the compliance statement should be kept current in the applicant’s system.
3. The following are recommended examples of formats that may be used to present the list of the specific regulations and subparts, including all subparagraphs (Compliance Statement):
