95	CRAC Modified Net Revenue (CMNR)	\$129,045	\$120,119	(\$8,712)	\$281,952	(\$22,308)	\$5,329

<1 Current Period & FYTD Actuals for Power Sales & Contracted Power Purchases decreased by a net \$98.5 million, due to the change in accounting for power "bookout" transactions

These uncertainties among other factors may result in large range swings +/- impacting the final results in revenues, expenses, and cash reserves.

PBL Rate Case amounts are from the final SNCRAC ROD data that was presented at the August 28th, 2003 Customer Workshop, which did not include any results from debt refinancing.

after adoption of new accounting guidance, EITF 03-11, effective as of Oct 1, 2003. The change in accounting for power "bookout" transactions was not applied to the SOY Target or the Forecast.

<2 This is an "accounting only" (no cash impact) adjustment representing the mark-to-market (MTM) adjustment required by SFAS 133, as amended, for identified derivative instruments, which is not included in 1 The MTM adjustment is excluded in calculating Modified Net Revenues for rate setting purposes.

<3 Identified as Capped Expenses in the SNCRAC Final Rate Case

<4 Line 52, PBL Marketing and Business Support, contained both Cons Support projects AND approximately \$120 million of Other Power Purchase costs during FY 2001.

Peak Load Management projects were classified to Line 19, Contracted Power Purchases, in subsequent fiscal years.

<5 Represents the MTM required transition adjustment at Oct. 1, 2000, the date of adoption of SFAS 133, as amended, for identified derivative instruments

<6 Although the forecasts in this report are presented as point estimates, BPA operates a hydro-based system that encounters much uncertainty regarding water supply and wholesale market prices.
