

What's New for DRVS 7.1.4

Patch increases the size of the constraints on the database field that helps calculate Average Earnings Rates for Labor Exchange users only.

Please Note: Only states with extremely large numbers of Retention numerator records such that the sum of wages of 2nd quarter After Exit and 3rd Quarter after Exit exceed \$999,999,999.99 need to install this patch

If you have any questions or need assistance, please contact esta@mathematica-mpr.com and cc your regional ETA staff.
