This manifest is required as part of your Kern River Use Permit. If there is more than one river use permit holder in your group, one manifest can be used to include those crafts and passengers as long as the number does not exceed the maximum group size allowed on a particular Kern River run. If passengers change on a trip or you choose a different segment of the river to run, a new manifest is required. The information collected can be useful in search and rescue efforts, as well as, in reporting private whitewater boating use on the river.

Please take the time below and let us know about your experience on the Kern River. Your comments are welcome!
