Subject: 401K fees

Part of my retirement is tied up in the RSA (Retirement Systems of Alabama), so I do not know if this really involves me, but I was very distressed to hear of these hidden fees that many of my friends are inadvertently and unknowingly paying on their 401k's. Please make this a priority by MAKING the fund managers disclose everything to employers so that they can help their employees make good decisions. I have some funds in another place that I know I am paying fees on, but I could not tell you how much. I don't think it's fair that while I'm saving so as to not be a burden on the government, there are people taking money from my future.

Thank you.
