

Partnership for Patients: The Community-Based Care Transition Program

U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES, ADMINISTRATION ON AGING, WASHINGTON DC 20201
PHONE 202.619.0724 | FAX 202.357.3523 | EMAIL AffordableCareAct@aoa.hhs.gov | WEB www.aoa.gov

Agenda

- Introduction/housekeeping
- The Partnership for Patients
- The Community-Based Care Transition Program
- Resources
- Next training
- Questions

Co-sponsors

Submit your questions

- During the course of the webinar, we invite you to submit your questions to:

AffordableCareAct@aoa.hhs.gov

Presenters

- Joe McCannon, Senior Advisor to the Administrator, Centers for Medicare & Medicaid Services (CMS)
- James Hester, Senior Advisor, Center for Medicare & Medicaid Innovation, CMS
- Juliana Tiongson, Social Science Research Analyst, Center for Medicare & Medicaid Innovation, CMS

Partnership for Patients

The Human and Financial Cost of Unnecessary Harm

- On any given day, 1 out of every 20 patients in American hospitals is affected by a hospital-acquired infection
- Among chronically ill adults, 22 percent report a “serious error” in their care
- One out of seven Medicare beneficiaries is harmed in the course of their care, costing the federal government over \$4.4 billion each year
- Despite pockets of success -- we still see massive variation in the quality of care, and no major change in the rates of harm and preventable readmissions over the past decade

We can do much better – and we must.

Partnership for Patients: Better Care, Lower Costs

Secretary Sebelius has launched a new nationwide public-private partnership to tackle all forms of harm to patients. Our goals are:

1. *Reduce harm caused to patients in hospitals.* By the end of 2013, preventable hospital-acquired conditions would decrease by 40% compared to 2010.
 - Achieving this goal would mean approximately 1.8 million fewer injuries to patients with more than 60,000 lives saved over the next three years.
2. *Improve care transitions.* By the end of 2013, preventable complications during a transition from one care setting to another would be decreased such that all hospital readmissions would be reduced by 20% compared to 2010.
 - Achieving this goal would mean more than 1.6 million patients would recover from illness without suffering a preventable complication requiring re-hospitalization within 30 days of discharge.

Potential to save up to \$35 billion over 3 years

How Will Change Actually Happen?

- There is no “silver bullet”
- We must apply many incentives
- We must show successful alternatives
- We must offer intensive supports
 - Help providers with the painstaking work of improvement

Getting Started

- Build on tremendous private sector enthusiasm
 - Hundreds of hospitals, clinicians, employers, insurers, consumer groups and community organizations have already signed up!
- NEW supports through the CMS Innovation Center. Up to \$500 million investment for:
 - National-level content for anyone and everyone
 - Supports for every facility to take part in cooperative learning
 - Vanguard Group for ambitious organizations to tackle all-cause harm
 - Patient, family and professional engagement
 - Improved measurement and data collection, without adding burdens to hospitals
- We will work with communities to improve transitions between care settings:
 - CMS is now accepting applications to participate in the Community-Based Care Transitions Program
 - \$500 million available for community-based organizations

Care Transitions: The Problem

- Transition from one source of care to another is a moment with high risk for communications failures, procedural errors, and unimplemented plan.
- People with chronic conditions, organ system failure, and frailty are at highest risk because their care is more complicated and they are less resilient when failures occur.
- Strong evidence shows that we can significantly reduce hospital readmissions caused by flawed transitions.

Safe, Effective Transitions Require:

- Patient and caregiver involvement
- Person-centered care plans that are shared across settings of care
- Standardized and accurate communication and information exchange between the transferring and the receiving provider
- Medication reconciliation and safe medication practices
- The sending provider maintaining responsibility for the care of the patient until the receiving clinician/location confirms the transfer and assumes responsibility.

Vision

- A care system in which each patient with complex needs has a care plan that
 - Guides all care
 - Moves with the patient across settings of care and time.
 - Reflects the priorities of patient and family, and
 - Meets the needs of persons living with serious chronic conditions

Care Transitions: Readmissions

- Hospital readmission is one important indicator of possible flaws in one major type of transition.
- 20% of Medicare hospital patients are readmitted within 30 days of discharge
- Partnership for Patients Goal: Within three years, reduce by 20% the number of preventable readmissions that occur within 30 days of discharge
- Other indicators are needed and under development.

Care Transitions: The Approach

- Build on evidence from research and pilots.
- Support existing local coalitions of hospitals, nursing homes, physicians, home health, consumer groups, and other stakeholders.
- Encourage formation of new coalitions where needed.
- Provide data, technical support, payment mechanisms, financial support, enhanced surveys, consumer information, training, and other mechanisms to help coalitions move providers toward seamless transitions.

Care Transitions: Strategy

- Create a broad based public/private partnership
- Tailor support to where providers are in their quality journey - match support to needs:
 - ‘Walkers’: little track record, but interested in starting e.g. using QIO or AoA programs
 - ‘Joggers’’: proven track record, eligible for S 3026
 - ‘Marathoners’: established, mature coalitions eligible for S 3022 ACO support
- Build a national network of 2600 community focused care transition coalitions which partner hospitals with community resources

How Can You Get Started with Care Transitions in Your Community?

1. Sign the Partnership for Patients Pledge
 - <http://www.healthcare.gov/center/programs/partnership/join/index.html>
2. Care Transitions: Start fostering working relationships with the community of providers who care for patients in your area
 - Recruit and convene relevant partners,
 - Conduct a root cause analysis of the causes of readmissions or adverse events surrounding hospital discharge;
 - Implement interventions to address these causes;
 - Measure results and create a sustainable approach to maintain gains.

Questions about the Partnership?

PartnershipforPatients@hhs.gov

The Community-based Care Transition Program

The Community-based Care Transitions Program (CCTP)

- The CCTP, mandated by section 3026 of the Affordable Care Act, provides funding to test models for improving care transitions for high risk Medicare beneficiaries.
- Part of Partnership for Patients
 - <http://www.healthcare.gov/center/programs/partnership/join/index.html>

Program Goals

- Improve transitions of beneficiaries from the inpatient hospital setting to home or other care settings
- Improve quality of care
- Reduce readmissions for high risk beneficiaries
- Document measureable savings to the Medicare program

Eligible Applicants

- Are statutorily defined as:
 - Acute Care Hospitals with high readmission rates in partnership with a community based organization
 - Community-based organizations (CBOs) that provide care transition services
- There must be a partnership between the acute care hospitals and the CBO

Definition of CBO

- Community-based organizations that provide care transition services across the continuum of care through arrangements with subsection (d) hospitals
 - Whose governing bodies include sufficient representation of multiple health care stakeholders, including consumers

Key Points

- CBOs will use care transition services to effectively manage transitions and report process and outcome measures on their results
- Applicants will not be compensated for services already required through the discharge planning process under the Social Security Act and stipulated in the CMS Conditions of Participation

Preferences

- Preference will be given to proposals that:
 - include participation in a program administered by the AoA to provide concurrent care transition interventions with multiple hospitals and practitioners
 - provide services to medically-underserved populations, small communities and rural areas

Considerations

- Applicants must address:
 - how they will align their care transition programs with care transition initiatives sponsored by other payers in their respective communities
 - how they will work with accountable care organizations and medical homes that develop in their communities

Additional Considerations

- Consideration will be given to hospitals whose 30-day readmission rate on at least two of the three hospital compare measures (Acute Myocardial Infarction [AMI], Heart Failure [HF], Pneumonia [PNEU]) falls in the fourth quartile for its state
 - You can find this data at:
http://www.cms.gov/DemoProjectsEvalRpts/downloads/CCTP_FourthQuartileHospbyState.pdf
- Applicants are required to complete a root cause analysis

Payment Methodology

- CBOs will be paid a per eligible discharge rate
- Rate is determined by:
 - the target population
 - the proposed intervention(s)
 - the anticipated patient volume
 - the expected reduction in readmissions (cost savings)

Performance Measurement

- Awardees will need to demonstrate reduced 30-day all-cause readmission rates
- Awardees will be required to attend up to 3 face-to-face learning collaboratives each year in Baltimore

Conclusion

- The program solicitation is now available on our program webpage at <http://www.cms.gov/DemoProjectsEvalRpts/MD/itemdetail.asp?itemID=CMS1239313>
- The program will run for 5 years with the possibility of expansion beyond 2015
- Please direct CCTP questions to CareTransitions@cms.hhs.gov

Next Training

- We will continue our webinar series in May with a focus on communities working on transitions from nursing facilities to home
 - Watch your email for date, time and registration information
