

IUID Registry

DISA DECC Transition

FAQ's

Migration FAQ's will be maintained on the IUID website Documents page at

<https://iuid.logisticsinformationservice.dla.mil/Documents.aspx>

New Website Links

Q: My bookmarks (links) aren't working. What are the new addresses for the Registry?

The new URL addresses for the Registry functions are:

To access the website:

<https://iuid.logisticsinformationservice.dla.mil/brs> (Production)

<https://practiceiuid.logisticsinformationservice.dla.mil/brs> (Practice)

To request new accounts:

<https://iuid.logisticsinformationservice.dla.mil/brs> (Production)

<https://practiceiuid.logisticsinformationservice.dla.mil/brs> (Practice)

New API Links

Q: My bookmarks (links) aren't working. What are the new addresses for the Registry? (cont'd)

To access the APIs:

General Purpose: <https://iuid.logisticsinformationservice.dla.mil/apis/ws/v2.0/generalapi/iuidapi.asmx>

Procurement: <https://iuid.logisticsinformationservice.dla.mil/apis/ws/v2.0/procurement/procurement.asmx>

Part Number: <https://iuid.logisticsinformationservice.dla.mil/apis/ws/v2.0/sretrieval/uiifrompn.asmx>

UII Retrieval: <https://iuid.logisticsinformationservice.dla.mil/apis/ws/v2.0/retrieval/retrieval.asmx>

UII Retrieval: <https://iuid.logisticsinformationservice.dla.mil/apis/ws/v2.0/retrieval/retrieval.asmx>

UII Validation: <https://iuid.logisticsinformationservice.dla.mil/apis/ws/v2.0/uiivalidation/uiivalidation.asmx>

UII Verification: <https://iuid.logisticsinformationservice.dla.mil/apis/ws/v2.0/uiiverification/uiiverification.asmx>

Warranty: <https://iuid.logisticsinformationservice.dla.mil/apis/ws/v2.0/warranty/warranty.asmx>

FAQ's

Q: Will there be any additional Authentication (ECA Certificate, DoD CAC, etc.) necessary to access the Registry?

The only difference with Authentication is Port 80 (non-secure) connections will no longer be supported for the IUID websites or API's. Users will have to enter HTTPS:// before the URL for a connection.

Q: What is SSL and how do I ensure I have what is required?

SSL stands for Secure Socket Layer. This means that as of Monday, 09-24-2012, Port 80 (non-secure) connections will no longer be supported for the IUID websites or API's. Users will have to enter HTTPS:// before the URL for a connection.

FAQ's

Q: The system isn't recognizing my login information. What is the contact for password resets? For disabled accounts?

During the Brownout / Blackout stages, you will not be able to get your account enabled / password reset if you lock yourself out during this period until Monday, 09-24-2012.

Contact iuid.accounts@dla.mil AFTER 8:00am Monday, 09-24-2012. Help Desk hours are 8:00 am – 4:30 pm (ESD).

FAQ's

Q: Will my current password still work once migrated?

Yes. Once your account is migrated you will continue to use the same user id and password. If you update your profile or change your password after September 14, you will need to re-enter the change after September 24.

Q: Do I need to apply for a new account / will my user id or password change?

There is no action required on your part, the user account information will automatically be migrated. If you do experience any difficulties with your username or password, contact iuid.accounts@dla.mil for assistance. After Monday, 09-24-2012, new accounts and user profiles can be accessed through <https://iuid.logisticsinformationservice.dla.mil/brs>.

FAQ's

Q: Does this migration involve any changes in Registry functionality?

No. The Registry will function the same way in the new environment as it did on the BPN network.

Q: Can I still submit changes and deletions to the registry?

Processing of IUID Registry Help Desk corrections requests will be temporarily suspended beginning COB on Friday, 09-14-2012. Any requests received after that date will be held for processing once the IUID Registry begins operations on the DECC sometime after Monday, 09-24-2012. Completion of requests received prior to Friday, 09-14-2012 will be subject to the DECC migration schedule and is not guaranteed.

FAQ's

Q: How will this migration affect the information I enter into Wide Area Workflow (WAWF)?

There is no direct impact on WAWF. WAWF will continue to send the UII information to GEX, which then sends the information to the Registry. You will not have to do anything on your end. During the Black Out period, your data will queue at GEX and once the Registry is back up your data will process. You will not be able to query the Registry to verify your UII information until after the data is processed and the Registry is in a functional state.

Q: Will I need to re-submit any data because of the brownout?

No. All submissions made via XML or WAWF were transferred to the new environment on the DECC. If you do notice any problems with your data, please contact the IUID Help Desk (iuid.helpdesk@dla.mil) for assistance.

FAQ's

Q: Will this new process change the way I load files in to the Registry? Flat Files via GEX. Will I need to re-register for my controlled account to the Registry?

No. Your GEX channel stays the same between you and GEX. GEX will direct the files to the new directories for the IUID Registry. Any files submitted during the Black Out period queue at GEX until the Registry is live again, then it will process.

No. Your user id and password will migrate with the Registry.

FAQ's

Q: Will this affect the transmissions of files via GEX?

There will be no affect on files transmitted via GEX. During the Black Out period, your XML files will queue at GEX and once the Registry is back up your files will process. You will not be able to query the Registry to verify your UII information until after the files are processed. You will not be able to query the Registry to verify your UII information until after the data is processed and the Registry is in a functional state.

Q: Will the same GEX connections we use today still be operational?

Your GEX channel stays the same between you and GEX. GEX will direct the files to the new directories for the IUID Registry. Any files submitted during the blackout will queue at GEX until the Registry is live again on the DECC, then process.

FAQ's

Q: When will the Practice Site be available?

The Practice Registry is expected to follow the timeline for the Production Registry, operation as of Monday, 09-24-2012.
