NATIONAL MARINE  
SANCTUARIES

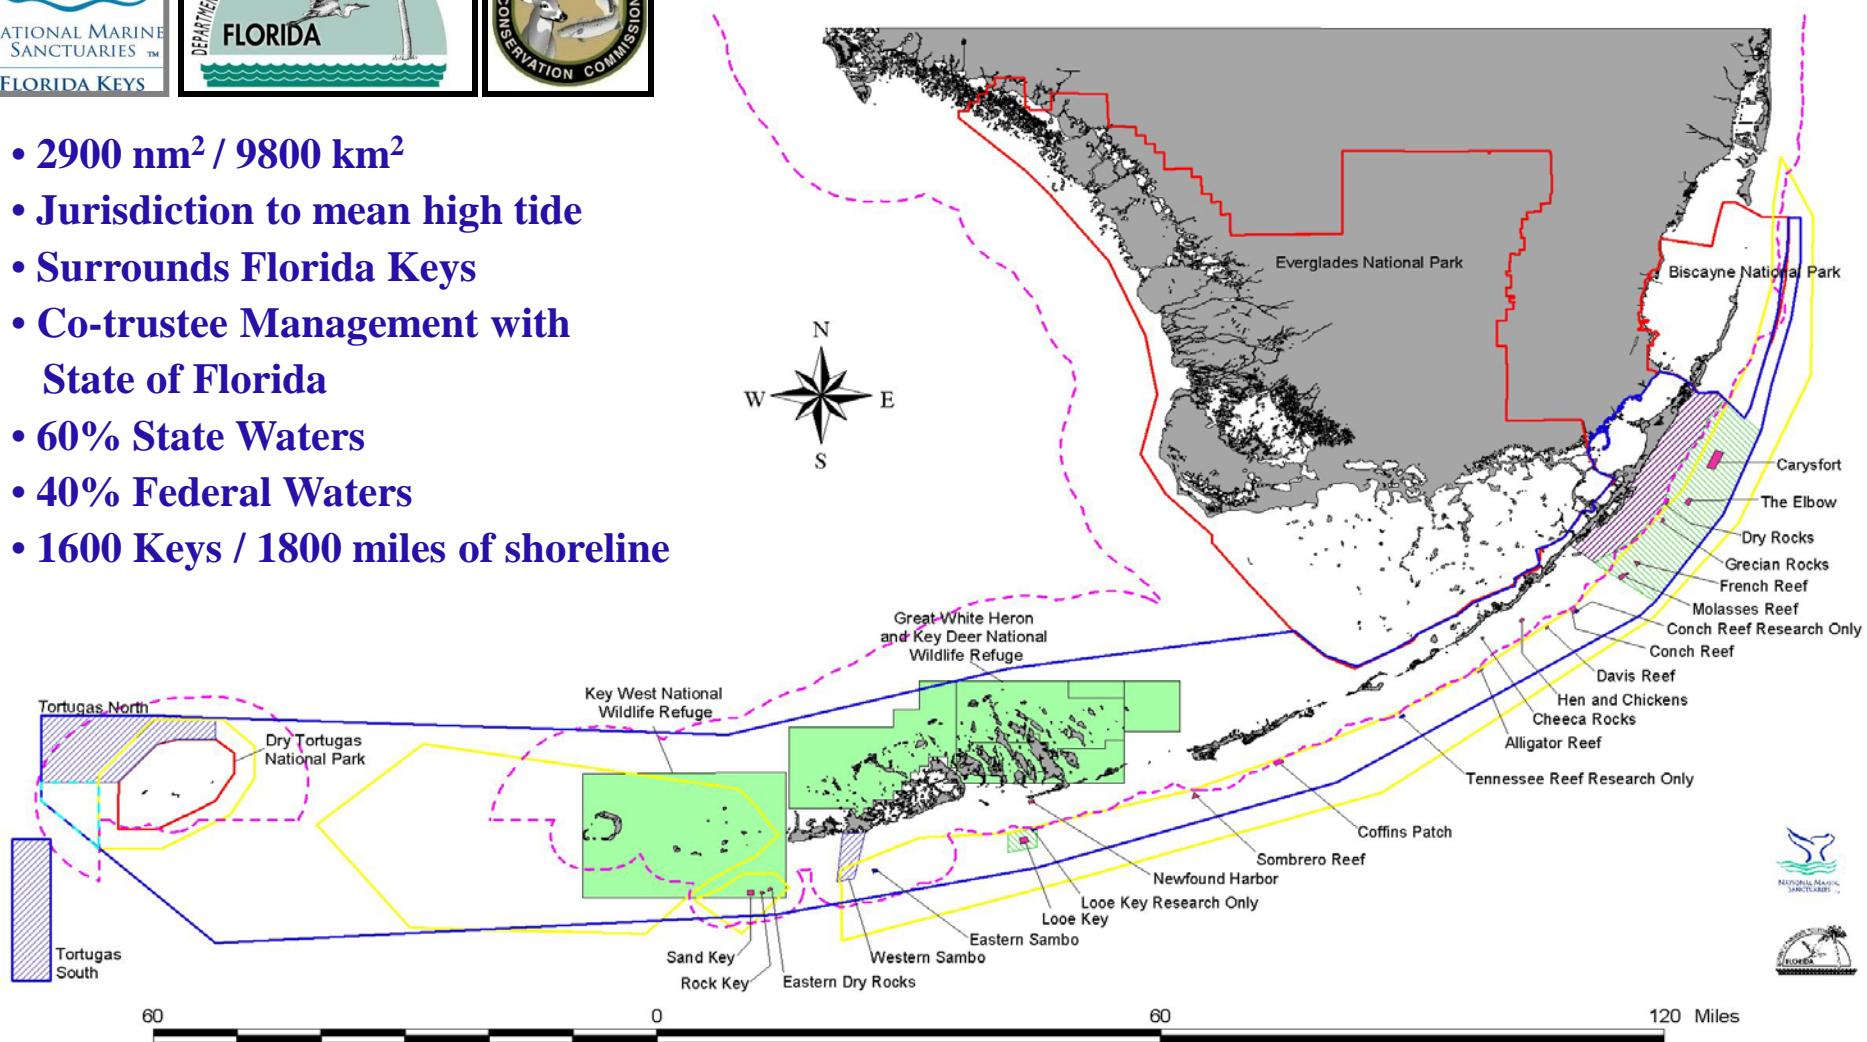

**Billy D. Causey, Ph.D.  
Southeast Regional Director  
Office of National Marine Sanctuaries  
San Juan, Puerto Rico  
November 3, 2009**

# Florida Keys National Marine Sanctuary

- 2900 nm<sup>2</sup> / 9800 km<sup>2</sup>
- Jurisdiction to mean high tide
- Surrounds Florida Keys
- Co-trustee Management with State of Florida
- 60% State Waters
- 40% Federal Waters
- 1600 Keys / 1800 miles of shoreline

# Threats to Coral Reefs

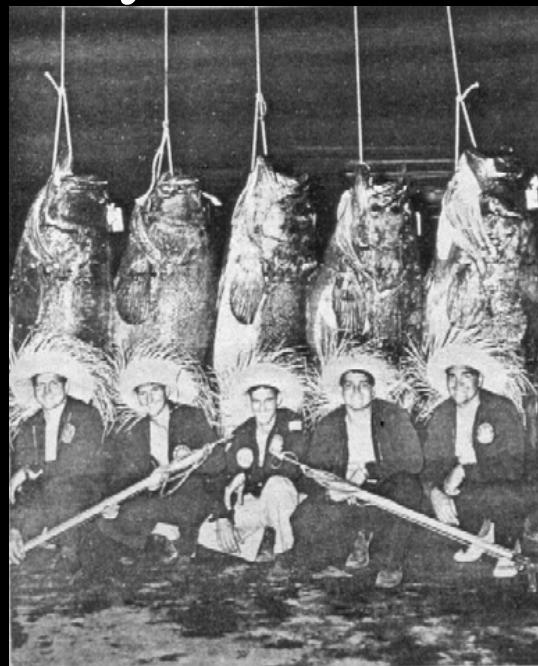

- Climate Change
- Land-based Sources of Pollution
- Habitat Loss and Destruction
- Overfishing

# Threats to Coral Reefs

# Overfishing Can be Managed At Local Levels

# What the Florida Keys reef fishery used to be?

An "average day"  
of fishing in the  
Florida Keys in  
the 1930s-1950s.

Ault *et al.*, 2008

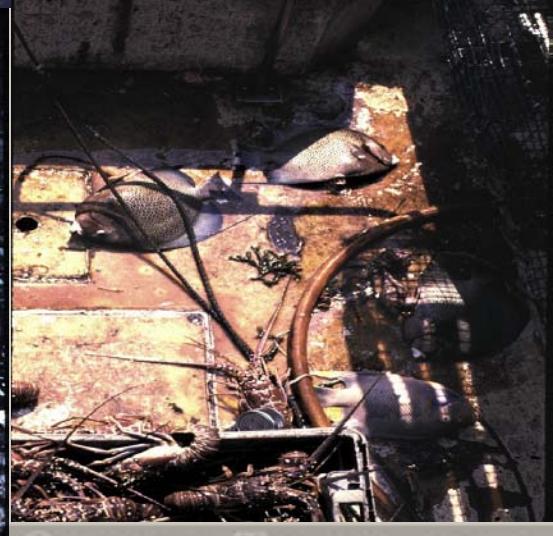

# Commercial Fishing

Commercial lobster vessel cited for possession  
of egg bearing and undersize spiny lobster

# Recreational Fishing

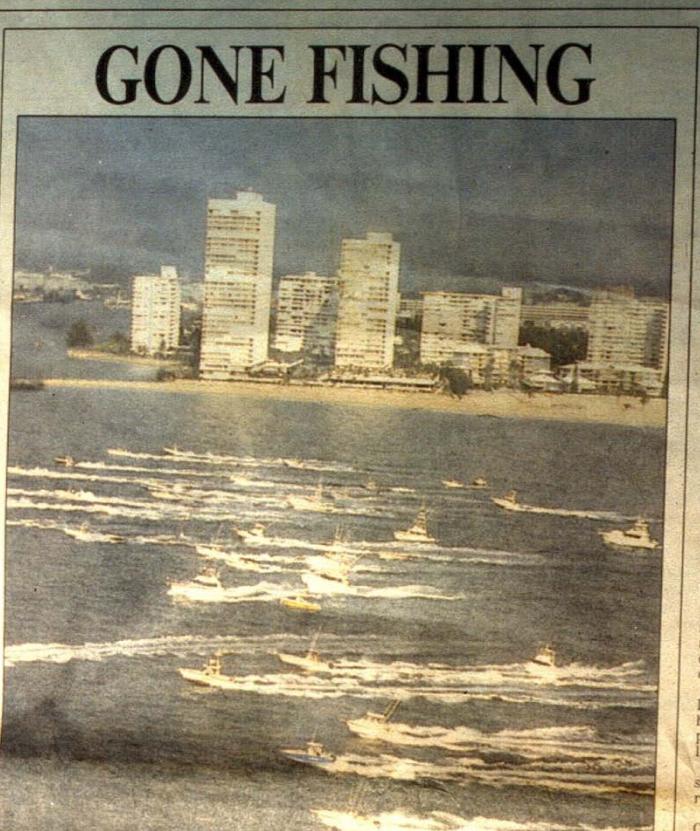

National Marine Sanctuaries • America's Ocean Treasures

# Southeast Florida Regional Reef Fish Landings Composition

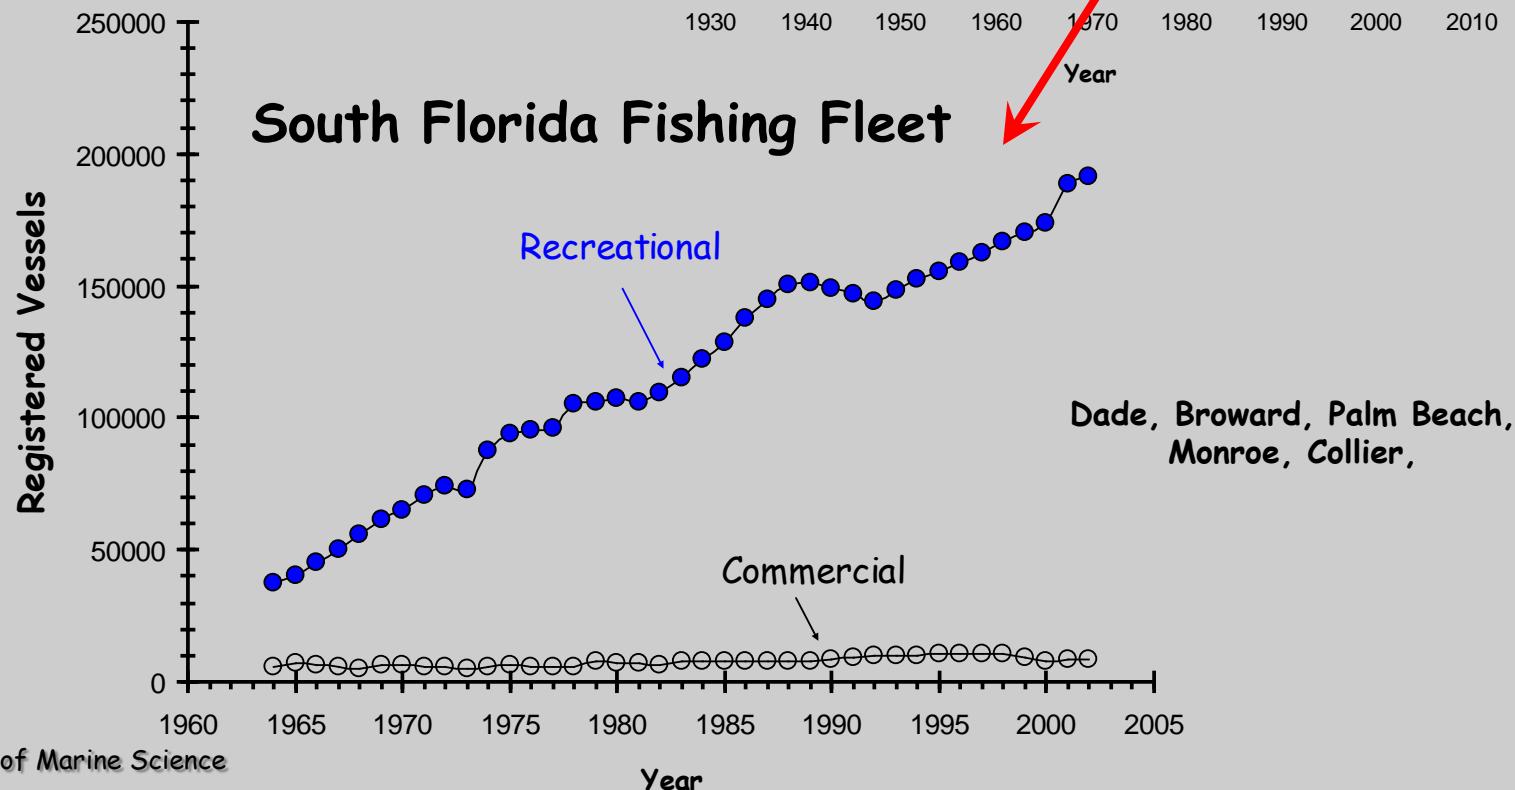

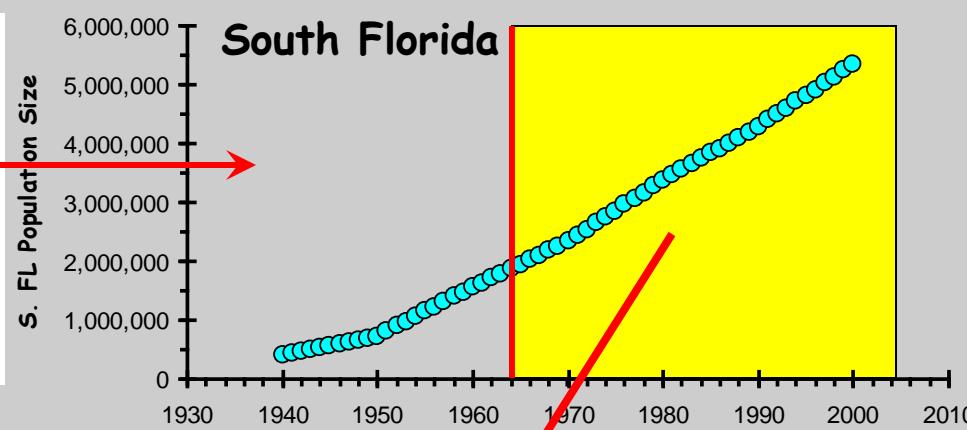

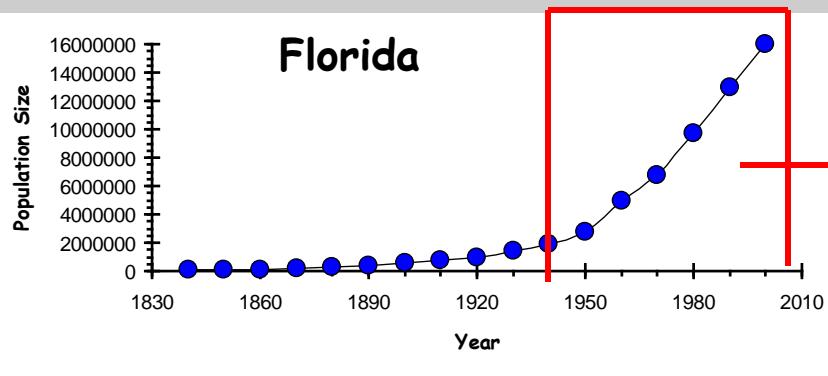

## Reef Fish Landings

|             |                     |
|-------------|---------------------|
| <b>68%</b>  | <b>Recreational</b> |
| <b>5%</b>   | <b>Headboat</b>     |
| <b>27%</b>  | <b>Commercial</b>   |
| <b>100%</b> | <b>Total</b>        |

## Marine Zones

- Sanctuary Preservation Areas
- Special-Use Areas
- Ecological Reserves
- Wildlife Management Areas
- Existing Management Areas

# FKNMS Marine Zoning Plan

- **18 Sanctuary Preservation Areas**
- **4 Research-Only Areas**
- **2 Ecological Reserves  
(1997 and 2001)**

- **27 Wildlife Management Areas**
- **19 Existing Management Areas**

# Ecological Reserves

- 2 Areas - 9 snm and 151 snm
- Areas of high habitat and species diversity
- Representative Keys marine ecosystem
- Generally good water quality
- Encompass large enough areas to include a range of habitats
- Provide natural spawning, nursery, and permanent residence areas for the replenishment and genetic protection of marine life
- Protect and preserve all habitats and species particularly those not protected by fishery management regulations.

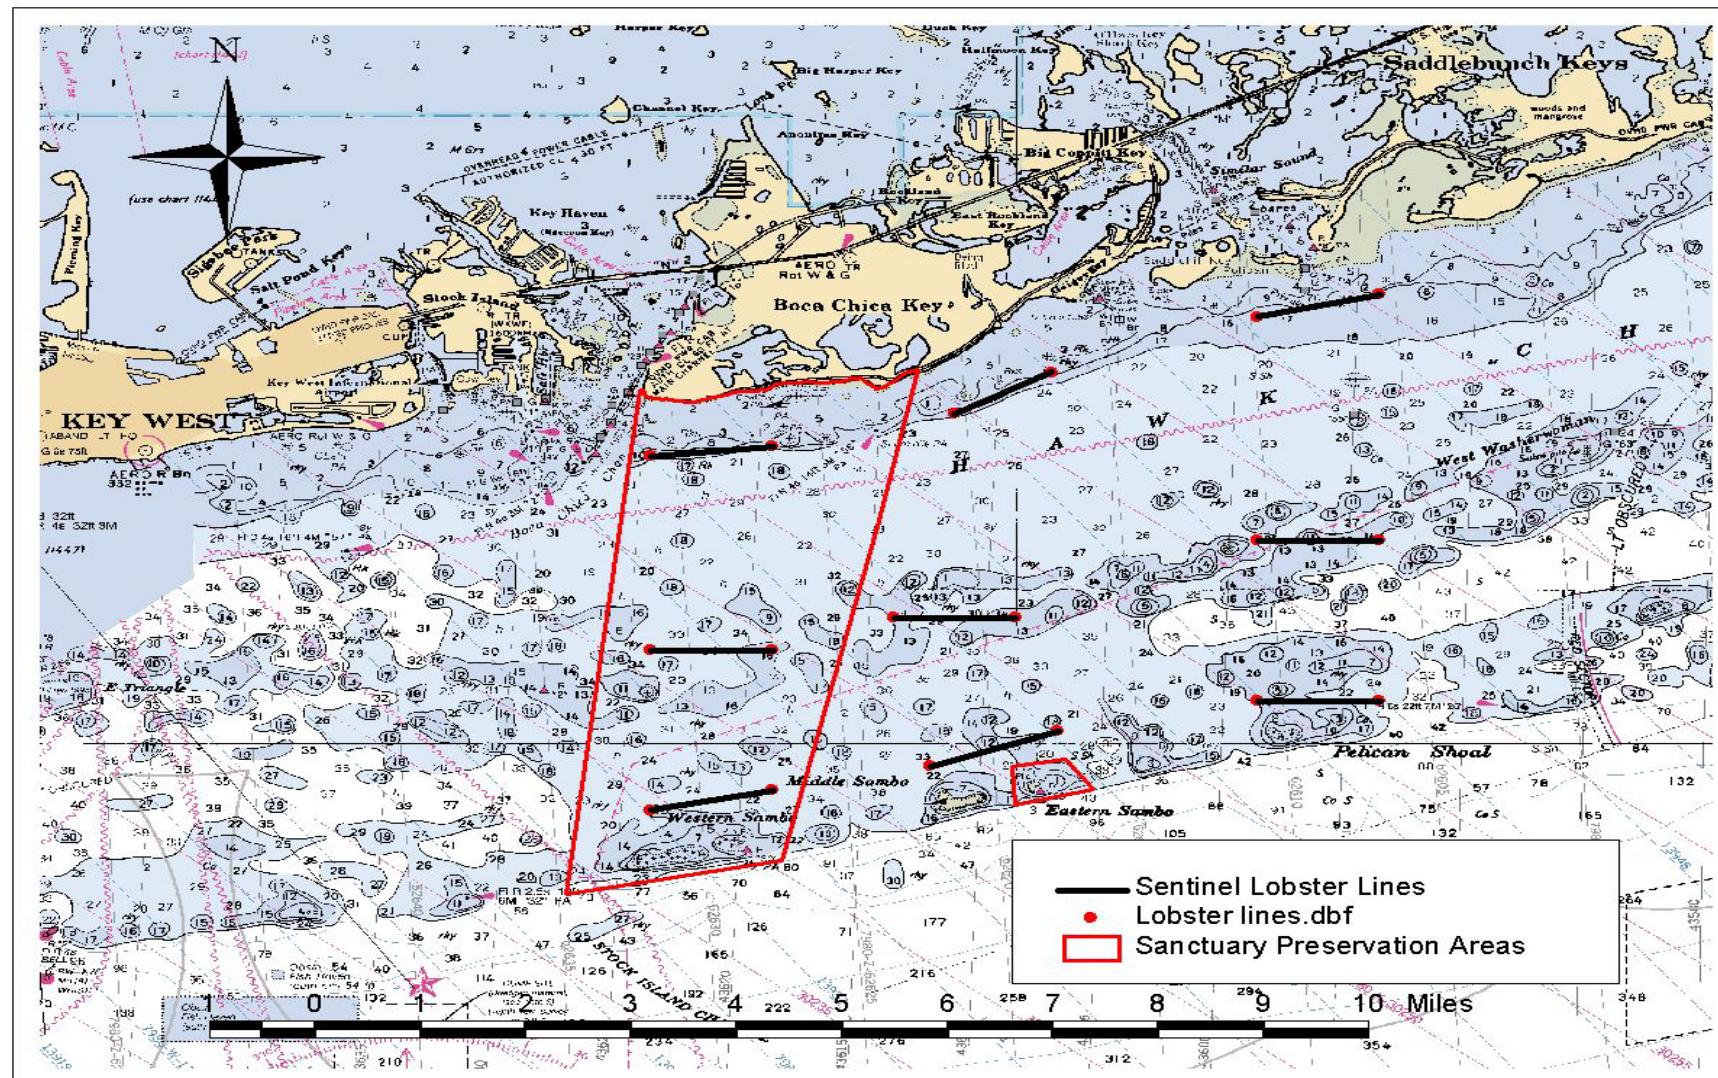

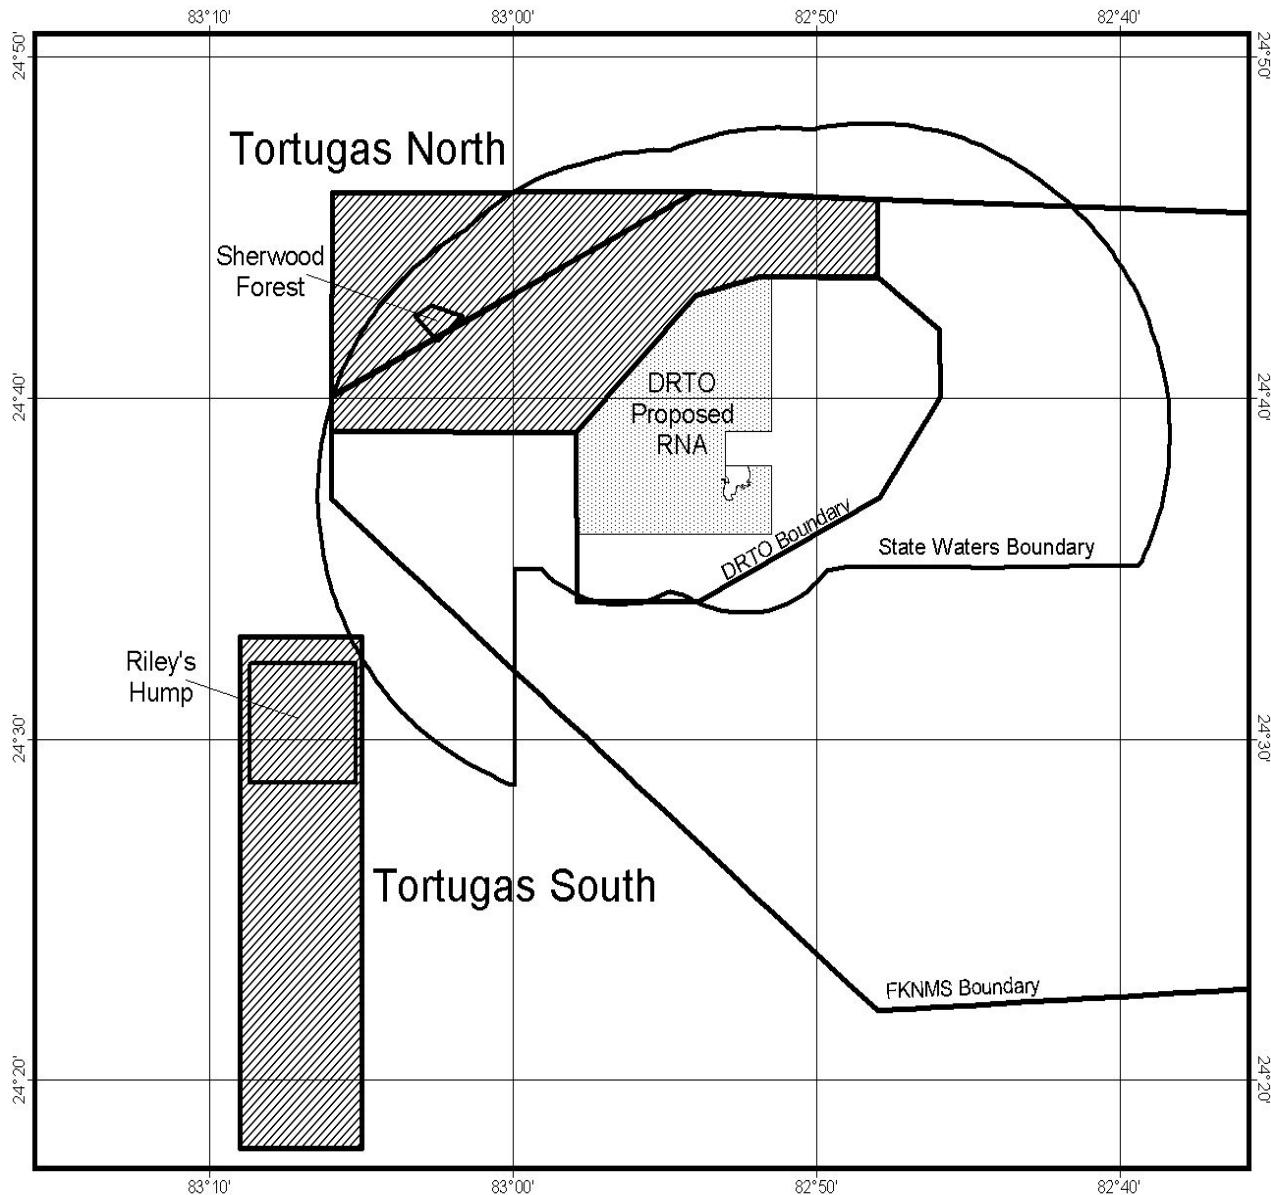

# Ecological Reserves

## Western Sambo Ecological Reserve - 9 snm

# Tortugas Ecological Reserve

**Implemented**

**July 1, 2001**

**518 sq k**

**151 sq mi**

## **7 Separate Jurisdictions**

- **South Atlantic FMC**
- **Gulf of Mexico FMC**
- **Highly Migratory FM**
- **Nat'l Park Service**
- **Nat'l Marine Sanctuary**
- **State of Florida – FWC**
- **State – Gov & Cabinet**

**Dry Tortugas NP**

**March 2008**

Fork Length (cm)

A vibrant underwater photograph of a coral reef. In the foreground, large, textured barrel sponges in shades of orange and yellow are nestled among dark, craggy rock. Behind them, several bright green, fan-like sea fans extend upwards. The background is a deep blue, filled with schools of small, silvery fish swimming in various directions.

2007-2008 Annual Report

## Measuring impacts of the Tortugas North Ecological Reserve:

A comparative analysis of differing levels of protection on coral reef and adjacent ecosystems of the Tortugas Banks, FL

### Principal Investigators:

John Selden Burke, [john.burke@noaa.gov](mailto:john.burke@noaa.gov)  
Shay Viehman, [shay.viehman@noaa.gov](mailto:shay.viehman@noaa.gov)  
Gregory A. Piniak, [greg.piniak@noaa.gov](mailto:greg.piniak@noaa.gov)  
J. Christopher Taylor, [chris.taylor@noaa.gov](mailto:chris.taylor@noaa.gov)

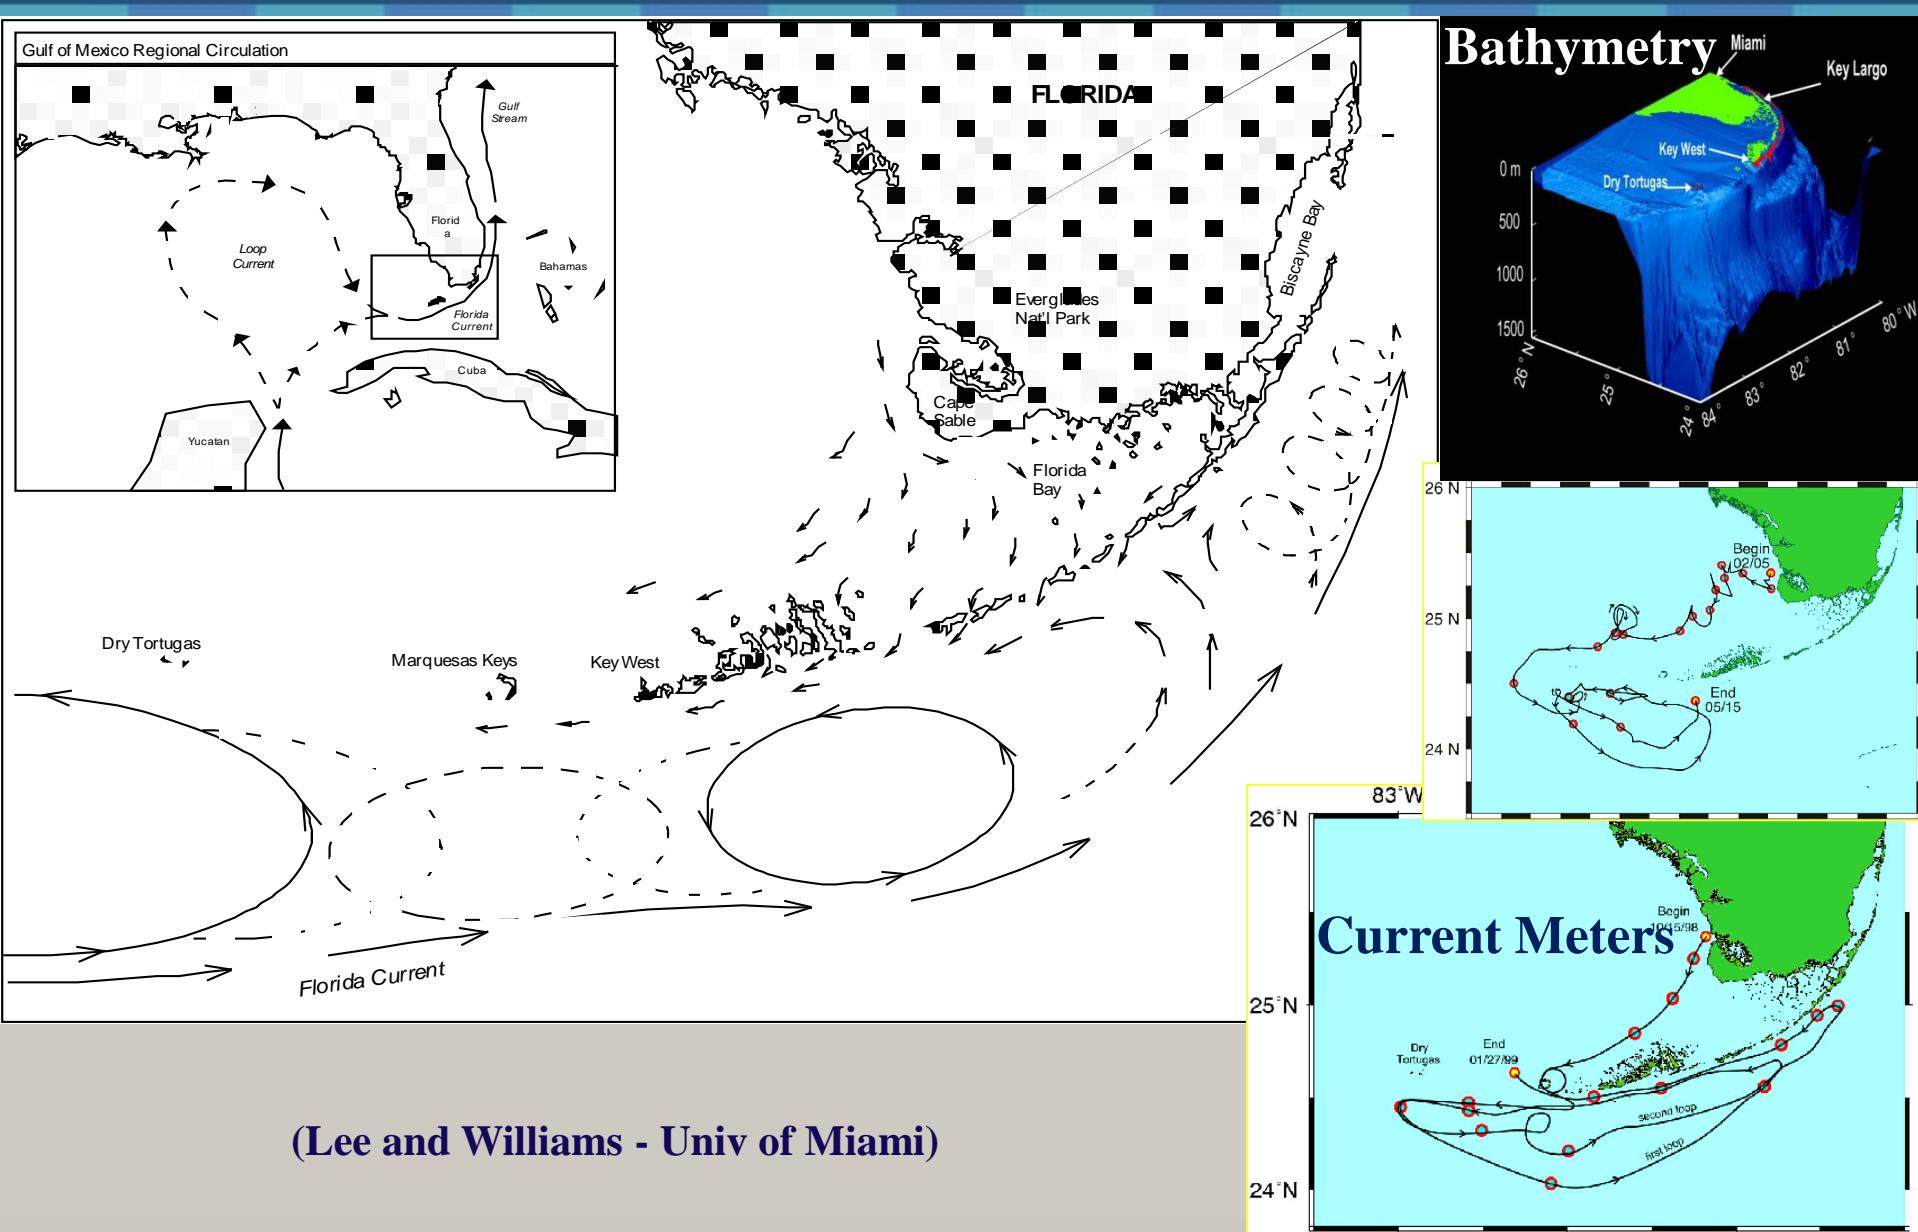

## Findings:

- Significant changes have occurred in the reef fish community following the establishment of the TNER
- Increase in abundance of large fishes
- A general decline in abundance of small fishes was evident
- These opposing trends suggest that mortality rates of prey species increased due to the observed increases in predator abundance
- These observed trends provide strong correlative evidence of a reserve effect and suggest that the TNER has achieved an important initial objective
- To reverse the decline of commercially exploited fish stocks around the Tortugas
