## **Notes on the inventory:**

-Below is a table of contents for each NHL file. All materials in the files have either been scanned or have been accounted for in the inventory. There are some NHLs that have their file contents listed here but were not scanned. These NHLs are noted by the file name.

-Items not scanned include USGS or other oversize maps, long documents such as technical reports, some newspaper articles, visitor pamphlets or booklets, postcards, and duplicates of correspondence.

-Citations have been recorded for articles as accurately as possible. In some cases there is no date or newspaper title.

-It is possible that an NHL file does not have a nomination form. It is also the case that older NHLs might not have a nomination form at all, though some type of early survey form is present.
