My Dashboard	My Dashboard	Standard Blue Background
There are many features of the homepage or "Dashboard" that allows for a broad view of "alert messages," "tasks," "smart links" with FSIS directives and notices...		
as well as specific details on establishments in a particular assignment...		
including things like its operating schedule.		
The Navigation Panel	The Navigation Panel	Standard Blue Background
From the navigation panel on the left of the screen, information on the establishment is readily available		

including detailed slaughter information, waivers and letters,		
and equipment.		
HACCP Processing	HACCP Processing	Standard Blue Background
From the HACCP processing page, information can be documented about an establishment's HACCP system.		
This includes viewing the different HACCP categories for the establishment and adding new HACCP information as it arises.		
Working with Hazard Analysis	Working with Hazard Analysis	Standard Blue Background
The hazard analysis screens allow for editing the analysis...		
by adding and viewing hazards – biological, chemical or physical – that are associated with each processing step,		
as well as the control method or intervention for that identified hazard.		
Documenting Noncompliance	Documenting Noncompliance	Standard Blue Background
PHIS also allows for documentation of any noncompliances that were identified during verification activities.	PHIS also allows for documentation of any noncompliances that were identified during verification activities.	Standard Blue Background

<p>From the noncompliance screen, select from a list of regulations that correspond to the processing step or critical control point that was verified.</p>		
<p>This screen will also allow FSIS employees to create a noncompliance record.</p>		
<p>With PHIS, FSIS employees will be able to view and update information quickly, all within a few clicks. This valuable tool will help FSIS employees save lives and protect public health.</p>	<p>With PHIS, FSIS employees will be able to view and update information quickly, all within a few clicks.
