## NRC ASSIGNS NEW RESIDENT INSPECTOR TO SEABROOK NUCLEAR PLANT

Nuclear Regulatory Commission officials in the Region I Office in King of Prussia, Pa., have selected Matthew Jennerich as the Resident Inspector for Seabrook Station in Seabrook, N.H. He joins Senior Resident Inspector Bill Raymond at the single unit site, operated by NextEra Energy Seabrook, LLC.

Jennerich served in the United States Navy for 7 years as a submarine officer and is currently in the Naval Reserves, supporting the U.S. submarine fleet. He earned a bachelor's degree in mechanical engineering from the University of Kansas and a master's degree in engineering management from Old Dominion University.

Jennerich joined the NRC in September 2010 and completed a rigorous NRC inspector qualification program the following year. Most recently, he was a project engineer in the Region I Division of Reactor Projects.

“Matt Jennerich has the training and commitment to safety that will help the NRC carry out its mission of protecting people and the environment, and ensure NextEra continues to safely operate Seabrook Station,” said NRC Region I Administrator Bill Dean.

Each U.S. commercial nuclear power plant site has at least two NRC Resident Inspectors. They serve as the agency's eyes and ears at the facility, conducting regular inspections, monitoring significant work projects, and interacting with plant workers and the public. Resident inspectors can serve for up to 7 years at any one site.

The Seabrook Resident Inspectors can be reached at 603-474-3589.
