The Year in Trade 2008 Operation of the Trade Agreements Program

60th Report

Publication 4091

July 2009

This report was principally prepared by:

The Office of Economics

Joanne Guth, *Project Leader*
Nick Grossman, *Deputy Project Leader*

Nannette Christ, Justino De La Cruz,
William Greene, Alexander Hammer, Aimee Larson, Walker Pollard,
James Stamps, and Edward C. Wilson

Office of the General Counsel
William W. Gearhart

Office of Tariff Affairs and Trade Agreements
Naomi Freeman and Dan Shepherdson

Office of Investigations
Mary Messer and Andy Rylyk

Office of Unfair Import Investigations
T. Spence Chubb

Office of Industries
Samantha Brady, Dawn Heuschel,
Laura Rodriguez, and Donald Sussman

Office of Information Technology Systems
Barbara V. Bobbitt

Supporting assistance was provided by:
Terri L. Anderson

Interns:
Natalia Buniewicz and Andrew Martinez

Office of Publishing

Under the direction of
Arona Butcher, Chief
Country and Regional Analysis Division

PREFACE

This report is the 60th in a series of annual reports submitted to the U.S. Congress under section 163(c) of the Trade Act of 1974 (19 U.S.C. 2213(c)) and its predecessor legislation. Section 163(c) of the Trade Act of 1974 states that “the International Trade Commission shall submit to the Congress at least once a year, a factual report on the operation of the trade agreements program.”

This report is one of the principal means by which the U.S. International Trade Commission provides Congress with factual information on trade policy and its administration for calendar year 2008. The trade agreements program includes “all activities consisting of, or related to, the administration of international agreements which primarily concern trade and which are concluded pursuant to the authority vested in the President by the Constitution” and congressional legislation.

TABLE OF CONTENTS

Preface	iii
Abbreviations and Acronyms	xi
Executive Summary	xv
Chapter 1. Overview of U.S. Trade	1-1
Scope and approach of the report	1-1
Overview of the U.S. economy in 2008	1-1
Exchange rate trends	1-3
Balance of payments	1-4
Trade in goods and services	1-5
U.S. trade in goods in 2008	1-6
U.S. merchandise trade by product category	1-7
Exports	1-7
Imports	1-8
U.S. merchandise trade with leading partners	1-8
U.S. trade in services in 2008	1-10
U.S. services trade by product category	1-11
Exports	1-11
Imports	1-12
U.S. services trade with leading partners	1-13
Chapter 2. Administration of U.S. Trade Laws and Regulations	2-1
Import relief laws	2-1
Safeguard actions	2-1
Trade adjustment assistance	2-1
Assistance for workers	2-2
Assistance for farmers	2-3
Assistance for firms	2-4
Laws against unfair trade practices	2-4
Section 301 investigations	2-4
Active section 301 case in 2008	2-5
Special 301	2-5
Antidumping and countervailing duty investigations and reviews	2-7
Antidumping investigations	2-7
Countervailing duty investigations	2-8
Reviews of outstanding antidumping and countervailing duty orders/suspension agreements	2-9
Section 337 investigations	2-10

EXECUTIVE SUMMARY

The expansion of the U.S. economy that began in November 2001 slowed notably in 2008, particularly in the second half of the year as financial market instability deepened, credit tightened, and asset values declined at an accelerating pace. Slower growth in both the U.S. and world economies contributed to the decline in both U.S. exports and imports in the fourth quarter of 2008. For the year as a whole, the U.S. trade deficit for goods and services decreased for a second consecutive year as the surplus in services grew more than the deficit in goods (figure ES.1). There was a small increase in the merchandise trade deficit from 2007 to 2008 (\$819.4 billion in 2007 to \$820.8 billion in 2008) as the increase in U.S. imports exceeded the increase in U.S. exports; the deficit increased slightly even though U.S. exports grew more rapidly than U.S. imports (12 percent for exports versus 7 percent for imports) for the third year in a row. Increases in U.S. exports of oil and other mineral fuels, lubricants, and related materials; chemicals and related products; food and live animals; machinery and transport equipment; and crude materials (except fuels) represented about 80 percent of the total increase in exports in 2008, while increases in U.S. imports of oil and other mineral fuels, lubricants, and related materials, and chemicals and related products represented most of the increase in imports for the same year. Much of the growth in the value of U.S. exports and imports of oil and other mineral fuels, lubricants, and related products was due to the substantial increase in the

FIGURE ES.1 U.S. trade balance in goods and services, 1986-2008

Source: U.S. Department of Commerce.

price of petroleum products from 2007 to 2008. U.S. imports of machinery and transport equipment decreased substantially (\$20.8 billion) in 2008. The U.S. surplus in services trade increased by \$20.6 billion to \$139.7 billion in 2008.

In 2008, the U.S. dollar appreciated approximately 9 percent, on a trade-weighted average basis, against a group of major currencies including the Canadian dollar, the euro, the Japanese yen, and the Chinese yuan. This reflects a sharp reversal in the value of the U.S. dollar, which continued to fall through the second and third quarters before appreciating substantially during the fourth quarter of the year. By year-end the largest appreciation was against the British pound, the Mexican peso, and the currency of the United States' largest trading partner, Canada. In contrast, the U.S. dollar depreciated against the Japanese yen and the Chinese yuan.

A summary of U.S. trade agreement activities in 2008 is presented below, followed by a table summarizing key developments on a monthly basis for the year. Trade agreement activities during 2008 included the administration of U.S. trade laws and regulations; U.S. participation in the World Trade Organization (WTO), the Organization for Economic Cooperation and Development (OECD), and the Asia-Pacific Economic Cooperation (APEC) forum; U.S. negotiation of and participation in free trade agreements (FTAs); and bilateral developments with major trading partners.

Key Trade Developments in 2008

Administration of U.S. Trade Laws and Regulations

Section 301: There was one active case under section 301 in 2008. This case concerned the European Union's (EU) meat hormone directive. A WTO panel issued a report on the matter in March 2008, and the panel report was appealed to the Appellate Body, which issued its report in October 2008. The Appellate Body was unable to determine whether the EU's modified hormone regime was WTO-consistent, but confirmed that the original authorization to impose additional duties was still valid. In May 2009, the United States and EU signed a Memorandum of Understanding to settle the dispute.

Special 301: The USTR's 2008 special 301 report identified nine countries on the priority watch list and highlighted weak intellectual property rights (IPR) protection and enforcement in China and Russia, both of which were maintained on the priority watch list. In addition, Argentina, Chile, India, Israel, Thailand, and Venezuela were maintained on the priority watch list due to significant concerns regarding IPR protection. Pakistan was elevated to the priority watch list from the watch list because Pakistan failed to make progress in enacting legislation to provide more effective protection for patented pharmaceuticals. Thirty-six countries were placed on the watch list, including Egypt, Lebanon, Turkey, and Ukraine, which were downgraded from the priority watch list, and Algeria, Greece, Norway, and Spain, which were added to the watch list. Belize and Lithuania were removed from the watch list due to improved IPR enforcement.

Antidumping investigations: The Commission instituted 13 new antidumping investigations and completed 32 during 2008. Antidumping duty orders were issued by the U.S. Department of Commerce (Commerce) in 2008 in 23 of those completed investigations.

Countervailing duty investigations: The Commission instituted six new countervailing duty investigations and completed seven investigations during 2008. Countervailing duty orders were issued by Commerce in 2008 in all seven completed investigations.

Sunset reviews: During 2008, Commerce and the Commission instituted 26 sunset reviews of existing antidumping and countervailing duty orders and suspension agreements and the Commission completed 25 reviews, resulting in 16 antidumping and countervailing duty orders and suspension agreements being continued for five additional years.

Section 337 investigations: During 2008, there were 89 active section 337 investigations and ancillary proceedings, 47 of which were instituted in 2008. Of these 47, there were 41 new section 337 investigations and 6 new ancillary proceedings relating to previously concluded investigations. Approximately one-third of the active investigations in 2008 concerned products in the semiconductor, telecommunications, computer, and consumer electronics fields. At the close of 2008, 52 section 337 investigations and related proceedings were pending.

Trade adjustment assistance (TAA): In 2008, the U.S. Department of Labor instituted investigations in response to 2,129 petitions for TAA that it received during 2008. A total of 1,469 petitions were certified as eligible for the affected workers to apply for TAA benefits and services, and 464 petitions were denied.

Trade Preference Programs

Generalized System of Preferences (GSP): Duty-free U.S. imports entered under the GSP program totaled \$31.7 billion in 2008. Angola was the leading GSP beneficiary in 2008, followed by India, Thailand, Equatorial Guinea, Brazil, and Indonesia. During 2008, Solomon Islands was designated a least-developed GSP beneficiary (Solomon Islands was already a GSP beneficiary), and Kosovo and Azerbaijan were designated GSP beneficiaries. Trinidad and Tobago was graduated from the GSP program effective January 1, 2010, for reaching high income. Authorization for the GSP program is currently set to expire on December 31, 2009.

African Growth and Opportunity Act (AGOA): A total of 41 sub-Saharan African (SSA) countries were designated for benefits under AGOA during 2008, and 27 SSA countries were eligible for AGOA textile and apparel benefits. Duty-free U.S. imports under AGOA, including GSP, were valued at \$66.3 billion in 2008. U.S. imports under AGOA, exclusive of GSP, were valued at \$56.4 billion in 2008, a 33.4 percent increase from 2007. The increase in imports under AGOA was driven mainly by increases in the value of U.S. imports of petroleum-related products, which made up more than 93 percent of imports under AGOA in 2008.

Andean Trade Preference Act (ATPA): ATPA, as amended by the Andean Trade Promotion and Drug Eradication Act (ATPDEA), provides duty-free treatment for certain products of Bolivia, Colombia, Ecuador, and Peru. U.S. imports under ATPA were valued at \$17.2 billion in 2008, up 40.1 percent from \$12.3 billion in 2007. U.S. imports under ATPA increased from all of the beneficiary countries except Bolivia in 2008. The increase in imports under ATPA was driven primarily by increases in the value of petroleum-related imports, which accounted for 77 percent of imports under ATPA in 2008. Other leading imports under ATPA in 2008 included apparel, copper cathodes, fresh cut flowers, and asparagus. On October 16, 2008, ATPA was extended until

December 31, 2009, for Colombia and Peru, and until June 30, 2009, for Bolivia and Ecuador, with provisions for reviews of their eligibility under ATPA requirements. Effective December 15, 2008, President Bush suspended Bolivia from eligibility for failing to meet ATPA's counternarcotics cooperation criteria.

Caribbean Basin Economic Recovery Act (CBERA): CBERA, as amended by the Caribbean Basin Trade Partnership Act (CBTPA), provides duty-free and reduced-duty treatment for certain products of designated Caribbean Basin countries. In 2008, articles from 19 countries and territories were eligible for CBERA preferences. U.S. imports under CBERA were valued at \$4.7 billion in 2008, a 14.0 percent decline from \$5.5 billion in 2007. The decline in U.S. imports under CBERA was due primarily to the fact that the Dominican Republic was a CBERA beneficiary for only part of 2007 before the United States-Dominican Republic-Central America Free Trade Agreement (U.S.-CAFTA-DR) entered into force for that country. Trinidad and Tobago was the leading supplier of U.S. imports under CBERA in 2008. Methanol, mineral fuels, fuel-grade ethanol, and apparel products ranked as the leading U.S. imports under CBERA in 2008. In May, special preferences for imports from Haiti were extended through September 30, 2018, in amendments to CBERA under the Haitian Hemispheric Opportunity through Partnership Encouragement Act of 2008 (HOPE II Act). Also in May, the CBTPA provisions of CBERA were extended through September 30, 2010.

WTO and OECD

WTO developments: The Doha Development Agenda of multilateral trade negotiations resumed in February 2008 after the negotiating texts for the Agriculture Negotiating Group and the Non-Agricultural Market Access Group were revised. However, the talks reached an impasse on July 29, 2008. The WTO Director-General announced that fundamental differences between parties had not been overcome, citing in particular a lack of convergence regarding the selective safeguard mechanism in the agriculture negotiations. The WTO announced in July 2008 the first Executive Director of the Enhanced Integrated Framework, an initiative by six multilateral economic and financial institutions—including the WTO—to help least-developed country governments better integrate trade-related technical assistance into their overall national development strategies. Ukraine and Cape Verde acceded to the WTO in 2008 as the 152nd and 153rd WTO members, respectively.

WTO dispute settlement: During 2008, WTO members filed 19 new requests for WTO dispute settlement consultations, compared to 13 in 2007, 22 in 2006, and 12 in 2005. The United States filed 3 of the 19 requests, with two directed against China and one against the EU. Six requests for consultations were filed against the United States. Five new dispute settlement panels were established in 2008, compared to 14 in 2007, 14 in 2006, and 7 in 2005. One of the five panels was established in 2008 at the request of the United States to examine EU tariff treatment of certain information technology products. Two panels were established at the request of Japan and Chinese Taipei to examine the same EU matter. The remaining two panels were established at the request of New Zealand to examine Australia's import measures on apples from New Zealand and at the request of the Philippines to examine Thailand's customs and fiscal measures on cigarettes from the Philippines.

OECD developments: The OECD Trade Committee held discussions focused on systemic policy issues relating to trade agreements and nontariff measures. The committee continued its Global Forum on Trade, bringing together public and private groups on particular trade topics, and considered inviting certain nonmember governments as ad hoc observers to the OECD as part of its outreach program. The committee also reviewed Aid for Trade issues, and selected trade issues concerning the trade policy of Brazil (a non-OECD country).

FTA Developments During 2008

U.S. FTAs in force in 2008: The United States was a party to nine FTAs as of December 31, 2008. These included a multiparty agreement with the countries of Central America and the Dominican Republic (U.S.-CAFTA-DR), entered into force with respect to the Dominican Republic, El Salvador, Guatemala, Honduras, and Nicaragua (2006-07); the U.S.-Bahrain FTA (2006); the U.S.-Morocco FTA (2006); the U.S.-Australia FTA (2005); the U.S.-Chile FTA (2004); the U.S.-Singapore FTA (2004); the U.S.-Jordan FTA (2001); the North American Free Trade Agreement (NAFTA) (1994); and the U.S.-Israel FTA (1985).

FTA developments: In September 2008, the United States announced the launch of negotiations to join the Trans-Pacific Strategic Economic Partnership Agreement between Brunei Darussalam, Chile, New Zealand, and Singapore. In December 2008, the President issued proclamations implementing U.S.-CAFTA-DR for Costa Rica and the U.S.-Oman FTA effective January 1, 2009.

U.S. merchandise trade flows with FTA partners: In 2008, U.S. merchandise exports to FTA partners increased 8.0 percent to \$444.2 billion or 38 percent of total U.S. exports. U.S. imports of goods from FTA partners increased 4.7 percent to \$625.8 billion or 30 percent of total U.S. imports. The United States registered a merchandise trade deficit with its FTA partners of \$181.6 billion in 2008, including a record deficit with its NAFTA partners of \$197.2 billion. Excluding NAFTA, the United States registered a trade surplus with the rest of the FTA partners of \$15.6 billion, up from \$3.9 billion in 2007.

NAFTA developments: NAFTA entered into force on January 1, 1994, and the last of its trade provisions was fully implemented by January 1, 2008, with the exception of the NAFTA cross-border trucking provisions. In 2008, U.S. two-way merchandise trade (exports plus imports) with NAFTA partners totaled \$905.1 billion, a 5.8 percent increase over 2007.

NAFTA dispute settlement: Chapter 11 of NAFTA includes provisions designed to protect cross-border investors and facilitate the settlement of investment disputes. In 2008, there were five active chapter 11 cases—two cases against the United States by Canadian investors and three cases filed by U.S. investors against Mexico. Chapter 19 of NAFTA contains a mechanism that provides for review by a binational panel of antidumping and countervailing duty determinations under the law of the importing country. At the end of 2008, the NAFTA Secretariat listed 10 active binational panels under chapter 19. Of the four binational panels formed in 2008 under chapter 19, three challenged U.S. agencies' determinations on products from Mexico and one involved products from Canada.

Trade Activities with Major Trading Partners

European Union

The EU¹ as a unit was the largest two-way (exports and imports) U.S. merchandise trading partner in 2008. U.S. trade with the EU was valued at \$615 billion in 2008, accounting for 18.9 percent of U.S. merchandise trade with the world. U.S. exports to the EU amounted to \$251 billion and U.S. imports from the EU were \$364 billion, resulting in a U.S. merchandise trade deficit with the EU of \$112 billion in 2008. Leading U.S. exports included certain medicaments, petroleum products, aircraft and parts, blood fractions (e.g., antiserum), and passenger cars. Leading U.S. imports were certain medicaments, petroleum products, passenger cars, nucleic acids and their salts, and airplanes and parts. The EU was also the United States' largest trading partner in terms of services in 2008, accounting for 37.4 percent of U.S. services trade with the world. The United States registered a trade surplus in services of \$58.0 billion with the EU in 2008.

The Transatlantic Economic Council, established in 2007 to guide efforts to lower bilateral trade and investment barriers, addressed a number of topics in 2008, including regulatory cooperation, the EU chemicals regulation known as REACH (Registration, Evaluation and Authorization of Chemicals), and the EU ban on imports of U.S. poultry meat treated with pathogen reduction substances.

Canada

Canada was the largest single-country two-way U.S. merchandise trading partner in 2008. U.S. merchandise trade with Canada was valued at \$557 billion in 2008, accounting for 17.1 percent of total U.S. merchandise trade. U.S. exports to Canada were valued at \$222 billion and U.S. imports from Canada amounted to \$335 billion, resulting in a merchandise trade deficit of \$112 billion. Leading U.S. exports to Canada in 2008 included motor vehicles and related products as well as energy products, including petroleum, natural gas, and electricity. Leading U.S. imports included crude petroleum, natural gas, and passenger vehicles. The United States registered a trade surplus in services of \$22.7 billion with Canada in 2008.

Under dispute settlement procedures of the 2006 U.S.-Canada Softwood Lumber Agreement, the London Court of International Arbitration determined in March 2008 that Canada failed to properly adjust its export quota levels for softwood lumber in the first half of 2007, as the United States contended. In February 2009, the tribunal issued its determination concerning an appropriate remedy to correct the breach in the agreement. In January 2008, the United States requested a second arbitration tribunal to consider a U.S. challenge of several Canadian provincial programs concerning softwood lumber.

¹ The 27 members of the EU in 2008 were Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Romania, Slovak Republic, Slovenia, Spain, Sweden, and the United Kingdom.

China

In 2008, U.S. merchandise trade with China was valued at \$405 billion, accounting for approximately 12.4 percent of U.S. merchandise trade with the world. U.S. exports to China were valued at \$67.2 billion and U.S. imports from China amounted to \$338 billion, resulting in a merchandise trade deficit of \$270 billion. Leading U.S. exports in 2008 included soybeans, computer chips, passenger airplanes, and copper and aluminum waste and scrap. Leading U.S. imports from China in 2008 were computers and their parts, wireless telephones, toys, and video games and their parts. The United States registered a trade surplus in services of \$6.2 billion with China in 2008.

China's compliance with its WTO commitments remained a focus of U.S.-China trade relations in 2008. Notable areas of U.S. concern were China's IPR enforcement policies, textile and apparel trade, financial sector liberalization, product safety, and environmental sustainability. Also during 2008, U.S. and Chinese officials held bilateral discussions to address global trade imbalances and China's exchange rate policy.

Mexico

In 2008, U.S. merchandise trade with Mexico was valued at \$348 billion, accounting for approximately 10.7 percent of U.S. merchandise trade with the world. U.S. exports to Mexico were \$132 billion and U.S. imports from Mexico were \$216 billion, resulting in a merchandise trade deficit of \$84.8 billion. Leading U.S. exports to Mexico included refined petroleum products, motor vehicles and parts, corn, computer components, and soybeans. Leading U.S. imports from Mexico included crude petroleum, motor vehicles and parts, televisions, cellular telephones, and medical instruments. The United States registered a trade surplus in services of \$8.3 billion with Mexico in 2008.

In 2008, the U.S. Department of Transportation evaluated the one-year Cross-Border Trucking Demonstration Project. In August 2008, the U.S. Department of Transportation extended the demonstration program for two years until 2010; however, the program was terminated in January 2009, when the Congress discontinued its funding.

Japan

U.S. merchandise trade with Japan was valued at \$201 billion, accounting for approximately 6.2 percent of U.S. merchandise trade with the world in 2008. U.S. exports to Japan amounted to \$61.4 billion and U.S. imports from Japan were \$139 billion, resulting in a U.S. merchandise trade deficit of \$77.7 billion. Leading exports to Japan were corn, aircraft and parts, wheat, soybeans, and pharmaceuticals. Leading imports from Japan were motor vehicles and parts, printer parts, digital cameras, and airplane and jet parts. The U.S. services trade surplus with Japan was \$17.3 billion in 2008.

The U.S.-Japan Economic Partnership for Growth has served as the primary forum for trade and economic dialogue between the two countries since its establishment in 2001. In 2008, discussions under this framework focused on U.S. beef exports to Japan and deregulation of Japan's economy, including economy-wide and sector-specific reforms.

Korea

U.S. merchandise trade with Korea was valued at \$79.8 billion, accounting for approximately 2.4 percent of U.S. merchandise trade with the world in 2008. U.S. exports to Korea amounted to \$33.1 billion and U.S. imports from Korea were \$46.7 billion, resulting in a U.S. merchandise trade deficit of \$13.6 billion. Leading U.S. exports to Korea during the year included corn, aircraft, transistors, and ferrous waste and scrap. Leading U.S. imports from Korea included cellular phones, automobiles, computer parts and accessories (mainly memory modules), and computer chips. The U.S. trade surplus in services with Korea was \$7.0 billion.

U.S. trade relations with Korea in 2008 were dominated by the status of the U.S.-Korea FTA that was signed in June 2007, and the agreement on a protocol to resume exports of U.S. beef to Korea that had been suspended originally over bovine spongiform encephalopathy (BSE) concerns in late 2003.

Taiwan

U.S. merchandise trade with Taiwan was valued at \$59.8 billion, accounting for approximately 1.8 percent of U.S. merchandise trade with the world in 2008. U.S. exports to Taiwan amounted to \$23.6 billion and U.S. imports from Taiwan were \$36.2 billion, resulting in a U.S. merchandise trade deficit of \$12.6 billion. Leading U.S. exports to Taiwan included processors and controllers for computers, electronic integrated circuits, semiconductor manufacturing and assembly equipment, soybeans, and aircraft. Leading U.S. imports from Taiwan included electronic digital integrated circuits, wireless telephones, reception apparatuses for navigational radios, parts for data processing machines, and reception apparatuses for televisions. The U.S. registered a trade deficit in services with Taiwan of \$291.0 million.

U.S. trade relations with Taiwan during 2008 focused on the USTR's removal of Taiwan from the watch list of IPR violators, providing U.S. beef and beef product companies with more comprehensive market access, and reforming Taiwan's rice procurement practices.

Brazil

U.S. merchandise trade with Brazil was valued at \$59.1 billion in 2008, accounting for approximately 1.8 percent of U.S. merchandise trade with the world. U.S. exports to Brazil amounted to \$29.0 billion and U.S. imports from Brazil were \$30.1 billion, resulting in a U.S. merchandise trade deficit of \$1.0 billion. Leading U.S. exports to Brazil included aircraft and aircraft parts (including jet engines and parts), refined petroleum products, and coal. Leading U.S. imports from Brazil included crude petroleum, pig iron, aircraft, and refined petroleum products. The U.S. trade surplus in services with Brazil was \$7.4 billion.

In 2008, the USTR noted that Brazil had made important progress in improving the effectiveness of IPR enforcement, but also noted that more progress could be made.

India

U.S. merchandise trade with India was valued at \$43.2 billion, accounting for approximately 1.3 percent of U.S. merchandise trade with the world in 2008. U.S. exports to India amounted to \$17.3 billion and U.S. imports from India were \$25.9 billion, resulting in a U.S. merchandise trade deficit of \$8.5 billion. Leading U.S. exports to India included fertilizers, aircraft, nonindustrial diamonds, and nonmonetary gold. Leading U.S. imports from India included nonindustrial diamonds, gold jewelry, certain medicaments, linen, pipe for oil and gas lines, and apparel. The United States registered a trade deficit in services with India of \$1.6 billion.

U.S. trade relations with India during 2008 focused on negotiating a Bilateral Investment Treaty, continuing to promote sectoral openings (including alcoholic beverages), promoting regulatory cooperation, and cooperating on all aspects of protection of intellectual property and promotion of technology transfer.

Table ES.1 Summary of 2008 trade agreement activities

January

1-The North American Free Trade Agreement is fully implemented.

1-United States-Japan Agreement on Mutual Recognition of the Results of Conformity Assessment Procedures (MRA) for telecommunications equipment entered into force.

22-The Czech Republic is placed on the USTR “Special 301” watch list as a result of an out-of-cycle review of intellectual property rights protection and enforcement.

28-Antigua, Bermuda, and Costa Rica ask the WTO for dispute settlement arbitration in their efforts to seek compensation from the United States on its decision to alter its WTO services schedule by eliminating commitments on cross-border gambling services.

February

18-The United States and the EU agree to suspend WTO dispute settlement arbitration proceedings concerning the EU’s implementation of the Dispute Settlement Body findings against measures affecting the approval and marketing of biotechnology products.

19-The United States and Rwanda sign a Bilateral Investment Treaty.

19-The fifth ministerial meeting is held under the U.S.-India Trade Policy Forum.

29-President Bush signs legislation to extend trade preferences under ATPA until December 31, 2008.

March

4-The London Court of International Arbitration finds that Canada violated the Softwood Lumber Agreement by failing to adjust quota volumes of the Eastern Canadian provinces in the first six months of 2007 to account for rapidly changing market conditions. However, it also finds that this same condition does not apply to the Western provinces.

14-Canada enacts a law to implement the Convention on the Settlement of Investment Disputes Between States and Nationals of Other States.

27-Mexico agrees to open its market to all U.S. cattle younger than 30 months.

April

1-The United States and Ukraine sign a Trade and Investment Cooperation Agreement.

7-President Bush sends the U.S.-Colombia Free Trade Agreement to Congress.

10-The U.S. House of Representatives votes to remove the timelines mandated by Trade Promotion Authority for consideration of the Free Trade Agreement with Colombia, effectively postponing a vote indefinitely.

10-Mexico, Canada, and the United States amend NAFTA’s rules of procedure for AD/CVD panels.

10-Chile opens its market to poultry from the United States after it approves U.S. control, inspection, and certification systems.

18-The United States and Korea conclude an agreement on a protocol to fully reopen South Korea’s market to all U.S. beef and beef products consistent with international standards and the World Organization for Animal Health (OIE) guidelines.

April—Continued

25-In USTR’s annual “Special 301” report on intellectual property, the United States adds Algeria, Greece, Norway, and Spain to its watch list and Pakistan to its priority watch list. Egypt, Lebanon, Turkey, and Ukraine are moved from the priority watch list to the watch list. Belize and Lithuania are removed from the watch list. USTR announces out-of-cycle reviews for Taiwan and Israel to monitor progress on outstanding IPR issues.

30-The WTO Appellate Body rules that U.S. use of “model zeroing” in antidumping proceedings against Mexican stainless steel is inconsistent with U.S. WTO obligations.

May

16-Ukraine becomes a member of the WTO.

22-CBTPA provisions of the Caribbean Basin Economic Recovery Act are extended through September 30, 2010.

22-HOPE II Act passes Congress, extending and enhancing trade benefits for Haiti until September 30, 2018.

June

4-OECD Ministerial Council meeting discusses trade, growth, and development issues, with special focus on the economics of climate change, sovereign wealth funds, and the current economic situation.

9-U.S. Trade Policy Review held at the WTO.

17-U.S.-China Strategic Economic Dialogue takes place in Annapolis, MD.

June—Continued

20-After public controversy in Korea about the April 18 U.S.-Korea beef protocol, Korean beef importers and U.S. exporters reach a commercial understanding that only U.S. beef from cattle under 30-months of age will be shipped to Korea, as a transitional measure, to improve Korean consumer confidence in U.S. beef.

20-The WTO DSB adopts the findings of the compliance panel and Appellate Body in favor of Brazil’s allegations that the United States had not implemented earlier WTO findings against U.S. agricultural support measures, including support for cotton farmers.

July

14-The seventh annual AGOA Forum is held in Washington, DC.

16-The United States signs a Trade and Investment Framework Agreement with the East African Community (Burundi, Kenya, Rwanda, Tanzania, and Uganda).

16-The United States signs a Trade, Investment, and Development Cooperation Agreement with the Southern African Customs Union (Botswana, Lesotho, Namibia, South Africa, and Swaziland).

23-Congress extends restrictions on imports from Burma for another year.

23-Cape Verde becomes a member of the WTO.

29-The WTO Doha trade negotiations in Geneva reach an impasse over a U.S. and India dispute on agricultural safeguards.

August

1-The WTO DSB adopts the findings of the panel and Appellate Body in favor of Thailand and India in two separate cases addressing U.S. measures on imported shrimp, ruling that the United States violated its obligations under the WTO Antidumping Agreement.

12-Jordan ratifies the WTO Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPs).

18-The United States, Japan, and Chinese Taipei request a WTO dispute settlement panel to review whether the EU has failed to accord required duty-free treatment of certain products covered by the WTO Information Technology Agreement.

September

22-U.S. negotiations are launched to join the comprehensive Trans-Pacific Strategic Economic Partnership Agreement.

October

1-The United States and Costa Rica reach an agreement on an extension of time for Costa Rica to join the U.S.-CAFTA-DR.

16-President Bush signs legislation to extend trade preferences under ATPA and GSP, and to amend AGOA.

16-The WTO Appellate Body issues a report largely affirming the earlier panel report that the United States did not violate its WTO obligations by maintaining sanctions on certain EU products after the EU claimed it had come into compliance by amending its ban on beef from animals treated with growth-promoting hormones.

24-Mexico requests WTO consultations with the United States concerning U.S. limitations on the use of a dolphin-safe label for tuna and tuna products.

October—Continued

30-The WTO Appellate Body rules in favor of the United States in its challenge against India's "additional" and "extra-additional" duties on imports of wine, spirits, and other agricultural and manufactured products, but did not recommend that India be asked to remove the duties because neither side provided the necessary evidence to reach a factual finding.

November

11-Costa Rica's national assembly passes the final piece of legislation needed to implement U.S.-CAFTA-DR.

13-China agrees to eliminate discriminatory restrictions on how U.S. and other foreign suppliers of financial information services do business in China, which the United States had challenged in a WTO dispute brought earlier in the year.

19-The 20th APEC ministerial meeting takes place in Lima, Peru.

21-Based on a final review of data collected through an import-monitoring program covering certain apparel products from Vietnam, the U.S. Department of Commerce finds insufficient evidence to self-initiate an antidumping investigation.

26-The WTO Appellate Body rules against the EU in the compliance proceeding brought by the United States against its banana import regime. The Appellate Body also rules against the EU in a parallel proceeding brought by Ecuador.

26-Thailand requests WTO dispute settlement consultations with the United States concerning certain issues (U.S. antidumping "zeroing methodology") relating to the imposition of antidumping measures on polyethylene retail carrier bags.

November—Continued

27-Brazil requests WTO dispute settlement consultations with the United States regarding the antidumping administrative review on certain orange juice from Brazil and various related U.S. laws, regulations, administrative procedures, practices, and methodologies.

December

1-Canada requests WTO dispute settlement consultations with the United States on country-of-origin labeling (COOL) measures.

4-U.S.-China Strategic Economic Dialogue takes place in Beijing, China.

9-China requests the establishment of a WTO dispute settlement panel concerning U.S. final antidumping and countervailing duty orders on steel pipe, off-the-road tires, light-walled rectangular pipe and tube, and laminated woven sacks.

10-Chinese Taipei accedes to the WTO Agreement on Government Procurement.

15-Bolivia is suspended from ATPA eligibility for failing to meet the program's counternarcotics cooperation criteria.

15-The WTO Appellate Body generally upholds panel findings that China's treatment of imports of U.S. and other foreign auto parts is inconsistent with China's WTO obligations.

17-A WTO compliance panel finds that the United States has failed to comply fully with the Appellate Body ruling concerning U.S. antidumping "zeroing methodology" in a successful challenge mounted by the EU.

19-The United States requests WTO dispute settlement consultations with China regarding China's "Famous Brands" programs.

December—Continued

22-China requests a WTO dispute settlement panel to investigate U.S. antidumping and countervailing duties on Chinese products.

23-The United States Trade Representative releases its seventh annual report on China's compliance with its WTO accession obligations.

23-The President issues a proclamation implementing the U.S.-CAFTA-DR for Costa Rica on January 1, 2009.

29-The United States and Russia sign a protocol to the 2005 U.S.-Russia agreement on trade in certain types of poultry, beef, and pork.

29-The President issues a proclamation implementing the U.S.-Oman FTA on January 1, 2009.

31-U.S. quotas on textile and apparel imports from China expire.

Sources: Compiled from multiple U.S. government sources, including the Office of the U.S. Trade Representative. CHAPTER 1

Overview of U.S. Trade

Scope and Approach of the Report

This report provides factual information on the operation of the U.S. trade agreements program and its administration for calendar year 2008.¹ Trade agreement activities during 2008 include the administration of U.S. trade laws and regulations; U.S. participation in the World Trade Organization (WTO), the Organization for Economic Cooperation and Development (OECD), and the Asia-Pacific Economic Cooperation (APEC) forum; U.S. negotiation of and participation in free trade agreements (FTAs); and bilateral developments with major trading partners.

The report is based on primary source materials about U.S. trade programs and administrative actions there under, including U.S. government reports, notices, and news releases, and publications and news releases by the U.S. International Trade Commission (USITC or the Commission). Additional primary sources of information include publications of international institutions, including the International Monetary Fund (IMF), World Bank, OECD, WTO, United Nations (UN), and official publications of foreign governments. Professional journals, trade publications, and news reports are used to provide supplemental factual information when primary source information is unavailable.

Merchandise trade data are provided the primary focus throughout the report except for chapters 1 and 5, which also provide data on services trade as compiled by the Commission primarily from the U.S. Bureau of Economic Analysis (BEA) of the U.S. Department of Commerce and the IMF.

Overview of the U.S. Economy in 2008

The expansion of the U.S. economy that began in November 2001 slowed notably in 2008.² In particular, U.S. economic activity dropped sharply at the end of 2008, as financial market instability intensified, credit conditions tightened, and asset values declined at an accelerating pace.³ The first half of the year saw increasing inflationary

¹ This is the 60th in a series of annual reports submitted to the U.S. Congress under section 163(c) of the Trade Act of 1974 (19 U.S.C. 2213(c)) and its predecessor legislation.

² White House, *Economic Report of the President*, January 2009, 20. In 2008, the U.S. economy underwent severe economic and financial turmoil. In response, the Federal Reserve Bank and the U.S. Department of the Treasury implemented various programs to address the situation. White House, *Economic Report of the President*, January 2009 and Board of Governors of the Federal Reserve System, *Monetary Policy Report to the Congress*, February 2009. In addition, the Business Cycle Committee of the National Bureau of Economic Research (NBER) determined that a peak in economic activity occurred in the U.S. economy in December 2007. The peak marked the end of the expansion that began in November 2001 and the beginning of a recession. NBER, Business Cycle Dating Committee, "Determination of the December 2007 Peak in Economic Activity."

³ U.S. Board of Governors of the Federal Reserve System, *Monetary Policy Report*, February 2009, 1.

pressure as a result of higher prices for energy and other commodities and depreciation of the U.S. dollar against most other major currencies. The second half of the year saw declining prices for energy and other commodities and strengthening of the U.S. dollar in most foreign exchange markets.⁴

U.S. real gross domestic product (GDP)—the output of goods and services produced by labor and property located in the United States—increased by 1.1 percent in 2008, following 2.0 percent growth in 2007.⁵ Exports of goods and services, personal consumption expenditures for services, and federal, state, and local government spending were the leading contributors to real growth in 2008. This overall growth was partially offset by declines in residential fixed investment, personal consumption expenditures for goods, and an increase in imports of goods and services.⁶ Notably, in the second half of 2008, the financial and economic strains—initially triggered by the end of the housing boom in the United States and other countries, together with the problems in mortgage markets—intensified.⁷

Growth in the first half of 2008 was followed by a 0.5 percent decline in real GDP in the third quarter and a sharp 6.3 percent decline in the fourth quarter (figure 1.1).⁸ The fourth quarter decline reflected negative contributions from exports of goods and services, residential and nonresidential fixed investment, and personal consumption expenditures, which were partially offset by positive contributions from federal government spending.⁹

FIGURE 1.1 U.S. real gross domestic product, in percent change, 2001-08

⁶ Ibid.

⁷ Board of Governors of the Federal Reserve System, *Monetary Policy Report*, February 2009, 1.

⁸ USDOC, BEA, "Gross Domestic Product," March 26, 2009, table 1.

⁹ Ibid. According to the BEA, gross private domestic investment declined by 20.8 percent and personal consumption expenditures decreased by 4.3 percent, whereas government spending increased by 1.6 percent in the fourth quarter of 2008.

In contrast to the first half of the year when there was a robust global demand for U.S. exports in part due to the depreciation of the dollar, U.S. exports decreased by 23.6 percent in the fourth quarter of 2008 compared to the same period in 2007, in response to a robust re-appreciation of the dollar and the decline in foreign economic activity. The decline in trade flows in the latter part of the year was widespread as the global economic downturn affected most U.S. trade partners. World real GDP growth declined from 4.1 percent in 2007 to 2.2 percent in 2008 and world real trade growth declined from 6.9 percent in 2007 to 2.5 percent in 2008.¹⁰ In 2008, the U.S. economy again recorded growth (1.1 percent) that either equaled or exceeded that of some other major industrialized countries and areas, including the euro area (0.7 percent), the OECD (0.8 percent), Canada (0.5 percent), and Japan (-0.7 percent).¹¹ However, U.S. economic growth was below the world average GDP growth rate of 3.4 percent, as well as that of Mexico (1.3 percent) and China (9.0 percent).¹²

Exchange Rate Trends

The U.S. dollar appreciated 9 percent in 2008 on a trade-weighted average basis against a basket of currencies including the Canadian dollar, the euro, the Japanese yen, and the Chinese yuan.¹³ This reflects a sharp reversal in the value of the U.S. dollar from a small relative depreciation—against the euro, peso, yen, and yuan through the second and third quarters—to a substantial appreciation in the fourth quarter of 2008 against most major currencies, except the yen and the yuan (figure 1.2).¹⁴ For the year as a whole, the U.S. dollar appreciated 35.6 percent against the British pound, 26.9 percent against the Mexican peso, 23.4 percent against the Canadian dollar, and 5.9 percent against the euro (figure 1.2).¹⁵ The strengthening of the dollar during the second half of the year was attributable to, among other factors, the expectation by foreign investors that the decline in foreign economic growth relative to the decline in U.S. economic growth would be more severe than previously anticipated and to an increase in demand for the relative safety of U.S. assets such as Treasury securities.¹⁶ In contrast, the dollar depreciated 17.2 percent against the Japanese yen, as Japanese investors sold foreign assets mainly in response to market volatility. The dollar also depreciated 6.5 percent against the Chinese yuan, the majority of which took place in the first half of the year.

Source: U.S. Federal Reserve Board.

^a Units of the foreign currency per unit of the U.S. dollar. A decrease in the index represents a depreciation in the U.S. dollar relative to the foreign currency, and an increase in the index represents an appreciation of the U.S. dollar relative to the foreign currency.

Balance of Payments¹⁷

The U.S. current account deficit—the combined balances in trade in goods and services, income, and net current unilateral transfers—decreased from \$731.2 billion in 2007 to \$673.3 billion in 2008.¹⁸ As a share of U.S. GDP, the current account deficit was 4.7 percent in 2008, down from 5.3 percent in 2007. The decline was due to the increases in surpluses in income and in services. The deficit in goods trade increased slightly from

¹⁷ Trade data in this section of the report may not match data in other sections or in the report appendix because it is reported on a balance of payments (BOP) basis. Total goods data are reported on a BOP basis whereas commodity and country detailed data for goods are on a Census basis. The Census basis data for goods used elsewhere in this report are compiled from the documents collected by the U.S. Customs Service and reflect the movement of goods between foreign countries and the 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and U.S. foreign trade zones. Data on goods compiled on a Census basis are adjusted by the USDOC BEA to a BOP basis to bring the data in line with the concepts and definitions used to prepare the international and national accounts. These adjustments are made to supplement coverage of the Census basis data, to eliminate duplication of transactions recorded elsewhere in the international accounts, and to value transactions according to a standard definition. For a more detailed discussion of the differences between BOP basis and Census basis data, see USDOC, BEA, “Information on Goods and Services” in USDOC, BEA, “International Economic Accounts,” December 2008. For further information on data sources and definitions, see USDOC, Census Bureau (CB), BEA, “International Economic Accounts—U.S. International Trade in Goods and Services: December 2008,” March 2009, A-1.

¹⁸ USDOC, BEA, “International Economic Accounts—U.S. International Transactions: Fourth Quarter and Year 2008, Current Account.” March 18, 2009.

\$819.4 billion in 2007 to \$820.8 billion in 2008. The surplus in income increased from \$81.7 billion in 2007 to \$127.6 billion in 2008.¹⁹

The trade surplus in services increased from \$119.1 billion in 2007 to \$139.7 billion in 2008.²⁰ Exports of services increased to \$544.4 billion in 2008 from \$497.2 billion in 2007. Although nearly all service categories experienced an increase in exports, the largest increases were in “other” private services (which includes business, professional, and technical services; insurance services; and financial services); travel; “other” transportation (such as freight and port services); passenger fares; royalties; and license fees. Imports of services increased from \$378.1 billion in 2007 to \$404.7 billion in 2008. All import service categories increased, and the largest increases were in “other” private services, “other” transportation, passenger fares, travel, and direct defense expenditures.²¹ In 2008, net financial inflows were \$546.6 billion, down from \$774.3 billion in 2007.²²

Trade in Goods and Services

The U.S. trade deficit for goods and services decreased in 2008 for a second consecutive year as the surplus in services grew more than the deficit in goods. The goods and services deficit decreased by \$19.1 billion in 2008 to \$681.1 billion (4.8 percent of GDP), from \$700.3 billion in 2007 (5.1 percent of GDP).²³ U.S. exports of goods and services, on a seasonally adjusted U.S. balance-of-payments (BOP) basis, were valued at \$1,835.8 billion in 2008, and U.S. imports of goods and services were valued at \$2,516.9 billion. Goods exports and imports were \$1,291.4 billion and \$2,112.2 billion, respectively, resulting in a goods deficit of \$820.8 billion, up \$1.4 billion from 2007. For services, exports exceeded imports, which resulted in a services trade surplus of \$139.7 billion—\$20.6 billion more than the 2007 surplus of \$119.1 billion.²⁴

The trade deficit decreased considerably at the end of 2008, due in part to a sharp decline in the price of oil.²⁵ However, during the first half of the year the price of oil rose to historic levels, reaching a monthly average of \$134 per barrel in July, and then fell sharply during the second half to \$41 per barrel in December (figure 1.3). For the year as a whole, the value of imports of petroleum and petroleum products increased by 37.0 percent to \$453.3 billion, reflecting an increase in the price of oil (the volume of imports

¹⁹ The balance in income is income receipts (including income receipts on U.S.-owned assets abroad and compensation of U.S. employees abroad) less income payments (including income payments on foreign-owned assets in the United States and compensation of foreign employees in the United States).

²⁰ Services trade data are reported here on a BOP basis for purposes of comparison with merchandise trade figures. BOP data include trade in private services, as well as transfers under U.S. military agency sales contracts and U.S. government purchases of miscellaneous services. USDOC, BEA, “International Economic Accounts—U.S. International Transactions: Current Account,” March 18, 2009, table 1.

²¹ U.S. trade in services is described in detail below.

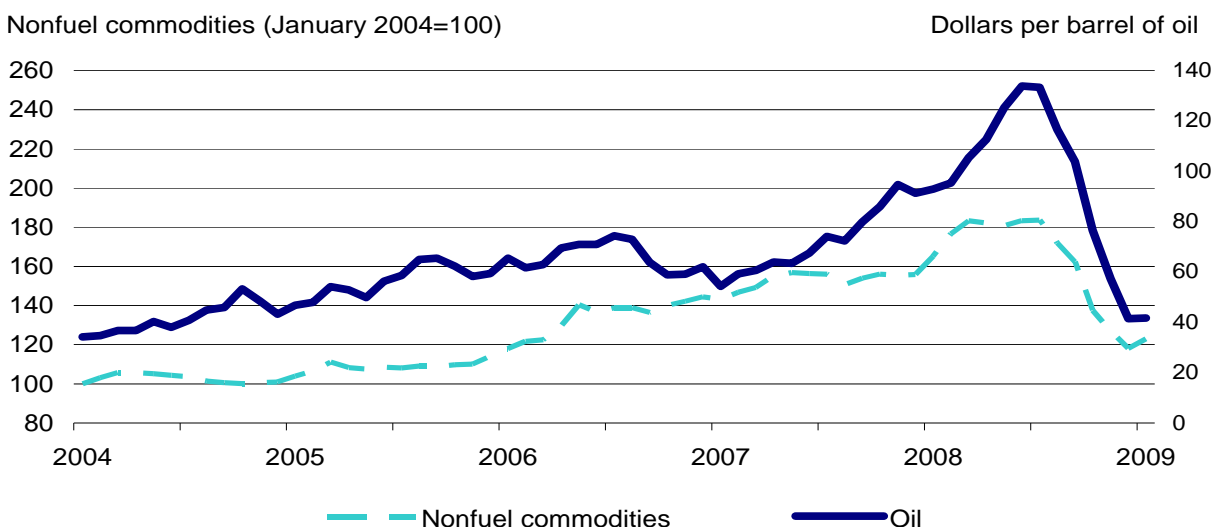

²² Net financial inflows are net acquisitions by foreign residents of assets in the United States less net acquisitions by U.S. residents of assets abroad. The main components of the financial account are capital transfers, foreign direct investment, portfolio investment, banking and other flows, statistical discrepancies, and official reserve assets. USDOC, BEA, “International Economic Accounts—U.S. International Transactions: Current Account,” March 18, 2009, 7 and table 1.

actually declined slightly), while imports of nonpetroleum-related products increased by only 1.3 percent to \$1,646.8 billion.²⁶ As a result, imports of petroleum and petroleum products accounted for 21.5 percent of total imports by value in 2008, up from 16.8 percent in 2007. The deficit in petroleum and petroleum products increased from \$293.2 billion in 2007 to \$386.3 billion in 2008 and rose as a share of the total goods deficit, from 35.8 percent in 2007 to 47.1 percent in 2008.²⁷ U.S. trade in goods and services is discussed in more detail below.

U.S. Trade in Goods in 2008

U.S. merchandise exports increased to \$1,169.8 billion (8.2 percent of GDP) in 2008 from \$1,046.4 billion (7.6 percent of GDP) in 2007 (figure 1.4).²⁸ U.S. merchandise imports increased to \$2,090.5 billion (14.7 percent of GDP) in 2008 from \$1,942.9 billion (14.0 percent of GDP) in 2007. Exports increased more rapidly than imports for the third year in a row. Exports increased by 15.6 percent between 2005 and 2006, 12.6 percent over the 2006-07 period, and 11.8 percent over the 2007-08 period. Imports increased by 11.0 percent, 5.3 percent, and 7.6 percent, respectively, during the same periods.

²⁶ USDOC, CB, BEA, "International Economic Accounts—Trade in Goods and Services, December 2008 and January 2009," February 11, 2009, and March 13, 2009.

²⁸ Merchandise trade data in this section do not match the seasonally adjusted BOP basis data presented above because of adjustments made to the data as described in footnote 17.

FIGURE 1.4 U.S. merchandise trade with the world, 2006-08

Source: U.S. Department of Commerce.

Although U.S. trade in goods increased for the year as a whole, exports and imports each declined in the fourth quarter of 2008. This reversal reflected the sharp decline in U.S. economic activity in the second half of the year, but particularly in the fourth quarter of 2008 (figure 1.1). U.S. goods exports increased by 17.9 percent through the third quarter of 2008, but decreased by 5 percent in the fourth quarter.²⁹ Similarly, U.S. goods imports rose by 13.2 percent through the third quarter of 2008, but declined by 7.8 percent in the last quarter of the year.

*U.S. Merchandise Trade by Product Category*³⁰

Exports

Machinery and transport equipment, which consistently ranks as the largest U.S. export by Standard International Trade Classification (SITC) group, accounted for 40.8 percent of total U.S. exports in 2008 (appendix table A.1). U.S. exports of machinery and transport equipment were valued at \$477.1 billion in 2008, up 3.1 percent from \$462.7 billion in 2007. Growth in the exports of mineral fuels, lubricants, and related materials contributed the most to the overall increase in exports, accounting for 27.9 percent of total export growth. Approximately 80 percent of the total increase in exports in 2008 was accounted for by increased U.S. exports of goods from the following five SITC groups: mineral fuels, lubricants, and related materials; chemicals and related products; food and live animals; machinery and transport equipment; and crude materials (except fuels). No SITC group registered a decline in exports from 2007 to 2008.

²⁹ Percent changes calculated with respect to the same period of the previous year.

³⁰ U.S. trade in services is described below.

Imports

While U.S. imports of most SITC groups increased from 2007 to 2008, imports decreased modestly in the categories of machinery and transport equipment, consistently the largest U.S. import by SITC group; beverages and tobacco; and miscellaneous manufactured articles. U.S. imports of machinery and transport equipment were valued at \$718.3 billion in 2008, down 2.8 percent from \$739.1 billion in 2007, and accounted for 34.3 percent of total U.S. imports in 2008. The 7.6 percent increase in total U.S. imports in 2008 was due almost entirely to increases in imports of mineral fuels, lubricants, and other materials, as well as chemicals and related products.

U.S. imports under the four preferential trade programs with developing countries totaled \$110.0 billion in 2008 and accounted for 5.3 percent of total U.S. imports during the year. In 2007, such imports were valued at \$90.7 billion. Duty-free imports totaled \$31.7 billion under the Generalized System of Preferences (GSP) program (appendix table A.11), \$56.4 billion (excluding GSP imports) under the African Growth and Opportunity Act (AGOA) (appendix table A.13), and \$17.2 billion under the Andean Trade Preference Act (ATPA) (appendix table A.15). In addition, imports that entered free of duty or at reduced rates under the Caribbean Basin Economic Recovery Act (CBERA) totaled \$4.7 billion (appendix table A.17). U.S. imports under free trade agreement (FTA) provisions amounted to \$329.8 billion in 2008.³¹

*U.S. Merchandise Trade with Leading Partners*³²

Table 1.1 shows U.S. trade with selected major trading partners, ranked by total trade (exports and imports) in 2008.³³ The European Union (EU) as a unit remained the largest global market for U.S. exports and largest source of U.S. imports in 2008. Canada remained the largest single-country two-way trading partner of the United States, followed by China and Mexico. Figures 1.5 and 1.6 show leading U.S. export markets and import suppliers, respectively, by share in 2008.

Foreign economic growth in 2008 fell largely as a result of the widespread financial instability and ensuing economic downturn.³⁴ Nevertheless, U.S. exports increased by 11.8 percent and U.S. imports increased by 7.6 percent over the 2007–08 period. U.S. exports to some major trading partners (China, EU-27, Mexico, and Japan) grew faster than imports from these countries, but for other major trading partners (Canada and Korea) imports grew faster than exports.

³¹ See chap. 2 of this report for further information on the trade preference programs and chap. 4 for information on U.S. FTAs.

³² See chap. 5 for further information on U.S. merchandise trade with major trading partners, i.e., EU-27, Canada, China, Mexico, and other countries. Venezuela and Saudi Arabia are also leading trading countries of the United States but are not discussed because most of these countries' trade with the United States consists of petroleum and petroleum products.

³³ Leading U.S. exports to and imports from these partners are presented in appendix tables A.21 through A.47.

³⁴ Board of Governors of the Federal Reserve System, *Monetary Policy Report to the Congress*, February 2009.

China alone accounted for 29.4 percent of the total U.S. merchandise deficit of \$920.7 billion in 2008, and NAFTA partners Canada and Mexico together accounted for 21.4 percent of the deficit. The U.S. trade deficit with China rose from \$262.1 billion in 2007 to \$270.3 billion in 2008, even though U.S. exports to China grew faster (10.1 percent) than U.S. imports from China (4.5 percent) over the 2007-08 period.

U.S. Trade in Services in 2008³⁵

The U.S. surplus in cross-border private services trade increased 18.3 percent in 2008, reaching \$164.3 billion (figure 1.7).³⁶ Export growth in most services categories combined with significantly slower growth in imports of insurance; telecommunications;

³⁵ This section focuses primarily on cross-border transactions in private services, which exclude government sales and purchases of services. Services trade data are drawn from the BEA. In these national accounts data, “cross-border transactions” occur when firms resident in one country provide services to consumers in another, with people, information, or money crossing U.S. boundaries in the process. Cross-border transactions appear explicitly as imports and exports in the balance of payments. U.S. firms also provide services to foreign consumers through affiliates established in host countries, with the income generated through “affiliate transactions” appearing as investment income in the balance of payments. The channel of delivery used by service providers depends primarily on the nature of the service. For example, many financial services, such as retail banking services, are supplied most effectively by affiliates located close to the consumer. Conversely, trade in education services predominantly takes the form of cross-border transactions, with students traveling abroad to attend foreign universities.

³⁶ USDOC, BEA, “U.S. International Transactions,” U.S. International Transactions Accounts Data, Table 1 (accessed March 30, 2009).

FIGURE 1.7 U.S. private cross-border services trade with the world, 2006-08^a

^a Data for 2008 are preliminary.

business, professional, and technical services;³⁷ and other services contributed to the fifth consecutive annual increase in the U.S. services trade surplus. U.S. cross-border exports of private services increased 10.0 percent, from \$480.0 billion in 2007 to \$528.1 billion in 2008. U.S. cross-border imports of services increased 6.6 percent, from \$341.1 billion to \$363.8 billion during the same period. Appendix tables A.2 and A.3 show U.S. trade in private services by product category.

U.S. Services Trade by Product Category

Exports

Business, professional, and technical services led U.S. cross-border services exports, accounting for 22.7 percent of the total in 2008, followed closely by exports of travel services,³⁸ which accounted for 20.9 percent of total U.S. cross-border services exports. Exports of business, professional, and technical services increased 11.5 percent to \$120.0 billion in 2008. Management and consulting services constitutes the largest sector within

³⁷ Business, professional, and technical services include accounting, auditing, and bookkeeping services; advertising; construction, architectural, and engineering services; computer and information services; installation, maintenance, and repair of equipment; legal services; management and consulting services; medical services; operational leasing; sports and performing arts; trade-related services; and other miscellaneous services.

³⁸ Travel services comprise purchases of goods and services by U.S. persons traveling abroad and by foreign travelers in the United States. These goods and services include food, lodging, recreation, gifts, entertainment, local transportation in the country of travel, and other items incidental to a foreign visit.

business, professional, and technical services, and was likely a key contributor to export growth in 2008, as international demand for such services continued to increase.³⁹ Exports of travel services increased 14.2 percent in 2008, reaching \$110.5 billion. Such growth is attributable to an increase in both the number of foreign visitors to the United States and their expenditures, in part encouraged by the appreciation of foreign currencies against the U.S. dollar, especially during the first half of the year.⁴⁰ Exports of passenger fares⁴¹ reached \$31.6 billion in 2008, representing an increase of 23.7 percent—the most rapid growth among all categories of U.S. private services. Similar to exports of travel services, this growth is due to a greater number of foreign visitors attracted by the strength of many foreign currencies against the U.S. dollar during the first half of 2008, as well as higher airfare prices resulting from higher fuel prices and lower carrier capacity.⁴²

Imports

Travel services ranked as the largest single category of U.S. cross-border services imports, increasing by 5.0 percent from \$76.2 billion in 2007 to \$80.0 billion in 2008, or 22.0 percent of total services imports. The lower rate of this increase relative to exports is due to the decline in outbound U.S. tourism in the second half of the year, likely a result of multiple factors including the slowdown in U.S. economic growth.⁴³ Other significant categories of U.S. imports in 2008 were business, professional, and technical services, which totaled \$75.3 billion, and other transportation services, which totaled \$71.8 billion. U.S. imports of these categories increased 9.6 percent and 7.1 percent, respectively, over 2007. However, overall growth in imports was moderated by sharply lower growth and declines across a range of private services, such as financial services,⁴⁴ demand for which decreased due to the onset of the economic recession.

³⁹ IBISWorld, “Global Management Consultants,” November 6, 2008, 19; Macris, “Private Practice: How the Consulting Business is Faring in Bleak Economic Times,” February 2009, 23; USDOC, BEA, “Transactions in Private Services, By Type of Service and Affiliation, 1992–2007,” Supplemental Information, October 24, 2008. Management and consulting services accounted for 15 percent of total business, professional, and technical services exports in 2007, the most recent year for which data are available. Such exports likely continued to increase in 2008 as developing economies in the Middle East and Asia experienced continued high demand for such services.

⁴⁴ Financial services include non-insurance, non-deposit financial services provided by banks and securities firms.

U.S. Services Trade with Leading Partners

The EU was both the United States' largest export market and largest import supplier in 2008 (table 1.2), accounting for 37.1 percent of total U.S. services exports and 37.9 percent of total U.S. services imports (figures 1.8 and 1.9).⁴⁵ Canada and Japan followed the EU as the second and third most significant markets for U.S. services trade in 2008. In addition to a large regional services trade surplus with the EU (\$58.0 billion), the United States maintained large bilateral services trade surpluses with Canada (\$22.7 billion), Japan (\$17.3 billion), Mexico (\$8.3 billion), and Brazil (\$7.4 billion). Small deficits were registered with India and Taiwan. The deficit with India is driven by the large volume of U.S. imports of other private services. Although 2008 data for sectors that make up this category are not yet available, data from previous years suggest that the deficit is due to the outsourcing of information technology (IT) services by U.S. firms, resulting in higher imports of computer and data processing services.⁴⁶ The small deficit maintained with Taiwan is due to imports of other transportation services, or transactions resulting from the transportation of goods by ocean, air, land, pipeline, and inland waterways.⁴⁷

CHAPTER 2

Administration of U.S. Trade Laws and Regulations

This chapter surveys activities related to the administration of U.S. trade laws during 2008. It covers import relief laws; unfair trade laws; and certain other trade provisions, including the U.S. Generalized System of Preferences (GSP), the African Growth and Opportunity Act (AGOA), the Andean Trade Preference Act (ATPA), and the Caribbean Basin Economic Recovery Act (CBERA).

Import Relief Laws

Safeguard Actions

This section covers only safeguard actions under provisions administered by the Commission, including global safeguards provided for in sections 201-204 of the Trade Act of 1974, China safeguards provided for in section 421 of the Trade Act of 1974, and safeguards provided for in various bilateral free trade agreements involving the United States. Safeguard actions under provisions administered by other U.S. government agencies, such as the China textile safeguard actions by the U.S. Department of Commerce (Commerce), are described elsewhere in this report.¹

The Commission did not conduct any safeguard investigations during 2008, no safeguard measures under provisions administered by the Commission were in effect at any time during calendar year 2008, and no safeguard petitions filed under these provisions were pending before the Commission at the end of 2008.

Trade Adjustment Assistance

The United States provides trade adjustment assistance (TAA) for the purpose of assisting U.S. workers, manufacturing firms, and farmers adversely affected by import competition or when production shifts to foreign countries.² In 2008, TAA comprised the following programs: TAA for Workers and Alternative Trade Adjustment Assistance (ATAA); the Health Coverage Tax Credit (HCTC) for certain trade-impacted workers

¹ The U.S.-China Memorandum of Understanding establishing quotas on U.S. imports of selected textile and apparel products from China is covered in the chap. 5 section on China.

² TAA was formally established by the Trade Expansion Act of 1962 (Pub. L. 87-794) but was little used until the Trade Act of 1974 (Pub. L. 93-618) expanded program benefits and eligibility. The TAA program was amended by the Trade Adjustment Assistance Reform Act (TAA Reform Act), which was part of the Trade Act of 2002 (Pub. L. 107-210). The TAA Reform Act reauthorized and expanded TAA; it also consolidated the TAA and the North American Free Trade Agreement (NAFTA) TAA programs. *Economic Report of the President*, 2009, box 8-2, 232-33; Topoleski, "TAA for Workers," February 20, 2008.

and others; TAA for Firms; and TAA for Farmers.³ These programs are described separately below.

Assistance for Workers

The TAA for Workers and ATAA programs are administered by the U.S. Department of Labor through the Employment and Training Administration (ETA).⁴ The TAA for Workers program provides training and income support through a variety of benefits and services⁵ for manufacturing sector workers who lose their jobs, or whose hours of work and wages are reduced, as a result of increased imports.⁶ TAA also extends to eligible secondary workers—workers whose layoff was caused by the loss of business as a supplier of component parts, a final assembler, or a finisher for a firm employing a worker group with a current TAA certification.⁷ Benefits and services also are available for workers who lose their jobs, or whose hours of work and wages are reduced, as a result of shifts in production to foreign countries that are party to a free trade agreement (FTA) with the United States or a country that is named as a beneficiary under the AGOA, the ATPA, or the CBERA.⁸

The ATAA program for workers age 50 and older provides an alternative to the benefits offered under the regular TAA program.⁹ Participation in ATAA allows workers for whom retraining may not be suitable to accept reemployment at a lower wage and receive a wage subsidy.¹⁰

The HCTC is administered by the Internal Revenue Service (IRS) of the U.S. Department of the Treasury.¹¹ The HCTC helps certain trade-affected workers pay for health

³ President Obama signed the Trade and Globalization Adjustment Assistance Act of 2009 on February 17, 2009, as part of the American Recovery and Reinvestment Act of 2009 (Pub. L. 111-5). This new legislation reauthorized and changed certain provisions of the TAA programs for workers, firms, and farmers beginning in 2009. For more information, see USDOL, ETA, “Important Information for Individuals Considering Filing a Petition,” March 5, 2009; USDOL, ETA, “Upcoming Changes to Trade Adjustment Assistance Questions and Answers,” April 2, 2009; and U.S. Department of Commerce, EDA, “Congress Makes Changes to Trade Adjustment Assistance for Firms Program,” undated.

⁴ States serve as agents to the U.S. Department of Labor (USDOL) in administering the TAA for Workers program. USDOL, ETA, “Fact Sheet,” undated. For additional information, see USDOL, ETA website, <http://www.doleta.gov/tradeact/>.

⁵ For TAA certified workers, services and benefits include income support, relocation allowances, job search allowances, and the HCTC. TAA participants that require retraining in order to obtain suitable employment may receive occupational training. USDOL, ETA, “TAA and ATAA for Workers—Who We Serve,” January 13, 2009.

⁶ Workers must meet two group eligibility requirements: (1) the workers’ company produces a product, and (2) a required minimum of the workforce has been laid off or is threatened with layoffs (3 workers in groups of fewer than 50, or 5 percent of the workforce in groups of 50 or more) in the 12 months preceding the date a petition for TAA is filed. USDOL, ETA, “TAA and ATAA Application Process,” January 13, 2009.

⁷ USDOL, ETA, “Trade Adjustment Assistance: Application Process,” undated.

⁸ USDOL, ETA, “Trade Adjustment Assistance Reform Act of 2002,” January 13, 2009. Countries that are party to an FTA with the United States are discussed in chap. 4 of this report. The AGOA, ATPA, and CBERA programs are discussed later in this chapter.

⁹ ATAA was established by the Trade Adjustment Assistance Reform Act of 2002 (Pub. L. 107-210), which was part of the Trade Act of 2002.

¹⁰ USDOL, ETA, “TAA and ATAA Services and Benefits,” January 13, 2009.

¹¹ The HCTC was established by the Trade Adjustment Assistance Reform Act of 2002 (Pub. L. 107-210), which was part of the Trade Act of 2002. For additional information on the HCTC, see U.S. Department of the Treasury, Internal Revenue Service (IRS) website, <http://www.irs.gov/individuals/article/0,,id=187948,00.html>.

insurance premiums.¹² In order to receive the HCTC, eligible individuals must be enrolled in a qualified health plan and be a TAA or ATAA recipient.¹³

To obtain TAA or ATAA services and benefits, a group of workers must first file a petition requesting certification as workers adversely affected by foreign trade with the U.S. Department of Labor's Division of Trade Adjustment Assistance (DTAA). If the petition is certified by DTAA, each worker in the group may then apply separately for individual services and benefits. Workers age 50 and older who are certified as eligible to apply for both TAA and ATAA may choose whether to participate in the TAA program or the ATAA program, but may not participate in both.¹⁴ The Department of Labor instituted investigations for 2,129 petitions for TAA it received during 2008.¹⁵ Of that number, it issued 1,469 certifications for TAA and denied 464 petitions.¹⁶ According to the U.S. Department of Labor, approximately 80,000 trade-affected workers receive TAA benefits in any given year.¹⁷

Assistance for Farmers

TAA for Farmers is administered by the U.S. Department of Agriculture through the Foreign Agricultural Service (FAS).¹⁸ The TAA for Farmers program was in effect from October 1, 2002, through December 31, 2007, when its statutory authority expired.¹⁹ The program provided free technical assistance in the development of business adjustment plans to producers of raw agricultural commodities, including farmers, ranchers, fish farmers, and fishermen, who had been adversely affected by import competition.²⁰

¹² The HCTC is disbursed as an annual tax credit when individual recipients file their federal tax returns, monthly as premiums become due, or a combination of both. IRS, "HCTC Information for Individuals," January 16, 2009.

¹³ In 2008, the HCTC paid 65 percent of an eligible individual's qualified health plan premium. The tax credit was increased to 80 percent of qualified premiums beginning in April 2009. This increase was a result of changes introduced by the American Recovery and Reinvestment Act of 2009. IRS, "HCTC Latest News, Overview and Background," March 4, 2009.

¹⁴ USDOL, ETA, "TAA and ATAA Services and Benefits," January 13, 2009.

¹⁵ Because of the timing of the application process, the adverse trade impact cited in some of the petitions occurred in 2007. Also because of the timing of the process, not all of the investigations instituted by DTAA in 2008 were completed that year. For additional information, see USDOL, ETA, "Search for Trade Adjustment Assistance Cases," http://www.doleta.gov/tradeact/taa/taa_search_form.cfm (accessed April 15, 2009).

¹⁶ Workers may file for administrative reconsideration if their petition is denied. Workers who are dissatisfied with the result of the administrative reconsideration, or who missed the deadline for administrative reconsideration, may seek judicial review of the petition denial. USDOL, ETA, "Trade Act Programs: Appeal Rights," January 13, 2009.

¹⁷ USDOL, "2009 Congressional Budget Justification: ETA," undated, 13.

¹⁸ For additional information, see U.S. Department of Agriculture, FAS website, <http://www.fas.usda.gov/ITP/TAA/taafaqs.asp>.

¹⁹ The Trade and Globalization Adjustment Assistance Act of 2009 reauthorized and modified the TAA for Farmers program.

²⁰ U.S. Department of Agriculture, FAS, "Trade Adjustment Assistance for Farmers Program: Frequently Asked Questions," March 19, 2009.

Assistance for Firms

TAA for Firms is administered by the U.S. Department of Commerce through the Economic Development Administration (EDA).²¹ The TAA for Firms program provides financial assistance in the form of matching funds to help eligible import-impacted manufacturers.²² The matching funds are intended to help firms offset the costs of projects aimed at improving a manufacturer's competitive position. Funds may be applied toward the cost of consultants, engineers, designers, or industry experts for improvement projects in areas such as manufacturing, engineering, marketing, information technology, and quality.²³

In FY 2008, the EDA announced that it would allocate \$14.1 million in TAA program funds, an increase from \$12.9 million in FY 2007, to its national network of 11 Trade Adjustment Assistance Centers (TAACs). TAACs, typically sponsored by universities or nonprofit organizations, are the primary point of contact for firms during the certification and adjustment proposal processes under the TAA program.²⁴

Laws Against Unfair Trade Practices

Section 301 Investigations

Section 301 of the Trade Act of 1974 is the principal U.S. statute for addressing foreign unfair practices affecting U.S. exports of goods or services.²⁵ Section 301 may be used to enforce U.S. rights under bilateral and multilateral trade agreements and also may be used to respond to unreasonable, unjustifiable, or discriminatory foreign government practices that burden or restrict U.S. commerce. Interested persons may petition the United States Trade Representative (USTR) to investigate foreign government policies or practices, or the USTR may initiate an investigation.

If the investigation involves a trade agreement and consultations do not result in a settlement, section 303 of the Trade Act of 1974 requires the USTR to use the dispute settlement procedures that are available under the subject agreement. If the matter is not resolved by the conclusion of the investigation, section 304 of the Trade Act of 1974 requires the USTR to determine whether the practices in question deny U.S. rights under a trade agreement; whether they are unjustifiable, unreasonable, or discriminatory; and whether they burden or restrict U.S. commerce. If the practices are determined to violate a trade agreement or to be unjustifiable, the USTR must take action.²⁶ If the practices are determined to be unreasonable or discriminatory and to burden or restrict U.S. commerce, the USTR must determine whether action is appropriate and, if so, what type of action to

²¹ For additional information, see U.S. Department of Commerce, EDA website, <http://www.taacenters.org/index.html>.

²² According to the U.S. Department of Commerce, “[w]e work with a variety of manufacturers and for some, imports represent only a minor challenge. For others, they pose a serious threat. Regardless of the degree of impact, a firm may be eligible if it experienced sales and employment declines at least partially due to imports over the last two years.” U.S. Department of Commerce, EDA, “Trade Adjustment Assistance for Firms: Frequently Asked Questions,” undated.

²³ TAA pays for half of the cost of these services, up to \$150,000 in projects with a maximum TAA share of \$75,000. Actual levels of assistance depend on a variety of factors. U.S. Department of Commerce, EDA, “Trade Adjustment Assistance for Firms: Program Benefits,” undated.

²⁴ U.S. Department of Commerce, EDA, “Announcement of Federal Funding Opportunity,” undated.

²⁵ Section 301 refers to sections 301-310 of the Trade Act of 1974, as amended (19 U.S.C. 2411-2420).

²⁶ Section 301(a) of the Trade Act of 1974, as amended (19 U.S.C. 2411(a)).

take.²⁷ The time period for making these determinations varies according to the type of practices alleged.

There was one active section 301 case in 2008, which is described below. There were no new section 301 petitions filed in 2008.

Active Section 301 Case in 2008

The one section 301 case active in 2008 concerned the European Union's (EU) meat hormone directive. Under section 301, the United States had imposed additional 100 percent ad valorem duties in 1999 on about \$117 million in imports from the EU, following a successful WTO challenge of an EU law that bans imports of meat from animals that have been treated with certain hormones.²⁸ Thereafter, the EU modified its hormone directive and initiated the dispute settlement process at the WTO to consider whether the EU's modified hormone regime complied with the EU's WTO obligations. A WTO panel issued a report in March 2008, and the panel report was appealed to the Appellate Body, which issued its report in October 2008. The Appellate Body was unable to determine whether the EU's modified hormone regime was WTO-consistent but confirmed that the original authorization to impose additional duties was still valid. Therefore, the additional duties remained in effect throughout 2008.²⁹ The WTO Dispute Settlement Body approved the Appellate Body report in November 2008. As provided under sections 306 and 307 of the Trade Act of 1974, USTR initiated a review of the actions taken under section 301 in the beef hormone case and solicited public comments on the advisability of modifying the list of products that are subject to additional duties.³⁰ At year-end, that process was ongoing, while the United States and the EU continued consultations to resolve the dispute.³¹

Special 301

The Special 301 law³² requires the USTR each year to identify foreign countries that deny adequate and effective protection of intellectual property rights (IPR) or deny fair and equitable market access to U.S. persons who rely on IPR protection.³³ Under the statute, countries are considered to deny adequate and effective IPR protection if they do not allow foreign persons "to secure, exercise, and enforce rights related to patents, process patents, registered trademarks, copyrights, and mask works."³⁴ Countries are

²⁷ Section 301(b) of the Trade Act of 1974, as amended (19 U.S.C. 2411(b)).

²⁸ 64 Fed. Reg. 40638 (July 27, 1999).

²⁹ The additional duties are set forth in subheadings 9903.02.21 through 9903.02.47 of the Harmonized Tariff Schedule of the United States (2009).

³⁰ 73 Fed. Reg. 66066 (November 6, 2008).

³¹ The United States and EU signed a Memorandum of Understanding on May 13, 2009. For more information on this dispute, see chap. 3 section on WTO dispute settlement and chap. 5 section on the EU.

³² The Special 301 law is set forth in Section 182 of the Trade Act of 1974, as amended (19 U.S.C. 2242).

³³ Persons who rely on IPR protection means persons involved in: "(A) the creation, production or licensing of works of authorship ... that are copyrighted, or (B) the manufacture of products that are patented or for which there are process patents." Section 182(d)(1) of the Trade Act of 1974, as amended (19 U.S.C. 2242(d)(1)).

³⁴ A "mask work" is a "series of related images, however fixed or encoded—(A) having or representing the predetermined, three-dimensional pattern of metallic, insulating, or semiconductor material present or removed from the layers of a semiconductor chip product; and (B) in which series the relation of the images to one another is that each image has the pattern of the surface of one form of the semiconductor chip product." Section 901(a)(2) of the Semiconductor Chip Protection Act (14 U.S.C. 901(a)(2)) and Section 182(d)(2) of the Trade Act of 1974, as amended (19 U.S.C. 2242(d)(2)).

considered to deny fair and equitable market access if they deny access to a market for a product that is protected by a copyright or related right, patent, trademark, mask work, trade secret, or plant breeder's right through the use of laws and practices that violate international agreements or that constitute discriminatory nontariff trade barriers. A country can be found to deny adequate and effective IPR protection even if it is in compliance with its obligations under the WTO Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS Agreement).³⁵

In addition, the Special 301 law directs the USTR to identify so-called priority foreign countries.³⁶ Priority foreign countries are countries that have the most onerous or egregious acts, policies, or practices that have the greatest adverse impact (actual or potential) on the relevant U.S. products. Such countries must be designated as priority foreign countries unless they are entering into good faith negotiations or making significant progress in bilateral or international negotiations to provide adequate and effective IPR protection. The identification of a country as a priority foreign country triggers a section 301 investigation, unless the USTR determines that the investigation would be detrimental to U.S. economic interests.

In addition to identifying priority foreign countries as required by statute, the USTR has adopted a practice of naming countries to either the so-called watch list or the priority watch list if the countries' IPR laws and practices do not provide adequate and effective IPR protection, but the deficiencies do not warrant identification of the countries as priority foreign countries. The priority watch list is for countries with significant IPR problems that warrant close monitoring and bilateral consultation. A country that is identified on the priority watch list may make progress and thereby be downgraded to the watch list or removed from any listing. Alternatively, a country that fails to make progress may be elevated from the watch list to the priority watch list or from the priority watch list to the list of priority foreign countries.

In the 2008 Special 301 review, the USTR examined the adequacy and effectiveness of IPR protection in 78 countries.³⁷ In conducting the review, the USTR focused on a wide range of issues and policy objectives, including the need for significantly improved enforcement against counterfeiting and piracy, Internet piracy, counterfeit pharmaceuticals, transshipment of pirated and counterfeit goods, ensuring that foreign government ministries only use legally authorized and properly licensed business software, proper implementation of the TRIPS Agreement by developed and developing countries, and full implementation of TRIPS Agreement standards by new WTO members at the time of their accession.³⁸

In the 2008 Special 301 review, no countries were identified as priority foreign countries. The 2008 Special 301 report identified nine countries on the priority watch list and highlighted weak IPR protection and enforcement in China and Russia, both of which were maintained on the priority watch list. In addition, Argentina, Chile, India, Israel, Thailand, and Venezuela were maintained on the priority watch list due to significant concerns regarding IPR protection. Pakistan was elevated to the priority watch list from the watch list because Pakistan failed to make progress in enacting legislation to provide more effective protection for patented pharmaceuticals. Thirty-six countries were placed on the watch list, including Egypt, Lebanon, Turkey, and Ukraine, which were downgraded from the priority watch list, and Algeria, Greece, Norway, and Spain, which

³⁵ Section 182(d)(4) of the Trade Act of 1974, as amended (19 U.S.C. 2242(d)(4)).

³⁸ *Ibid.*

were added to the watch list. Lastly, Belize and Lithuania were removed from the watch list due to improved IPR enforcement.³⁹

Antidumping and Countervailing Duty Investigations and Reviews

Antidumping Investigations

The U.S. antidumping law is contained in Title VII of the Tariff Act of 1930, as amended.⁴⁰ The antidumping law provides relief in the form of special additional duties that are intended to offset margins of dumping. Antidumping duties are imposed when (1) Commerce, the administering authority, has determined that imports are being, or are likely to be, sold at less than fair value (LTFV) in the United States, and (2) the Commission has determined that a U.S. industry is materially injured or threatened with material injury or that the establishment of an industry in the United States is materially retarded by reason of such imports. Most investigations are conducted on the basis of a petition filed with Commerce and the Commission by or on behalf of a U.S. industry.

In general, imports are considered to be sold at LTFV when the U.S. price (i.e., the purchase price or the exporter's sales price, as adjusted) is less than the foreign market value, which is usually the home-market price or, in certain cases, the price in a third country, or a constructed value, calculated as set out by statute.⁴¹ The antidumping duty is calculated to equal the difference between the U.S. price and the foreign-market value. The duty specified in an antidumping order reflects the dumping margin found by Commerce during its period of investigation. This rate of duty will be applied to subsequent imports from the specified producers/exporters in the subject country, but this rate may be adjusted if Commerce receives a request for an annual review.

Commerce and the Commission each conduct preliminary and final antidumping investigations in making their separate determinations.⁴² The Commission instituted 13 new antidumping investigations and completed 32 investigations during 2008.⁴³ Antidumping duties were imposed in 2008 as a result of affirmative Commission determinations in 23 of those completed investigations on 13 products from 11 countries (table 2.1).

Details on all antidumping investigations active at the Commission during 2008 are presented in appendix table A.4. A list of all antidumping duty orders, including

³⁹ Ibid.

⁴⁰ 19 U.S.C. 1673 et seq.

⁴¹ 19 U.S.C. 1677b; 19 CFR part 353, subpart D.

⁴² Upon the filing of a petition, the Commission has 45 days to determine whether there is a reasonable indication that an industry in the United States is materially injured or threatened with material injury, or that the establishment of an industry in the United States is materially retarded, by reason of imports of the merchandise subject to the investigation. This is known as the preliminary phase of the investigation. If the Commission makes an affirmative determination, Commerce continues its investigation and makes preliminary and final determinations concerning whether the imported merchandise is being, or is likely to be, sold at LTFV. If Commerce reaches a final affirmative dumping determination, the Commission has 45 days to make its final injury determination. If the Commission's reasonable indication, or preliminary phase, determination is negative, both the Commission and Commerce terminate further investigation.

⁴³ Data reported here and in the following two sections ("Countervailing Duty Investigations" and "Reviews of Outstanding Antidumping and Countervailing Duty Orders/Suspension Agreements") reflect the total number of investigations. In other Commission reports these data are grouped by product because the same investigative team and all of the parties participate in a single grouped proceeding, and the Commission generally produces one report and issues one opinion containing its separate determinations for each investigation.

suspension agreements,⁴⁴ in effect as of the end of the year is presented in appendix table A.5.

In 2008, the U.S. Supreme Court agreed to consider an appeal involving an antidumping determination of the Department of Commerce with respect to low-enriched uranium.⁴⁵ The Court last agreed to consider an appeal involving a countervailing duty or antidumping determination in the late 1970s. On January 26, 2009, the Supreme Court issued its decision in the Eurodif case, affirming Commerce's decision to treat certain sales of low-enriched uranium as sales of goods under the antidumping laws. The Court stated that, when an agency exercises this authority in the course of adjudication, "its interpretation governs in the absence of unambiguous statutory language to the contrary or unreasonable resolution of language that is ambiguous."⁴⁶

Countervailing Duty Investigations

The U.S. countervailing duty law is also set forth in Title VII of the Tariff Act of 1930, as amended. It provides for the levying of special additional duties to offset foreign subsidies on products imported into the United States.⁴⁷ In general, procedures for such investigations are similar to those under the antidumping law. Petitions are filed with Commerce (the administering authority) and with the Commission. Before a countervailing duty order can be issued, Commerce must find a countervailable subsidy and the Commission must make an affirmative determination of material injury, threat of material injury, or material retardation by reason of the subsidized imports.

The Commission instituted six new countervailing duty investigations and completed seven during 2008. Countervailing duties were imposed in 2008 as a result of affirmative Commission determinations in all seven completed investigations on seven products from China (table 2.2).

Details on all countervailing duty investigations active at the Commission during 2008 are presented in appendix table A.6, and a list of all countervailing duty orders, including suspension agreements,⁴⁸ in effect at the end of the year is presented in appendix table A.7.

⁴⁴ An antidumping investigation may be suspended if exporters accounting for substantially all of the imports of the merchandise under investigation agree either to eliminate the dumping or to cease exports of the merchandise to the United States within six months. In extraordinary circumstances, an investigation may be suspended if exporters agree to revise prices to eliminate completely the injurious effect of exports of the subject merchandise to the United States. A suspended investigation is reinstated if LTFV sales recur. See 19 U.S.C. 1673c.

⁴⁵ *United States v. Eurodif S.A.*, 129 S. Ct. 878 (2009).

⁴⁶ *Ibid.*, 886.

⁴⁷ A subsidy is defined as a "bounty or grant bestowed directly or indirectly by any country, dependency, colony, province, or other political subdivision on the manufacture, production, or export of products." See 19 U.S.C. 1677(5) and 1677-1(a).

⁴⁸ A countervailing duty investigation may be suspended if the government of the subsidizing country or exporters accounting for substantially all of the imports of the merchandise under investigation agrees to eliminate the subsidy, to completely offset the net subsidy, or to cease exports of the merchandise to the United States within six months. In extraordinary circumstances, an investigation may be suspended if the government of the subsidizing country or exporters agrees to eliminate completely the injurious effect of exports of the subject merchandise to the United States. A suspended investigation is reinstated if subsidization recurs. See 19 U.S.C. 1671c.

TABLE 2.1 Antidumping duty orders that became effective during 2008

Country	Product	Range of duty (percent)
Australia	Electrolytic manganese dioxide	83.66
Brazil	Polyethylene terephthalate film, sheet, and strip	28.72 to 44.36
China	Circular welded carbon-quality steel pipe	69.20 to 85.55
China	Electrolytic manganese dioxide	149.92
China	Laminated woven sacks	64.28 to 91.73
China	Light-walled rectangular pipe and tube	249.12 to 264.64
China	Lightweight thermal paper	19.77 to 115.29
China	Off-the-road tires	0.00 to 210.48
China	Polyethylene terephthalate film, sheet, and strip	3.49 to 76.72
China	Raw flexible magnets	105.00 to 185.28
China	Sodium hexametaphosphate	92.02 to 188.05
China	Sodium nitrite	190.74
China	Steel nails	0.00 to 118.04
China	Steel wire garment hangers	15.83 to 187.25
Germany	Lightweight thermal paper	6.50
Germany	Sodium nitrite	150.82 to 237.00
Korea	Light-walled rectangular pipe and tube	0.92 (de minimis) to 30.66
Mexico	Light-walled rectangular pipe and tube	2.40 to 11.50
South Africa	Uncovered innerspring units	121.39
Taiwan	Raw flexible magnets	31.20 to 38.03
Turkey	Light-walled rectangular pipe and tube	27.04 to 41.71
United Arab Emirates	Polyethylene terephthalate film, sheet, and strip	4.05
Vietnam	Uncovered innerspring units	116.31

Reviews of Outstanding Antidumping and Countervailing Duty Orders/Suspension Agreements

Section 751 of the Tariff Act of 1930 requires Commerce, if requested, to conduct annual reviews of outstanding antidumping and countervailing duty orders to determine the amount of any net subsidy or dumping margin and to determine compliance with suspension agreements. Section 751 also authorizes Commerce and the Commission, as appropriate, to review certain outstanding determinations and agreements after receiving information or a petition that shows changed circumstances. In these circumstances, the party seeking revocation or modification of an antidumping or countervailing duty order or suspension agreement has the burden of persuading Commerce and the Commission that circumstances have changed sufficiently to warrant review and revocation. On the basis of either of these reviews, Commerce may revoke an antidumping or countervailing

duty order in whole or in part or terminate or resume a suspended investigation. No changed circumstances investigations were active at the Commission during 2008.

The Uruguay Round Agreements Act amended section 751 of the Tariff Act of 1930 to require both Commerce and the Commission to conduct sunset reviews of outstanding orders and suspension agreements five years after their publication to determine whether revocation of an order or termination of a suspension agreement would be likely to lead to continuation or recurrence of dumping or a countervailable subsidy and material injury.⁴⁹ During 2008, Commerce and the Commission instituted 26 sunset reviews of existing antidumping and countervailing duty orders and suspension agreements and the Commission completed 25 reviews, resulting in 16 antidumping and countervailing duty orders and suspension agreements being continued for five additional years.⁵⁰ Appendix table A.8 shows completed reviews of antidumping and countervailing duty orders and suspension agreements in 2008.⁵¹

Section 337 Investigations

Section 337 of the Tariff Act of 1930, as amended, authorizes the Commission, on the basis of a complaint or on its own initiative, to conduct investigations with respect to certain practices in import trade.⁵² Section 337 declares unlawful the importation into the United States, the sale for importation, or the sale within the United States after importation of articles that infringe a valid and enforceable U.S. patent, registered trademark, registered copyright, registered mask work, or registered vessel hull design, for which a domestic industry exists or is in the process of being established.⁵³

If the Commission determines that a violation exists, it can issue an order to exclude the subject imports from entry into the United States and order the violating parties to cease and desist from engaging in the unlawful practices.⁵⁴ The orders enter into force unless disapproved for “policy reasons” by the USTR within 60 days of issuance.

⁴⁹ 19 U.S.C. 1675c.

⁵⁰ Three of the 26 sunset reviews were subsequently terminated and the outstanding orders revoked because a domestic industry did not request that they be continued. The two revoked antidumping duty orders were on ceramic station post insulators from Japan and lawn and garden steel fence posts from China. The one revoked countervailing duty order was on DRAMs and DRAM modules from Korea.

⁵¹ For detailed information on reviews instituted, as well as Commission action in all reviews, see the Commission’s Web site section entitled “Five-Year (Sunset) Reviews,” at <http://info.usitc.gov/oinv/sunset.NSF>.

⁵² 19 U.S.C. 1337.

⁵³ Also unlawful under section 337 are other unfair methods of competition and unfair acts in the importation of articles into the United States, or in the sale of imported articles, the threat or effect of which is to destroy or substantially injure a domestic industry, to prevent the establishment of an industry, or to restrain or monopolize trade and commerce in the United States. Examples of such other unfair acts are misappropriation of trade secrets, common law trademark infringement, trade dress infringement, false advertising, and false designation of origin. Unfair practices that involve the importation of dumped or subsidized merchandise must be pursued under antidumping or countervailing duty provisions, not under section 337.

⁵⁴ Section 337 proceedings at the Commission are conducted before an administrative law judge in accordance with the Administrative Procedure Act, 5 U.S.C. 551 et seq. The administrative law judge conducts an evidentiary hearing and makes an initial determination, which is transmitted to the Commission. The Commission may adopt the determination by deciding not to review it, or it may choose to review it. If the Commission finds a violation, it must determine the appropriate remedy, the amount of any bond to be collected while its determination is under review by the President, and whether public interest considerations preclude the issuance of a remedy.

During calendar year 2008, there were 89 active section 337 investigations and ancillary proceedings, 47 of which were instituted in 2008. Of these 47, there were 41 new section 337 investigations and 6 new ancillary proceedings relating to previously concluded investigations. Thirty-seven of the new section 337 institutions in 2008 included allegations of patent infringement, four involved registered trademarks, one involved trade secrets, and one involved trade dress.⁵⁵ The Commission completed a total of 38 investigations and ancillary proceedings under section 337 in 2008, including one advisory opinion proceeding, one bond forfeiture proceeding, and one remand proceeding. Four exclusion orders and two cease and desist orders were issued during 2008. Nineteen investigations were also terminated by the Commission without determining whether section 337 had been violated. Twelve of these investigations were terminated on the basis of settlement agreements or consent orders.

Approximately one-third of the active investigations in 2008 concerned products in the semiconductor, telecommunications, computer, and consumer electronics fields. These investigations concerned products such as digital televisions, cellular telephones, personal computers, global positioning system (GPS) devices, and flash memory controllers. There were also a number of investigations involving medical devices such as catheters used in cryosurgery and vein harvesting surgical systems. Another group of investigations involved chemical products, including sucralose and an automotive coolant. Other section 337 investigations active during the year focused on a variety of consumer items, including ground fault circuit interrupters, noise cancelling headphones, and self-cleaning litter boxes.

At the close of 2008, 52 section 337 investigations and related proceedings were pending at the Commission. Commission activities involving section 337 actions in 2008 are presented in appendix table A.9. As of December 31, 2008, exclusion orders based on violations of section 337 were in effect for 67 investigations. Appendix table A.10 lists the investigations in which these exclusion orders were issued.

Tariff Preference Programs

Generalized System of Preferences

The U.S. Generalized System of Preferences (GSP) program authorizes the President to grant duty-free access to the U.S. market for certain products that are imported from designated developing countries and territories. Authorization for the GSP program was extended in October 2008 and is currently set to expire on December 31, 2009.⁵⁶

The program is authorized by Title V of the Trade Act of 1974, as amended.⁵⁷ By offering unilateral tariff preferences, the GSP program reflects the U.S. commitment to three broad goals: (1) to promote economic development in developing and transitioning economies through increased trade, rather than foreign aid; (2) to reinforce U.S. trade policy objectives by encouraging beneficiaries to open their markets, to comply more fully with international trading rules, and to assume greater responsibility for the international trading system; and (3) to help maintain U.S. international competitiveness

⁵⁵ Two of the investigations involved more than one type of intellectual property right.

⁵⁶ Pub. L. 110-436.

⁵⁷ 19 U.S.C. 2461 et seq.

by lowering costs of imports for U.S. business and lowering prices for American consumers. Certain additional products are allowed duty-free treatment when imported only from countries designated as least-developed beneficiary developing countries (LDBDC).

Countries are designated as “beneficiary developing countries” under the GSP program by the President, although countries can be removed from designation based on petitions alleging improper country practices, including inadequate protection of intellectual property rights or internationally recognized worker rights. The President also designates the articles that are eligible for duty-free treatment, but may not designate articles that he determines to be “import-sensitive” in the context of the GSP. Certain articles (for example, footwear, textiles, and apparel) are designated by statute as “import-sensitive” and thus not eligible for duty-free treatment under the GSP program. The statute also provides for graduation of countries from the program when they become “high-income” countries and for removal of eligibility of articles, or articles from certain countries, under certain conditions. The extension of the GSP program in 2006 provided that a competitive need limitation (CNL) waiver in effect with respect to a product for five or more years should be revoked if U.S. imports from that supplier meet certain “super-competitive” value thresholds.⁵⁸ The following developments with respect to the U.S. GSP program occurred in 2008:

- On April 17, 2008, Solomon Islands was designated a least-developed GSP beneficiary (Solomon Islands was already a GSP beneficiary).⁵⁹
- On June 30, 2008, a number of changes were announced based on the 2007 Annual Review of GSP. The Republic of Serbia and the Republic of Montenegro were separately granted GSP beneficiary status (replacing beneficiary status for Serbia and Montenegro as one country). The graduation of Trinidad and Tobago from the GSP program, to be effective January 1, 2010, for reaching high income, was announced. In addition, a number of products were excluded for exceeding CNLs; other products were granted CNL waivers; still others, which had previously received CNL waivers, had those waivers revoked as “super-competitive.”⁶⁰
- On December 19, 2008, Kosovo and Azerbaijan were designated GSP beneficiaries.⁶¹

Duty-free imports entered under the GSP program totaled \$31.7 billion in 2008, accounting for 8.6 percent of total U.S. imports from GSP beneficiary countries and 1.5 percent of total imports (table 2.3). Angola was the leading GSP beneficiary in 2008, followed by India, Thailand, Equatorial Guinea, Brazil, and Indonesia. More than one-third of the total value of all duty-free entries under the GSP were petroleum products (which only enter free of duty under the GSP when imported from LDBDCs, including Angola and Equatorial Guinea). Appendix table A.11 shows the top 20 products imported under the GSP in 2008, and appendix table A.12 shows the overall sectoral distribution of GSP benefits.

TABLE 2.3 U.S. imports for consumption from GSP beneficiaries and the world, 2008

Item	All GSP beneficiaries	World
	<i>(Millions of \$)</i>	
Total U.S. imports	369,697	2,073,837
Non-GSP eligible imports	310,355	1,103,350
GSP eligible products ^a	59,342	970,487
GSP Non-LDBDC eligible ^b	35,317	386,499
GSP LDBDC eligible ^c	24,025	583,988
Total GSP duty-free imports	31,652	31,652
Non-LDBDC GSP duty free	20,636	20,636
GSP LDBDC duty free	11,017	11,017
Total of GSP eligible products not benefitting from GSP duty-free treatment ^d	27,690	938,835
GSP program exclusions	9,312	9,312
All other	18,377	929,522

Source: Compiled from official statistics of the U.S. Department of Commerce.

Note: Customs-value basis; excludes imports from the U.S. Virgin Islands

^a Includes imports from all beneficiary countries for the articles that are designated as eligible articles under GSP.

^b Non-LDBDC (least-developed beneficiary developing countries) eligible products are those for which a rate of duty of "Free" appears in the Special rate column of the Harmonized Tariff Schedule of the United States (HTS) followed by the symbols "A" or "A*" in parentheses (the symbol "A" indicates that all beneficiary countries are eligible for duty-free treatment with respect to all articles provided for in the designated provisions and the symbol "A*" indicates that certain beneficiary countries, specified in general note 4(d) of the HTS, are not eligible for duty-free treatment with respect to any article provided for in the designated provision).

^c LDBDC eligible products are those for which a rate of duty "Free" appears in the Special rate column of the HTS followed by the symbol "A+" in parentheses (the symbol "A+" indicates that all LDBDCs (and only LDBDC's) are eligible for duty-free treatment with respect to all articles provided for in the designated provisions).

^d For a variety of reasons, all imports from beneficiary countries under HTS provisions that appear to be eligible for GSP treatment do not always and necessarily receive duty-free entry under the GSP. Such eligible imports may not receive duty-free treatment under GSP for at least five types of reasons: (1) the importers fail to claim GSP benefits affirmatively; (2) the goods are from a GSP beneficiary that lost GSP benefits on that product for exceeding the so-called competitive need limits; (3) the goods are from a GSP beneficiary country that lost GSP benefits on that product because of a petition to remove that country from GSP for that product or because of some other action by the President or USTR; (4) the GSP beneficiary country may claim duty-free treatment under some other program or provision of the HTS; and (5) the good fails to meet the rule of origin or direct shipment requirement of the GSP statute.

African Growth and Opportunity Act

In 2008, articles entering the United States free of duty under the African Growth and Opportunity Act (AGOA) were valued at \$56.4 billion; petroleum products accounted for more than 93 percent of such imports, down from about 95 percent in 2007. AGOA was enacted in 2000 to provide unilateral preferential trade benefits to eligible sub-Saharan African (SSA) countries pursuing political and economic reform.⁶² AGOA provides duty-free market access to all GSP eligible products and more than 1,800 additional qualifying

⁶² In addition to providing preferential access to the U.S. market for eligible SSA products, AGOA also includes a number of trade-facilitating provisions. For further information, see USTR, "2008 Comprehensive Report on U.S. Trade and Investment Policy Toward Sub-Saharan Africa and Implementation of the African Growth and Opportunity Act," 21.

tariff line-item products from designated SSA countries, and exempts these beneficiaries from GSP CNLs. AGOA also provides duty-free treatment for certain apparel articles made in qualifying SSA countries. AGOA is scheduled to be in effect until 2015.⁶³ Total U.S. imports from AGOA countries were valued at \$81.4 billion in 2008, an increase of 26.2 percent over 2007 (table 2.4). This increase in total imports was driven primarily by increased imports of petroleum products, which increased by approximately 30 percent, and represented more than 83 percent of total imports from AGOA countries.⁶⁴ Duty-free U.S. imports under AGOA, including under the GSP program, were valued at \$66.3 billion in 2008, accounting for 81 percent of total imports and representing an increase of 29.8 percent over 2007. U.S. imports under AGOA, exclusive of the GSP program, were valued at \$56.4 billion in 2008, a 33.4 percent increase over 2007, and accounted for 69.2 percent of all imports from AGOA countries.

The leading suppliers of duty-free U.S. imports under AGOA in 2008 were Nigeria (62.7 percent of total AGOA imports), Angola (17.4 percent), Republic of the Congo (4.7 percent), South Africa (4.3 percent), Chad (4.1 percent), and Gabon (3.8 percent). These six countries accounted for 97.0 percent of total imports by value under AGOA, a slight increase over 2007 (appendix table A.13). Of the leading imports under AGOA, petroleum-related products increased to \$52.8 billion in 2008, up 31.5 percent by value from 2007, and accounted for 93.7 percent of the total value of AGOA imports in 2008, a slight decrease over 2007 (appendix table A.14).⁶⁵ Imports of apparel in 2008 were

TABLE 2.4 U.S. imports for consumption from AGOA countries, 2006-08

Item	2006	2007	2008

Total under AGOA as a percent of total	64.5	65.5	69.2

Source: Compiled from official statistics of the U.S. Department of Commerce.

^a AGOA eligible products are those for which a rate of duty “Free” appears in the Special rate column of the HTS followed by the symbol “D” in parentheses (the symbol “D” indicates that all AGOA beneficiaries are eligible for duty-free treatment with respect to all articles provided for in the designated provisions). In addition, provisions of subchapters II and XIX of chapter 98 of the HTS set forth specific categories of AGOA-eligible products, under the terms of separate country designations enumerated in subchapter notes.

⁶³ AGOA was originally scheduled to be in effect through September 30, 2008. Section 3108 of the Trade Act of 2002 enhanced the original 2000 AGOA provisions and expanded preferential access for apparel imports from SSA beneficiaries (these modifications collectively are referred to as AGOA II). The AGOA Acceleration Act of 2004 (AGOA III) enhanced many of the original AGOA trade benefits and generally extended AGOA provisions until 2015. The Africa Investment Incentive Act of 2006 (AGOA IV) extended the textile and apparel provisions from September 2008 to September 2015, extended the provision allowing for the use of third-party fabric in qualifying duty-free apparel imports from September 2007 to September 2012, and expanded duty-free treatment for textiles and textile products originating entirely in one or more lesser-developed beneficiary countries (LDBCs). AGOA IV also increased the cap for apparel made from third-party fabric to 3.5 percent of U.S. apparel imported into the United States in the preceding 12-month period beginning October 1, 2006. In this report, the term AGOA refers to the original AGOA, AGOA II, AGOA III, and AGOA IV, as a group. For additional information, see USTR, “2008 Comprehensive Report.”

⁶⁴ Although petroleum products only enter duty free under GSP for LDBCs, the duty-free preference for petroleum products extends to all AGOA beneficiaries.

⁶⁵ The increase in imports of petroleum and related products reflects increasing prices. Import quantities from the five leading AGOA petroleum suppliers (Nigeria, Angola, Republic of the Congo, Chad, and Gabon) actually decreased from 675.1 million barrels in 2007 to 634.2 million barrels in 2008 (approximately -6.1 percent). U.S. Department of Energy, EIA, Official Energy Statistics Database, “U.S. Imports by Country of Origin,” (accessed April 3, 2009).

approximately \$1.1 billion, and accounted for 2.0 percent of total AGOA imports by value, compared to approximately \$1.3 billion, or 3.0 percent, in 2007.

Each year, the President must consider whether SSA countries⁶⁶ are, or remain, eligible for AGOA benefits based on specific criteria.⁶⁷ At the end of 2008, a total of 41 SSA countries were designated as eligible for AGOA benefits,⁶⁸ and 27 SSA countries were eligible for AGOA textile and apparel benefits.⁶⁹ During 2008, Comoros and Togo became eligible for AGOA benefits, and The Gambia became eligible for apparel benefits.

On October 16, 2008, President Bush signed legislation redesignating Mauritius as eligible for benefits under AGOA's third-country fabric provision.⁷⁰ The legislation also repealed amendments to AGOA that required Commission determinations with respect to the availability and use of regional SSA fabric, and related amendments (also known as the "abundant supply provision").⁷¹ The legislation also required the Commission to conduct a one-time review to identify yarns, fabrics, and other textile and apparel inputs that can be produced competitively in beneficiary sub-Saharan African countries through new or increased investment or other measures. The Commission delivered its report, *Sub-Saharan African Textile and Apparel Inputs: Potential for Competitive Production*, to the House of Representatives' Committee on Ways and Means, the Senate Committee on Finance, and the General Accounting Office on May 15, 2009.⁷²

Section 105 of AGOA requires the President to establish the U.S.-SSA Trade and Economic Cooperation Forum. AGOA also requires the USTR and the Secretaries of State, Commerce, and the Treasury to host meetings with senior-level officials from governments of countries that are eligible for AGOA benefits to discuss their trade, investment, and development relationships. The seventh AGOA Forum was held in Washington, DC, July 14-16, 2008. The theme of the forum was "Mobilizing Private Investment for Trade and Growth." The forum's focus was on "creating a business

⁶⁶ 19 U.S.C. 3706 lists a total of 48 countries, or their successor political entities, as potential beneficiaries.

⁶⁷ 19 U.S.C. 3703(a). See also USTR, "2008 Comprehensive Report," 21-22.

⁶⁸ The following 39 countries are listed in general note 16 of the 2008 HTS as designated AGOA eligible beneficiaries: Angola, Benin, Botswana, Burkina Faso, Burundi, Cameroon, Cape Verde, Chad, Democratic Republic of the Congo, Djibouti, Ethiopia, Gabon, The Gambia, Ghana, Guinea, Guinea-Bissau, Kenya, Lesotho, Liberia, Madagascar, Malawi, Mali, Mauritania, Mauritius, Mozambique, Namibia, Niger, Nigeria, Republic of the Congo, Rwanda, São Tomé and Príncipe, Senegal, Seychelles, Sierra Leone, South Africa, Swaziland, Tanzania, Uganda, and Zambia. USITC, "HTS 2008 (Rev. 2)," April 1, 2008, 166. During 2008, Comoros and Togo were also designated as AGOA eligible beneficiaries. USITC, "HTS 2008 (Supplement-1)," July 1, 2008, 166. Effective January 1, 2009, Mauritania's designation as an AGOA beneficiary country was terminated. White House, "To Take Certain Actions Under the African Growth and Opportunity Act and the Generalized System of Preferences," December 19, 2008.

⁶⁹ The following 26 countries are listed in U.S. Note 7 of the HTS as eligible to receive AGOA apparel benefits during 2008: Benin, Botswana, Burkina Faso, Cameroon, Cape Verde, Chad, Ethiopia, Ghana, Kenya, Lesotho, Madagascar, Malawi, Mali, Mauritius, Mozambique, Namibia, Niger, Nigeria, Rwanda, Senegal, Sierra Leone, South Africa, Swaziland, Tanzania, Uganda, and Zambia. USITC, "HTS 2008 (Rev. 2)," April 1, 2008, sect. xxii, 98-II-3. During 2008, The Gambia was also designated to receive AGOA apparel benefits. USITC, "HTS 2008 (Supplement-1)," July 1, 2008, sect. xxii, 98-II-3.

⁷⁰ Section 3 of the Andean Trade Preference Extension Act (Pub. L. 110-436). On December 3, 2004, the President signed into law the Miscellaneous Trade and Technical Corrections Act of 2004, which amended AGOA III to grant LDBDC status to Mauritius allowing producers there to use third-country fabric in qualifying apparel. The designation was only effective for a 1-year period beginning October 1, 2004.

⁷¹ Section 3 of the Andean Trade Preference Extension Act (Pub. L. 110-436). For information about these provisions, see USITC, *The Year in Trade 2007, 2008*, 2-15-2-16.

⁷² USITC, *Sub-Saharan African Textile and Apparel Inputs*, 2009.

climate that will encourage private investment and help mobilize capital to finance investment.”⁷³

Andean Trade Preference Act

In 2008, articles from Bolivia, Colombia, Ecuador, and Peru entering the United States free of duty under the Andean Trade Preference Act (ATPA) increased 40.1 percent to \$17.2 billion, driven primarily by increased imports of petroleum and petroleum products (table 2.5). ATPA was enacted in 1991 to promote broad-based economic development and viable economic alternatives to coca cultivation and cocaine production by offering Andean products broader access to the U.S. market.⁷⁴ ATPA expired on December 4, 2001, but was renewed and expanded by the Andean Trade Promotion and Drug Eradication Act (ATPDEA), part of the Trade Act of 2002.⁷⁵ ATPA, as amended by ATPDEA, has expired several times.⁷⁶ On October 16, 2008, ATPA was extended through December 31, 2009, for Colombia and Peru and through June 30, 2009, for Bolivia and Ecuador with provisions for reviews of their eligibility under ATPA requirements. Benefits for Ecuador will continue unless the President determines that Ecuador does not satisfy the eligibility requirements set forth in the ATPA. ATPA benefits will continue for Bolivia only if the President determines that Bolivia has

^a ATPDEA eligible products are those for which a rate of duty “Free” appears in the Special rate column of the HTS followed by the symbol “J+” in parentheses (the symbol “J+” indicates that all ATPDEA beneficiary countries are eligible for duty-free treatment with respect to all articles provided for in the designated provisions).

^b ATPA (excluding ATPDEA) eligible products are those for which a special duty rate appears in the Special rate column of the HTS followed by the symbols “J” or “J*” in parentheses (the symbol “J” indicates that all beneficiary countries are eligible for special duty rate treatment with respect to all articles provided for in the designated provisions and the symbol “J*” indicates that certain articles, specified in general note 11(d) of the HTS, are not eligible for special duty rate treatment with respect to any article provided for in the designated provision). In addition, subchapter XXI of chapter 98 sets forth provisions covering specific products given duty-free eligibility under the ATPDEA, under the terms of separate country designations enumerated in that subchapter.

⁷³ “Seventh AGOA Forum,” www.agoa.gov (accessed March 12, 2009). For more information, see USDOC, ITA, African Growth and Opportunity Act web site, http://www.agoa.gov/agoa_forum/agoa_forum7.html.

⁷⁴ For a more detailed description of ATPA, including country and product eligibility, see USITC, *Impact of the Andean Trade Preference Act*, 2008.

⁷⁵ Pub. L. 107-210, Title XXXI. The four ATPA beneficiaries are not automatically eligible for ATPDEA preferences. ATPDEA authorizes the President to designate any ATPA beneficiary as eligible for ATPDEA benefits provided the President determines the country has satisfied certain requirements, including protection of IPR and internationally recognized workers’ rights. The President designated all four ATPA beneficiaries as ATPDEA beneficiaries on October 31, 2002. President, Proclamation, “To Implement the Andean Trade Promotion and Drug Eradication Act, Proclamation 7616.” 67 Fed. Reg. 67283-67291 (October 31, 2002).

⁷⁶ Pub. L. 109-432, sect. 7001 et seq.; Pub. L. 110-42; and Pub. L. 110-191.

satisfied ATPA eligibility requirements.⁷⁷ Effective December 15, 2008, President Bush suspended Bolivia from eligibility for failing to meet ATPA's counternarcotics cooperation criteria.⁷⁸

A wide range of products is eligible for duty-free entry under ATPA. ATPDEA amended ATPA to provide duty-free treatment for certain products previously excluded from ATPA, including certain textiles and apparel, footwear, petroleum and petroleum derivatives, watches and watch parts assembled from parts originating in countries not eligible for normal trade relations (NTR) rates of duty, and certain tuna packaged in foil or other flexible airtight packages (not cans). In addition, certain products previously eligible for reduced-duty treatment became eligible for duty-free entry under ATPA, including certain handbags, luggage, flat goods (such as wallets, change purses, and eyeglass cases), work gloves, and leather wearing apparel. Products that continue to be excluded from ATPA preferential treatment include textile and apparel articles not otherwise eligible for preferential treatment under ATPDEA and certain agricultural products. Thus, canned tuna, rum and tafia, and above-quota imports of certain agricultural products subject to tariff rate quotas (primarily sugar, beef, and dairy products) continue to be excluded from the program.

Total (dutiable and duty-free) U.S. imports from Bolivia,⁷⁹ Colombia, Ecuador, and Peru were valued at \$28.5 billion in 2008, an increase of 36.1 percent from \$20.9 billion in 2007 (table 2.5). U.S. imports entered under ATPA preferences in 2008 were valued at \$17.2 billion and accounted for 60.5 percent of all imports from ATPA countries. U.S. imports under ATPDEA were valued at \$14.6 billion and accounted for 84.5 percent of imports under ATPA in 2008. U.S. imports under the original ATPA (ATPA excluding ATPDEA) accounted for the remaining 15.5 percent, valued at \$2.7 billion.

In 2008, U.S. imports under ATPA increased from all of the beneficiary countries except Bolivia (appendix table A.15). Colombia returned to being the largest source of U.S. imports under ATPA in 2008 after trailing Ecuador in 2006 and 2007. Imports from Colombia increased 62.1 percent in value during 2008 mainly because of higher petroleum shipments and prices. Ecuador fell to the second-leading supplier of ATPA imports in 2008. Petroleum products accounted for 77 percent of U.S. imports under ATPA in 2008 and represented 6 of the top 25 U.S. imports under the program (appendix table A.16). Apparel was the next-largest category of imports under ATPA, accounting for 6 percent of such imports and 5 of the 25 leading imports under ATPA. Other leading imports under ATPA in 2008 included copper cathodes, fresh cut flowers, asparagus, and pouched tuna.

Caribbean Basin Economic Recovery Act

The Caribbean Basin Economic Recovery Act (CBERA) was enacted in 1983 as part of the Caribbean Basin Initiative (CBI) to encourage economic growth and development in the Caribbean Basin countries by promoting increased production and exports of nontraditional products through duty preferences. The Caribbean Basin Trade Partnership Act (CBTPA) amended CBERA in 2000 and expanded the list of qualifying articles, for

⁷⁷ Pub. L. 110-436. On June 30, 2009, the President did not revoke Ecuador's eligibility for ATPA benefits and did not reinstate ATPA eligibility for Bolivia.

⁷⁸ Proclamation No. 8323, 73 Fed. Reg. 72677 (November 25, 2008).

⁷⁹ Includes data for Bolivia after it lost beneficiary status on December 15, 2008.

eligible countries, to include certain apparel.⁸⁰ The CBTPA also extended NAFTA-equivalent treatment (that is, rates of duty equivalent to those accorded to goods under the same rules of origin applicable under NAFTA) to a number of other products previously excluded from CBERA, including certain tuna, petroleum and petroleum derivatives, certain footwear, watches and watch parts assembled from parts originating in countries not eligible for normal trade relations (NTR) rates of duty, and certain handbags, luggage, flat goods, work gloves, and leather wearing apparel. Products that continue to be excluded from CBERA preferential treatment include textile and apparel products not otherwise eligible for preferential treatment under the CBTPA and above-quota imports of certain agricultural products subject to tariff-rate quotas (primarily sugar, beef, and dairy products). CBTPA provisions were scheduled to expire on September 30, 2008, but were extended through September 30, 2010⁸¹—other parts of CBERA have no expiration date. In the discussions that follow, the term CBERA refers to CBERA as amended by the CBTPA.

TABLE 2.6 U.S. imports for consumption from CBERA countries, 2006-08

Item	2006 ^a	2007 ^a	2008

Source: Compiled from official statistics of the U.S. Department of Commerce.

^a Data for 2006 and 2007 include U.S. imports from El Salvador, Guatemala, Honduras, Nicaragua, and the Dominican Republic only for the period during which those countries were eligible for CBERA benefits before CAFTA-DR entered into force.

^b CBTPA eligible products are those for which a special duty rate appears in the Special rate column of the HTS followed by the symbol “R” in parentheses (the symbol “R” indicates that all CBTPA beneficiary countries are eligible for special duty rate treatment with respect to all articles provided for in the designated provisions). In addition, subchapters II and XX of chapter 98 set forth provisions covering specific products eligible for duty-free entry, under separate country designations enumerated in these subchapters (and including the former CBTPA beneficiaries enumerated in footnote a above).

^c CBERA (excluding CBTPA) eligible products are those for which a special duty rate appears in the Special rate column of the HTS followed by the symbols “E” or “E*” in parentheses (the symbol “E” indicates that all beneficiary countries are eligible for special duty rate treatment with respect to all articles provided for in the designated provisions and the symbol “E*” indicates that certain beneficiary countries or articles, specified in general note 7(d) of the HTS, are not eligible for special duty rate treatment with respect to any article provided for in the designated provision).

⁸⁰ Textiles and apparel not subject to textile agreements in 1983 (textiles and apparel of silk or noncotton vegetable fibers—mainly linen and ramie) are eligible for duty-free entry under original CBERA provisions, which do not have an expiration date.

⁸¹ Pub. L. 110-234, sect. 15408.

In 2008, 19 countries and territories were designated eligible for permanent CBERA preferences⁸² and 9 were designated eligible for CBTPA preferences.⁸³ U.S. imports under CBERA decreased by 14.0 percent to \$4.7 billion in 2008 (table 2.6).⁸⁴ The decline in U.S. imports under CBERA provisions in 2008 reflects the fact that the Dominican Republic was a beneficiary for only the first two months of 2007, and its imports since then have entered under U.S.-CAFTA-DR.⁸⁵ Over the past three years, U.S. imports under CBERA have declined in value and have accounted for a declining share of all U.S. imports from CBERA countries—38.5 percent in 2006, 28.8 percent in 2007, and 24.3 percent in 2008, mainly because the countries that left CBERA to become members of U.S.-CAFTA-DR over that period were major exporters of apparel under CBTPA provisions, whereas the remaining countries, except for Haiti, export very little apparel.

Appendix table A.17 shows U.S. imports entered under CBERA provisions from each of the CBERA countries from 2006 to 2008.⁸⁶ Trinidad and Tobago continued as the leading supplier of U.S. imports under CBERA in 2008. Appendix table A.18 shows the 25 leading U.S. imports entered under CBERA provisions from 2006 to 2008. Methanol, mineral fuels, fuel-grade ethanol, and apparel products dominated the list of duty-free imports in 2008. Three of the leading products were mineral fuels; 6 were knitted and nonknitted apparel; and the remaining 16 were products that had already qualified for benefits under the original CBERA before the implementation of the CBTPA.

HOPE Act

U.S. imports of apparel from Haiti decreased 8.8 percent to \$412.4 million in 2008. Imports of apparel in 2008 under provisions of the Haitian Hemispheric Opportunity through Partnership Encouragement Act of 2006 (HOPE Act)⁸⁷ as amended by the Haitian Hemispheric Opportunity through Partnership Encouragement Act of 2008 (HOPE II Act)⁸⁸ rose to \$75.0 million from \$13.6 million in 2007.

The HOPE Act, which was signed into law on December 20, 2006, amended CBERA to provide expanded rules of origin for inputs to apparel and wire harness automotive components assembled in Haiti and imported into the United States.⁸⁹

The HOPE Act provided expanded trade benefits beyond what the country receives under the CBTPA for up to five years, extending duty-free treatment to U.S. imports of knit and

⁸² Antigua and Barbuda, Aruba, The Bahamas, Barbados, Belize, Costa Rica, Dominica, Grenada, Guyana, Haiti, Jamaica, Montserrat, Netherlands Antilles, Panama, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Trinidad and Tobago, and the British Virgin Islands.

⁸³ Barbados, Belize, Costa Rica, Guyana, Haiti, Jamaica, Panama, St. Lucia, and Trinidad and Tobago.

⁸⁴ Table 2.6, and appendix tables A.17 and A.18 include data of four CAFTA-DR countries that were eligible for CBERA benefits during a portion of 2006 and data for the Dominican Republic, which was a CBERA beneficiary during part of 2007. When the U.S.-CAFTA-DR enters into force for a country, such country is removed from the enumeration of designated beneficiary countries under CBERA, CBTPA, and the GSP. U.S.-CAFTA-DR entered into force in 2006 for El Salvador, Guatemala, Honduras, and Nicaragua, in 2007 for the Dominican Republic, and in 2009 for Costa Rica. U.S. FTAs are discussed in more detail in chap. 4 of this report.

⁸⁵ For a description of the current level of economic development and some of the possible future trade and development strategies for CBERA beneficiary countries, see USITC, *Caribbean Growth and Development*, 2008.

⁸⁶ See footnote 80.

⁸⁸ Pub. L. 110-234, sect. 15401, et seq., the Haitian Hemispheric Opportunity through Partnership Encouragement Act of 2008 (HOPE II Act).

⁸⁹ There were no imports of wire harness automotive components from Haiti in 2007 or 2008.

woven apparel assembled in Haiti from U.S., Haitian, or third-country inputs, subject to import caps, eligibility requirements, and in most cases, value-added content requirements. The Act provided for more flexible alternative sourcing of inputs (such as yarn and fabric) than the CBTPA and has the potential to improve the competitiveness of Haitian manufacturers by allowing the use of lower cost raw materials, a primary cost component in the production of apparel.⁹⁰

The HOPE II Act extended all tariff preferences through September 30, 2018. It allowed direct shipment of goods assembled in Haiti from either Haiti or the Dominican Republic and further expanded opportunities for duty-free imports of apparel, textile luggage, and textile headgear assembled in Haiti.

⁹⁰ For more details on the special rules for apparel imported directly from Haiti under the HOPE Act, see USITC, *Special Rules for Haiti*, 2008.

CHAPTER 3

Selected Trade Developments in the WTO, OECD, and APEC

In 2008, multilateral trade negotiations under the Doha Development Agenda (the Doha Round) resumed in February under the guidance of the World Trade Organization (WTO), but reached an impasse at mid-year. In addition, the WTO carried out its regular work, in particular welcoming Ukraine and Cape Verde as new WTO members in 2008 and finalizing details concerning the Enhanced Integrated Framework, a multilateral facility to help integrate least developed countries into the multilateral world trading system. This chapter also highlights developments in the Organization for Economic Cooperation and Development (OECD) that helped support activities in the world trading system, as well as similar developments in the Asia-Pacific Economic Cooperation forum (APEC).

World Trade Organization

Multilateral trade negotiations in the Doha Development Agenda (DDA) resumed in February 2008 in the two core areas of agriculture and nonmarket access negotiations. Nonetheless, negotiators were unable to sufficiently narrow their differences in the first half of the year, in particular over a selective safeguard mechanism for trade in agricultural products. At the end of July 2008, these talks reached an impasse that remained at year-end.

Doha Trade Negotiations

In his capacity as chairman of the Trade Negotiations Committee (TNC) overseeing the Doha Round, WTO Director-General Pascal Lamy reported in January 2008 on the state of play in the round. He cited positive political expressions of support for concluding the round by the end of 2008, as well as progress on technical matters that could provide a basis for reaching a consensus on “negotiating modalities” in both the agricultural and industrial products negotiations.¹ In February 2008, revised negotiating texts in both the Agriculture Negotiating Group and the Non-Agricultural Market Access (NAMA) Group were issued by their respective chairs, the first major revision since these texts were initially tabled in July 2007.²

In May 2008, the Director-General further reported that discussions conducted in the TNC since February had focused principally on finalizing these negotiating modalities in

¹ WTO, General Council, “Annual Report (2008),” 2-3; WTO, “Informal TNC Meeting at the Level of Head of Delegation—Chairman’s Remarks,” January 31, 2008, JOB(08)/2, 1.

² WTO, “Director-General—Lamy welcomes revised agriculture and NAMA negotiating texts,” February 8, 2008, Press release 513.

the two groups.³ A second revision of the negotiating texts under consideration in these groups was released in May 2008, including a draft assessment by the chairmen of what could be agreed upon regarding possible formulas for cutting tariffs and subsidies.⁴ The two papers were circulated at roughly the same time because members link the two subjects, in part because in both groups members are seeking a balance between the depth of cuts and the size of cuts to be undertaken.⁵

Director-General Lamy also signaled that work in other areas—such as services, rules, and intellectual property matters—would need to advance to clarify certain issues.⁶ In particular, the Director-General pointed out that consultations indicated that further work would be required on two matters related to the Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS Agreement): a register for geographical indications and the relation between the WTO TRIPS Agreement and the United Nations Convention on Biological Diversity.

On July 10, 2008, a third revision of negotiating texts for the Agriculture and NAMA groups was released⁷ but after intensive negotiations and consultations, the Director-General reported on July 30, 2008, that an impasse had been reached in establishing negotiating modalities in these groups.⁸ He cited in particular a lack of convergence over the special safeguard mechanism, which would permit developing country members to apply a temporary increase in import duties to address import surges of agricultural products. This impasse dealt a setback to the goal of concluding the Doha Round in 2008, despite the progress made during the intensive negotiations in the first half of 2008.⁹

In October 2008, the Director-General reported that, despite a quick resumption of talks in the negotiating groups, the July setback made it clear that the round would not be concluded by year-end 2008.¹⁰ He reiterated that the special safeguard mechanism was a key item in the discussions in the Agriculture group. The Director-General also reported that he convened a meeting of major providers of trade finance in November 2008 to examine the issue of availability of trade financing at affordable rates for developing countries, in view of the global financial crisis.

In December 2008, despite the release of the fourth version of negotiating texts in the Agriculture and NAMA groups,¹¹ the Director-General reported that the political drive to bridge remaining gaps was insufficient to finalize negotiating modalities by year-end 2008.¹² He pointed out that several rounds of intensive consultations had focused on sectorals, the special safeguard mechanism for agricultural products, and the cotton issue affecting several least-developed country members. He also made suggestions for possible “early outcome” agreements in areas such as trade facilitation, duty- and quota-

free market access, cotton, and bananas, and noted that the issue of trade facilitation was most advanced.

As a broader result of these consultations, the Director-General proposed that members move forward in 2009 on two fronts—one, to renew efforts in the Doha Round multilateral trade negotiations, but also more broadly to strengthen the systemic nature of the WTO as a central element of the multilateral trading system.¹³ Concerning the broader nature of the WTO, the Director-General related the formation of an internal WTO task force that would provide regular updates on trade measures taken as a consequence of the global financial crisis. He reiterated the need for WTO monitoring of trade finance developments to ensure that the trade flows of developing countries are not adversely affected. The Director-General also highlighted the need for an increased focus in 2009 on the issue of Aid for Trade—the effort to establish international trade as a central element in developing and least-developed country members’ economic development policies—and noted that the second Global Review of Aid for Trade would be held in July 2009.¹⁴

General Council

In 2008, the General Council announced the selection of the first Executive Director of the Enhanced Integrated Framework (EIF), a trade-related technical assistance program for least-developed countries established by the WTO and five other multilateral economic institutions. The WTO General Council also welcomed two new members, Ukraine, acceding in May 2008, and Cape Verde, acceding in July 2008, as the 152nd and 153rd WTO members, respectively. The council assessed reports on issues regarding small and vulnerable economies as well as special and differential treatment, and approved a number of waivers concerning various stages of adoption of newer versions of the Harmonized System (HS) tariff nomenclature.

Work Programs, Decisions, and Reviews

Enhanced Integrated Framework

In October 2008, the WTO Director-General announced the selection of Ms. Dorothy Tembo, of Zambia, as the first Executive Director of the EIF.¹⁵ The Integrated Framework for Trade-Related Technical Assistance to Least-Developed Countries (Integrated Framework, IF) was inaugurated in 1997 as a multilateral initiative by six multilateral institutions—the International Monetary Fund, International Trade Centre, United Nations Conference on Trade and Development, United Nations Development Program, World Bank, and World Trade Organization—to support the integration of the least-developed countries into the multilateral trading system. In December 2005, WTO members agreed at their Ministerial Conference in Hong Kong to broaden the capabilities of the IF by developing the EIF, a process approaching conclusion with the creation of the executive director post and the location of EIF offices on the premises of the WTO in

Geneva, Switzerland. Although the EIF will share the WTO administrative structure, it will continue to be governed by its six core agencies independently from the WTO Secretariat.¹⁶

Small economies

The Dedicated Session of the WTO Committee on Trade and Development (CTD) reported at WTO General Council sessions throughout 2008 on its monitoring of proposals made by the small, vulnerable economies (SVEs) in the Doha Round.¹⁷ The Dedicated Session in particular monitored the SVE proposals made in the Agriculture, NAMA, Services, and Rules negotiating groups, in its effort to integrate them more fully into the multilateral trading system, as tasked by trade ministers at the Doha ministerial meeting in 2001.¹⁸ In December 2008, the Dedicated Session began an assessment of all SVE proposals, as compiled for them by the WTO Secretariat. The Dedicated Session also requested consultations with the Secretariat financial crisis task force on the impact of the crisis on SVE industrial and service sectors, in particular trade financing.¹⁹

Special and differential treatment

The WTO Committee on Trade and Development reported to the WTO General Council on its work regarding its mandate received at the December 2005 WTO Hong Kong Ministerial Conference to review Doha Round proposals concerning special and differential treatment. In 2008, the committee reported that it had focused largely on areas concerning agreement-specific proposals, and elements of a possible monitoring mechanism.²⁰

TRIPS Council matters

In December 2008, the General Council agreed to extend the acceptance period until December 31, 2009, for the 2003 protocol amending the TRIPS Agreement concerning public health matters. The extension allows additional time for members to implement the WTO Decision on the Implementation of paragraph 6 of the Doha Declaration on the TRIPS Agreement and Public Health, which was adopted by the General Council in August 2003 and is scheduled to enter into force upon acceptance by two-thirds of the WTO members.²¹

¹⁶ WTO, “Enhanced Integrated Framework Executive Secretariat—Institutional and Administrative Arrangements—Communication from the Director-General,” July 21, 2008, WT/GC/115, 1-2.

¹⁷ The SVE members include Barbados, Fiji, Nicaragua, St. Vincent and the Grenadines, and the Solomon Islands.

¹⁸ WTO, General Council, “Annual Report (2008),” 5. In early 2002, the General Council approved as a standing item on the council’s agenda a work program that was to address the special needs of SVEs. The council designated the CTD to meet in dedicated session on the subject and report regularly to the council on progress made. At the WTO Sixth Ministerial Conference in Hong Kong in December 2005, ministers instructed the CTD to continue this work program, monitoring the progress of the SVEs’ proposals in the Doha Round and elsewhere.

²⁰ WTO, General Council, “Annual Report (2008),” 6–7.

²¹ *Ibid.*, 7. The August 2003 Decision concerning the WTO TRIPS Agreement and Public Health permits developing and least-developed country members who lack sufficient pharmaceutical manufacturing capacity needed to confront public health crises (e.g., malaria, tuberculosis, HIV) to instead import cheaper generic versions of the necessary medicines that otherwise may be restricted from export under a compulsory licensing agreement due to their patented status.

Cotton initiative

In December 2008, the WTO Director-General updated the General Council on his work concerning development assistance in the cotton sector. Following the December 2003 WTO Ministerial Conference in Cancun, Mexico, consultations between the Director-General and members led to a cotton initiative aimed at addressing issues raised about domestic agricultural support payments to cotton producers in the developed countries that affect unsubsidized cotton production in and exports from least-developed countries, in particular, from the four sub-Saharan African countries of Benin, Burkina Faso, Chad, and Mali. The General Council subsequently tasked the Director-General in 2004 to pursue these consultations.

The Director-General reported that in 2008 there had been improvements both in the amount committed and in actual disbursements of development assistance to the cotton sector. However, he said further talks with the donor community were needed regarding this aid as well as regarding aspects of domestic cotton sector reform.²²

Accessions

The WTO General Council welcomed the accession of two new members during 2008.²³ On May 16, 2008, Ukraine became the 152nd WTO member; on July 23, 2008, Cape Verde became the 153rd. In addition to the 153 members of the WTO by the end of 2008, there were 29 observers in various stages of the accession process, as well as the Vatican (Holy See), which is not required to accede to the WTO within five years as required of all other governments with WTO observership. (See tables 3.1 and 3.2 for WTO membership and WTO observers in 2008, respectively.)

Waivers

During 2008, the General Council agreed to grant or extend waivers from WTO obligations, particularly regarding members' schedules of concessions resulting from the adoption of newer HS tariff schedule nomenclature (notably HS 1996, HS 2002, and HS 2007), as well as waivers from most-favored-nation obligations when granting nonreciprocal trade preferences approved by members.²⁴ The council also granted several waivers to members regarding particular individual obligations resulting from past concessions.

WTO Director-General appointment process

In December 2008, the General Council opened the selection process for the next Director-General, including the possibility of reappointment of the current Director-General.²⁵

Dispute Settlement

This section focuses principally on complaints filed, and panel and Appellate Body findings and recommendations adopted, under the WTO Dispute Settlement Understanding during 2008. Appendix table A.19 shows developments during 2008 in the WTO dispute settlement cases in which the United States was either a complainant or respondent. A separate table is presented on disputes that were active during 2008 under the NAFTA dispute settlement procedures (appendix table A.20).

The WTO Dispute Settlement Understanding (DSU) establishes a framework for the resolution of disputes that arise between members under the WTO agreements. Under the DSU, a complaining member may file a complaint with the WTO Dispute Settlement Body (DSB). The member must then seek to resolve the dispute through consultations with the named respondent party. If the parties fail to resolve the dispute through consultations, the complaining party may ask the DSB to establish a panel to review the matters raised in the complaint and make findings and recommendations. Either party may appeal issues of law covered in the panel report and legal interpretations developed by the panel to the WTO's Appellate Body.²⁶ The findings and recommendations of the Appellate Body and panel (as modified by the Appellate Body) are then generally adopted without change by the DSB. While the guidelines suggest that panels complete their proceedings in six months, and the Appellate Body complete its review in 60 days, these periods may be extended.

Once the panel report or the Appellate Body report is adopted, the party concerned must notify its intentions with respect to implementation of adopted recommendations. If it is impracticable to comply immediately, the party concerned is given a reasonable period of time, the latter to be decided either by agreement of the parties and approval by the DSB or through arbitration. Further DSU provisions set out rules for compensation or the suspension of concessions in the event of non-implementation. Within a specified time frame, parties can enter into negotiations to agree on mutually acceptable compensation. Where this has not been agreed, a party to the dispute may request authorization of the DSB to suspend concessions or other obligations to the other party concerned. Disagreements over the proposed level of suspension may be referred to arbitration.

The section below focuses on new requests for consultations filed, the issues before new panels established during 2008, and panel reports and Appellate Body reports issued during 2008. The summaries in this section are intended to highlight some of the key

²⁶ WTO Dispute Settlement Understanding, Article 17.6.

issues raised in the complaint or in a panel or Appellate Body report. They should not be regarded as comprehensive or as reflecting a U.S. government interpretation of the issues raised or addressed. The summaries are based primarily on information contained in longer summaries published online by the World Trade Organization. Several cases with complex issues remained pending before panels throughout 2008 with little or no activity. For example, disputes involving trade in large civil aircraft brought by the United States against the European Communities (EC)²⁷ (DS316) and by the EC against the United States (DS353) and a dispute brought by the United States against China relating to protection and enforcement of intellectual property rights (DS362), in which panels were established in 2005, 2006, and 2007, respectively, remained pending throughout 2008, with panel reports expected in 2009.²⁸ In addition, litigation in a number of disputes continued well beyond the adoption of panel and Appellate Body reports, as parties pressed for implementation of recommendations or sought compensation and/or suspension of concessions in the case of non-implementation. During 2008, the United States was involved in several such matters, including in pressing for EC implementation of DSB recommendations on EC measures on biotech products,²⁹ claims by Brazil that certain changes in U.S. agricultural support measures failed to bring them into conformity with the DSB recommendations in the upland cotton case,³⁰ and claims by the EC that the United States had not fully complied with DSB recommendations relating to “zeroing” in calculating dumping margins.³¹

New Requests for Consultations and New Panels Established

During 2008, WTO members filed 19 new requests for WTO dispute settlement consultations. This compares with 13 in 2007, 22 in 2006, and 12 in 2005. Three of the requests were resolved in December 2008 when the United States, Canada, and the EC, respectively, entered into memoranda of understanding with China relating to certain

²⁷ The term EC is used rather than EU in the WTO dispute settlement section because the source documents (WTO online summaries) use EC.

²⁸ See WTO, DSB, Online summaries of DS316, European Communities—Measures Affecting Trade in Large Civil Aircraft; DS353, United States—Measures Affecting Trade in Large Civil Aircraft—Second Complaint; and DS362, China—Measures Affecting the Protection and Enforcement of Intellectual Property Rights. A panel report in dispute DS362 was circulated on January 26, 2009.

²⁹ The issue here involved EC implementation of panel report recommendations adopted in December 2006 relating to EC measures affecting the approval and marketing of biotech products. In January 2008, the United States asked for authority to suspend concessions. The EC objected and on February 6, 2008, referred the matter to arbitration. On February 15, 2008, the EC and United States jointly asked the arbitrator to suspend work pursuant to procedures agreed to by the EC and United States. WTO, DSB, DS291: European Communities—Measure Affecting the Approval and Marketing of Biotech Products, Online summary. See also, USTR, “Statement on EC-Biotech Dispute,” January 14, 2008.

³⁰ Brazil alleged that measures taken by the United States to comply with the DSB recommendations in DS267, United States—Upland Cotton, failed to implement the DSB recommendations. Brazil requested establishment of an Article 21.5 panel, and the panel’s report was circulated in December 2007. Both the United States and Brazil appealed certain of the findings in the panel report. On June 2, 2008, the Appellate Body issued its report, generally upholding the panel report and finding that the changes to the U.S. support measures did not bring the United States into conformity with the DSB recommendations. The DSB adopted the panel report (as modified) and Appellate Body report on June 20, 2008. WTO, DSB, DS267: United States—Subsidies on Upland Cotton, Online summary.

³¹ The EC requested establishment of a compliance panel on September 13, 2007, asserting a disagreement as to whether the United States had complied with certain DSB recommendations. The compliance panel found that the United States had failed to comply with DSB recommendations in administrative reviews in two cases reviewed, but that it had not failed to comply with recommendations in administrative reviews in three other cases reviewed. WTO, DSB, DS294: United States—Laws, Regulations and Methodology for Calculating Dumping Margins (Zeroing), Online summary.

measures by China affecting financial information services and suppliers; a fourth involving Indonesia and South Africa was withdrawn when South Africa withdrew antidumping measures. Five new dispute settlement panels were established in 2008, compared to 14 in 2007, 14 in 2006, and 7 in 2005. Table 3.3 shows the five cases in which panels were established during 2008.

The United States was either the complaining party or the respondent in nearly half the complaints filed during 2008.³² The United States filed 3 of the 19 requests for dispute settlement consultations during 2008, with two directed against China and one against the EC. In the first of these, *China—Measures Affecting Financial Information Services and Foreign Financial Information Suppliers* (DS373), the United States and China, as noted above, reached an agreement in the form of a Memorandum of Understanding, which was notified to the WTO on December 4, 2008; no panel was established.³³ In the second, relating to EC tariff treatment of certain information technology products (DS375), the United States requested establishment of a panel after consultations failed to resolve the dispute, and a panel was established on September 23, 2008 (see further description below). In the third request, the United States challenged certain grants, loans, and other incentives provided to enterprises by China on the condition that they meet certain export performance criteria (DS387); as of year-end 2008, no panel had been requested or established.³⁴

Six requests for dispute settlement consultations during 2008 were filed against the United States—two by Mexico and one each by Brazil, Canada, China, and Thailand. While no panels had been established in any of the six cases as of the end of 2008, a panel was established on January 20, 2009 in one of the six—DS379. In the respective complaints, China challenged determinations and orders of the Department of Commerce in several antidumping and countervailing duty investigations involving imports from

³² Of the 19 complaints filed during 2008, three each were filed by the United States, the EC, and Mexico, while two were filed by Canada. Brazil, China, Chinese Taipei, India, Indonesia, Japan, the Philippines, and Thailand each filed one complaint. The United States was named as the respondent in six of the disputes, followed by China (five), the EC (four), Thailand (two), and India and South Africa, one each.

³³ In its request for consultations, the United States raised claims about a number of Chinese measures affecting financial information services and foreign financial services suppliers in China, including measures that require foreign financial information suppliers to supply their services through an entity designated by Xinhua News Agency. The United States alleged that these and other requirements and restrictions accord less favorable treatment to foreign information services and service suppliers than those accorded to Chinese financial information services and service suppliers that are not affected by these requirements and restrictions. The United States alleged that the measures are inconsistent with various provisions of the GATS, the horizontal standstill commitment contained in China's schedule of obligations under the GATS, and China's Protocol of Accession. The United States requested consultations on March 3, 2008; on March 14, 2008, the EC requested to join the consultations. On December 4, 2008, China and the United States informed the DSB that they had reached an agreement in relation to this dispute in the form of a Memorandum of Understanding. WTO, DSB, *DS373: China—Measures Affecting Financial Information Services and Foreign Financial Information Suppliers*, Online summary. See also, USTR, "China to End Restrictions on Suppliers of Financial Information Services Challenged by United States in WTO," November 13, 2008.

³⁴ In its request for consultations, the United States raised claims about certain Chinese measures offering grants, loans, or other incentives to enterprises in China on the condition that those enterprises meet certain export performance criteria. The United States alleged that the measures are inconsistent with Article 3 of the SCM Agreement, Articles 3, 9, and 10 of the Agreement on Agriculture, various provisions of China's Protocol of Accession, and Article III:4 of the GATT 1994. The United States filed its request for consultations on December 19, 2008. On January 15, 2009, Canada, the EC, Mexico, and Turkey requested to join the consultations, and on January 16, 2009, Australia requested to join the consultations. WTO, DSB, *DS387: China—Grants, Loans and Other Incentives*, Online summary. See also, USTR, "United States Files WTO Case Against China Over Illegal Support for Chinese 'Famous Brands,'" December 19, 2008.

TABLE 3.3 WTO dispute settlement panels established in 2008

Case No.	Complainant	Respondent	Case Name	Panel Established
DS367	New Zealand	Australia	Measures Affecting the Importation of Apples from New Zealand	Jan. 21, 2008
DS371	Philippines	Thailand	Customs and Fiscal Measures on Cigarettes from the Philippines	Nov. 17, 2008
DS375	United States	EC	Tariff Treatment of Certain Information Technology Products	Sept. 23, 2008
DS376	Japan	EC	Tariff Treatment of Certain Information Technology Products	Sept. 23, 2008
DS377	Chinese Taipei	EC	Tariff Treatment of Certain Information Technology Products	Sept. 23, 2008

China (DS379);³⁵ Mexico challenged certain U.S. measures relating to the labeling of Mexican tuna and tuna products as "dolphin safe" (DS381);³⁶ Brazil challenged certain U.S. laws, regulations, and procedures applied in U.S. antidumping duty reviews relating to imports of orange juice from Brazil (DS382);³⁷ Thailand challenged the U.S. practice of "zeroing" in calculating overall weighted-average dumping margins in an investigation involving polyethylene retail carrier bags from Thailand (DS383);³⁸ and Canada³⁹ and Mexico,⁴⁰ in separate complaints, challenged certain U.S. country-of-origin labeling requirements for beef and pork at the retail level.

Panels established during 2008 at the request of the United States

During 2008, the DSB established a panel in one case at the request of the United States (DS375). The issues raised and procedural history of this dispute are summarized below. One panel established at U.S. request in November 2007 (DS363) became fully active in March 2008 when the panel was composed and, as a consequence, is also detailed below.

⁴⁰ WTO, DSB, DS386: United States—Certain Country of Origin Labeling Requirements, Online summary.

Measures by China Affecting Trading Rights and Distribution Services for Certain Publications and Audiovisual Entertainment Products (DS363)

The United States filed its request for consultations in this matter on April 10, 2007, and its request for a panel on October 10, 2007. The DSB established a panel on November 27, 2007, and the Director-General composed the panel on March 27, 2008. The United States alleged that various Chinese measures reserve trading rights for certain publications and audiovisual entertainment products only to certain Chinese state-designated and wholly or partially state-owned enterprises, and that various Chinese measures impose market access restrictions or discriminatory limitations on foreign service providers seeking to engage in the distribution of publications and certain audiovisual home-entertainment products. The United States claimed that such measures are inconsistent with China's obligations under its Protocol of Accession, the GATT 1994, and the General Agreement on Trade in Services (GATS). The panel was expected to issue its final report to the parties in May 2009.⁴¹

Tariff Treatment by the European Communities and its Member States of Certain Information Technology Products (DS375)

The United States filed its request for consultations on May 28, 2008. In its complaint, the United States, joined by Japan and Taiwan, claimed that the tariff treatment the EC and its member states accord to certain information technology products (e.g., flat panel displays, facsimile machines) does not respect their commitments to provide duty-free treatment for these products under the Information Technology Agreement. The United States (and Japan and Taiwan) also claimed that a number of EC customs classification instruments alone or in combination with EEC Council Regulation No. 2658/87, and certain amended explanatory notes published in the EC Official Journal after their application, are inconsistent with the EC's and member states' obligations under Articles II and X of GATT 1994. On August 18, 2008, the United States, Japan, and Taiwan requested establishment of a panel, and the DSB established a panel on September 23, 2008. The case was pending at year-end 2008.⁴²

Appellate Body and Panel Reports Issued and/or Adopted During 2008 That Involved the United States

During 2008, reports were issued by panels and/or the Appellate Body in seven cases in which the United States was the complainant or a respondent. As noted above, several other disputes before panels in which the United States was either the complainant or a respondent were pending during the year.

⁴¹ WTO, DSB, DS363: China—Measures Affecting Trading Rights and Distribution Services for Certain Publications and Audiovisual Entertainment Products, Online summary.

⁴² WTO, DSB, DS375: European Communities and its Member States—Tariff Treatment of Certain Information Technology Products, Online summary. See also, USTR, "U.S. Files WTO Case Challenging EU Tariffs on Certain Technology Products," May 28, 2008.

Reports in which the United States was the complainant

Measures by China Affecting Imports of Automobile Parts (DS340)

In this dispute the United States (and the EC and Canada) argued that China was assessing duties on certain auto parts at rates significantly above its bound rates. The panel issued its rulings on July 18, 2008, relating to the U.S. (and EC and Canadian) claims. With respect to the U.S. claims, the panel found China's Policy Order 8 to be inconsistent with China's obligations under Articles II and III of the GATT 1994 and China's Working Party Report, but exercised judicial economy in not making findings with regard to certain other U.S. claims. On September 15, 2008, China notified its decision to appeal certain issues of law and legal interpretations of the panel to the Appellate Body. In a report circulated on December 15, 2008, the Appellate Body generally upheld the panel's findings with regard to China's obligations under Articles II and III, but reversed the panel's finding that China's Policy Order 8 is inconsistent with China's commitment under China's Working Party Report. On January 12, 2009, the DSB adopted the Appellate Body report and panel report, as modified.⁴³

Additional Duties Imposed by India on Imports from the United States (DS360)

The United States alleged that additional or extra-additional duties applied by India to imports from the United States, including wines and distilled products, were inconsistent with certain provisions of Articles II and III of the GATT 1994. The panel circulated its report on June 9, 2008. The panel found that the United States had failed to establish that India's additional duty on alcoholic liquor was inconsistent with Article II of the GATT 1994, and in light of its conclusions, made no recommendations. However, the panel also noted that India had made certain changes to its additional duties after the establishment of the panel to address concerns raised by India's trading partners. The United States appealed certain issues of law and legal interpretations of the panel to the Appellate Body. In its report circulated on October 30, 2008, the Appellate Body rejected certain U.S. claims about the scope of the U.S. challenge, but found that the panel had erred in its interpretation of Article II and also found that India's additional duty and extra-additional duty would not be justified under Article II to the extent that they result in duties exceeding those set out in India's Schedule of Concessions. On November 17, 2008, the DSB adopted the Appellate Body report and the panel report as "reversed" by the Appellate Body report.⁴⁴

⁴⁴ WTO, DSB, *DS360: India—Additional and Extra-Additional Duties on Imports from the United States*, Online summary. See also, USTR, "WTO Appellate Body Reverses Panel and Finds in Favor of the United States," October 30, 2008.

Reports in which the United States was the respondent

Continued U.S. Suspension of Obligations in the EC—Hormones Dispute (DS320)

In this dispute the EC challenged continuing U.S. retaliatory measures against the EC based on the EC's alleged failure to lift its ban on hormone-treated beef in response to earlier reports adopted by the DSB in DS26 and DS48. Following adoption of those reports, in 2003 the EC amended its ban on beef from certain hormone-treated cattle and claimed that its measures were now WTO-consistent. In its complaint filed in November 2004, the EC contended, among other things, that the United States, by having failed to remove the retaliatory measures, was in violation of its obligations under Articles I and II of GATT 1994 and also certain articles of the DSU. The panel circulated its report on March 31, 2008, finding, among other things, that the United States was not in violation of its obligations to the extent that the EC measure earlier found to be in violation has not been removed. Both the EC and United States appealed certain findings. The Appellate Body circulated its report on October 16, 2008, affirming the panel's findings in part and reversing them in part. Among other things, the Appellate Body said that it was unable to complete its analysis as to whether the EC's directive amending its measures brought the EC into substantive compliance with the earlier DSB recommendations, and concluded that the recommendations and rulings adopted by the DSB in *EC—Hormones* remain operative. On November 14, 2008, the DSB adopted the panel report (as modified) and Appellate Body report.⁴⁵

U.S. Measures Relating to Shrimp from Thailand (DS343)

In this dispute Thailand alleged that the United States, through its use of “zeroing” in calculating dumping margins in an antidumping case involving shrimp from Thailand, had failed to make a fair comparison between the export price and the normal value, and had calculated distorted margins of dumping in violation of certain articles of the WTO Antidumping Agreement and certain articles of the GATT 1994. The panel circulated its report on February 29, 2008, finding that the United States had acted inconsistently with Article 2.4.2 and Article 18.1 of the Antidumping Agreement and the Ad Note to the Agreement. Thailand and the United States appealed certain issues of law and interpretation to the Appellate Body. The Appellate Body circulated its report on July 16, 2008, generally upholding the panel findings that the U.S. calculation was not reasonable under the Ad Note or necessary under Article XX(d) of the GATT 1994. On August 1, 2008, the DSB adopted the panel's report, as modified by the Appellate Body report. On October 31, 2008, the United States and Thailand notified the DSB that the United States had agreed to implement the DSB recommendations and rulings by April 1, 2009.⁴⁶

U.S. Antidumping Measures on Stainless Steel from Mexico (DS344)

In this dispute Mexico alleged that certain provisions of the U.S. antidumping law and regulations and U.S. administrative practices and methodologies, including “zeroing,” employed by the U.S. Department of Commerce in antidumping investigations and

⁴⁵ WTO, DSB, *DS320: United States—Continued Suspension of Obligations in the EC—Hormones Dispute*, Online summary. See also the Section 301 part of chap. 2 and the EU section of chap. 5.

⁴⁶ WTO, DSB, *DS343: United States—Measures Relating to Shrimp from Thailand*, Online summary.

administrative reviews involving stainless steel sheet and strip from Mexico were inconsistent with U.S. obligations under the GATT 1994 and the Antidumping Agreement. In its report circulated on December 20, 2007, the panel found that the use of model zeroing in investigations is inconsistent with Article 2.4.2 of the Antidumping Agreement. It also found that Commerce acted inconsistently with Article 2.4.2 in using model zeroing in its administrative reviews regarding imports of Mexican stainless steel sheet and strip. However, the panel found that use of simple zeroing in periodic reviews is not inconsistent with Articles VI:1 and VI:2 of the GATT 1994 or Articles 2.1, 9.3, and 2.4 of the Antidumping Agreement, and that Commerce's actions in using simple zeroing in its periodic reviews of dumping margins in the Mexican stainless steel sheet and strip were not inconsistent with U.S. WTO obligations.⁴⁷

In January 2008, Mexico appealed certain issues of law and interpretation covered by the panel report to the Appellate Body. In a report circulated on April 30, 2008, the Appellate Body reversed the panel's finding on simple zeroing, and found that simple zeroing in periodic reviews is inconsistent with Article VI:2 of the GATT 1994 and Article 9.3 of the Antidumping Agreement. It also reversed the panel's finding regarding Commerce's use of simple zeroing in the Mexican stainless steel sheet and strip reviews. On May 20, 2008, the DSB adopted the Appellate Body report and panel report as modified. The United States notified the DSB that it intended to comply and would need a reasonable amount of time for implementation. Mexico asked that the deadline for implementation be determined through binding arbitration. An arbitrator was appointed, and on October 31, 2008, the arbitrator determined that the deadline date should be April 30, 2009.⁴⁸

U.S. Customs Bond Directive for Merchandise Subject to Antidumping/Countervailing Duties (DS345)

In this dispute India alleged that the amended U.S. customs bond directive and the enhanced bond requirement imposed by the United States on imports of frozen warm-water shrimp from India are inconsistent with U.S. obligations under various articles of the Antidumping Agreement, the Subsidies and Countervailing Measures (SCM) Agreement, and the GATT 1994. A panel was established in November 2006 and composed in January 2007. In a report circulated on February 29, 2008, the panel rejected India's claims that the U.S. laws, rules, and regulations that authorize the imposition of the enhanced bond requirement and the instruments comprising the amended customs bond directive are inconsistent with U.S. obligations. However, the panel upheld India's claims that the application of the enhanced bond requirement to subject shrimp from India is inconsistent with certain articles of the Antidumping Agreement and with the Ad Note; that application of the enhanced bond requirement to subject shrimp from India prior to the imposition of the antidumping order is inconsistent with the Antidumping Agreement; and that the United States violated the Antidumping Agreement and the SCM Agreement because it failed to notify the amended customs bond directive to the Antidumping and SCM Committees. The panel rejected the U.S. argument that the application of the enhanced bond requirement is justified under Article XX(d) of the GATT 1994. It declined to rule on certain other claims made by India.⁴⁹

⁴⁸ Ibid.

⁴⁹ WTO, DSB, DS345: United States—Customs Bond Directive for Merchandise Subject to Anti-Dumping/Countervailing Duties, Online summary.

India (on April 17, 2008) and the United States (on April 29, 2008) notified the DSB of their respective decisions to appeal. On July 16, 2008, the Appellate Body circulated its report generally upholding the panel's findings, including the panel's conclusion that the application of the U.S. enhanced bond requirement to the subject shrimp is inconsistent with Article 18.1 of the Antidumping Agreement because it is inconsistent with the Ad Note to Article VI:2 and 3 of the GATT 1994. The DSB adopted the Appellate Body report and panel report (as modified) on August 1, 2008. On October 31, 2008, the United States and India notified the DSB that they had agreed that the reasonable time for the United States to implement the DSB recommendations and rulings is eight months, expiring on April 1, 2009.⁵⁰

Continued Existence and Application of U.S. Zeroing Methodology (DS350)

In this dispute the EC challenged U.S. “zeroing” methodology in calculating the margin of dumping, including the methodology set out in Commerce’s implementing regulation and Commerce’s Antidumping Manual (1997 edition). The EC alleged that the U.S. regulation and zeroing methodology and procedures for determining the dumping margin are inconsistent with several articles of the Antidumping Agreement and the GATT 1994. In a report circulated on October 1, 2008, the panel found that the United States acted inconsistently with its obligations (1) under Article 2.4.2 of the Antidumping Agreement by using model zeroing in four investigations at issue; (2) under Article VI:2 of the GATT 1994 and Article 9:3 of the Antidumping Agreement by applying simple zeroing in 29 periodic reviews at issue; and (3) under Article 11.3 of the Antidumping Agreement by using, in the eight sunset reviews at issue, dumping margins obtained through model zeroing in prior investigations. In November 2008 both the EC and United States notified the Appellate Body of their decision to appeal the panel findings, and the appeal was pending at year-end.⁵¹

Organization for Economic Cooperation and Development

OECD is an international organization with 30 member countries committed to democracy and the market economy.⁵² The OECD Trade Committee is a forum designed to allow policy officials to have dialog about policy issues and developments in trade relations.⁵³ During 2008, the OECD Trade Committee focused on outreach programs to nonmember countries, including its Global Forum on Trade to engage private sector and civil society groups as well as nonmember countries, and Aid for Trade issues designed to build developing countries’ trade capacity. At the June 2008 OECD Ministerial

Council meeting, member countries' discussions mirrored these outreach efforts to candidate countries and others. Ministers also discussed the economics of climate change, sovereign wealth funds, and the effect of the recent credit markets upheaval on the current economic situation. In November 2008, the OECD member countries issued several pledges reaffirming their commitment to maintain open trade and investment conditions in their markets, and to continue to provide support for developing countries during the worldwide economic and financial instability. In particular, OECD members underlined the need to maintain the availability of export credits to underpin the continued flow of international trade.⁵⁴

Trade Committee

The OECD Trade Committee held three meetings during 2008, in March,⁵⁵ May,⁵⁶ and October.⁵⁷ It addressed several working parties' reports about ongoing activities; took up systemic policy discussions on bilateral and regional trade agreements and on nontariff measures; considered several outreach matters dealing with nonmember countries, such as inviting certain governments as ad hoc observers, continuing the Global Forum on Trade venue, and reviewing Aid for Trade matters; and addressed a number of institutional and administrative issues, such as the renewal of mandates for working parties, preparations for the OECD Ministerial Council meeting, and the committee's work program. Brazil and the committee also reviewed jointly selected trade issues concerning Brazil's trade policy.

Ongoing Activities of the Trade Committee

In March 2008, the Working Party of the Trade Committee reported that its recent work centered around analysis of three key areas—trade in services, trade and domestic economic policies, and the benefits of trade liberalization. The Joint Group on Trade and

⁵⁴ A number of multilateral and plurilateral institutions and groups expressed similar concerns during the year as the worldwide financial crisis deepened, reaffirming from their own particular perspectives their support for developing countries and commitments to avoid trade protectionist measures, such as found in the OECD ministerial meeting in June 2008; the APEC ministerial meeting in November 2008; the WTO General Council meeting in December 2008; and the declaration from the Group of Twenty meeting in London, England, in April 2009. Leaders of the Group of Twenty, "The Global Plan for Recovery and Reform," April 2, 2009; OECD, "OECD Ministerial Declaration on Policy Coherence for Development," June 4, 2008, C/MIN(2008)2/FINAL; APEC, "The Twentieth APEC Ministerial Meeting—Joint Statement," November 19-20, 2008; and WTO, Trade Negotiations Committee, "Chairman's Introductory Statement," December 17, 2008, JOB(08)/134.

⁵⁶ OECD, "Summary Record of the 150th Session of the Trade Committee," October 29, 2008, TAD/TC/M(2008)3/ANN; OECD, "Summary Record of the 150th Session of the Trade Committee," October 29, 2008, TAD/TC/M(2008)3/PROV.

⁵⁷ OECD, "Summary Record of the 151st Session of the Trade Committee," December 18, 2008, TAD/TC/M(2008)4/ANN; OECD, "Summary Record of the 151st Session of the Trade Committee," December 18, 2008, TAD/TC/M(2008)4.

Environment reported that its focus had been on national trade and environment policies, such as trade and climate change, as well as on environmental measures in regional trade agreements.⁵⁸

In May 2008, the Working Party of the Trade Committee reported on deliberations concerning trade and investment, as well as a cooperative project with the Directorate on Science and Technology regarding the positive relationship found between strengthening intellectual property rights and advances in innovation.⁵⁹ The Working Party on Export Credits and Credit Guarantees updated the committee on the three most recent agreements reached: (1) OECD Recommendations on Export Credits in Respect of Antibribery, (2) OECD Recommendations on Export Credits in Respect of the Environment, and (3) Agreement on Principles and Guidelines for Sustainable Lending.

In October 2008, the Working Party of the Trade Committee reported on trade facilitation as well as the OECD-wide initiative on the political economy of reform.⁶⁰ The working party also considered the issue of policy coherence for economic development as part of the broad OECD initiative to investigate how reforms in different areas of a developing country's economy can produce a more coherent impact in support of economic development objectives. The working party reported progress in data collection and refining methodologies for a major review of Aid for Trade to take place in mid-2009. The Joint Working Party for Agriculture and Trade also made its first presentation to the Trade Committee in its effort to keep the committee informed on related areas.

Multilateral Trading System Discussions

In March 2008, the Trade Committee initiated a discussion series designed to provide an increased opportunity for policymakers to exchange views on issues of timely importance to the multilateral trade system. Such issues often prove difficult to address sufficiently or broadly enough at the WTO in Geneva, Switzerland.

Bilateral and regional trade agreements in the multilateral trading system

The first topic concerned bilateral and regional trade agreements in the multilateral trading system. The Secretariat provided a short issues paper of five questions, as well as a select bibliography of staff work in the area, and three delegations tabled short papers for discussion purposes.

In May, the committee continued the discussion of bilateral and regional trade agreements in the multilateral trade system, focusing in particular on commercial business views of the implications of an expanded use of bilateral and regional trade agreements in world trade.⁶¹ Key questions included (1) what priority do commercial businesses accord to these agreements? (2) with the expansion of bilateral and regional trade agreements, does business now see the multilateral trade system as less important or less effective? (3) what trade measures does business consider most important to include in these agreements? (4) does the proliferation of bilateral and regional trade agreements reduce or increase transaction costs for business? (5) does overlapping country membership in these agreements create confusion or problems for business about which

⁵⁸ "Summary Record of the 149th Session of the Trade Committee."

⁵⁹ "Summary Record of the 150th Session of the Trade Committee."

⁶⁰ "Summary Record of the 151st Session of the Trade Committee."

⁶¹ "Summary Record of the 150th Session of the Trade Committee."

rules to follow, such as different rules of origin among different regional trade agreements? and (6) is there some way that business can help ensure in the elaboration and implementation of these agreements that they ultimately support the multilateral trade system?

The committee heard the views of the OECD Business and Industry Advisory Committee (BIAC) representatives regarding these questions. The BIAC representatives said that businesses often distinguish between bilateral and regional trade agreements, finding regional agreements to be more positive and more likely to extend liberalization further to the global level that, in turn, permits significant economies of scale and provides broader investment choices for businesses. The BIAC representatives observed that, while regional agreements may prove a second-best solution when the multilateral trade system cannot provide an immediate solution to a trade problem, such agreements are unlikely to displace the multilateral trade system in the longer run. The BIAC representatives suggested including the subject of competition policy in regional agreements, a subject not yet addressed by the multilateral trade system.

In response to whether regional agreements increased transaction costs, the BIAC representatives emphasized the importance to the business sector of integrated global supply chains for goods and services, encouraging the committee to carry out an analysis of obstacles that impede these supply chains and at what cost. The BIAC representatives also pointed out that differences in rules of origin often come about as a result of pressure from industry itself, and that a harmonized version of origin rules would tend to diminish the costs of doing business.

Nontariff measures

In October 2008, the Trade Committee opened a discussion on nontariff measures under its systemic policy discussion series.⁶² The Secretariat provided a short issues paper and three delegations tabled short papers for discussion purposes. At the conclusion, the committee requested the Secretariat develop a detailed outline of aspects of nontariff measures that might serve as a framework for future discussions, as well as compile a list of other suggested topics that delegates might choose for future systemic policy discussions.

Administrative Matters and Public Outreach

The Trade Committee dealt with a number of administrative matters during 2008, including mandate renewals for the Trade Committee, Working Party of the Trade Committee, Joint Working Party on Agriculture and Trade, and the Working Party on Export Credits and Credit Guarantees; preparations for the June 2008 Ministerial Council meeting; and continuation of the OECD Global Forum on Trade's public outreach program for 2009 and beyond. The Global Forum on Trade program provides the opportunity for OECD committees to interact and exchange views with public stakeholders on subjects of mutual interest. This provides for exchanges of views between OECD members and nonmember officials, but also policy analysts, researchers, experts in the field, business leaders, and others. To date, Global Forums have been established to discuss agriculture, competition policy, education, international investment, public governance issues, sustainable economic development, taxation, and

⁶² "Summary Record of the 151st Session of the Trade Committee."

trade. Several other forums are currently planned concerning biotechnology, finance, and the knowledge economy.

Asia-Pacific Economic Cooperation (APEC)

APEC is an international organization that consists of Pacific Basin countries seeking to enhance intra-regional economic growth and cooperation.⁶³ The organization operates as a cooperative, multilateral economic and trade group, whose decisions are made by consensus, and whose commitments are undertaken voluntarily. APEC leaders meet annually to provide direction to the organization in the form of action-oriented work programs, and to define priorities for its committees, working groups, senior officials meetings, and special task groups. Since its inception, APEC has aimed to facilitate economic growth, trade, investment, and cooperation in the Asia-Pacific region.⁶⁴ To reach its objectives, member countries committed to the “Bogor Goals” in 1994, which set forth a timetable for creating a free and open trade and investment area in the Asia-Pacific region by 2010 for the industrialized countries, and by 2020 for the developing countries. In subsequent years, various annual APEC initiatives have been undertaken to provide member countries with direction on how to successfully meet the long-term objectives initially agreed upon in Bogor, Indonesia.⁶⁵

Three main developments resulted from the November 2008 annual ministerial meeting in Lima, Peru, and its related workshops. Ministers reaffirmed their commitment to open trade and investment policies in the face of the global financial crisis, implemented new trade and investment initiatives, and promoted greater corporate responsibility to address the social dimensions of globalization of the region.

Open Trade and Investment

During the November 2008 annual meeting, APEC Heads of State reaffirmed their commitment to open trade and investment policies in the face of the global financial crisis. In their ministerial statement, they concluded that this course of action will help APEC members play a central role in promoting recovery, growth, and development.⁶⁶ To that end, APEC has shared information on liberalization initiatives and conducted workshops and seminars to build capacity and raise awareness among members in support of the WTO Doha Round negotiations.⁶⁷ It has also continued to examine options and prospects for a Free Trade Area of the Asia-Pacific (FTAAP) by compiling a preliminary inventory of issues to be addressed as part of the preparatory process.⁶⁸ Moreover, APEC ministers recommended that member leaders support the G-20 Washington Declaration and reaffirmed their commitment against the creation of new

⁶³ APEC was established in 1989. Its 21 members are Australia; Brunei Darussalam; Canada; Chile; China; Hong Kong, China; Indonesia; Japan; Korea; Malaysia; Mexico; New Zealand; Papua New Guinea; Peru; the Philippines; Russia; Singapore; Chinese Taipei (Taiwan); Thailand; the United States; and Vietnam. For more information, see APEC, “APEC at a Glance,” http://www.apec.org/apec/about_apec.html.

trade and investment barriers in the next 12 months.⁶⁹ The development of a more diversified and sounder institutional investor base was also a stated ministerial goal in 2008, as it aims to deepen financial sector participation, remove trade restrictions, and improve regulatory frameworks.⁷⁰ To demonstrate their commitment to structural reform, APEC ministers endorsed the Good Practice Guide on Regulatory Reform at their Lima ministerial meeting.⁷¹

Committee on Trade and Investment

APEC's Committee on Trade and Investment (CTI) accomplished four main tasks in 2008. First, agreement was reached on model measures⁷² for FTAs, including customs administration and trade facilitation, competition policy, environment, and safeguards.⁷³ Second, progress was made on the implementation of the Second Trade Facilitation Action Plan with the establishment of Key Performance Indicators and reporting methodologies for monitoring its implementation.⁷⁴ Third, agreement was reached on a new APEC Investment Facilitation Action Plan (IFAP) that will assist economies in improving their investment environments.⁷⁵ Finally, CTI members endorsed the APEC Digital Prosperity Checklist, which provides assistance to economies to advance the use of information and communications technologies as catalysts for growth and development.⁷⁶

Corporate Social Responsibility

Ministers exhibited renewed interest in promoting corporate social responsibility (CSR) during the November 2008 summit, emphasizing the social dimensions of globalization. Through APEC's Business Advisory Council, APEC ministers agreed to promote CSR through individual government incentive programs and practices in its member countries. Given that CSR programs develop at different speeds and in different directions among APEC members, reflecting the heterogeneity of member-country business cultures and levels of social and economic development, it was agreed that these CSR measures will remain voluntary during this phase of implementation.⁷⁷

CHAPTER 4

U.S. Free Trade Agreements

This chapter summarizes developments related to U.S. Free Trade Agreements (FTAs) during 2008. It describes trends in U.S. merchandise trade with FTA partners during 2008, the status of U.S. FTA negotiations during the year, and major North American Free Trade Agreement (NAFTA) activities, including NAFTA dispute settlement developments during the year.

FTAs in Force During 2008

The United States was a party to nine FTAs as of December 31, 2008.¹ These included a multiparty agreement with the countries of Central America and the Dominican Republic (U.S.-CAFTA-DR) that entered into force with respect to the Dominican Republic, El Salvador, Guatemala, Honduras, and Nicaragua (2006–07); the U.S.-Bahrain FTA (2006); the U.S.-Morocco FTA (2006); the U.S.-Australia FTA (2005); the U.S.-Chile FTA (2004); the U.S.-Singapore FTA (2004); the U.S.-Jordan FTA (2001); NAFTA (1994); and the U.S.-Israel FTA (1985).²

In 2008, total two-way merchandise trade between the United States and its FTA partners was \$1.1 trillion, or about one-third of U.S. merchandise trade with the world. U.S. merchandise exports to FTA partners increased by 8.0 percent to \$444.2 billion and accounted for 38.0 percent of total U.S. exports. U.S. imports of goods from FTA partners increased 4.7 percent to \$625.8 billion and accounted for 29.9 percent of U.S. imports from the world.

The U.S. merchandise trade deficit with its FTA partners decreased by \$4.7 billion to \$181.6 billion in 2008 (table 4.1). The U.S. deficit with its NAFTA partners was a record high \$197.2 billion, an increase of \$7.1 billion from 2007. Excluding NAFTA, the United States registered a trade surplus with the rest of the FTA partners of \$15.6 billion, up from \$3.9 billion in 2007. The FTA partners with which the United States recorded a merchandise trade surplus in 2008 were Australia, Chile, Bahrain, Singapore, Morocco, and the CAFTA-DR countries, while the United States continued to have merchandise trade deficits with Israel and Jordan.

The value of U.S. imports entered under FTA provisions increased 5.1 percent from \$313.9 billion in 2007 to \$329.8 billion in 2008 (table 4.2). More than 60 percent of total imports from CAFTA-DR partners entered under FTA provisions in 2008. Similarly, more than 50 percent of total imports from NAFTA partners Canada and Mexico, Chile, and Bahrain entered under FTA provisions. On the other hand, less than 20 percent of total imports from Israel, Singapore, and Morocco entered under FTA provisions. Imports

¹ Since the U.S.-Singapore FTA in 2004, the modifications to the HTS required to implement each FTA can be found at USITC, Tariff Information Center Web site, http://www.usitc.gov/tata/hts/other/rel_doc/annex/index.htm.

² FTAs with Oman and with Costa Rica (as part of U.S.-CAFTA-DR) entered into force on January 1, 2009. Therefore, no imports from these countries entered under FTA provisions in 2008. The United States-Peru Trade Promotion Agreement entered into force on February 1, 2009. These agreements are described in more detail below.

entered under FTA provisions accounted for 15.8 percent of total U.S. imports in 2008, a decrease from 16.2 percent in 2007.

FTA Developments During 2008

Costa Rica was the final party to the U.S.-CAFTA-DR to implement the agreement. On February 27, 2008, the USTR announced that the six current CAFTA-DR countries would grant Costa Rica an extension until October 1, 2008, to complete its implementing

process.³ Costa Rica was subsequently granted another extension, until January 1, 2009, to complete its implementing process.⁴ Costa Rica completed the implementation process on November 11, 2008,⁵ and on December 23, 2008, the President issued a proclamation implementing the U.S.-CAFTA-DR for Costa Rica effective January 1, 2009.⁶ Other U.S.-CAFTA-DR developments are described below.

The United States and Oman signed an FTA in January 2006 but the agreement did not enter into force immediately. On December 29, 2008, the President issued a proclamation to implement the U.S.-Oman FTA effective January 1, 2009.⁷ The agreement was part of President Bush's larger Middle East Free Trade Area initiative, which also includes FTAs with Jordan, Israel, Morocco, and Bahrain.⁸ Implementing legislation for the agreement was passed by Congress and signed by the President in 2006.⁹

On September 22, 2008, the USTR notified Congress of the Administration's intention to begin negotiations for an FTA with the members of the Trans-Pacific Strategic Economic Partnership (TPP).¹⁰ Current members of the TPP include Brunei Darussalam, Chile, New Zealand, and Singapore. With the exception of the chapters on services and investment, TPP entered into force in 2006.¹¹ On December 30, 2008, the USTR notified Congress of the Administration's intention to add Australia, Vietnam, and Peru (once the U.S.-Peru TPA enters into force, which occurred February 1, 2009) to the TPP Agreement negotiations.¹²

The status of many pending FTAs remained unchanged throughout 2008. Although the President signed implementing legislation for the U.S.-Peru TPA on December 14, 2007, because Peru had not taken all steps necessary for entry into force, the President did not issue a proclamation implementing the U.S.-Peru TPA during 2008. The FTAs with Colombia, Panama, and Korea,¹³ which were signed by both parties in previous years, were all awaiting congressional approval as of the end of 2008. The United States held some negotiations with Malaysia in early 2008. There were no changes in the status of other previously initiated FTA negotiations with Ecuador, the South African Customs Union, Thailand, and the United Arab Emirates, or countries involved with the Free Trade Area of the Americas. The status of U.S. FTA negotiations during 2008 is shown in table 4.3.

³ In a national referendum held on October 7, 2007, the citizens of Costa Rica voted to join U.S.-CAFTA-DR. However, the Costa Rican government did not complete the necessary implementing legislation during the year. U.S.-CAFTA-DR establishes a 2-year period for signatory countries to join the agreement after it first takes effect. U.S.-CAFTA-DR first took effect on March 1, 2006, and therefore the 2-year period for all parties to join the agreement was to end on March 1, 2008. USTR, "USTR Announces Agreement on Extension of Time for Costa Rica to Join the CAFTA-DR," February 27, 2008.

^d No negotiations since 2005.

^e No negotiations since 2006.

^f Negotiations held during 2008.

^g The United States announced its intention to launch negotiations for an FTA with the Trans-Pacific Strategic Economic Partnership countries on September 22, 2008.

Since July 2007, the President has remained without Trade Promotion Authority, the statutory authority to negotiate trade agreements that the Congress can approve or disapprove but cannot amend.¹⁴

U.S.-Colombia TPA

On April 7, 2007, the President transmitted implementing legislation (H.R. 5724) to Congress for its approval of the U.S.-Colombia TPA.¹⁵ The U.S.-Colombia TPA, covered by the previous Trade Promotion Authority, required Congress to take an up-or-down vote within 90 legislative work days of submission by the President.¹⁶ On April 10, 2008, the House approved resolution (H.Res. 1092) removing the 90 day requirement for a Congressional vote.¹⁷ The U.S.-Colombia TPA was not voted on before the end of the Congressional session in December 2008.¹⁸

¹⁴ The Trade Act of 2002 (title XXII of the Trade Act of 2002) was enacted on August 2, 2002.

¹⁵ 73 Fed. Reg. 72677 (November 28, 2008).

¹⁷ USTR, "Statement from Ambassador Susan C. Schwab on the House vote to deny the Colombia Free Trade Agreement," April 10, 2008.

¹⁸ USTR, "2009 National Trade Estimate Report," 129.

U.S.-Israel FTA

The U.S.-Israel FTA, which initially took effect in 1985, was intended to apply to trade in all products between the two nations.¹⁹ However, the two countries held differing interpretations as to the meaning of certain rights and obligations related to agricultural products under the FTA.²⁰ In 1996, the United States and Israel signed the Agreement on Trade in Agricultural Products (ATAP), which was an adjunct to the U.S.-Israel FTA. The agreement expired and then was subsequently renewed in 2004 and was scheduled for expiration on December 31, 2008.²¹ On December 10, 2008, the United States and Israel agreed to extend the ATAP for one year through December 31, 2009, in order to give the two governments time to conclude an agreement to replace the 2004 agreement.²²

U.S.-CAFTA-DR

On December 23, 2008, the President issued a proclamation to implement the U.S.-CAFTA-DR for Costa Rica as of January 1, 2009.²³ Costa Rica was the last of the signatory countries to implement the U.S.-CAFTA-DR. In November 2008, the Costa Rican legislature voted to implement the U.S.-CAFTA-DR after voters gave their assent in a national referendum in October 2007. Implementing legislation for the agreement was passed by Congress and signed by the President in 2005.²⁴

On August 15, 2008, the United States implemented two new textile provisions in the U.S.-CAFTA-DR designed to promote regional production and create new opportunities for the use of U.S. fabric and yarn in apparel production in the region.²⁵ These provisions modified certain rules of origin pertaining to the U.S.-CAFTA-DR to: (1) allow a limited quantity of woven apparel containing Mexican or Canadian inputs to enter the United States duty-free; and (2) include a pocketing amendment requiring that for apparel items containing at least one pocket, the pocket bag fabric must be formed and finished in the territory of one or more of the U.S.-CAFTA-DR countries using yarn wholly formed in the territory of one or more of the U.S.-CAFTA-DR parties before the apparel can qualify as an originating good, and therefore, duty-free treatment under the U.S.-CAFTA-DR.²⁶

On October 16, 2008, the President signed Public Law 110-436, which amended Title IV of the U.S.-CAFTA-DR Act to establish the Earned Import Allowance Program (EIAP) for the Dominican Republic.²⁷ This program will allow producers that purchase a certain quantity of qualifying U.S. fabric for the manufacture of certain pants and bottoms of cotton (excluding denim) in the Dominican Republic to receive a credit that can be used to ship a certain quantity of eligible apparel using third-country fabrics from the

Dominican Republic to the United States duty-free (i.e., for every 2 square meter equivalents (SMEs) of qualifying U.S. fabric purchased for apparel production by producers in the Dominican Republic, one SME credit is received that can be used in the manufacture of apparel using non-qualifying fabric). The EIAP entered into effect on December 1, 2008.²⁸ The U.S. International Trade Commission will conduct an annual review of the program and evaluate its effectiveness in reports to be submitted to the House Committee on Ways and Means and the Senate Committee on Finance.²⁹

On April 25, 2008, the Committee for the Implementation of Textile Agreements (CITA) announced its decision to apply a safeguard on U.S. imports of cotton socks from Honduras.³⁰ Honduras has been the second largest supplier of socks to the United States for the past several years. Pursuant to the provisions of the U.S.-CAFTA-DR, the United States applied a 5 percent tariff to U.S. imports of Honduran socks from July 1 to December 31, 2008. CITA took this action to give U.S. sock producers an opportunity to adjust to increased import competition from CAFTA-DR partners.³¹

North American Free Trade Agreement³²

NAFTA, a free trade agreement between the United States, Canada, and Mexico, entered into force on January 1, 1994. All of the agreement's provisions were fully implemented by January 1, 2008, with the exception of the NAFTA cross-border trucking provisions.³³ In 2008, total two-way (exports plus imports) U.S. merchandise trade with NAFTA partners increased by 5.8 percent over 2007, with U.S.-Canada merchandise trade amounting to \$557.3 billion and U.S.-Mexico merchandise trade totaling \$347.8 billion (table 4.4). In 2008, the U.S. merchandise trade deficit with NAFTA partners increased by 3.7 percent to \$197.2 billion from \$190.2 billion in the previous year.

²⁹ 74 Fed. Reg. 19592 (April 29, 2009).

³⁰ USDOC International Trade Administration, "Administration to Apply Temporary Safeguard on Cotton Socks from Honduras," April 25, 2008.

³¹ On January 18, 2008, as provided for under Article 3.23 of U.S.-CAFTA-DR, CITA formally advised Honduras of its intent to apply a textile safeguard measure on imports of Honduras-origin cotton socks because of the substantial growth (99 percent) of these imports from Honduras in the first 11 months of 2007 over the previous year. USDOC, International Trade Administration, "Administration Announces Intent to Apply Safeguard on Cotton Socks from Honduras," News release, January 18, 2008.

³² U.S. bilateral trade relations with Canada and Mexico are described in chap. 5 of this report.

³³ See chap. 5 for a discussion of NAFTA's cross-border trucking provisions in the section on Mexico. Regarding the agreement's trade provisions, NAFTA's last remaining restrictions on U.S.-Mexico trade were removed on January 1, 2008. These included restrictions on U.S. exports to Mexico of corn, dry edible beans, nonfat dry milk, and high fructose corn syrup, as well as on U.S. imports from Mexico of sugar and certain horticultural products. U.S.-Canada agricultural restrictions were removed before January 1, 1998, under the provisions of the U.S.-Canada Free Trade Agreement (CFTA), which was incorporated into NAFTA in 1994. USDA, FAS, "North American Free Trade Agreement (NAFTA)," Fact Sheet, January 2008; USDA, "Statement by Acting Agriculture Secretary Chuck Conner on the Full Implementation of the North America Free Trade Agreement (NAFTA) on Jan. 2, 2008"; and USTR, *2009 Trade Policy Agenda*, 2009, 121.

TABLE 4.4 U.S. merchandise trade with NAFTA partners, 2006-08

Year	NAFTA partner	U.S.			Two-way trade (exports plus imports)
		Exports	U.S. Imports	Trade Balance	
Billions of \$					
2008	Canada	222.4	334.8	-112.4	557.3
	Mexico	131.5	216.3	-84.8	347.8
	Canada and Mexico	353.9	551.2	-197.2	905.1

Note: Because of rounding, figures may not add to totals shown.

The following sections describe the major activities of the NAFTA Free Trade Commission (FTC), the Commission for Labor Cooperation (CLC), the Commission for Environmental Cooperation (CEC), and dispute settlement activities under NAFTA chapters 11 and 19 during 2008.

Free Trade Commission

NAFTA's central oversight body is the FTC. It is chaired jointly by trade representatives from the three member countries.³⁴ The FTC is responsible for overseeing the implementation of NAFTA, as well as for its dispute settlement provisions.

At its most recent annual meeting, in August 2007, in Vancouver, Canada, the FTC agreed to develop a work plan to enhance North American competitiveness.³⁵ The trilateral plan is expected to address key issues that impact NAFTA's trade and identify the most effective means to facilitate it.³⁶ In February 2008, deputy ministers from the United States, Canada, and Mexico met in Monterrey, Mexico, to discuss progress on the trilateral work plan.³⁷

Commission for Labor Cooperation

The CLC, comprised of a ministerial council and an administrative secretariat, was established under the North American Agreement on Labor Cooperation (NAALC), a supplemental agreement to NAFTA that aims to promote effective enforcement of domestic labor laws and foster transparency in their administration. The CLC is responsible for the implementation of the NAALC. Each NAFTA partner has established a National Administrative Office (NAO) within its labor ministry to serve as the contact point with the other parties and the Secretariat, to provide publicly available information to the Secretariat and the other parties, and to provide for the submission and review of

³⁴ The representatives are the U.S. Trade Representative, the Canadian Minister for International Trade, and the Mexican Secretary of Economy.

³⁶ The plan and the FTC meetings' goals are described in USITC, *The Year in Trade 2007*, 4-8.

³⁷ USTR, 2009 Trade Policy Agenda, 2009, 121.

public communications on labor law matters.³⁸ In the United States, that office is the Division of Trade Agreement Administration and Technical Cooperation (TAATC).³⁹ The NAOs and the Secretariat also carry out the Ministerial Council's Cooperative Activities program.

On April 24, 2008, the NAALC labor ministers held their Eighth Regular Session of the Ministerial Council.⁴⁰ The ministers established priorities for the NAALC and the Secretariat, including addressing the challenges and opportunities for youth employment, improving mine safety, and protecting freedom of association.⁴¹ The ministers also signed a joint declaration to cooperate on resolving issues raised in a public communication regarding freedom of association, the protection of the right to organize, and the right to bargain collectively.⁴² In December 2008, as agreed in the Joint Declaration, the three countries held a government-to-government session in Puebla, Mexico; it was agreed that federal and state officials are to share and build upon the information gathered through that government-to-government session.

The NAALC also provides for the review of public submissions related to the labor laws of the NAFTA countries.⁴³ In April 2008, one new submission on labor matters was filed with the Canadian NAO under the NAALC.⁴⁴ The submission alleged violation of collective bargaining and other labor rights in North Carolina. In the same year, the U.S. NAO addressed a related submission, filed in Mexico in 2006, concerning the collective bargaining rights of public sector workers in North Carolina. With respect to this submission, the U.S. NAO provided responses and information to the Mexican NAO on the application of federal and state laws in North Carolina.⁴⁵

In December 2008, as part of its Cooperative Activities program and as instructed by the Council of Ministers, the NAALC Secretariat hosted a seminar on youth employment in Mexico City, Mexico.⁴⁶

Commission for Environmental Cooperation

The CEC was established under the North American Agreement on Environmental Cooperation (NAAEC), a supplemental agreement to NAFTA designed to ensure that trade liberalization and efforts to protect the environment are mutually supportive. The CEC oversees the mandate of the NAAEC and is composed of (1) the Council—the governing body of the CEC—made up of the environmental ministers from the United

³⁸ CLC, "The National Administrative Offices."

³⁹ The TAATC, formerly the Office of Trade Agreement Implementation (OTAI), is located in the U.S. Department of Labor (USDOL), Bureau of International Labor Affairs (ILAB), Office of Trade and Labor Affairs (OTLA). USDOL, OTLA, "Trade Agreement Administration and Technical Cooperation."

⁴⁰ The Ministerial Council includes the Secretary of Labor of the United States, the Minister of Labor of Canada, and the Secretary of Labor and Social Welfare of Mexico. Secretariat of the Commission for Labor Cooperation, "Puebla Meeting"; USTR, *2009 Trade Policy Agenda*, 2009, 121.

States, Canada, and Mexico;⁴⁷ (2) the Joint Public Advisory Committee, made up of five private citizens from each of the NAFTA parties; and (3) the Secretariat, located in Montreal, Canada, composed of professional staff that implements initiatives and conducts research on topics pertaining to the North American environment, environmental law, and standards, and processes citizen submissions on enforcement matters.⁴⁸

Articles 14 and 15 of the NAAEC provide citizens and nongovernmental organizations with a mechanism to aid in enforcing environmental laws in the NAFTA countries. Article 14 governs alleged violations submitted for review by the CEC. It sets forth specific guidelines regarding criteria for submissions and parties that can file complaints. Article 15 outlines the Secretariat's obligations in considering the submissions and publishing findings in the factual record.⁴⁹ At the end of 2008, 10 files remained active under article 14, one of which had been submitted in 2008 (table 4.5). During 2008, there were 10 active files based on citizen submissions under article 15; two involved Canada, seven involved Mexico, and one involved the United States (table 4.6). In 2008, the CEC publicly released two final factual records for submissions first filed in 2003, one with respect to Canada and another with respect to Mexico.

At the 2008 annual ministerial session in Ottawa, Canada, the CEC Council agreed that trade can provide opportunities for mutually supportive economic and environmental outcomes but remains a risk to the environment. To combat the threat to air quality and human health from the importation of non-environmentally compliant small engine products, the Council announced that enforcement officials will collaborate on intelligence to limit such trade.⁵⁰ The Council also announced the establishment of Green Suppliers Partnerships for the auto industry of the NAFTA countries, noting that this program is particularly important as motor vehicles and parts account for the largest share of intra-regional trade.⁵¹ Also, the Council instructed the Secretariat to prepare a comprehensive report on the opportunities and challenges for Green Building in North America to encourage improvements in energy performance in the construction and renovation of commercial and residential buildings throughout North America.⁵²

In November 1993, the United States and Mexico agreed on arrangements to help border communities with environmental infrastructure projects to further the goals of NAFTA and the NAAEC. In 2008, the Border Environment Cooperation Commission (BECC) and the North American Development Bank (NADB) reported working with more than 140 communities throughout the U.S.-Mexico border region to address their environmental infrastructure needs.⁵³ As of December 31, 2008, the BECC had certified 152 environmental infrastructure projects, which will cost an estimated \$3.2 billion to build. To date, the NADB has contracted more than \$870.9 million in loans and grants to support 118 certified projects. Of those funds, a total of \$748.3 million has already been disbursed.⁵⁴

⁴⁷ The CEC Council consists of the U.S. Environmental Protection Agency Administrator, the Canadian Environment Minister, and the Mexican Secretary for Environment and Natural Resources.

^b Status as of December 31, 2008. Date indicates when the final factual record was publicly released.

Dispute Settlement

The dispute settlement provisions of NAFTA chapters 11 and 19 cover a variety of areas.⁵⁵ Developments during 2008 are described below with respect to NAFTA chapter 11 investor-state disputes and chapter 19 binational reviews of final determinations of antidumping and countervailing cases. Appendix table A.20 presents an overview of developments in NAFTA dispute settlement cases to which the United States was a party in 2008.

Chapter 11 Dispute Settlement Developments

Chapter 11 of NAFTA includes provisions designed to protect cross-border investors and facilitate the settlement of investment disputes. An investor who alleges that a NAFTA country has breached its investment obligations under chapter 11 may pursue arbitration through internationally recognized channels or remedies available in the host country's domestic courts.⁵⁶ A key feature of the chapter 11 arbitral provisions is the enforceability in domestic courts of final awards made by arbitration tribunals.⁵⁷

⁵⁵ NAFTA Secretariat, "Overview of the Dispute Settlement Provisions."

⁵⁶ Internationally recognized arbitral mechanisms include: the International Centre for the Settlement of Investment Disputes (ICSID) at the World Bank, ICSID's Additional Facility Rules, and the rules of the United Nations Commission for International Trade Law (UNCITRAL Rules).

⁵⁷ NAFTA Secretariat, "Overview of the Dispute Settlement Provisions."

In 2008, there were two active chapter 11 cases filed against the United States by Canadian investors.⁵⁸ In the same year, there were no active chapter 11 cases filed by U.S. investors against Canada;⁵⁹ but there were three active chapter 11 cases filed by U.S. investors against Mexico.⁶⁰

Chapter 19 Dispute Panel Reviews

Chapter 19 of NAFTA contains a mechanism that provides for review by a binational panel, as an alternative to judicial review by domestic courts, of final determinations made by national investigating authorities in antidumping and countervailing duty cases. A panel may be established at the request of any involved NAFTA country.⁶¹

At the end of 2008, the NAFTA Secretariat listed 10 binational panels active under chapter 19 (table 4.7). Of the four binational panels formed in 2008 under chapter 19, three challenged U.S. agencies' determinations on products from Mexico and one challenged U.S. determinations on products from Canada.⁶²

CHAPTER 5

U.S. Relations with Major Trading Partners

This chapter reviews U.S. bilateral trade relations with nine selected trading partners during 2008: the European Union (EU), Canada, China, Mexico, Japan, Korea, Taiwan, Brazil, and India (ordered by value of merchandise trade).

European Union

The EU¹ as a unit is the largest two-way (exports and imports) U.S. trading partner in terms of both goods and services. U.S. merchandise trade with the EU increased 6.3 percent to \$614.9 billion in 2008, accounting for 18.9 percent of total U.S. trade. For the third year in a row, the U.S. merchandise trade deficit with the EU declined. In 2008, the deficit declined by \$13.5 billion to \$112.5 billion (figure 5.1), matching the U.S. trade deficit with Canada. The United States registered a trade surplus in services of \$58.0 billion with the EU in 2008, up \$11.9 billion over 2007 (figure 5.2). The EU accounted for 37.4 percent of U.S. trade in services in 2008.²

U.S. merchandise exports to the EU rose 11.0 percent to \$251 billion in 2008. Leading U.S. exports included certain medicaments, petroleum products, aircraft and parts, blood fractions (e.g., antiserum), and passenger cars. U.S. exports of petroleum

Source: U.S. Department of Commerce.

Figure 5.2 U.S. private services trade with the EU, 2004-08^a

Source: U.S. Department of Commerce.

^a Data for 2008 are preliminary.

¹ The 27 members of the EU in 2008 were Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Romania, Slovak Republic, Slovenia, Spain, Sweden, and the United Kingdom.

² The United Kingdom was the largest single-country U.S. trading partner in services in 2008.

products rose particularly quickly, more than tripling to \$9 billion in 2008, reflecting increases in both the price of oil and the quantity exported. The value of most other major exports also increased.

U.S. merchandise imports from the EU increased 3.3 percent in 2008 to \$364 billion. Because of the importance of intra-industry trade in the bilateral relationship, the composition of U.S. imports from the EU was similar to the composition of U.S. exports. Leading U.S. imports were certain medicaments, petroleum products, passenger cars, nucleic acids and their salts, and airplanes and parts. Petroleum products increased the fastest among top U.S. imports—by over 20 percent—reflecting primarily the increase in the price of petroleum. U.S.-EU merchandise trade data are shown in appendix tables A.21 through A.23.

The Transatlantic Economic Council (TEC), established in 2007, addressed a number of bilateral trade issues in 2008, which are discussed below. There were also developments in several WTO dispute settlement cases involving the United States and EU in 2008 (see appendix table A.19). In particular, the United States requested dispute settlement consultations with the EU regarding its tariff treatment of certain information technology products that appear to violate EU commitments under the International Technology Agreement. WTO dispute settlement panel reports and Appellate Body reports were issued in two cases: the U.S. case against the EU banana import regime and the EU case addressing continued U.S. retaliatory duties related to the earlier U.S. case on the EU meat hormone ban.³ Some long-running disputes continued, including two cases involving alleged subsidies for large civil aircraft,⁴ in which there were delays in the issuance of panel reports, and the U.S. case against EU marketing and approval of biotechnology products. Major developments during 2008 are described in the WTO dispute settlement section of chapter 3.

Transatlantic Economic Council

The TEC is a cabinet-level organization created at the U.S.-EU Summit in April 2007 to oversee and guide efforts to lower barriers to trade and investment between the United States and the EU. In 2008, the TEC met in May and December to improve regulatory cooperation and address certain priority issues (“lighthouse projects”) aimed at advancing transatlantic economic integration, including protection of intellectual property rights (IPR), secure trade, investment, and financial markets. The TEC also addressed two issues of U.S. concern: (1) the EU ban on imports of U.S. poultry meat treated with pathogen reduction substances; and (2) implementation of the EU chemicals regulation REACH (Registration, Evaluation, and Authorization of Chemicals).

³ With respect to the case on continued U.S. retaliatory duties in the EU hormones dispute, the United States agreed not to impose new duties on EU products after the United States and EU signed a Memorandum of Understanding on May 13, 2009. This case is also described in the Section 301 part of chap. 2 and in the WTO dispute settlement part of chap. 3.

⁴ One case was brought by the United States against the EU and one case was brought by the EU against the United States.

At the TEC meeting in December 2008, participants noted that the TEC had made progress towards strengthening transatlantic economic integration by focusing on three areas: (1) ensuring coordination and, where appropriate, development of compatible regulatory approaches generally, as well as in the development and application of specific regulations; (2) resolving specific bilateral issues; and (3) advancing common interests and addressing common challenges involving third countries.⁵ With respect to IPR, the TEC reported progress on joint IPR enforcement efforts, including improved information sharing about key third countries including China and Russia; negotiation of an Anti-Counterfeiting Trade Agreement with other trading partners; and advancing global patent harmonization.⁶ The TEC also reported progress on aligning U.S. and EU policies on accounting standards and automobile standards, and on strengthening the physical security of the supply chain in bilateral trade by agreeing to establish mutual recognition of customs security programs in 2009.⁷

At the annual U.S.-EU Summit in June 2008, the TEC issued a statement supporting an open global investment environment and reaffirming the U.S. and EU commitment to promote open investment policies at home and abroad.⁸ At the December 2008 TEC meeting, U.S. and EU officials agreed to “identify issues of concern with respect to bilateral investment measures and to develop lists of priority third-country investment barriers.”⁹

Regulatory Cooperation

The U.S.-EU High-Level Regulatory Cooperation Forum, established at the 2005 U.S.-EU Summit, met twice in 2008 in conjunction with the semiannual TEC meetings. During 2008, the Forum reported progress to the TEC on a number of issues, including cooperation on the safety of imports in key product areas, information sharing, impact and risk assessment methodologies in the development of regulations, and better incorporation of international standards in domestic regulations. With respect to import product safety, the Forum submitted a report to the May TEC meeting that reviewed U.S. and EU product safety systems in seven areas (e.g., motor vehicles, toys, pharmaceuticals, cosmetics, food, electrical equipment for consumer use, and other nonfood consumer products) and recommended ways to improve information sharing on unsafe products, particularly those imported from third countries.¹⁰ Examples of specific 2008 developments related to the recommendations include creation of a Toy Safety Working Group that has focused on the safety of imported toys, and an agreement (with Australia) to exchange inspection data and to pilot joint inspections of companies manufacturing pharmaceuticals in the United States, EU, and third

countries. (The first joint inspection was completed in 2008 in China.)¹¹ The Forum also presented a joint report to the May TEC meeting that reviewed how the United States and EU analyze the impact of domestic regulations on international trade and investment,¹² and listed possible ways to best ensure that future regulations take such effects fully into account.¹³ In line with the report's conclusions, during the year both sides revised their respective guidance on how to conduct impact assessments.¹⁴ Finally, both sides discussed U.S. and EU approaches to the use of standards, including voluntary national and international standards, in their regulations and agreed to conduct and present to the TEC in 2009 a joint report on the U.S. and EU systems, including sector case studies.¹⁵

Poultry

Since April 1, 1997, the EU has banned imports of U.S. poultry meat treated with pathogen reduction treatments (PRTs). PRTs are used to decontaminate poultry carcasses and are not permitted on poultry marketed in the EU. In 2002, the United States requested that the EU approve the use of four PRTs, including chlorine dioxide, but the ban remains in place.¹⁶ During 2008, lifting of the ban was a priority issue in the TEC, but no progress was made by the end of the year.¹⁷

REACH

The EU's new chemicals policy embodied in the REACH regulation entered into force on July 1, 2007.¹⁸ The legislation, which aims to protect human health and the environment, replaces about 40 laws and covers about 30,000 existing chemicals. It shifted the responsibility for determining the safe use of chemicals from the EU member states to industry, and required EU-based manufacturers and importers of chemicals of at least 1 metric ton annually to preregister such chemicals with the newly

¹⁸ Regulation (EC) No. 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), establishing a European Chemicals Agency, amending Directive 1999/45/EC and repealing Council Regulation (EEC) No. 793/93 and Commission Regulation (EC) No. 1488/94 as well as Council Directive 76/769/EEC and Commission Directives 91/155/EEC, 93/67/EEC, 93/105/EC and 2000/21/EC, O.J. (L396) 1.

created European Chemicals Agency (ECHA) between June 1, 2008, and December 1, 2008.¹⁹ Those companies that met the preregistration requirements must fully register by one of three staggered deadlines, with the largest volume and most hazardous chemicals subject to the earliest deadline of December 1, 2010.²⁰ Those chemicals of highest concern are subject to an authorization procedure by ECHA,²¹ which could result in restrictions or even a complete ban on their use.²²

According to the United States, REACH “appears to be overly broad and to adopt a particularly costly, burdensome, and complex approach that could disrupt and distort global trade.”²³ At the May TEC meeting, the European Commission acknowledged the “unprecedented challenge [posed by REACH] both for European and third country producers” and agreed to “within its competence, undertake the necessary steps to ensure transparent implementation, legal certainty and nondiscriminatory trade.”²⁴ In response to U.S. concerns about uncertainties regarding the treatment of chemical ingredients used in imported cosmetics under REACH,²⁵ the European Commission also committed to ensure that U.S. exports of cosmetics and personal care products to the EU are not disrupted by REACH implementation.²⁶

Canada

In 2008, Canada was the largest single-country U.S. trading partner based on two-way trade, accounting for 17.1 percent of U.S. merchandise trade with the world. U.S. merchandise trade with Canada was \$557.3 billion in 2008, 6.0 percent more than in 2007. The U.S. trade deficit with Canada increased \$13.0 billion in 2008 to \$112.4 billion, following a decline over the 2006-07 period (figure 5.3). The United States registered a trade surplus in services with Canada of \$22.7 billion in 2008, up \$4.3 billion from 2007 (figure 5.4). Canada was the second largest single-country U.S. trading partner in services (exports plus imports) in 2008, following the United Kingdom.

U.S. merchandise exports to Canada increased 4.4 percent to \$222.4 billion in 2008 (19.0 percent of total U.S. exports). Leading U.S. exports to Canada in 2008 included motor vehicles and related products as well as energy products, including petroleum,

¹⁹ If a company failed to meet the preregistration deadline, its chemicals are illegally on the EU market. European Commission, “Implementing REACH in Practice,” June 3, 2008, 4-6.

^a Data for 2008 are preliminary.

natural gas, and electricity. The 4.4 percent increase in U.S. exports to Canada was lower than the 11.8 percent growth of U.S. exports to the world largely because of declines in U.S. exports of auto-related products to Canada.

U.S. merchandise imports from Canada rose 7.1 percent to \$334.8 billion in 2008 (16.0 percent of total U.S. imports). Leading U.S. imports from Canada reflected much the same composition as U.S. exports to Canada, including petroleum, natural gas, and passenger vehicles. The fastest growing imports from Canada in 2008 were energy products, such as crude, heavy, and light petroleum; natural gas; electricity; and propane; with some of these products showing growth rates greater than 20 percent over last year as increased energy prices raised import values. U.S. imports of motor vehicles from Canada decreased in 2008, however, as the U.S. and Canadian economies slipped into recession. U.S.-Canada merchandise trade data can be found in appendix tables A.24 through A.26.

U.S.-Canadian trade relations are governed in large part by the North American Free Trade Agreement (NAFTA), which entered into force on January 1, 1994, replacing the 1989 bilateral U.S.-Canada Free Trade Agreement. NAFTA progressively eliminated tariff and nontariff barriers for bilateral trade in most agricultural and all industrial products that originate in the United States and Canada. In addition, NAFTA improved access for trade in services, established rules on investment, strengthened protection of intellectual property rights, and created a NAFTA dispute settlement mechanism. Since the implementation of NAFTA in 1994, total two-way merchandise trade between the United States and Canada has grown by roughly 265 percent, creating a number of new challenges for trade relations between the two countries.²⁷ Certain trade-related disputes between the United States and Canada are subject to NAFTA and WTO dispute settlement rules. Major procedural developments in active WTO and NAFTA dispute cases are listed in appendix tables A.19 and A.20, respectively. The following sections report on developments in U.S.-Canada trade relations during 2008, notably the U.S.-Canada Softwood Lumber Agreement.

²⁷ U.S. Department of State, "Background Note: Canada," November 2008.

Agriculture

The U.S.-Canada Consultative Committee on Agriculture, set up under the bilateral 1998 Record of Understanding on Agricultural Matters, met in May and November 2008. The Committee discussed trade-related issues regarding fruits, vegetables, seeds, plants, livestock, as well as biotechnology matters. Much of these discussions centered on the trade-related aspects of sanitary and phytosanitary standards, technical standards, labeling, and the implementation of national regulations governing these issues.²⁸

The two countries also made progress in implementing the Technical Arrangement Concerning Trade in Potatoes, set up in 2007 and expected to be fully in place by November 2009. The arrangement is expected to improve U.S. potato growers' access to Canadian processors with the help of expedited import documentation, as well as to provide Canadian potato growers with easier entry of some specialty potatoes into the U.S. market.²⁹

Softwood Lumber Agreement

Following expiration of the 1996 U.S.-Canada Softwood Lumber Agreement in March 2001, the United States and Canada signed a successor agreement on trade in softwood lumber in October 2006. In 2007, the United States held consultations with Canada regarding several Canadian federal and provincial programs for softwood lumber and, in August 2007, requested international arbitration under the agreement to resolve concerns about Canada's application of the agreement's provisions on export volume caps as well as its import surge mechanism.³⁰

The arbitration tribunal issued its decision on March 3, 2008, determining that Canada failed to properly adjust export quota levels for softwood lumber during the first half of 2007.³¹ The tribunal reached a determination as to an appropriate remedy in February 2009.

On January 18, 2008, the United States also requested a second arbitration tribunal to consider a U.S. challenge of several provincial programs on softwood lumber. The United States claims these programs reduce or offset export measures fixed under the agreement.³² This second tribunal is expected to reach a determination in late 2009.

China

In 2008, China was the United States' second largest single-country trading partner based on two-way trade, and accounted for approximately 12 percent of U.S. trade with the world. The United States' bilateral deficit with China, which grew by \$8.3 billion to \$270.3 billion in 2008, was higher than the U.S. deficit with any other single-country trading partner. The widening of the 2008 U.S. merchandise trade deficit with China was mostly attributable to an increase in U.S. merchandise imports (figure 5.5). The U.S. surplus in services with China increased \$767.0 million to \$6.2 billion in 2008, primarily driven by growth in U.S. service sector exports (figure 5.6).

U.S. merchandise exports to China amounted to \$67.2 billion in 2008, up 10.1 percent from 2007. China remained the third largest destination for U.S. exports in 2008, behind Canada and Mexico. Soybeans represented the largest U.S. export to China in 2008, followed by computer chips, passenger airplanes, and copper and aluminum waste and scrap. The growth in U.S. exports to China was primarily led by soybeans, which grew by 77.3 percent year on year, as well as electronic processors and cotton.

In 2008, China remained the largest single-country source of U.S. imports. In that year, U.S. imports from China amounted to \$337.5 billion, or 4.5 percent higher than they were in 2007. Leading U.S. imports from China in 2008 were computers and their parts, wireless telephones, toys, and video games and their parts. The growth was also primarily led by consumer electronics, including voice over internet protocol (VOIP) machines, laptops, and video games and their parts. Despite the robust growth in U.S. imports from China in early 2008, growth slowed in the fourth quarter, owing to the slowdown in U.S. consumption. U.S.-China merchandise trade data are shown in appendix tables A.27 through A.29.

Figure 5.5 U.S. merchandise trade with China, 2004-08

Source: U.S. Department of Commerce.

Figure 5.6 U.S. private services trade with China, 2004-08^a

Source: U.S. Department of Commerce.

^a Data for 2008 are preliminary.

In 2008, U.S.-China bilateral trade relations focused on intellectual property rights enforcement, textile and apparel trade, product safety, as well as cooperation on the financial sector, energy, and the environment. Also during 2008, U.S. and Chinese officials held bilateral discussions to address global trade imbalances and China's exchange rate policy. These issues were the main focus of the September 2008 Joint Commission on Commerce and Trade (JCCT) and the June and December 2008 U.S.-China Strategic Economic Dialogues (SEDs).³³

There were also developments in several WTO dispute settlement cases between the United States and China in 2008 (for more details, see chapter 3 and appendix table A.19), including:³⁴

- *Measures Affecting Imports of Automobile Parts (DS340)*: The United States (with the EU and Canada) claimed that China was assessing duties on certain auto parts at rates significantly above bound rates. The panel report was issued (July 18, 2008), and was subsequently appealed by China (September 15, 2008). The Appellate Body report was issued (December 15, 2008), representing the first WTO case brought against China to conclude both panel and Appellate Body rulings.
- *Measures Affecting the Protection and Enforcement of Intellectual Property Rights (DS362)*: A panel was established (September 25, 2007) to examine certain measures pertaining to the protection and enforcement of intellectual property rights in China. Because of the complexity of the case, the panel report was delayed and issued on January 26, 2009.
- *Measures Affecting Trading Rights and Distribution Services for Certain Publications and Audiovisual Entertainment Products (DS363)*: A panel was established (November 27, 2007) and composed (March 27, 2008) to review the U.S. claim that China's regulation limited the importation and distribution of products such as films, home entertainment products, and publications. Due to the complexity of the case, including translation issues, completion of the panel report has been extended to May 2009.

³³ The U.S.-China Strategic Economic Dialogue was established on September 20, 2006, to create a forum for high-ranking officials to discuss specialized bilateral trade issues and support the JCCT and other bilateral diplomatic forums. For more information, see White House, "President's Statement on the Creation of the U.S.-China Strategic Economic Dialogue," September 2006; U.S. Department of the Treasury, "Fact Sheet: Creation of the U.S. - China Strategic Economic Dialogue," September 2006.

³⁴ In a more recent case (DS392), filed in April 2009, China requested WTO dispute settlement consultations with the United States regarding U.S. measures affecting imports of poultry from China.

- *Measures Affecting Financial Information Services and Foreign Financial Information Suppliers* (DS373): The United States requested WTO dispute settlement consultations with China (March 3, 2008) regarding measures that limit the ability of foreign financial information service providers to establish offices in China and service Chinese users. China and the United States notified the WTO on December 4, 2008, of a memorandum of understanding that provided a mutually agreed settlement between the two parties.
- *Definitive Antidumping and Countervailing Duties on Imports of Certain Products from China* (DS379): China requested consultations (September 19, 2008) regarding antidumping and countervailing duties imposed by the United States on a variety of its products, including steel pipe, off-road tires, light-walled rectangular pipe and tube, and laminated woven sacks. A panel was established on January 20, 2009.
- *Grants, Loans and Other Incentives* (DS387): The United States requested consultations with China (December 19, 2008) claiming that the Chinese government offers grants, loans, and other incentives to exporting enterprises, which violate WTO rules prohibiting export subsidies.

Intellectual Property Rights Enforcement

Intellectual property protection for both domestic and foreign rights-holders in China continued to be a high priority issue for the United States in 2008, according to the USTR.³⁵ A WTO dispute settlement panel, established in September 2007 in response to a complaint by the United States, held proceedings in April and June 2008 to evaluate China's protection and enforcement of U.S. IPR. In January 2009, the panel announced that it found certain aspects of China's IPR regime to be inconsistent with its WTO obligations.³⁶ Despite China's 2007 accession to the World Intellectual Property Organization (WIPO) Internet Treaties, the International Intellectual Property Alliance (IIPA) recommended that China remain on USTR's priority watch list, noting limited progress in China's copyright industries and increased problems with online and mobile piracy. The IIPA estimated 2008 losses due to copyright piracy in China to be \$3.5 billion dollars, considerably more than any other country.³⁷

According to the USTR, China's legal and regulatory framework has improved since its accession to the WTO, but problems persist with IPR protection and enforcement.³⁸ Notwithstanding repeated anti-piracy campaigns and an increase in civil IPR cases in Chinese courts, piracy and counterfeiting remain the main IPR problems. Such IPR violations continued to affect goods and services in a broad range of industries, including business and entertainment software, information technology, music, films,

³⁶ USTR, "United States Wins WTO Dispute Over Deficiencies in China's Intellectual Property Rights Laws," January 26, 2009.

³⁷ International Intellectual Property Alliance, "2009 Special 301 Report," February 17, 2009. In USTR's 2009 Special 301 report, China remains on the priority watch list.

³⁸ USTR, 2008 Report on China's WTO Compliance, 2008, 72-74.

pharmaceuticals, chemicals, apparel, athletic footwear, textile fabrics, electrical equipment, automotive parts, and industrial products, among others.³⁹

During the 2008 JCCT and SED meetings, the United States and China agreed to continue regular IPR working group meetings to address China's development of guidelines on IPR and standards, internet piracy challenges, and how to mitigate sales of counterfeit goods.⁴⁰

Textile and Apparel Trade

In 2008, China remained the largest exporter of textiles and apparel goods to the United States, increasing its share of total U.S. textile and apparel imports from 40.2 percent in 2007 to 40.9 percent in 2008.⁴¹ During the year, 34 categories of textile and apparel products were subject to 21 quotas under the 2005 memorandum of understanding (MOU) between the United States and China, which established quotas on U.S. imports of selected textile and apparel products from China from January 1, 2006 through December 31, 2008.⁴² During 2008, quotas filled at an average rate of 66 percent, which represented an increase over 2007, when the average fill rate was 62 percent. In 2008, quota fill rates ranged from 3 percent for certain man-made fiber furnishings to 93 percent for certain hosiery.⁴³

In 2008, both the EU and the United States conducted programs to monitor imports of Chinese textiles and apparel upon the expiration of quotas. Throughout 2008, the EU and China jointly monitored Chinese exports of textiles and apparel to the EU, with a goal of avoiding market disruptions.⁴⁴ In October 2008, the United States established a similar program to monitor U.S. imports of textiles and apparel constrained by quotas, after concerns that "a market-disrupting surge in textile and apparel imports from China could occur after the MOU expires."⁴⁵ According to the new series of monitoring reports produced by the Commission, the share held by China in U.S. imports of products constrained by quotas during 2005-08 ranged from 3 percent (for certain man-made fiber furnishings) to 90 percent (for silk trousers and shorts) of the total U.S. import market for these products.⁴⁶

⁴⁰ U.S. Department of Commerce, "19th U.S.-China Joint Commission on Commerce and Trade Outcomes," September 16, 2008.

⁴¹ In terms of square meter equivalents (SMEs).

⁴² For the purposes of the MOU, several categories of textile and apparel products (using the U.S. Textile and Apparel Category System) were grouped together and subject to the same quota. For example, for the period January 1, 2008 through December 31, 2008, products in categories 340 (men's and boys' cotton woven shirts) and 640 (men's and boys' man-made fiber woven shirts) are subject to the same restraint level of 8,724,590 dozen. "Memorandum of Understanding Between the Governments of the United States of America and the People's Republic of China Concerning Trade in Textile and Apparel Products," November 8, 2005.

⁴⁶ USITC, *Textile and Apparel Imports from China: Statistical Reports*, 2009.

Product Safety

During the 2008 Strategic Economic Dialogues, the United States and China agreed on several initiatives aimed at improving product quality and food safety. These initiatives included continued dialogue on China's export-product quality and food-safety control system; strengthened cooperation on inspection, quarantine, and safety of designated products;⁴⁷ and implementation of the Food Safety Information Notification MOU to effectively protect consumers of both countries.⁴⁸ In addition to these initiatives, the United States and China signed:

- A joint progress statement on the Five-Year Work Plan under the Agreement on the Safety of Food and Feed. The U.S. Department of Health and Human Services (HHS) and China's General Administration of Quality Supervision, Inspection, and Quarantine (AQSIQ) were signatories to this statement;⁴⁹
- A memorandum of understanding on the safety of drugs and medical devices. Both the U.S. Food and Drug Administration and China's State Food and Drug Administration were signatories to this agreement; and
- A memorandum of understanding on Collaboration in Traditional Chinese Medicine.⁵⁰

In addition to these measures, the United States and China agreed to review the implementation of existing bilateral agreements, identify gaps in performance, and prepare a corresponding progress report in advance of the next SED.⁵¹

Financial Sector Cooperation

During the 2008 SED meetings, the United States and China agreed to increase financial sector liberalization in China by:

- Allowing non-deposit taking foreign financial institutions to provide consumers with finance;
- Letting qualified foreign companies list on China's stock exchanges through direct share issuance or depository receipts;

⁴⁷ U.S. Department of the Treasury, "Joint U.S.–China Fact Sheet: Fourth U.S.–China Strategic Economic Dialogue," June 2008.

⁴⁹ U.S. Department for Health and Human Services, "United States and China Outline Progress on Agreement on Food and Feed Safety," December 11, 2007.

⁵⁰ U.S. Department of the Treasury, "Joint Fact Sheet: Fourth Economic Dialogue," June 2008.

⁵¹ U.S. Department of the Treasury, "Joint Fact Sheet: Fifth Economic Dialogue," December 2008.

- Easing qualifications on foreign incorporated banks to issue subordinated Chinese RMB-denominated bonds;⁵²
- Permitting foreign incorporated banks to trade bonds in the Chinese interbank market; and
- Allowing foreign banks to increase guarantees and/or foreign currency loans from overseas affiliates.⁵³

Also, in response to a March 2008 complaint that the United States filed against China under the WTO Dispute Settlement Understanding, which challenged restrictions China placed on foreign suppliers of financial information, the United States and China signed a MOU that provides for an independent regulator to eliminate certain requirements for foreign financial information suppliers, and removal of challenged restrictions on foreign suppliers.⁵⁴

Notwithstanding these understandings, China continued to leave several market-access related WTO commitments unfulfilled. For example, China still limits electronic payment services, foreign equity in domestic securities, and branch expansion for foreign insurance companies.⁵⁵

Ten Year Framework on Energy and Environment Cooperation

During the SED meeting in June 2008, the United States and China signed the Ten Year Framework on Energy and Environment Cooperation to foster collaborative work on environmental sustainability, climate change, and energy security. The Ten Year Framework aimed to collaboratively improve electricity production and transmission, ensure clean water sources, limit air pollution, establish environmentally friendly and efficient transportation systems, and conserve forest and wetland ecosystems.⁵⁶ During the December 2008 SED meeting, the United States and China added a sixth goal regarding energy efficiency cooperation: to promote energy efficiency in buildings and communities and increased consumer recognition of energy efficient products. Under a related MOU on energy conservation and environmental protection, the United States and China agreed that each country's export-import banks will facilitate the financing of select environmentally friendly projects involving U.S. exports.

In 2008, the United States and China formed seven voluntary "EcoPartnerships," cooperative partnerships between subnational entities (e.g., states, provinces, cities, research universities, corporations, nonprofit organizations) that aim to find new approaches toward sustainable economic growth. These partnerships experimented with public-private partnerships to address deficiencies in energy efficiency in Chinese

enterprises and take advantage of U.S. private sector expertise to support China's high-priority clean water program.⁵⁷

Global Trade Imbalances and China's Exchange Rate Regime

The U.S. merchandise trade deficit with China of \$270.3 billion in 2008 grew by \$8.3 billion relative to the year before. The magnitude and growth of this bilateral trade deficit, increasing imbalances in the global economy, and policies limiting the Chinese currency's flexibility remained a concern for U.S. policymakers in 2008.⁵⁸

Since China officially ended its fixed exchange rate peg with the U.S. dollar on July 21, 2005, the yuan appreciated by approximately 17.2 percent in U.S. dollar terms by year-end 2008.⁵⁹ China's current exchange-rate policy of managing the yuan against a broader set of currencies, while allowing the yuan to fluctuate by as much as 0.3 percent daily against the dollar, has continued since mid-2005. China has reformed its currency market by authorizing non-state banks to administer spot currency trading.⁶⁰

According to the U.S. Treasury Department, China's large current account surplus in 2008, and inflationary pressure associated with the corresponding influx of foreign exchange reserves, has continued to leave its economy imbalanced, both domestically and internationally.⁶¹ During the June 2008 SED, the U.S. Treasury Department intensified pressure on China to rebalance its economy by boosting domestic demand through consumption-led growth, reforming its financial system, continuing to let the yuan appreciate, and imposing greater foreign exchange-rate flexibility. In addition to these efforts, the December 2008 SED placed emphasis on financial market stability and sustained economic growth in both countries.⁶²

Mexico

In 2008, Mexico was the third largest single-country U.S. trading partner following Canada and China, and accounted for approximately 11 percent of U.S. trade with the world.⁶³ The U.S. merchandise trade deficit with Mexico declined by \$6.0 billion to \$84.8 billion in 2008 (figure 5.7), mainly due to increased U.S. exports to Mexico, which in 2008 grew more in value than corresponding imports from Mexico. The slowdown of the U.S. and Mexican economies, mostly in the third and fourth quarters

⁵⁷ Ibid.

⁵⁸ Congressional Research Service, "China-U.S. Trade Issues," March 7, 2008.

⁵⁹ USITC estimates based on foreign exchange rates provided by the IMF's International Financial Statistics database. Given the recent global economic downturn, China has kept the yuan close to a peg against the dollar since early 2009.

⁶⁰ In the past, all foreign exchange trading was highly regulated and exclusively run by the State Administration for Foreign Exchange (SAFE).

⁶¹ U.S. Department of Treasury, "Report to Congress on International Economic and Exchange Rate Policies," May 2008.

⁶² U.S. Department of Treasury, "Joint Fact Sheet: Fifth Economic Dialogue," December 2008.

⁶³ Based on two-way trade, i.e., the sum of merchandise exports plus imports.

of 2008,⁶⁴ contributed to the decrease in the bilateral trade deficit with Mexico, which occurred despite a dollar appreciation of more than 25 percent against the Mexican peso in 2008. The U.S. trade surplus in services with Mexico grew by 2.1 percent to \$8.3 billion in 2008 (figure 5.8). U.S. services exports to Mexico were \$24.7 billion and U.S. services imports from Mexico were \$16.4 billion.

U.S. merchandise exports to Mexico amounted to \$131.5 billion in 2008, up 10.2 percent from 2007. In 2008, as in the previous year, machinery and transportation equipment continued to be the largest product group in bilateral trade, of which automotive trade was an important component in both imports and exports. Other leading U.S. exports to Mexico included petroleum products, computer parts, corn, soybeans, and parts for electrical apparatus.

In 2008, U.S. merchandise imports from Mexico increased by 2.9 percent to \$216.3 billion. Leading U.S. imports from Mexico included petroleum and petroleum products, motor vehicles, televisions, cellular telephones, and medical instruments. Particularly important in the movement of U.S. imports was the increase in U.S. imports of mineral fuels,⁶⁵ which was partially offset by a decrease in U.S. imports of machinery and transport equipment—together responsible for most of the change in total U.S. imports from Mexico. U.S.-Mexico merchandise trade data are shown in appendix tables A.30 through A.32.

U.S.-Mexican trade relations are governed in large part by NAFTA, which provides duty-free treatment for substantially all bilaterally traded goods originating in the United States and Mexico. There were a number of trade disputes between the United States and Mexico that were the subject of WTO and NAFTA dispute settlement proceedings in 2008. The procedural developments in each of these cases are described in appendix tables A.19 and A.20, respectively.⁶⁶ Recent developments in cross-border trucking provisions between Mexico and the United States are summarized below.

Figure 5.7 U.S. merchandise trade with Mexico, 2004-08

Source: U.S. Department of Commerce.

Figure 5.8 U.S. private services trade with Mexico, 2004-08^a

Source: U.S. Department of Commerce.

^a Data for 2008 are preliminary.

⁶⁴ The slowdown in the economies of the United States and those of the developed world at the end of 2008 is discussed in chap. 1, as well as the value of the dollar against the currencies of major U.S. trading partners.

⁶⁵ In 2008, most of the increase in U.S. imports of petroleum products was due to the increase in the price of oil. Chap. 1 illustrates a substantial increase in the price of oil, which peaked in mid-2008.

⁶⁶ Developments during 2008 in WTO dispute settlement cases are also described in chap. 3.

Cross-Border Trucking Between the United States and Mexico

The NAFTA cross-border trucking provisions permit Mexican trucks to obtain operating authority to provide cross-border truck services throughout the United States beginning in 2000. Implementation, however, has been delayed because of safety concerns.⁶⁷ On September 7, 2007, the U.S. Department of Transportation (USDOT) initiated a one-year Cross-Border Trucking Demonstration Project aimed at demonstrating the ability of Mexico-based motor carriers to operate safely in the United States beyond the commercial zones along the U.S.-Mexico border.⁶⁸ In 2008, the USDOT evaluated this one-year demonstration project.⁶⁹ On August 6 of the same year, the USDOT extended the demonstration program for two years until 2010.⁷⁰ However, the program was terminated by USDOT in January 2009 when the Congress discontinued its funding.⁷¹

On October 31, 2008, the USDOT assessed how the Federal Motor Carrier Safety Administration (FMCSA) implemented U.S. motor carrier safety policies and regulations for this one-year demonstration project and evaluated the safety performance of Mexico-domiciled carriers operating beyond the border commercial zones in the United States.⁷² Although the one-year demonstration program permitted up to 100 Mexico-domiciled motor carriers to operate throughout the United States, only 25 Mexican carriers participated in the project.⁷³ From September 7, 2007, to September 6, 2008, the report states that the FMCA records show that there were more than 12,000 truck crossings into the United States. Over 85 percent of these crossings were to destinations within the commercial zone—nearly all of them to Texas and California—and less than 15 percent were long-haul operations that went beyond the border commercial zone.⁷⁴

⁶⁷ Developments in cross-border truck services between the United States and Mexico from 1981 to 2004 are summarized in U.S. Department of Transportation, “Cross-Border Truck Safety Inspection Program...,” Fact sheet, February 23, 2007; and USITC, *The Economic Effects of Significant U.S. Import Restraints—Fifth Update 2007*, February 2007, 99. Developments from 2004 to 2007 are described in 72 Fed. Reg. 23883 (May 1, 2007) and USITC, *The Year in Trade 2007*, 5–10.

⁶⁸ The safety of the participating carriers was tracked closely by the Federal Motor Carrier Safety Administration (FMCSA) and its state partners, a joint U.S.- Mexico monitoring group, and an evaluation panel independent of the U.S. Department of Transportation. Details of the Cross-Border Trucking Demonstration Project are discussed in 72 Fed. Reg. 23883 (May 1, 2007); 72 Fed. Reg. 31877 (June 8, 2007); 72 Fed. Reg. 46263 (August 17, 2007); and USITC, *The Year in Trade 2007*, 5–11.

⁶⁹ As mandated by Congress, U.S. Troop Readiness, Veterans’ Care, Katrina Recovery, and Iraq Accountability Appropriations Act, 2007. P. L. 110-28 (2007), sec. 6901, 121 Stat. 183-185 (May 25, 2007).

⁷⁰ 73 Fed. Reg. 45796 (August 6, 2008).

⁷¹ 74 Fed. Reg. 11628 (March 18, 2009). The USDOT ceased to operate this program when Congress banned USDOT funds to operate or maintain the program, Omnibus Appropriations Act, March 11, 2009, Pub. L. No. 111-8. In response, the government of Mexico, stating that this measure is inconsistent with U.S. obligations under NAFTA, suspended the preferential tariffs that NAFTA affords certain goods from the United States. On March 18, 2009, the government of Mexico announced new tariffs on 89 tariff lines, which range from 10 percent to 45 percent with a simple average of 18 percent. The value of Mexico’s imports from the United States of these 89 products was \$2.4 billion in 2007 and \$2.3 billion in 2008, which amounted to less than 2 percent of total U.S. exports to Mexico. On March 19, 2009, the new tariffs became effective. Secretaría de Gobernación, *Diario Oficial de la Federación* (Mexico’s Federal Register), March 18, 2009.

⁷² The assessment was carried out by the Independent Evaluation Panel at the request of the U.S. Department of Transportation.

⁷³ Independent Evaluation Panel Report, U.S.-Mexico Cross-Border Trucking Demonstration Project, xi.

⁷⁴ *Ibid.*, xii.

The Independent Evaluation Panel that assessed the project also reported that, according to FMCSA and official state safety enforcement records, there were no crashes involving Mexico-domiciled trucks participating in the project. In addition to the every-truck-every-time checks done at the border-crossing facilities, more than 7,000 and 1,400 safety inspections were conducted on participating drivers and trucks, respectively. Of the 7,000 driver safety inspections, less than 1 percent resulted in out-of-service (OOS) violations. This driver OOS rate of the demonstration project was lower than the rate of all U.S.-domiciled carriers (7.2 percent) and U.S.-domiciled new-entrant carriers (13.3 percent).⁷⁵ Of the 1,400 vehicle safety inspections, 8.7 percent resulted in OOS violations compared to 22.6 percent of all U.S.-domiciled carriers and 28.0 percent of U.S.-domiciled new-entrant carriers.⁷⁶ The report found that a larger sample of carriers is needed to make a statistically significant comparison.⁷⁷

Although the project was terminated in early 2009, Mexico still grants the United States the right to operate U.S.-domiciled trucks in Mexico as originally granted in the two-year project extension.

Japan

In 2008, Japan was the fourth largest single-country U.S. trading partner, accounting for 6.2 percent of U.S. total merchandise trade. The U.S. merchandise trade deficit with Japan in 2008 was \$77.7 billion or 8.4 percent of the total U.S. merchandise trade deficit, down for the second year in a row (figure 5.9). The \$9.2 billion decrease in the merchandise trade deficit resulted from a 5.7 percent increase in U.S. exports to Japan and a 4.0 percent decrease in U.S. imports from Japan. This narrowing of the merchandise trade deficit with Japan may be partially attributable to the 17.2 percent depreciation of the dollar versus the yen in 2008. The U.S. services trade surplus with Japan increased by \$1.5 billion to \$17.3 billion in 2008. U.S. exports of services to Japan grew 5.8 percent to \$42.6 billion, while imports of services from Japan increased 3.4 percent to \$25.3 billion (figure 5.10).

U.S. merchandise exports to Japan were \$61.4 billion or 5.3 percent of total U.S. merchandise exports in 2008, compared with \$58.1 billion or 5.6 percent of the total in 2007. Exports of corn, the leading U.S. export to Japan, increased 46.8 percent in 2008 to \$3.8 billion. The value of other leading agricultural exports, such as wheat, soybeans, and pork, increased sharply in terms of value compared with 2007, due in large part to higher prices. Exports of leading manufactures, such as aircraft and parts, semiconductor manufacturing equipment, medical instruments, and cigarettes, declined. The value of U.S. exports of mineral fuels (e.g., petroleum coke and liquefied natural gas) also increased significantly due to higher prices.

⁷⁵ Ibid., xiii.

⁷⁶ Ibid.

⁷⁷ The panel reports that U.S. and Mexican officials cited uncertainty regarding whether the project will continue and the additional cost of insurance as the main reasons behind the limited participation of Mexican carriers.

Figure 5.9 U.S. merchandise trade with Japan, 2004-08

Source: U.S. Department of Commerce.

Figure 5.10 U.S. private services trade with Japan, 2004-08^a

Source: U.S. Department of Commerce.

^a Data for 2008 are preliminary.

U.S. merchandise imports from Japan declined for the second straight year to \$139.1 billion or 6.7 percent of total U.S. merchandise imports in 2008. The decline was primarily attributable to decreases in U.S. imports of motor vehicles and parts, although imports of most other manufactures also declined. Imports of passenger vehicles, the leading U.S. import from Japan, decreased 5.2 percent from 2007 to \$42.7 billion or 30.7 percent of total imports from Japan in 2008. Similarly, imports of motor vehicle parts decreased 11.8 percent to \$7.1 billion. One exception was imports of copy and fax machine parts, which increased 11.8 percent to \$4.7 billion. U.S.-Japan merchandise trade data are shown in appendix tables A.33 through A.35.

The U.S.-Japan Economic Partnership for Growth has served as the primary forum for trade and economic dialogue between the two countries since its establishment in 2001. In 2008, discussions under this framework focused on U.S. beef exports to Japan and deregulation of Japan's economy, including economy-wide and sector-specific reforms.

Beef

Japan continues to restrict imports of U.S. beef by requiring all products to be derived from animals 20 months old or younger because of concerns about BSE (bovine spongiform encephalopathy, also known as "mad cow disease").⁷⁸ Japan's restrictions on imports of U.S. beef have had a substantial adverse impact on U.S. beef exports. Prior to the prohibition on imports of U.S. beef in December 2003, Japan was the largest export market for U.S. beef. U.S. exports of beef totaled \$3.6 billion in 2003, of which \$1.3 billion, or 37.1 percent, went to Japan. In 2008, U.S. exports of beef totaled \$3.2 billion, and just \$382 million or 12.0 percent of that total was shipped to Japan.⁷⁹

⁷⁸ Japan was one of several countries that banned imports of U.S. beef and beef products in December 2003 after a cow of Canadian origin, found in a U.S. herd, was determined to be infected with BSE. USDA implemented an export verification program in 2006 to ensure that exports meet the Japanese age restrictions and that banned Canadian beef did not mix with U.S. beef exported to Japan. USDA, Food Safety and Inspection Service, "Export Requirements for Japan, JA-139 (April 23, 2008), Red Meat Export Requirements for Japan"; USTR, *2008 Trade Policy Agenda*, 2008, 158-165; and USITC, *Global Beef Trade*, 2008, 5-4-5-6.

⁷⁹ GTIS, Global Trade Atlas Database (accessed April 2, 2009).

The year 2008 was the first full year since Japan replaced its policy of 100 percent reinspection of U.S. beef and beef products with a sampling-based protocol. This change likely contributed to the 56.2 percent increase in U.S. beef exports to Japan between 2007 and 2008.⁸⁰ As of December 2008, Japan's 20 months or younger age restriction was still in place.

Deregulation

During 2008, bilateral dialogue on the deregulation of Japan's economy continued under a component of the partnership known as the Regulatory Reform and Competition Policy Initiative. Discussions with Japan focused on recommendations originally exchanged in October 2007.⁸¹

Japan implemented several cross-sectoral reforms in 2008. These reforms included efforts to open regulatory decision-making, lower barriers to trade and investment, enhance competition, and improve the business climate.⁸² Japan revised its customs laws in order to streamline import procedures, and improved efficiency in customs processing through the elimination of overtime service charges.⁸³ Japan also strengthened the penalties for companies and individuals caught rigging bids on government contracts, and increased to 11 the number of ministries that have adopted programs to encourage the reporting of bid-rigging activities.⁸⁴

Japan continued sector-specific reforms in 2008. Japan agreed to eliminate mobile handset subsidies to telecommunications companies, which have impeded competition by causing high costs to consumers who choose to change service providers.⁸⁵ Japan approved six new food additives for use in Japan that are already generally accepted worldwide, including in the United States. Additionally, Japan liberalized the sale of insurance products through banks, creating greater consumer choice. Japan also moved to equalize regulatory treatment of formerly state-owned companies (Japan Post companies) relative to other private companies. Japan has taken steps to eliminate the perception that Japan Post Bank and Japan Post insurance deposits are implicitly guaranteed by the government, as well as to ensure that Japan Post companies are required to meet the same banking, insurance, and other regulatory obligations as other private sector financial companies.⁸⁶

⁸⁶ USTR, "Seventh Report on the U.S.-Japan Regulatory Reform Initiative," July 5, 2008.

Korea

Korea was the seventh largest single-country two-way trading partner of the United States with two-way merchandise trade valued at \$79.8 billion in 2008, accounting for 2.4 percent of U.S. trade with the world. The United States recorded a \$13.6 billion trade deficit with Korea in 2008, up slightly from a \$12.4 billion deficit in 2007 and similar to deficits in previous years (figure 5.11). The U.S. trade surplus in services with Korea grew \$871 million to \$7.0 billion (figure 5.12).

U.S. exports to Korea were valued at \$33.1 billion in 2008, an increase of 0.2 percent over 2007. Leading U.S. exports to Korea during the year included corn, aircraft, transistors, and ferrous waste and scrap. Most of the 2007 leading exports (19 of the top 25) showed declines in value; but strong increases in exports of corn, transistors, and ferrous waste and scrap largely offset those declines.

U.S. imports from Korea totaled \$46.7 billion, an increase of 2.9 percent from 2007. Leading U.S. imports from Korea included cellular phones, automobiles, computer parts and accessories (mainly memory modules), and computer chips. Declines, by value, of many of the leading imports were more than offset by the large increases in the value of imports of cellular phones and computer chips. U.S.-Korea merchandise trade data are shown in appendix tables A.36 through A.38.

U.S.-Korean trade relations in 2008 were dominated by the status of the U.S.-Korea FTA, which was signed in June 2007, and the agreement on a protocol to resume exports of U.S. beef to Korea, which had been suspended originally over bovine spongiform encephalopathy concerns in late 2003.

^a Data for 2008 are preliminary.

U.S.-Korea FTA

The United States and the Republic of Korea signed an FTA on June 30, 2007, after concluding negotiations in April of that year. The U.S.-Korea FTA would, if implemented, be the “most commercially significant” free trade agreement for the United States since the NAFTA entered into force in 1994.⁸⁷

The FTA would eliminate duties on a wide range of the partner countries’ originating goods immediately, while phasing out duties on other originating goods over differing transition periods and providing preferential tariff-rate quotas (TRQ) on certain sensitive goods. Specifically, upon entry into force of the FTA, approximately 82 percent of U.S. tariff lines and approximately 80 percent of Korean tariff lines would have free rates of duty for originating goods. Approximately 93 percent of U.S. tariff lines and 92 percent of Korean tariff lines would have free rates of duty after five years; approximately 99 percent of U.S. tariff lines and 98 percent of Korean tariff lines would have free rates of duty by year 10.⁸⁸

At the end of 2008, the agreement was pending approval by the U.S. Congress and the Korean National Assembly. A major area of contention for the United States concerns automobiles. A number of U.S. manufacturers, union groups, and legislators have publicly opposed the agreement citing concerns over market access.⁸⁹ Korea is a major vehicle producer and exporter but has low levels of import penetration.

Beef

On January 13, 2006, the United States and Korea announced an initial import protocol for the resumption of Korean imports of U.S. beef (boneless beef from cattle under 30 months of age), which had been suspended in December 2003 after a Canadian cow in Washington State was found to have BSE. On September 7, 2006, Korea announced that it would resume importation of U.S. beef in accordance with the protocol.⁹⁰ Following the resumption of imports, several shipments of U.S. beef to Korea were rejected by Korean authorities because of the presence of bones, and further shipments from the United States were effectively suspended. Shipments were resumed in early 2007, but problems persisted and all imports from the United States were stopped in October 2007.⁹¹

The United States urged Korea to recognize guidelines set by the World Organization for Animal Health (OIE)⁹² and reopen its market. On May 22, 2007, the OIE Scientific Commission formally classified the United States as a controlled risk country for BSE.

⁸⁷ USTR, “United States and Korea Conclude Historic Trade Agreement,” April 2, 2007.

⁸⁸ USITC, *U.S.-Korea Free Trade Agreement*, 2007, 1-7.

⁸⁹ *Ibid.*, 3-85–3-90.

⁹⁰ USDA, “Statement by Agriculture Secretary Mike Johanns.” Sept. 7, 2006.

⁹¹ USITC, *Global Beef Trade*, 2008, 6-1.

⁹² The Office International des Epizooties was established in 1924. In May 2003, the Office became the World Organization for Animal Health, but kept its historical acronym OIE. See http://www.oie.int/eng/OIE/en_about.htm?e1d1.

The controlled risk classification recognizes that U.S. regulatory controls are effective and that U.S. fresh beef and beef products from cattle of all ages can be safely traded.⁹³

On April 18, 2008, the United States and Korea agreed to a protocol that provides for a full reopening of the Korean beef market to exports from the United States. The protocol defines conditions for the importation of U.S. beef into Korea and requires that the United States meet or exceed OIE guidelines. It permits all U.S. beef (bone-in and boneless) and beef products from cattle of all ages to be imported into Korea, with appropriate specified risk materials, as defined by the OIE, removed.⁹⁴

There was significant public opposition to resuming imports of U.S. beef in Korea.⁹⁵ As a result, on June 20, 2008, Korean beef importers and U.S. exporters reached a commercial understanding—separate from the April 18 agreement—that only U.S. beef and beef products from cattle less than 30 months of age will be shipped to Korea, as a transitional measure, to improve Korean consumer confidence in U.S. beef. At the request of U.S. exporters, the U.S. Department of Agriculture set up a voluntary Quality System Assessment Program that will verify that beef from participating plants is from cattle less than 30 months of age.⁹⁶ U.S. beef exports resumed as of June 26, 2008, after Korea published its “Import Health Requirements for U.S. Beef and Products” in its official gazette,⁹⁷ and Korea quickly returned to being one of the leading destinations for U.S. beef exports.

Taiwan

In 2008, Taiwan was the United States’ 11th largest trading partner based on two-way trade, and accounted for approximately 1.8 percent of U.S. trade with the world. The narrowing of the U.S. merchandise trade deficit with Taiwan, which amounted to \$12.6 billion in 2008 compared to \$13.5 billion the year before, was mostly attributable to a fall in U.S. merchandise imports from Taiwan (figure 5.13). The U.S. trade deficit in services with Taiwan increased \$106.0 million to \$291.0 million in 2008, primarily driven by growth in U.S. service sector imports (figure 5.14).

U.S. merchandise exports to Taiwan amounted to \$23.6 billion in 2008, down 3.7 percent compared to 2007. This decline was led by falling U.S. exports of semiconductor manufacturing machines, and caused Taiwan to fall from the 10th to 13th largest destination for U.S. exports in 2008. Leading U.S. exports to Taiwan included processors and controllers for computers, electronic integrated circuits, semiconductor manufacturing and assembly equipment, soybeans, and aircraft. Ferrous waste and scrap exports grew by 124.3 percent in 2008 to become the seventh largest U.S. export to Taiwan.

Source: U.S. Department of Commerce.

Figure 5.14 U.S. private services trade with Taiwan, 2004-08^a

Source: U.S. Department of Commerce.

^a Data for 2008 are preliminary.

In 2008, U.S. imports from Taiwan amounted to \$36.2 billion, representing a 4.9 percent decrease from the year before. The drop in overall imports from Taiwan was led by consumer products, such as liquid crystal display (LCD) screens, because U.S. demand for such products dropped precipitously in the fourth quarter. In 2008, Taiwan fell from the 9th to 12th largest source of U.S. imports. Leading U.S. imports from Taiwan during the year included electronic digital integrated circuits, wireless telephones, reception apparatuses for navigational radios, parts for data processing machines, and reception apparatuses for televisions. U.S.-Taiwan merchandise trade data are shown in appendix tables A.39 through A.41.

A U.S.-Taiwan Trade and Investment Framework Agreement (TIFA) was established in 1994 as the primary forum in which officials from the United States and Taiwan could address bilateral trade issues and promote economic cooperation.⁹⁸ Although the TIFA's seventh annual meeting did not take place in 2008 as scheduled, U.S.-Taiwan negotiations on intellectual property rights enforcement and agricultural trade were nonetheless coordinated through the TIFA framework.

Intellectual Property Rights

In April 2008, the USTR published in its annual Special 301 Report that an Out-of-Cycle Review would be initiated for Taiwan to monitor progress on outstanding IPR enforcement. As a result of this review, concluded in January 2009, Taiwan was taken off of the watch list, where it had been since 2004.⁹⁹

The decision to remove Taiwan from the watch list was based on the finding that Taiwan had achieved years of sustained progress in combating IPR violations, and that Taiwan strengthened IPR protection in 2008 in several additional ways. First, in 2008,

⁹⁸ American Institute in Taiwan (AIT), "U.S. and Taiwan Enhance Trade Cooperation," July 12, 2007.

⁹⁹ USTR, "USTR Announces Conclusion of the Special 301 Out-of-Cycle Review for Taiwan," January 16, 2009.

Taiwan established an IPR Court and an IPR enforcement branch in the High Prosecutor's Office in order to develop the capacity to handle technically difficult IPR cases. Second, a Campus IPR Action Plan, launched in 2007 by the Ministry of Education, continued to fight Internet and textbook piracy on campuses. Third, Taiwan made moves toward amending its copyright law with the intention of requiring Internet service providers to undertake specific notice-and-takedown actions against online infringers.¹⁰⁰

Despite Taiwan's 2008 progress in IPR protection and enforcement, the USTR reiterated several of its concerns from previous years.¹⁰¹ These include the magnitude of counterfeit pharmaceutical imports in Taiwan, ongoing Internet piracy, illegal file sharing, textbook copying at universities, and the lack of sufficient IPR protection for the packaging, configuration, and appearance of products (so-called trade dress).

Taiwan remains a transshipment point and a market for counterfeit clothing and luxury goods. Customs and intellectual property police regularly seize these products, but inadequate resources combined with relatively light sentences make these deterrents ineffective. The U.S. International Intellectual Property Alliance estimates that losses due to copyright piracy in Taiwan cost U.S. industry \$327.8 million in 2007. However, progress has been made in curbing the flow of counterfeit goods from Taiwan to the United States, as the value of these products seized by U.S. Customs dropped from \$26.5 million in 2002 to \$3.4 million in 2007 and to \$1.3 million in the first half of 2008.¹⁰²

Agriculture

Taiwan remained a significant market for U.S. agriculture in 2008, importing \$3.4 billion of U.S. agricultural products.¹⁰³ During the year, agricultural trade negotiations continued to focus on providing more comprehensive market access for U.S. beef and beef products and reforming Taiwan's rice procurement practices.

Beef

In 2008, Taiwan continued to restrict imports of U.S. beef by requiring all products to be derived from animals younger than 30 months.¹⁰⁴ Additionally, Taiwan still required that specified risk material tissue be removed from all beef imports, despite the fact that the more internationally accepted standard is only the removal of tissue from cattle over 30 months of age.¹⁰⁵ Moreover, ruminant and nonruminant product

¹⁰⁴ USTR, *2009 National Trade Estimate Report*, 2009, 480.

¹⁰⁵ Ibid.

imports intended for use in animal feed and pet food are still banned due to continued concerns over BSE, though some exceptions are made.¹⁰⁶

Some progress was made on market access for the entire range of U.S. beef and beef products in 2008. In November 2008, the Director of the American Institute in Taiwan¹⁰⁷ issued a statement urging Taiwan to resume trade in all U.S. beef and beef products, after Taiwan's health authorities had completed all related scientific review and technical work.¹⁰⁸ However, Deputy Director-General of the Ministry of Taiwan's Foreign Affairs' Department of North American Affairs responded by saying that while Taiwan's Department of Health had sent experts to the United States twice to inspect beef safety and did not detect any problems, there is no timetable set for the full resumption of trade in all beef products.¹⁰⁹

U.S. beef exports to Taiwan recovered strongly after the import ban was lifted in January 2006. In 2003, before the impositions of any of the bans, the United States exported \$70 million worth of fresh/chilled and frozen beef.¹¹⁰ By 2007 and 2008, U.S. exports of fresh/chilled and frozen beef to Taiwan amounted to \$107 and \$128 million, respectively.¹¹¹

Rice

Taiwan implemented a country-specific quota (CSQ) for public sector rice imports in 2007 after it received certification from the WTO on modifications and rectifications to its existing TRQ import regime.¹¹² In 2008, Taiwan did not fulfill its obligations in regard to imports of rice from the United States and other WTO members. At the end of the year, only 30 percent (28,300 mt) of the annual import requirement from all countries had been confirmed, of which purchases of U.S. rice (4,000 mt) were just 7 percent of the U.S. CSQ.¹¹³ U.S. companies' ability to win bids has remained inhibited by price ceilings that effectively allow Taiwan's import authorities to reject tender offers and force bidders into a price negotiation. The practical impact is to force exporters to lower their competitive bids in order to win tenders and to significantly delay Taiwan's purchases.¹¹⁴ U.S. exports of rice to Taiwan declined from \$36 million in 2007 to \$15 million in 2008.¹¹⁵

¹⁰⁶ The ruminant and nonruminant products intended for use as animal feed and pet food include tallow (including protein-free tallow), lard, poultry, and porcine meal.

¹⁰⁷ U.S. commercial, cultural, and other interaction with the people on Taiwan is facilitated through the American Institute in Taiwan (AIT), a private nonprofit corporation, which was set up after the United States changed its diplomatic recognition from Taipei to Beijing in 1979.

Brazil

Brazil was the 12th largest single-country two-way trading partner of the United States and the second largest South American partner after Venezuela, with two-way merchandise trade valued at \$59.1 billion in 2008, accounting for 1.8 percent of U.S. trade with the world. The United States recorded a \$1.0 billion trade deficit with Brazil in 2008, down from a \$3.3 billion deficit in 2007 and down substantially from deficits in previous years (figure 5.15). The U.S. trade surplus in services with Brazil grew \$1.6 billion to \$7.4 billion in 2008 (figure 5.16).

U.S. exports to Brazil were valued at \$29.0 billion in 2008, an increase of 33.9 percent over 2007. Leading U.S. exports to Brazil during the year included aircraft and aircraft parts (including jet engines and parts), refined petroleum products, and coal. There were especially large increases in the value of aircraft and jet engines¹¹⁶ and refined petroleum products (reflecting increases in both quantity and unit values).

U.S. imports from Brazil totaled \$30.1 billion, an increase of 20.2 percent from 2007. Leading U.S. imports from Brazil included crude petroleum, pig iron, aircraft, and refined petroleum products. There was an especially large increase in the value of crude petroleum (reflecting increases in both quantity and unit values), which accounted for over 75 percent of the total increase in the value of imports. U.S.-Brazil merchandise trade data are shown in appendix tables A.42 through A.44.

U.S.-Brazilian dialogue on IPR enforcement is discussed in the following section. An agreement on arbitration of the WTO case brought by Brazil concerning U.S. subsidies on upland cotton was reached on October 1, 2008 (see table A.19).

^a Data for 2008 are preliminary.

¹¹⁶ Aircraft and the engines in such aircraft are exported together but are recorded separately for trade accounting purposes.

Intellectual Property Rights Enforcement

The USTR reported that Brazil has made important progress in improving the effectiveness of IPR enforcement, particularly efforts aimed at pirated audiovisual products such as CDs and DVDs.¹¹⁷ There has also been increased cooperation between the U.S. Patent and Trademark Office and the Brazilian National Institute of Industrial Property, highlighted by a Memorandum of Understanding signed in July 2008.¹¹⁸

The United States moved Brazil from the Special 301 priority watch list to the watch list in 2007 in recognition of Brazil's considerable progress in enhancing copyright enforcement.¹¹⁹ An Out-of-Cycle Review was begun in 2007 to evaluate the sustainability of the progress Brazil had achieved in IPR enforcement.¹²⁰ The result of the Out-of-Cycle Review was Brazil's continuation on the watch list in 2008.¹²¹

The United States continues to have several concerns about Brazil's IPR enforcement regime. Brazilian law requires that its National Health Surveillance Agency (ANVISA) approve pharmaceutical patents before they are issued and the USTR considers that ANVISA's role in reviewing pharmaceutical patent applications remains nontransparent. Even though concrete steps have been taken to streamline patent application processing, the application backlog remains high, resulting in extensive delays in patent approvals.¹²²

The United States and Brazil continue to pursue bilateral dialogue on IPR issues through the U.S.-Brazil Bilateral Consultative Mechanism and other means. The USTR recommends that Brazil strengthen its IPR enforcement legislation, take greater action in addressing book and Internet piracy, and consider acceding to and implementing the World Intellectual Property Organization (WIPO) Internet Treaties.¹²³

India

In 2008, India was the 15th largest U.S. trading partner based on two-way trade, accounting for 1.3 percent of total U.S. trade. The U.S. merchandise trade deficit with India was \$8.5 billion in 2008, an increase of \$1.0 billion compared to 2007, but still \$4.1 billion below the record deficit recorded in 2006 (figure 5.17). The increase in the trade deficit with India was associated with a 23.3 percent appreciation of the U.S. dollar against the Indian rupee in 2008.¹²⁴ The U.S. trade deficit in services with India grew \$1.4 billion, from \$251 million in 2007 to \$1.6 billion in 2008 (figure 5.18). In 2008, U.S. firms continued to purchase information technology (IT) services from India. According to Indian sources, during the year India relied on the United States to

consume 60 percent of its exports of IT-business process outsourcing services, which increased overall by 29.0 percent to \$40.9 billion.¹²⁵

U.S. merchandise exports to India amounted to \$17.3 billion in 2008, up 6.3 percent compared to 2007. Leading U.S. exports to India included fertilizers, aircraft, nonindustrial diamonds, nonmonetary gold, and oil from coal tar. Although the Boeing Aircraft Company has delivered 163 passenger aircraft valued at \$25 billion since 2005,¹²⁶ U.S. aircraft exports to India declined by nearly 60 percent in 2008 compared to 2007.

In 2008, U.S. merchandise imports from India increased 8.4 percent to \$25.9 billion. Leading U.S. imports from India in 2008 included nonindustrial diamonds, gold jewelry, certain medicaments, linens, pipe for oil and gas pipelines, and apparel. U.S. imports of nonindustrial diamonds from India consisted of raw diamonds imported by Indian companies from third countries for processing and polishing before export to the United States. In the first full year since the U.S. ban on imports of Indian mangos was lifted in 2007, imports of fresh mangos from India nearly doubled from \$654,888 in 2007 to \$1.2 million in 2008. U.S.-India merchandise trade data are shown in appendix tables A.45 through A.47.

The U.S.-India Trade Policy Forum (TPF) serves as the primary forum for trade and economic dialogue between the two countries.¹²⁷ Trade issues addressed in the TPF during 2008 are discussed below. There were also important developments in 2008 in two WTO dispute settlement cases involving the United States and India.¹²⁸ In the first case, the United States alleged that India imposes an “additional duty” and an “extra-additional duty” in addition to a basic customs duty on imported wines, spirits, and other imports.¹²⁹ The dispute settlement panel issued its report on June 9, 2008, and the Appellate Body issued its report on October 30, 2008, which found, among other things, that the “additional” and “extra-additional” duties are not consistent with the WTO’s core schedule tariff commitment rules in that they resulted in the imposition of

¹²⁹ For more background on this dispute, see USITC, *The Year in Trade 2007*, July 2008, 5-20.

duties in excess of those committed to by the Indian government in its schedule of tariff concessions.¹³⁰ In the second case, India claimed that an additional bonding requirement imposed by U.S. Customs on importers of frozen warm-water shrimp subject to an antidumping duty order from India is inconsistent with U.S. WTO obligations. The dispute settlement panel issued its report on February 29, 2008, and the Appellate Body issued its report on July 16, 2008.¹³¹ The panel and Appellate Body found that the bonding requirement was inconsistent with certain provisions of the Antidumping Agreement.

Trade Dialogue

The TPF, established in 2005, is a key element of the U.S.-India Economic Dialogue and is co-chaired by the United States Trade Representative and India's Minister of Commerce and Industry.¹³² The TPF was created to help facilitate and promote bilateral trade and investment, and discuss other bilateral and multilateral trade issues such as the ongoing WTO Doha Round negotiations.¹³³ The TPF serves as a venue for discussion in five key areas: tariffs and nontariff barriers, agriculture, investment, services, and innovation and creativity.¹³⁴ The fifth ministerial-level meeting was held on February 19, 2008, in Chicago, Illinois, where discussions covered issues such as a potential bilateral investment treaty and market access for items of interest to both sides.¹³⁵

The delegations also met for the second time with the U.S.-India Private Sector Advisory Group (PSAG) to the TPF. The PSAG presented its vision statement on key policy issues on which the governments could enhance their engagement and further bolster the U.S.-India economic partnership.¹³⁶ The PSAG identified the following intermediate targets for the two governments: negotiate a mutually agreeable Bilateral Investment Treaty; continue to promote sectoral openings; promote regulatory cooperation; and cooperate on all aspects of protection of intellectual property and promotion of technology transfer.¹³⁷

^b For cases in which the final action was taken by the ITA, the date shown is the *Federal Register* notice date of that action. For cases in which the final action was taken by USITC, the date of the USITC notification of Commerce is shown.

^c Not applicable.

^d The investigation was terminated or discontinued following withdrawal of the petition.

^e Pending as of Dec. 31, 2008.

TABLE A.5 Antidumping duty orders in effect as of December 31, 2008

Country	Commodity	Effective date of original action
Argentina:	Honey	Dec. 10, 2001
	Barbed wire and barbless wire strand	Nov. 13, 1985
Australia:		
	Electrolytic manganese dioxide	Oct. 7, 2008
Belarus:		
	Steel concrete reinforcing bars	Sept. 7, 2001
Belgium:		
	Stainless steel plate in coils	May 21, 1999
Brazil:	Polyethylene terephthalate film, sheet, and strip	Nov. 10, 2008
	Certain orange juice	Mar. 9, 2006
	Frozen or canned warmwater shrimp and prawns	Feb. 1, 2005
	Prestressed concrete steel wire strand	Jan. 28, 2004
	Carbon and certain alloy steel wire rod	Oct. 29, 2002
	Hot-rolled carbon steel flat products	July 6, 1999
	Stainless steel bar	Feb. 21, 1995
	Silicomanganese	Dec. 22, 1994
	Circular welded non-alloy steel pipe	Nov. 2, 1992
	Carbon steel butt-weld pipe fittings	Dec. 17, 1986
Canada:	Iron construction castings	May 9, 1986
	Iron construction castings	Mar. 5, 1986
Chile:		
	Preserved mushrooms	Dec. 2, 1998
China:	Lightweight thermal paper	Nov. 24, 2008
	Polyethylene terephthalate film, sheet, and strip	Nov. 10, 2008
	Electrolytic manganese dioxide	Oct. 7, 2008
	Steel wire garment hangers	Oct. 6, 2008
	Raw flexible magnets	Sept. 17, 2008
	Off-the-road tires	Sept. 4, 2008
	Sodium nitrite	Aug. 27, 2008
	Laminated woven sacks	Aug. 7, 2008
	Light-walled rectangular pipe and tube	Aug. 5, 2008
	Steel nails	Aug. 1, 2008
	Circular welded carbon-quality steel pipe	July 22, 2008
	Sodium hexametaphosphate	Mar. 19, 2008
	Certain polyester staple fiber	June 1, 2007
	Certain activated carbon	April 27, 2007
	Certain lined paper school supplies	Sept. 28, 2006
	Artist' canvas	June 1, 2006
	Chlorinated isocyanurates	June 24, 2005
	Magnesium	April 15, 2005
	Tissue paper	Mar. 30, 2005
	Frozen or canned warmwater shrimp and prawns	Feb. 1, 2005
	Crepe paper	Jan. 25, 2005
	Wooden bedroom furniture	Jan. 4, 2005
	Carbazole violet pigment 23	Dec. 29, 2004
	Hand trucks	Dec. 2, 2004
	Polyethylene retail carrier bags	Aug. 9, 2004
	Ironing tables	Aug. 6, 2004
	Tetrahydrofurfuryl alcohol	Aug. 6, 2004
	Color television receivers	June 3, 2004
	Malleable iron pipe fittings	Dec. 12, 2003
	Refined brown aluminum oxide	Nov. 19, 2003
	Barium carbonate	Oct. 1, 2003
	Polyvinyl alcohol	Oct. 1, 2003
	Saccharin	July 9, 2003

TABLE A.5 Antidumping duty orders in effect as of December 31, 2008–*Continued*

Country	Commodity	Effective date of original action
<i>China–Continued:</i>		
	Ferrovandium	Jan. 28, 2003
	Folding metal tables and chairs	June 27, 2002
	Folding gift boxes	Jan. 8, 2002
	Honey	Dec. 10, 2001
	Hot-rolled carbon steel flat products	Nov. 29, 2001
	Pure magnesium (granular)	Nov. 19, 2001
	Foundry coke	Sept. 17, 2001
	Steel concrete reinforcing bars	Sept. 7, 2001
	Non-frozen apple juice concentrate	June 5, 2000
	Preserved mushrooms	Feb. 19, 1999
	Carbon steel plate	Oct. 24, 1997
	Crawfish tail meat	Sept. 15, 1997
	Persulfates	July 7, 1997
	Furfuryl alcohol	June 21, 1995
	Pure magnesium (ingot)	May 12, 1995
	Glycine	Mar. 29, 1995
	Cased pencils	Dec. 28, 1994
	Silicomanganese	Dec. 22, 1994
	Paper clips	Nov. 25, 1994
	Fresh garlic	Nov. 16, 1994
	Helical spring lock washers	Oct. 19, 1993
	Sulfanilic acid	Aug. 19, 1992
	Carbon steel butt-weld pipe fittings	July 6, 1992
	Sparklers	June 18, 1991
	Silicon metal	June 10, 1991
	Axes and adzes	Feb. 19, 1991
	Bars and wedges	Feb. 19, 1991
	Hammers and sledges	Feb. 19, 1991
	Picks and mattocks	Feb. 19, 1991
	Tapered roller bearings	June 15, 1987
	Porcelain-on-steel cooking ware	Dec. 2, 1986
	Petroleum wax candles	Aug. 28, 1986
	Iron construction castings	May 9, 1986
	Natural bristle paint brushes	Feb. 14, 1986
	Barium chloride	Oct. 17, 1984
	Chloropicrin	Mar. 22, 1984
	Potassium permanganate	Jan. 31, 1984
	Greige polyester cotton printcloth	Sept. 16, 1983
Finland:		
	Carboxymethylcellulose	July 11, 2005
France:		
	Low enriched uranium	Feb. 13, 2002
	Ball bearings	May 15, 1989
	Brass sheet and strip	Mar. 6, 1987
	Sorbitol	Apr. 9, 1982
Germany:		
	Lightweight thermal paper	Nov. 24, 2008
	Sodium nitrite	Aug. 27, 2008
	Stainless steel sheet and strip	July 27, 1999
	Seamless pipe	Aug. 3, 1995
	Corrosion-resistant carbon steel flat products	Aug. 19, 1993
	Ball bearings	May 15, 1989
	Brass sheet and strip	Mar. 6, 1987
India:		
	Certain lined paper school supplies	Sept. 28, 2006
	Frozen or canned warm-water shrimp and prawns	Feb. 1, 2005
	Carbazole violet pigment 23	Dec. 29, 2004

TABLE A.5 Antidumping duty orders in effect as of December 31, 2008–*Continued*

Country	Commodity	Effective date of original action
<i>India–Continued</i>		
	Prestressed concrete steel wire strand	Jan. 28, 2004
	Polyethylene terephthalate (PET) film	July 1, 2002
	Silicomanganese	May 23, 2002
	Hot-rolled carbon steel flat products	Dec. 3, 2001
	Carbon steel plate	Feb. 10, 2000

Russia:		
	Magnesium	April 15, 2005
	Silicon metal	Mar. 26, 2003
	Ammonium nitrate (suspended)	May 19, 2000
	Hot-rolled carbon steel flat products (suspended)	July 12, 1999
	Carbon steel plate (suspended)	Oct. 24, 1997
	Ferrovandium and nitrided vanadium	July 10, 1995
	Uranium (suspended)	Oct. 16, 1992
	Solid urea	July 14, 1987
South Africa:		
	Uncovered innerspring units	Dec. 11, 2008
	Ferrovandium	Jan. 28, 2003
	Stainless steel plate in coils	May 21, 1999
Spain:		
	Chlorinated isocyanurates	June 24, 2005
	Stainless steel wire rod	Sept. 15, 1998
	Stainless steel bar	Mar. 2, 1995
Sweden:		
	Carboxymethylcellulose	July 11, 2005

TABLE A.5 Antidumping duty orders in effect as of December 31, 2008–*Continued*

Country	Commodity	Effective date of original action
Taiwan:	Raw flexible magnets	Sept. 17, 2008
	Polyethylene terephthalate (PET) film	July 1, 2002
	Hot-rolled carbon steel flat products	Nov. 29, 2001
	Polyester staple fiber	May 25, 2000
	Stainless steel sheet and strip	July 27, 1999
	Stainless steel plate in coils	May 21, 1999
	Stainless steel wire rod	Sept. 15, 1998
	Forged stainless steel flanges	Feb. 9, 1994
	Helical spring lockwashers	June 28, 1993
	Stainless steel butt-weld pipe fittings	June 16, 1993
	Welded ASTM A-312 stainless steel pipe	Dec. 30, 1992
	Circular welded non-alloy steel pipe	Nov. 2, 1992
	Light-walled rectangular pipe	Mar. 27, 1989
	Carbon steel butt-weld pipe fittings	Dec. 17, 1986
Porcelain-on-steel cooking ware	Dec. 2, 1986	
Small diameter carbon steel pipe	May 7, 1984	
Thailand:	Frozen or canned warm-water shrimp and prawns	Feb. 1, 2005
	Polyethylene retail carrier bags	Aug. 9, 2004
	Prestressed concrete steel wire strand	Jan. 28, 2004
	Hot-rolled carbon steel flat products	Nov. 29, 2001
	Carbon steel butt-weld pipe fittings	July 6, 1992
Trinidad and Tobago:	Welded carbon steel pipe	Mar. 11, 1986
	Carbon and certain alloy steel wire rod	Oct. 29, 2002
Turkey:	Light-walled rectangular pipe and tube	May 30, 2008
	Steel concrete reinforcing bars	Apr. 17, 1997
	Pasta	July 24, 1996
	Welded carbon steel pipe	May 15, 1986
Ukraine:	Carbon and certain alloy steel wire rod	Oct. 29, 2002
	Hot-rolled carbon steel flat products	Nov. 29, 2001
	Ammonium nitrate	Sept. 12, 2001
	Steel concrete reinforcing bars	Sept. 7, 2001
	Carbon steel plate (suspended)	Oct. 24, 1997
	Silicomanganese	Oct. 31, 1994
	Solid urea	July 14, 1987
United Arab Emirates:	Polyethylene terephthalate film, sheet, and strip	Nov. 10, 2008
United Kingdom:	Ball bearings	May 15, 1989
Venezuela:	Silicomanganese	May 23, 2002
Vietnam:	Uncovered innerspring units	Dec. 11, 2008
	Frozen or canned warm-water shrimp and prawns	Feb. 1, 2005
	Frozen fish fillets	Aug. 12, 2003

TABLE A.9 Section 337 investigations and related proceedings completed by the U.S. International Trade Commission during 2008 and those pending on December 31, 2008

Status of Investigation	Article	Country ^a	Commission determination
Completed: 337-TA-474	Certain Recordable Compact Discs and Rewritable Compact Discs	No foreign respondents	One related (ancillary) advisory opinion proceeding; issued an advisory opinion.
337-TA-487	Certain Agricultural Vehicles and Components Thereof	Canada, Germany, China, France, Netherlands	Terminated based on a finding of no violation. ^b
337-TA-551	Certain Laser Bar Code Scanners and Scan Engines, Components Thereof and Products Containing Same	China	One related (ancillary) bond forfeiture proceeding; bond forfeiture proceeding terminated based on a joint stipulation.
337-TA-558	Certain Personal Computer Consumer Electronic Convergent Devices, Components Thereof, and Products Containing Same	Taiwan	Terminated based on withdrawal of the complaint.
337-TA-567	Certain Foam Footwear	Canada	Terminated based on a finding of no violation.
337-TA-569	Certain Endoscopic Probes for Use in Argon Plasma Coagulation Systems	Germany	Terminated based on a finding of no violation.
337-TA-571	Certain L-Lysine Feed Products, Their Methods of Production and Genetic Constructs for Production	Hong Kong, China	Terminated based on a finding of no violation.
337-TA-574	Certain Equipment for Telecommunications or Data Communications Networks, Including Routers, Switches, and Hubs, and Components Thereof	France	Terminated based on a settlement agreement.
337-TA-578	Certain Mobile Telephone Handsets, Wireless Communication Devices, and Components Thereof	Finland	Terminated based on a finding of no violation.

TABLE A.9 Section 337 investigations and related proceedings completed by the U.S. International Trade Commission during 2008 and those pending on December 31, 2008 - *Continued*

Status of Investigation	Article	Country ^a	Commission determination
Completed – <i>Continued</i> : 337-TA-586	Certain Stringed Musical Instruments and Components Thereof	France, Germany	Terminated based on a finding of no violation.
337-TA-587	Certain Connecting Devices ("Quick Clamps") for Use with Modular Compressed Air Conditioning Units, Including Filters, Regulators, and Lubricators ("FRL'S") That Are Part of Larger Pneumatic Systems and the FRL Units They Connect	Japan, China	Terminated based on a finding of no violation.
337-TA-588	Certain Digital Multimeters, and Products with Multimeter Functionality	China, Hong Kong	Issued a general exclusion order and cease and desist orders.
337-TA-589	Certain Switches and Products Containing Same	Taiwan, Japan	Terminated based on a finding of no violation.
337-TA-593	Certain Digital Cameras and Component Parts Thereof	No foreign respondents	Terminated based on a settlement agreement.
337-TA-595	Certain Dynamic Random Access Memory Devices and Products Containing Same	Korea	Terminated based on a settlement agreement.
337-TA-596	Certain GPS Chips, Associated Software and Systems, and Products Containing Same	No foreign respondents	Terminated based on a finding of no violation.
337-TA-597	Certain Bassinet Products	No foreign respondents	Terminated based on a consent order.
337-TA-598	Certain Unified Communications Systems, Products Used With Such Systems, and Components Thereof	France	Terminated based on a finding of no violation.

TABLE A.9 Section 337 investigations and related proceedings completed by the U.S. International Trade Commission during 2008 and those pending on December 31, 2008 – *Continued*

Status of Investigation	Article	Country ^a	Commission determination
Completed - <i>Continued</i> : 337-TA-606	Certain Personal Computers and Digital Display Devices	Taiwan	Terminated based on a settlement agreement.
337-TA-607	Certain Semiconductor Devices, DMA Systems, and Products Containing Same	Japan	Terminated based on a settlement agreement.
337-TA-608 ^c	Certain Nitrile Gloves	Australia, China, Indonesia, Malaysia, Thailand	Terminated based on a finding of no violation.
337-TA-609	Certain Buffer Systems and Components Thereof Used in Container Processing Lines	Germany	Terminated based on a settlement agreement.
337-TA-610	Certain Endodontic Instruments	France	Terminated based on withdrawal of the complaint.
337-TA-611	Certain Magnifying Loupe Products and Components Thereof	China	Issued a limited exclusion order.
337-TA-612 ^c	Certain Nitrile Rubber Gloves	Malaysia	Terminated based on a finding of no violation.
337-TA-616	Certain Hard Disk Drives, Components Thereof, and Products Containing the Same	No foreign respondents	Terminated based on withdrawal of the complaint.
337-TA-618	Certain Computer Systems, Printers and Scanners	No foreign respondents	Terminated based on a settlement agreement.
337-TA-620	Certain Low Antimony Phosphoric Acid	Japan	Terminated based on a settlement agreement.
337-TA-622	Certain Base Plugs	No foreign respondents	Terminated based on a settlement agreement.
337-TA-633	Certain Acetic Acid	China	Terminated based on withdrawal of the complaint.
337-TA-635	Certain Pesticides and Products Containing Clothianidin	Switzerland, India	Terminated based on an arbitration agreement.
337-TA-638	Certain Intermediate Bulk Containers	China	Issued a limited exclusion order.
337-TA-639	Certain Spa Cover Lift Frames	Hong Kong	Terminated based on a consent order.

Status of Investigation	Article	Country ^a	Commission determination
Completed - <i>Continued</i> : 337-TA-642	Certain Catheters, Consoles and Other Apparatus for Cryosurgery, and Components Thereof	Canada	Terminated based on a settlement agreement.
337-TA-647	Certain Hand-Held Meat Tenderizers	No foreign respondents	Terminated based on withdrawal of the complaint.
337-TA-652	Certain Rubber Antidegradants, Antidegradant Intermediates, and Products Containing the Same	China, Korea	Terminated based on a finding of no violation.
337-TA-656	Certain Integrated Circuits and Products Containing Same	No foreign respondents	Terminated based on a settlement agreement.
Pending: 337-TA-501	Certain Encapsulated Integrated Circuit Devices and Products Containing Same	Malaysia	Pending before the Commission.
337-TA-533	Certain Rubber Antidegradants, Components Thereof, and Products Containing Same	China, Korea	Pending before the Commission.
337-TA-543	Certain Baseband Processor Chips and Chipsets, Transmitter and Receiver (Radio) Chips, Power Control Chips, and Products Containing Same, Including Cellular Telephone Handsets	No foreign respondents	Two related (ancillary) proceedings: one enforcement proceeding and one remand pending before the ALJ.
337-TA-545	Certain Laminated Floor Panels	Canada	One related (ancillary) consolidated enforcement and advisory opinion proceeding pending before the Commission.
337-TA-564	Certain Voltage Regulators, Components Thereof and Products Containing Same	No foreign respondents	One related (ancillary) enforcement proceeding pending before the ALJ.

TABLE A.9 Section 337 investigations and related proceedings completed by the U.S. International Trade Commission during 2008 and those pending on December 31, 2008 - *Continued*

Status of Investigation	Article	Country ^a	Commission determination
Pending - <i>Continued</i> : 337-TA-565	Certain Ink Cartridges and Components Thereof	China, Hong Kong	One related (ancillary) consolidated enforcement proceeding pending before the ALJ.
337-TA-582	Certain Hydraulic Excavators and Components Thereof	Canada	Pending before the Commission.
337-TA-601 ^d	Certain 3G Wideband Code Division Multiple Access (WCDMA) Handsets and Components Thereof	Korea	Pending before the ALJ.
337-TA-602	Certain GPS Devices and Products Containing Same	Taiwan	Pending before the Commission.
337-TA-604	Certain Sucralose, Sweeteners Containing Sucralose, and Related Intermediate Compounds Thereof	China, United Kingdom, Hong Kong	Pending before the Commission.
337-TA-605	Certain Semiconductor Chips with Minimized Chip Package Size and Products Containing Same	Canada, Switzerland	Pending before the Commission.
337-TA-613 ^d	Certain 3G Mobile Handsets and Components Thereof	Finland	Pending before the ALJ.
337-TA-615	Certain Ground Fault Circuit Interrupters and Products Containing the Same	China	Pending before the Commission.
337-TA-617	Certain Digital Televisions and Certain Products Containing Same and Methods of Using Same	Taiwan, Hong Kong, China	Pending before the Commission.
337-TA-619	Certain Flash Memory Controllers, Drives, Memory Cards, and Media Players and Products Containing Same	Taiwan, Hong Kong, China, Japan, British Virgin Islands, France, Ireland, Korea	Pending before the ALJ.
337-TA-621	Certain Probe Card Assemblies, Components Thereof and Certain Tested DRAM and NAND Flash Memory Devices and Products Containing Same	Japan, Korea	Pending before the ALJ.

^a This column lists the countries of the foreign respondents named in the investigation.

^b The Commission in 2004 issued two limited exclusion orders on certain categories of vehicles and these remain in force.

^c Inv. Nos. 337-TA-608 and 337-TA-612 were consolidated.

^d Inv. Nos. 337-TA-601 and 337-TA-613 were consolidated, and then unconsolidated.

TABLE A.10 Outstanding Section 337 exclusion orders as of December 31, 2008

Investigation No.	Article	Country ^a	Date patent expires ^b
337-TA-55	Certain Novelty Glasses	Hong Kong	Nonpatent
337-TA-69	Certain Airtight Cast-Iron Stoves	Taiwan, Korea	Nonpatent
337-TA-87	Certain Coin-Operated Audio-Visual Games and Components Thereof	Japan, Taiwan	Nonpatent
337-TA-105	Certain Coin-Operated Audio-Visual Games and Components Thereof	Japan, Taiwan	Nonpatent
337-TA-112	Certain Cube Puzzles	Taiwan, Japan, Canada	Nonpatent
337-TA-114	Certain Miniature Plug-In Blade Fuses	Taiwan	Nonpatent
337-TA-118	Certain Sneakers with Fabric Uppers and Rubber Soles	Korea	Nonpatent
337-TA-137	Certain Heavy-Duty Staple Gun Tackers	Taiwan, Hong Kong, Korea	Nonpatent
337-TA-152	Certain Plastic Food Storage Containers	Hong Kong, Taiwan	Nonpatent
337-TA-167	Certain Single Handle Faucets	Taiwan	Nonpatent
337-TA-174	Certain Woodworking Machines	Taiwan, South Africa	Nonpatent
337-TA-195	Certain Cloisonne Jewelry	Taiwan	Nonpatent
337-TA-197	Certain Compound Action Metal Cutting Snips and Components Thereof	Taiwan	Nonpatent
337-TA-229	Certain Nut Jewelry and Parts Thereof	Philippines, Taiwan	Nonpatent
337-TA-231	Certain Soft Sculpture Dolls, Popularly Known as "Cabbage Patch Kids," Related Literature, and Packaging Therefore	No foreign respondents	Nonpatent
337-TA-266	Certain Reclosable Plastic Bags and Tubing	Singapore, Taiwan, Korea, Thailand, Hong Kong	Nonpatent
337-TA-279	Certain Plastic Light Duty Screw Anchors	Taiwan	Nonpatent
337-TA-285	Certain Chemiluminescent Compositions and Components Thereof and Methods of Using, and Products Incorporating, the Same	France	Nonpatent
337-TA-287	Certain Strip Lights	Taiwan	Nonpatent
337-TA-295	Certain Novelty Teleidoscopes	Hong Kong, Taiwan	Nonpatent

TABLE A.10 Outstanding Section 337 exclusion orders as of December 31, 2008 -- *Continued*

Investigation No.	Article	Country ^a	Date patent expires ^b
337-TA-319	Certain Automotive Fuel Caps and Radiator Caps and Related Packaging and Promotional Materials	Taiwan	Nonpatent
337-TA-321	Certain Soft Drinks and Their Containers	Colombia	Nonpatent
337-TA-376	Certain Variable Speed Wind Turbines and Components Thereof	Germany	Feb. 1, 2011 ^c
337-TA-378	Certain Asian-Style Kamaboko Fish Cakes	Japan	Nonpatent
337-TA-380	Certain Agricultural Tractors Under 50 Power Take-Off Horsepower	Japan	Nonpatent
337-TA-383	Certain Hardware Logic Emulation Systems and Components Thereof	France	Apr. 28, 2009 Apr. 28, 2009
337-TA-406	Certain Lens-Fitted Film Packages	China, Hong Kong, Korea	Mar. 7, 2009 Aug. 10, 2010 Aug. 13, 2010 Nov. 1, 2011 Jan. 10, 2012 Apr. 18, 2012 July 25, 2012
337-TA-413	Certain Rare-Earth Magnets and Magnetic Material and Articles Containing Same	China, Taiwan	June 7, 2015
337-TA-416	Certain Compact Multipurpose Tools	China, Taiwan	July 1, 2011 Oct. 21, 2011 Oct. 21, 2011 Oct. 21, 2011
337-TA-424	Certain Cigarettes and Packaging Thereof	No foreign respondents	Nonpatent
337-TA-440	Certain 4-Androstenediol	China	July 13, 2018
337-TA-446	Certain Ink Jet Cartridges and Components Thereof	Taiwan	Apr. 25, 2012
337-TA-448	Certain Oscillating Sprinklers, Sprinkler Components, and Nozzles	Taiwan, Israel, Germany	July 8, 2014 July 8, 2014
337-TA-473	Certain Video Game Systems, Accessories, and Components Thereof	No foreign respondents	Dec. 18, 2015 Dec. 25, 2015
337-TA-474	Certain Recordable Compact Discs and Rewritable Compact Discs	No foreign respondents	May 23, 2012

TABLE A.10 Outstanding Section 337 exclusion orders as of December 31, 2008 -- *Continued*

Investigation No.	Article	Country ^a	Date patent expires ^b
337-TA-481/491	Certain Display Controllers with Upscaling Functionality and Products Containing Same; and Certain Display Controllers and Products Containing Same	Taiwan	Feb. 24, 2017
337-TA-482	Certain Compact Disc and DVD Holders	Denmark, Hong Kong, Taiwan	May 1, 2015
337-TA-486	Certain Agricultural Tractors, Lawn Tractors, Riding Lawnmowers, and Components Thereof	China	Nonpatent
337-TA-487	Certain Agricultural and Components Thereof	Canada, China, France, Germany, Netherlands	Nonpatent
337-TA-489	Certain Sildenafil or Any Pharmaceutically Acceptable Salt Thereof, Such as Sildenafil Citrate, and Products Containing Same	Belize, Israel, Nicaragua, Syria, United Kingdom, India, China	Mar. 27, 2012
337-TA-492	Certain Plastic Grocery and Retail Bags	Thailand, China, Singapore, Hong Kong	Dec. 6, 2010
337-TA-494	Certain Automotive Measuring Devices, Products Containing Same, and Bezels for Such Devices	Taiwan	Nonpatent
337-TA-498	Certain Insect Traps	No foreign respondents	Jan. 30, 2018
337-TA-500	Certain Purple Protective Gloves	Malaysia	Nonpatent
337-TA-505	Certain Gun Barrels Used in Firearms Training Systems	Switzerland, Netherlands	Sept. 25, 2015 Aug. 25, 2017
337-TA-511	Certain Pet Food Treats	China	Sept. 23, 2011
337-TA-512	Certain Light-Emitting Diodes and Products Containing Same	Malaysia	July 27, 2018 July 27, 2018 July 27, 2018 Jan. 18, 2015
337-TA-514	Certain Plastic Food Containers	China	Oct. 19, 2013 Dec. 23, 2017 Dec. 23, 2017
337-TA-518	Certain Ear Protection Devices	China, Taiwan	June 2, 2015
337-TA-522	Certain Ink Markers and Packaging Thereof	China, India, Korea	Nonpatent

^a This column lists the countries of the foreign respondents named in the investigation.

^b Multiple dates indicate the expiration dates of separate patents within the investigation.

^c Patent term extended pursuant to 35 U.S.C. 154(c).

TABLE A.11 U.S. imports for consumption of leading GSP duty-free imports, 2008

HTS No.	Description	Total Imports	GSP duty free	
			GSP eligible	(Millions of \$)
2709.00.20	Petroleum oils and oils from bituminous minerals, crude, testing 25 degrees A.P.I. or more	151,133	19,704	9,741
2709.00.10	Petroleum oils and oils from bituminous minerals, crude, testing under 25 degrees A.P.I.	108,270	3,715	1,024
3824.90.40	Fatty substances of animal or vegetable origin and mixtures thereof	1,448	1,062	889
7202.41.00	Ferrochromium containing more than 3 percent of carbon	910	906	748
7113.11.50	Articles of jewelry and parts thereof, of silver, n.e.s.o.i., valued over \$18 per dozen pieces or parts	1,283	574	481
7202.30.00	Ferrosilicon manganese	682	432	429
7113.19.29	Gold necklaces and neck chains, other than rope or mixed link	882	502	382
4011.10.10	New pneumatic radial tires, of rubber, of a kind used on motor cars, including station wagons and racing cars	4,912	757	379
7606.12.30	Aluminum alloy plates, sheets, and strip, of a thickness exceeding 0.2 mm, rectangular (including square), not clad	2,086	474	340
7113.19.50	Articles of jewelry and parts thereof, of precious metal except silver, except necklaces and clasps	4,207	1,788	323
2905.11.20	Methanol (methyl alcohol), n.e.s.o.i.	1,960	1,750	268
3907.60.00	Polyethylene terephthalate in primary forms	1,076	264	253
2710.19.05	Distillate and residual fuel oil (including blends) derived from petroleum or oils from bituminous minerals, testing under 25 degrees A.P.I.	44,004	566	236
4011.20.10	New pneumatic radial tires, of rubber, of a kind used on buses or trucks	2,759	266	207
8544.30.00	Ignition wiring sets, other wiring sets of a kind used in vehicles, aircraft or ships	5,532	669	167
2106.90.99	Food preparations, n.e.s.o.i.	1,168	174	165
8708.99.81	Parts and accessories of the motor vehicles, n.e.s.o.i.	5,442	191	157
6802.99.00	Monumental or building stone and articles thereof, n.e.s.o.i., of natural stone, n.e.s.o.i.	278	159	155
7323.93.00	Stainless steel table, kitchen or other household articles and parts thereof	885	150	143
4015.19.10	Gloves, mittens and mitts, seamless, of vulcanized rubber other than hard rubber, other than surgical or medical	349	159	140
	Top 20 items	339,263	34,264	16,628
	All other	1,734,574	25,078	15,024
	Total	2,073,837	59,342	31,652

Source: Compiled from official statistics of the U.S. Department of Commerce.

Note: Because of rounding, figures may not add to totals shown. Senegal's large percentage and value increase in 2008 was driven by increased petroleum imports, part of which was a shift from exports claiming no preference program to exports under AGOA. Namibia's large percentage and value decrease in 2008 was the result of reduced apparel exports resulting from the closure of the Malaysian-owned Ramatex textile and clothing complex in March 2008, which had exported apparel to the United States under AGOA.

^a Percent change is more than 10,000 percent.

^b Rounds to 100.0 percent.

^c Not applicable.

^d U.S. value less than \$500.

^e Not AGOA eligible.

TABLE A.14 U.S. imports for consumption of leading imports under AGOA, 2006-08

HTS No.	Description	Millions of \$			% change, 2007-08
		2006	2007	2008	
2709.00.20	Petroleum oils and oils from bituminous minerals, crude, testing 25 degrees A.P.I. or more	31,161	37,117	48,518	30.7

TABLE A.19 WTO dispute-settlement cases to which the United States was a party, developments in 2008 — *Continued*

Case No.	Title	Complainant	Action (Month/Day/Year)
DS285	United States – Measures Affecting Cross-Border Supply of Gambling and Betting Services	Antigua and Barbuda	Parties agree to procedures under DSU Articles 21 and 22 (05/24/06). Antigua and Barbuda request consultations (06/08/06). Antigua and Barbuda request establishment of a panel (07/06/06). DSB refers matter to original panel if possible (07/19/06). Panel composed (08/16/06). Panel report circulated (03/30/07). DSB adopts panel report (05/22/07). Antigua and Barbuda seeks authorization to suspend concessions (06/21/07). U.S. objects and seeks arbitration (07/23/07). Arbitrator's decision circulated (12/21/07).
DS291	European Communities – Measures Affecting the Approval and Marketing of Biotech Products	United States	Panel reports circulated (09/29/06). DSB adopts the panel reports (11/21/06). The EC announce its intention to implement recommendations and rulings and announce intent to discuss appropriate timeframe pursuant to DSU Article 21.3(b) with Argentina, Canada, and U.S. (12/19/06). U.S. and EC agree on a reasonable period of time for implementation (06/21/07). U.S. and EC inform DSB they have reached agreement on procedures under Articles 21 and 22 (01/14/08). U.S. asks for authorization to suspend concessions (01/17/08) DSB refers matter to arbitration (02/08/08). EC and U.S. ask arbitrator to suspend work (02/15/08).
DS294	United States – Laws, Regulations and Methodology for Calculating Dumping Margins (Zeroing)	European Communities	Panel report circulated (10/31/05). Appellate Body report circulated (04/18/06). U.S. announces that it intends to implement the DSB recommendations and rulings (05/30/06). U.S. and EC agree, pursuant to DSU Article 21.3(b), to the reasonable period of time for implementation (07/28/06). U.S. and EC reach an Understanding on Article 21 and 22 procedures (05/04/07). EC requests Article 21.5 consultations (07/09/07). Brazil and Korea request to join the consultations (07/20/07). EC requests establishment of Article 21.5 panel (09/13/07). Article 21.5 panel report is circulated (12/17/08).
DS295	Mexico – Definitive Antidumping Measures on Beef and Rice	United States	DSU adopts Appellate Body report and panel report as modified (12/20/05). Mexico and the United States inform DSB that they have reached agreement on the reasonable period of time for implementation; Mexico will comply in August 2006 (in part) and in December 2006 (in part) (05/18/06). Parties reach an Understanding on procedure for Articles 21 and 22 (01/16/07).
DS320	United States – Continued Suspension of Obligations in the EC – Hormones Dispute	European Communities	EC requests consultations with U.S. (11/08/04). EC requests establishment of a panel (01/13/05). Panel established (02/17/05). Panel report circulated (03/31/08). EC (05/29/08) and U.S. (06/10/08) notify DSB of intent to appeal. Appellate Body report circulated (10/16/08).

TABLE A.19 WTO dispute-settlement cases to which the United States was a party, developments in 2008 — *Continued*

Case No.	Title	Complainant	Action (Month/Day/Year)
DS322	United States – Measures Relating to Zeroing and Sunset Reviews	Japan	Panel report circulated (09/20/06). Appellate Body report circulated (01/9/07). Agreement reached on the reasonable period of time for implementation (05/04/07). Japan seeks authorization to suspend concessions (01/10/08). Japan asks for establishment of a compliance panel (04/07/08).
DS334	Turkey – Measures Affecting the Importation of Rice	United States	U.S. requests establishment of a panel (02/06/06). Panel established (03/17/06). Panel report circulated (09/21/07). Turkey and U.S. inform DSB of agreement on reasonable period for Turkey to comply (04/09/08). Turkey and U.S. notify DSB of agreement on Article 21 and 22 procedures (05/07/08).
DS335	United States – Antidumping Measure on Shrimp from Ecuador	Ecuador	Ecuador requests establishment of a panel (06/08/06). Panel established (07/19/06). Panel report circulated (01/30/07). Agreement reached on the reasonable period of time for implementation (03/26/07).
DS340	China – Measures Affecting Imports of Automobile Parts	United States	U.S. requests consultations with China (03/30/06). U.S. requests establishment of a panel (09/15/06). DSB establishes a single panel pursuant to DSU Article 9.1 to consider similar complaints against China made by EC (DS339), U.S. (DS340), & Canada (DS342) (10/26/06). Panel report circulated (07/18/08). China notifies DSB of decision to appeal (09/15/08). Appellate Body report circulated (12/15/08).
DS343	United States – Measures Relating to Shrimp from Thailand	Thailand	Thailand requests consultations (04/24/06). Panel established (10/26/06). Panel report circulated (02/29/08). Thailand (04/17/08) and U.S. (04/29/08) notify DSB of decision to appeal. Appellate Body report circulated (07/16/08).
DS344	United States – Final Antidumping Measures on Stainless Steel from Mexico	Mexico	Mexico requests consultations (05/26/06). Japan requests to join the consultations (06/09/06). Mexico requests establishment of a panel (10/12/06). Panel established (10/26/06). Panel report circulated (12/20/07). Mexico notifies DSB of decision to appeal (01/31/08). Appellate body report circulated (04/30/08). Article 21.3© arbitration report circulated (10/31/08).

TABLE A.19 WTO dispute-settlement cases to which the United States was a party, developments in 2008 — *Continued*

Case No.	Title	Complainant	Action (Month/Day/Year)
DS345	United States – Customs Bond Directive for Merchandise Subject to Anti-Dumping/Countervailing Duties	India	<p>India requests consultations (06/06/06). Brazil, China, and Thailand request to join the consultations (06/21/06). India requests establishment of a panel (10/13/06). Panel established (11/21/06). Chairman of panel informs the DSB that panel will not be able to complete its work within the standard 6-month time frame (07/27/07). Panel report circulated (02/29/08). India (04/17/08) and U.S. (04/29/08) notify DSB of decision to appeal. Appellate Body report circulated (07/16/08). U.S. and India notify DSB of agreement on reasonable time for U.S. to implement DSB recommendations (10/31/08).</p>
DS350	United States – Continued Existence and Application of Zeroing Methodology	European Communities	<p>EC requests consultations (10/02/06). EC expands its request for consultations (10/09/06). Japan (10/10/06), Thailand (10/12/06), Brazil, and India (10/13/06) request to join consultations. U.S. accepts their requests. EC requests establishment of a panel (05/10/07). Panel established (06/04/07). Panel report circulated (10/01/08). EC (11/06/08) and U.S. (11/18/08) notify DSB of decision to appeal.</p>
DS353	United States – Measures Affecting Trade in Large Civil Aircraft (Second Complaint)	European Communities	<p>EC requests consultations with U.S. (06/27/05). EC requests establishment of a panel (01/20/06). Panel established (02/17/06). Panel Chair informs the DSB that panel will not be able to complete its work within the standard 6-month time frame (05/18/07). Panel Chair informs DSB that the panel expects to complete work in 2009 (07/11/08)</p>
DS357	United States – Subsidies and Other Domestic Support for Corn and Other Agricultural Products	Canada	<p>Canada requests consultations with U.S. (01/08/07). Australia (01/18/07), Argentina, Brazil, EC, Guatemala, Nicaragua, Thailand (01/19/07), and Uruguay (01/22/07) request to join the consultations. U.S. accepts requests. Canada requests establishment of a panel (06/07/07). Canada withdraws request for establishment of a panel (11/15/07).</p>
DS360	India – Additional and Extra-Additional Duties on Imports from the United States	United States	<p>U.S. requests consultations with India (03/06/07). EC (03/16/07) and Australia (03/21/07) request consultations; India accepts their requests. U.S. requests establishment of a panel (05/24/07). Panel established (06/20/07). Panel report circulated (06/09/08). U.S. (08/01/08) and India (08/13/08) notify DSB of decision to appeal. Appellate Body report circulated (10/30/08).</p>

TABLE A.19 WTO dispute-settlement cases to which the United States was a party, developments in 2008 — *Continued*

Case No.	Title	Complainant	Action (Month/Day/Year)
DS362	China – Measures Affecting the Protection and Enforcement of Intellectual Property Rights	United States	U.S. requests consultations with China (04/10/07). Japan (04/20/07), EC, Canada (04/25/07), and Mexico (04/26/07) request to join consultations. China accepts their requests. U.S. requests establishment of panel (08/13/07). Panel established (09/25/07). Panel Chair informs DSB that the panel expects to issue its report in November 2008 (07/16/08). Panel report circulated (01/26/09)
DS363	China – Measures Affecting Trading Rights and Distribution Services for Certain Publications and Audiovisual Entertainment Products	United States	U.S. requests consultations with China (04/10/07). EC requests to join the consultation (04/25/07). China accepts the request. U.S. requests establishment of a panel (10/10/07). Panel established (11/27/07). Panel Chair informs DSB that the panel expects to issue its report in February 2009.
DS365	United States – Domestic Support and Export Credit Guarantees for Agricultural Products	Brazil	Brazil requests consultations with the U.S. (07/11/07). Canada (07/20/07), Guatemala (07/23/07), Costa Rica, Mexico (07/24/07), EC (07/25/07), Argentina, Australia, India, Nicaragua (07/26/07), and Thailand (07/27/07) request to join the consultations. U.S. accepts the requests. Canada and Brazil request establishment of a panel (11/08/07). Single panel established (12/17/07).
DS368	United States – Preliminary Anti-Dumping and Countervailing Duty Determinations on Coated Free Sheet Paper from China	China	China requests consultations with the U.S. (09/14/07).
DS373	China – Measures Affecting Financial Information Services and Foreign Financial Information Suppliers	United States	U.S. requests consultations with China (03/03/08). EC requests to join consultations; China accepts request (03/14/08). U.S. and China inform DSB they have reached agreement in the form of a memorandum of understanding (12/04/08).
DS375	European Communities – Tariff Treatment of Certain Information Technology Products	United States	U.S. requests consultations with EC (05/28/08). U.S., Japan, Chinese Taipei request establishment of a panel (08/18/08). Panel established (09/23/08).
DS379	United States – Definitive Anti-Dumping and Countervailing Duties on Certain Products from China	China	China requests consultations with U.S. (09/19/08). China requests establishment of a panel (12/09/08). Panel established (01/20/09).
DS381	United States – Measures Concerning the Importation, Marketing and Sale of Tuna and Tuna Products	Mexico	Mexico requests consultations with U.S. (10/24/08). EC (11/06/08) and Australia (11/07/08) request to join consultations.

TABLE A.19 WTO dispute-settlement cases to which the United States was a party, developments in 2008 — *Continued*

Case No.	Title	Complainant	Action (Month/Day/Year)
DS382	United States – Anti-Dumping Administrative Reviews and Other Measures Related to Imports of Certain Orange Juice from Brazil	Brazil	Brazil requests consultations with U.S. (11/27/08). Japan requests to join consultations (12/10/08).
DS383	United States – Anti-Dumping Measures on Polyethylene Retail Carrier Bags from Thailand	Thailand	Thailand requests consultations with U.S. (11/26/08).
DS384	United States – Certain Country of Origin Labelling (Cool) Requirements	Canada	Canada requests consultations with U.S. (12/01/08). Mexico and Nicaragua request to join consultations (12/12/08); U.S. accepts requests.
DS386	United States – Certain Country of Origin Labelling Requirements	Mexico	Mexico requests consultations with U.S. (12/17/08). Canada requests to join consultations (12/30/08); U.S. accepts request.
DS387	China – Grants, Loans and other incentives	United States	U.S. requests consultations with China (12/19/08). Canada, EC, Mexico, Turkey (01/15/09) and Australia (01/16/09) request to join consultations.

Source: WTO, "Chronological List of Disputes Cases," http://www.wto.org/english/tratop_e/dispu_e/dispu_status_e.htm.

Note: With a few exceptions, this list includes cases in which formal action occurred in 2008; where appropriate, pre-2008 and post-2008 actions are noted to place the 2008 actions in context. Since DSB adoption of panel and Appellate Body reports is virtually automatic, dates of adoption are generally omitted.

TABLE A.20 NAFTA Chapter 19 substantive challenges to original and five-year review determinations of USITC and Commerce, developments in 2008

File No.	Dispute	Action (Month/Day/Year)
USA-MEX-2005-1904-06	Stainless Steel Sheet and Strip (USITC Affirmative Five-Year Review Determination)	Panel Unanimously Affirmed USITC Determination (09/10/08). Notice of final panel action (09/22/08)
USA-MEX-2007-1904-03	Welded Large Diameter Line Pipe (USITC Negative Five-Year Review Determination with respect to Mexico)	USITC briefs filed (07/28/08)
USA-MEX-2008-1904-03	Light-Walled Rectangular Pipe and Tube (Commerce Final Affirmative Antidumping Determination)	Request for panel review (07/23/08)
USA-MEX-2008-1904-04	Light-Walled Rectangular Pipe and Tube (USITC Final Affirmative Injury Determination)	Request for panel review (08/29/08)

TABLE A.22 Leading exports to the European Union,^a by Schedule B subheading, 2006-08

Schedule B subheading	Description	2006	2007	2008	% change, 2007-08
		Millions of \$			
3004.90	Certain medicaments put up in measure doses or in forms or packings for retail sale, n.e.s.o.i.	7,194	7,893	9,630	22.0
2710.19	Oils and preparations from petroleum oils and oils from bituminous minerals, minimum 70 percent by weight of such products, not light	3,110	2,809	9,195	227.3
8802.40	Airplanes and other aircraft, of an unladen weight exceeding 15,000 kg	5,916	8,781	8,305	-5.4
8803.30	Parts of airplanes or helicopters, n.e.s.o.i.	6,299	6,573	6,745	2.6
3002.10	Antisera and other blood fractions, and modified immunological products	3,170	4,937	6,497	31.6
8411.91	Parts for turbojets or turbopropellers	4,657	5,645	6,221	10.2
8703.23	Passenger motor vehicles with spark-ignition internal-combustion reciprocating piston engine, cylinder capacity over 1,500 but not over 3,000 cc	6,453	5,957	5,449	-8.5
7108.12	Nonmonetary gold (including gold plated with platinum), unwrought, excluding powder	2,823	4,235	5,218	23.2
8703.33	Passenger motor vehicles with compression-ignition internal combustion piston engine (diesel), cylinder capacity over 2,500 cc	254	2,370	4,781	101.7
2701.12	Bituminous coal, whether or not pulverized, but not agglomerated	1,583	1,897	3,525	85.8
9018.90	Medical, surgical, dental or veterinary sciences instruments, appliances, and parts, n.e.s.o.i.	2,583	2,888	3,131	8.4
3824.90	Other chemical products and preparations of the chemical and allied industries, n.e.s.o.i.	568	1,171	3,024	158.3
8411.12	Turbojets of a thrust exceeding 25 kN	2,418	2,477	2,909	17.4
8802.30	Airplanes and aircraft, of an unladen weight over 2,000 kg but not over 15,000 kg	2,444	3,152	2,899	-8.0
9701.10	Paintings, drawings and pastels, executed entirely by hand, framed or not framed	1,196	1,818	2,549	40.2
8517.62	Machines for the reception, conversion, transmission or regeneration of voice, images or other data, including switching/routing apparatus	(^b)	2,597	2,535	-2.4
3822.00	Composite diagnostic or laboratory reagents, except pharmaceuticals	1,941	2,124	2,255	6.2
8411.99	Gas turbines parts, n.e.s.o.i.	1,687	1,624	2,013	24.0
8473.30	Parts and accessories for automated data processing machines and units	3,320	2,137	1,884	-11.9
7112.99	Waste and scrap of precious metals, other than of gold or platinum, n.e.s.o.i.	594	1,364	1,808	32.6
9018.39	Medical etc. needles n.e.s.o.i., catheters, cannulae and the like; parts and accessories thereof	1,588	1,362	1,720	26.3
1201.00	Soybeans, whether or not broken	725	1,023	1,600	56.4
9018.19	Electro-diagnostic apparatus n.e.s.o.i., and parts	1,184	1,258	1,438	14.3
8471.50	Digital processing units other than those of 8471.41 and 8471.49	696	944	1,300	37.7
8411.82	Gas turbines, except turbojets and turbopropellers, of a power not exceeding 5,000 kW	1,167	972	1,222	25.8
	Total of items shown	63,568	78,008	97,851	25.4
	All other	133,713	148,243	153,345	3.4

2709.00	Petroleum oils and oils obtained from bituminous minerals, crude	32,889	37,929	62,485	64.7
2711.21	Natural gas, gaseous state	24,211	22,370	26,703	19.4
8703.24	Passenger motor vehicles with spark-ignition internal-combustion reciprocating piston engine, cylinder capacity over 3,000 cc	30,905	30,312	25,184	-16.9
2710.19	Oils and preparations from petroleum oils and oils from bituminous minerals, minimum 70 percent by weight of such products, not light	5,216	6,265	7,695	22.8
8703.23	Passenger motor vehicles with spark-ignition internal-combustion reciprocating piston engine, cylinder capacity over 1,500 but not over 3,000 cc	5,588	6,429	6,173	-4.0
2710.11	Light oils and preparations from petroleum oils and oils from bituminous minerals, minimum 70 percent by weight of such products	4,219	4,831	5,496	13.8
2716.00	Electrical energy	2,518	2,713	3,641	34.2
3004.90	Certain medicaments put up in measure doses or in forms or packings for retail sale, n.e.s.o.i.	2,585	3,651	3,600	-1.4
4407.10	Coniferous wood sawn or chipped lengthwise, sliced or peeled, of thickness exceeding 6mm	6,039	4,860	3,216	-33.8
7601.10	Aluminum, not alloyed, unwrought	2,428	2,686	3,161	17.7
3104.20	Medicaments, for therapeutic or prophylactic uses, in measured doses, containing antibiotics other than penicillins	1,191	1,542	3,084	100.0
7108.12	Nonmonetary gold (including gold plated with platinum), unwrought, excluding powder	1,803	2,074	2,641	27.3
4802.61	Uncoated paper/paperboard for writing/printing/other graphic purposes n.e.s.o.i., over 10 percent fiber by mechanical process, in rolls	2,215	2,393	2,506	4.7
8708.29	Parts and accessories of bodies (including cabs) for motor vehicles, n.e.s.o.i.	3,088	3,346	2,505	-25.1
2711.12	Propane, liquefied	1,791	1,916	2,387	24.6
7601.20	Unwrought aluminum alloys	2,884	2,717	2,366	-12.9
4801.00	Newsprint, in rolls or sheets	2,987	2,345	2,331	-0.6
8704.31	Motor vehicles for transporting goods, with spark-ignition internal-combustion piston engine, gross vehicle weight not exceeding 5 mt	6,648	7,437	2,317	-68.8
8708.99	Parts and accessories for motor vehicles, n.e.s.o.i.	4,833	3,197	2,296	-28.2
8407.34	Reciprocating spark-ignition piston engines, of a cylinder capacity over 1,000 cc	2,434	2,905	2,203	-24.1
8802.40	Airplanes and other aircraft, of an unladen weight exceeding 15,000 kg	1,828	2,334	2,068	-11.4
4703.21	Chemical woodpulp, soda or sulfate, other than dissolving grades, semibleached or bleached, coniferous wood	1,656	1,925	1,931	0.3
7403.11	Refined copper, cathodes and sections of cathodes	1,315	1,681	1,826	8.7
3901.90	Polymers of ethylene n.e.s.o.i., in primary forms	1,310	1,325	1,528	15.3
0102.90	Bovine animals, live, n.e.s.o.i.	1,032	1,419	1,464	3.1
	Total of items shown	153,616	160,600	180,807	12.6
	All other	149,418	151,904	154,032	1.4
	Total of all commodities	303,034	312,505	334,840	7.1

TABLE A.28 Leading exports to China, by Schedule B subheading, 2006-08

Schedule B subheading	Description	2006	2007	2008	% change, 2007-08
Millions of \$					
1201.00	Soybeans, whether or not broken	2,530	4,117	7,301	77.3
8802.40	Airplanes and other aircraft, of an unladen weight exceeding 15,000 kg	5,222	6,192	4,180	-32.5
8542.31	Electronic integrated circuits, processors or controllers	(^a)	2,294	3,477	51.5
7404.00	Copper waste and scrap	1,439	1,786	1,763	-1.3
7602.00	Aluminum waste and scrap	1,484	1,590	1,728	8.6
5201.00	Cotton, not carded or combed	2,059	1,454	1,631	12.1
8542.32	Electronic integrated circuits, memories	(^a)	1,086	780	-28.2
7204.49	Ferrous waste and scrap, n.e.s.o.i.	495	469	762	62.3
8803.30	Parts of airplanes or helicopters, n.e.s.o.i.	716	779	720	-7.7
7204.29	Waste and scrap, of non-stainless alloy steel	648	785	697	-11.1
0207.14	Chicken cuts and edible offal, including livers, frozen	294	549	675	23.0
8473.30	Parts and accessories for automated data processing machines and units	882	699	634	-9.2
4101.50	Whole raw bovine or equine hides and skins, weight exceeding 16 kilograms, fresh, pickled or preserved but not tanned or further prepared	635	632	620	-1.9
4707.90	Recovered waste and scrap paper or paperboard, n.e.s.o.i., including unsorted such waste and scrap	433	600	604	0.7
4707.10	Waste and scrap of unbleached kraft paper or paperboard or of corrugated paper or paperboard	378	410	515	25.6
8542.39	Electronic integrated circuits, n.e.s.o.i.	(^a)	976	499	-48.9
2603.00	Copper ores and concentrates	215	424	490	15.5
8431.43	Parts for boring or sinking machinery, n.e.s.o.i.	260	254	490	92.9
2804.61	Silicon, containing by weight not less than 99.99 percent of silicon	179	345	466	35.0
4707.30	Recovered (waste and scrap) paper or paperboard, mainly of mechanical pulp (for example, newspapers, journals and similar printed matter)	223	374	418	11.8
8517.62	Machines for the reception, conversion, transmission or regeneration of voice, images or other data, including switching/routing apparatus	(^b)	366	416	13.7
8703.23	Passenger motor vehicles with spark-ignition internal-combustion reciprocating piston engine, cylinder capacity over 1,500 but not over 3,000 cc	253	353	393	11.3
8486.20	Machines and apparatus for the manufacture of semiconductor devices or electronic integrated circuits	(^c)	880	385	-56.3
4703.21	Chemical woodpulp, soda or sulfate, other than dissolving grades, semibleached or bleached, coniferous wood	199	316	334	5.5
8703.24	Passenger motor vehicles with spark-ignition internal-combustion reciprocating piston engine, cylinder capacity over 3,000 cc	190	159	332	109.4
	Total of items shown	18,734	27,892	30,310	8.7
	All other	32,890	33,121	36,856	11.3
	Total of all commodities	51,624	61,013	67,166	10.1

^a Trade in 2006 reported under parts of items contained in Schedule B subheadings 8542.21, 8542.29, and 8542.60.

^b Trade in 2006 reported under parts of items contained in Schedule B subheadings 8517.30, and 8517.50.

^c Trade in 2006 reported under parts of items contained in Schedule B chapters 84, 85, and 90.

TABLE A.29 Leading imports from China, by HTS subheading, 2006-08

HTS subheading	Description	2006	2007	2008	% change, 2007-08
Millions of \$					
8471.30	Portable digital automated data processing machines not exceeding 10 kg, with at least a CPU, keyboard and display	12,828	17,002	19,235	13.1
8517.12	Telephones for cellular networks or for other wireless networks	(^a)	14,029	12,368	-11.8
9503.00 ^b	Tricycles, scooters, similar wheeled toys; dolls, doll's carriages, and other toys; puzzles; reduced scale models	8,545	9,239	8,965	-3.0
8473.30	Parts and accessories for automated data processing machines and units	11,328	9,713	8,743	-10.0
9504.10	Video games used with television receiver and parts and accessories	3,643	7,318	8,246	12.7
8517.62	Machines for the reception, conversion, transmission or regeneration of voice, images or other data, including switching/routing apparatus	©	4,386	6,811	55.3
8528.51	Monitors, other than cathode-ray tube, designed for use with automatic data processing machines	(^d)	5,239	5,354	2.2
6403.99	Footwear not covering the ankles, with outer soles of rubber or plastics or composition leather and uppers of leather	5,703	5,540	5,148	-7.1
8528.72	Reception apparatus for television, incorporating a screen or video display device, color	(^e)	3,897	4,858	24.7
8525.80 ^f	Television cameras, digital cameras, and video camera recorders	3,264	3,975	3,831	-3.6
8528.59	Monitors, other than cathode-ray tube, not designed for use with automatic data processing machines	(^g)	2,947	3,609	22.5
6402.99	Footwear with outer soles and uppers of rubber or plastics n.e.s.o.i.	2,860	2,973	3,388	14.0
8471.70	Automatic data processing storage units	2,925	3,571	3,199	-10.4
9504.90	Game machines except coin-operated; board games; mah-jog; dominoes; dice	2,087	2,530	3,072	21.4
8443.99	Parts and accessories of printers, copying and facsimile machines, n.e.s.o.i.	(^h)	2,697	2,968	10.1
8504.40	Static converters	2,400	2,663	2,934	10.2
8443.31	Machines that perform two or more of the functions of printing, copying, facsimile transmission, able to connect to a computer or network	(ⁱ)	2,510	2,837	13.0
8471.50	Digital processing units other than those of 8471.41 and 8471.49	1,966	3,226	2,831	-12.2
9403.60	Wooden furniture, other than of a kind used in the bedroom	2,829	2,790	2,532	-9.2
4202.92	Trunks, cases, bags and similar containers, with outer surface of plastic sheeting or of textile materials	2,110	2,252	2,414	7.2
8528.71	Reception apparatus for television, not designed to incorporate a screen or video display device	(^e)	1,362	2,255	65.5
7304.29	Casing and tubing, of circular cross section, of a kind used in drilling for oil or gas, of iron (except cast iron) or steel	542	621	2,186	252.2
9403.20	Metal furniture, other than of a kind used in offices	1,861	2,132	2,101	-1.4
6110.20	Sweaters, pullovers, sweatshirts, waistcoats (vests) and similar articles, knitted or crocheted, of cotton	1,046	1,758	1,992	13.3
6403.91	Footwear covering the ankles, with outer soles and uppers of rubber or plastics, excluding waterproof footwear	1,682	1,555	1,837	18.1
	Total of items shown	67,618	115,924	123,715	6.7

TABLE A.32 Leading imports from Mexico, by HTS subheading, 2006-08

HTS subheading	Description	2006	2007	2008	% change, 2007-08
		Millions of \$			
2709.00	Petroleum oils and oils obtained from bituminous minerals, crude	29,195	29,848	37,629	26.1
8528.72	Reception apparatus for television, incorporating a screen or video display device, color	(^a)	14,149	14,306	1.1
8703.23	Passenger motor vehicles with spark-ignition internal-combustion reciprocating piston engine, cylinder capacity over 1,500 but not over 3,000 cc	10,639	10,110	10,425	3.1
8704.31	Motor vehicles for transporting goods, with spark-ignition internal-combustion piston engine, gross vehicle weight not exceeding 5 mt	4,694	5,059	5,115	1.1
8517.12	Telephones for cellular networks or for other wireless networks	(^b)	2,611	4,883	87.0
8471.50	Digital processing units other than those of 8471.41 and 8471.49	3,644	3,881	3,762	-3.1
8544.30	Insulated ignition wiring sets and other wiring sets of a kind used in vehicles, aircraft or ships	4,285	4,475	3,587	-19.9
8528.71	Reception apparatus for television, not designed to incorporate a screen or video display device	(^a)	3,574	3,341	-6.5
8703.24	Passenger motor vehicles with spark-ignition internal-combustion reciprocating piston engine, cylinder capacity over 3,000 cc	3,040	3,283	3,061	-6.7
9401.90	Parts of seats (except medical, barbers, dentist, etc.)	3,111	3,341	2,810	-15.9
8517.62	Machines for the reception, conversion, transmission or regeneration of voice, images or other data, including switching/routing apparatus	(^c)	2,573	2,793	8.6
2710.19	Oils and preparations from petroleum oils and oils from bituminous minerals, minimum 70 percent by weight of such products, not light	1,199	1,445	2,469	70.9
8517.70	Parts of telecommunications apparatus	(^d)	2,121	2,167	2.2
2710.11	Light oils and preparations from petroleum oils and oils from bituminous minerals, minimum 70 percent by weight of such products	1,365	1,700	2,114	24.3
9018.90	Medical, surgical, dental or veterinary sciences instruments, appliances, and parts, n.e.s.o.i.	1,555	1,834	2,027	10.5
8537.10	Boards, panels, consoles, other components incorporating apparatus for control or distribution of electricity, for voltage not exceeding 1,000 volts	1,663	1,976	1,937	-2.0
8708.29	Parts and accessories of bodies (including cabs) for motor vehicles, n.e.s.o.i.	3,012	2,462	1,915	-22.2
8708.99	Parts and accessories for motor vehicles, n.e.s.o.i.	2,583	2,120	1,696	-20.0
8418.10	Combined refrigerator-freezers, fitted with separate external doors	1,702	1,904	1,693	-11.1
8409.91	Parts for spark-ignition internal-combustion piston engines	1,493	1,720	1,587	-7.8
2203.00	Beer made from malt	1,600	1,593	1,567	-1.6
7106.91	Silver, other than powder, unwrought	973	1,184	1,351	14.1
8704.22	Motor vehicles for goods transport n.e.s.o.i., with compression-ignition internal combustion piston engine, weighing 5 to 20 metric tons	802	2,091	1,231	-41.1
8407.34	Reciprocating spark-ignition piston engines, of a cylinder capacity over 1,000 cc	1,453	1,291	1,229	-4.8
6203.42	Men's or boys' trousers, bib and brace overalls, breeches and shorts not knitted or crocheted, of cotton	1,328	1,213	1,177	-3.0
	Total of items shown	79,337	107,557	115,871	7.7

8703.23	Passenger motor vehicles with spark-ignition internal-combustion reciprocating piston engine, cylinder capacity over 1,500 but not over 3,000 cc	6,121	6,363	5,745	-9.7
8703.24	Passenger motor vehicles with spark-ignition internal-combustion reciprocating piston engine, cylinder capacity over 3,000 cc	2,974	2,424	2,101	-13.3
8473.30	Parts and accessories for automated data processing machines and units	2,076	2,074	1,501	-27.6
8542.39	Electronic integrated circuits, n.e.s.o.i.	(^b)	753	1,214	61.3
2710.19	Oils and preparations from petroleum oils and oils from bituminous minerals, minimum 70 percent by weight of such products, not light	1,438	1,821	1,081	-40.6
8542.32	Electronic integrated circuits, memories	(^b)	1,093	797	-27.1
8418.10	Combined refrigerator-freezers, fitted with separate external doors	400	444	642	44.5
4011.10	New pneumatic tires, of rubber, of a kind used on motor cars, including station wagons and racing cars	502	533	571	7.1
2902.20	Benzene	438	457	527	15.3
8708.99	Parts and accessories for motor vehicles, n.e.s.o.i.	723	602	523	-13.1
9013.80	Optical devices, appliances and instruments, n.e.s.o.i.	42	200	469	134.1
8542.31	Electronic integrated circuits, processors or controllers	(^b)	517	462	-10.5
8517.70	Parts of telecommunications apparatus	(^c)	246	417	69.9
8450.20	Household- or laundry-type washing machines, with a dry linen capacity exceeding 10 kilograms	140	406	411	1.1
7306.29	Seamed or welded iron or steel casing or tubing, of non-circular cross section, of kind used in drilling for oil or gas, not stainless	(^d)	158	373	135.8
2710.11	Light oils and preparations from petroleum oils and oils from bituminous minerals, minimum 70 percent by weight of such products	383	427	369	-13.6
8451.29	Drying machines for textile yarns, fabrics, or made up textile articles, with a dry linen capacity exceeding 10 kilograms	171	297	305	2.7
8517.62	Machines for the reception, conversion, transmission or regeneration of voice, images or other data, including switching/routing apparatus	(^e)	219	290	32.8
8504.23	Liquid dielectric transformers having a power handling capacity exceeding 10,000 kva	96	227	278	22.9
8471.70	Automatic data processing storage units	155	242	278	14.9
8429.52	Self-propelled mechanical shovels and excavators, with a 360-degree revolving superstructure	436	309	238	-22.9
4810.19	Writing/graphic paper and paperboard, coated with kaolin, not over 10% fiber obtained by a mechanical process, in sheets, n.e.s.o.i.	218	240	231	-3.8
7208.38	Flat-rolled products of iron or nonalloy steel in coils n.e.s.o.i., of a thickness of 3 mm but less than 4.75 mm	194	135	231	71.2
8528.51	Monitors, other than cathode-ray tube, designed for use with automatic data processing machines	(^f)	220	228	3.6
	Total of items shown	16,507	26,584	27,680	4.1

TABLE A.40 Leading exports to Taiwan, by Schedule B subheading, 2006-08

Schedule B subheading	Description	2006	2007	2008	% change, 2007-08
		Millions of \$			
8542.32	Electronic integrated circuits, memories	(^a)	1,024	1,875	83.2
8542.31	Electronic integrated circuits, processors or controllers	(^a)	1,521	1,588	4.4
8486.20	Machines and apparatus for the manufacture of semiconductor devices or electronic integrated circuits	(^b)	2,491	973	-60.9
1201.00	Soybeans, whether or not broken	473	714	953	33.5
8802.40	Airplanes and other aircraft, of an unladen weight exceeding 15,000 kg	982	1,288	906	-29.6
1005.90	Corn (maize), other than seed	566	755	808	7.0
7204.49	Ferrous waste and scrap, n.e.s.o.i.	114	323	725	124.3
8542.39	Electronic integrated circuits, n.e.s.o.i.	(^a)	960	673	-29.9
8486.90	Parts and accessories of machines and apparatus used in the manufacture of semiconductors, flat panels, or electronic integrated circuits	(^b)	358	416	16.4
8803.30	Parts of airplanes or helicopters, n.e.s.o.i.	547	384	413	7.6
7204.21	Waste and scrap, of stainless steel	104	282	330	17.1
1001.90	Wheat and meslin, excluding durum wheat	160	282	327	15.8
8475.90	Parts of machines for assembling electric/electronic lamps, tubes or flashbulbs, in glass envelopes, for manufacturing or hot working glass	160	77	311	305.1
7602.00	Aluminum waste and scrap	102	211	275	30.4
7004.90	Drawn glass and blown glass, in sheets, whether or not having an absorbent or reflecting layer, but not otherwise worked, n.e.s.o.i.	0	(^c)	243	(^d)
2844.20	Uranium and its compounds enriched in u235; plutonium and its compounds	67	111	207	86.9
9030.82	Other instruments and apparatus for measuring or checking semiconductor wafers or devices	348	289	174	-40.0
8419.89	Machinery, plant or laboratory equipment, for the treatment of material involving temperature change, not for domestic purposes, n.e.s.o.i.	49	35	171	391.4
8486.30	Machines and apparatus for the manufacture of flat panel displays	(^b)	37	168	349.9
2710.19	Oils and preparations from petroleum oils and oils from bituminous minerals, minimum 70 percent by weight of such products, not light	24	59	159	168.5
2902.50	Styrene (vinylbenzene; phenylethylene)	85	286	159	-44.5
2926.10	Acrylonitrile	214	243	158	-34.9
8543.90	Parts for electrical machines and apparatus, having individual functions, n.e.s.o.i.	197	179	141	-21.1
5201.00	Cotton, not carded or combed	152	140	131	-6.5
9031.41	Optical instruments for inspecting semiconductor wafers or devices, or photomasks or reticles used in manufacturing these items	341	498	127	-74.4
	Total of items shown	4,685	12,545	12,413	-1.1
	All other	16,691	11,996	11,215	-6.5
	Total of all commodities	21,376	24,541	23,628	-3.7

Source: Compiled from official statistics of the U.S. Department of Commerce.

Note: Because of rounding, figures may not add to totals shown. The abbreviation "n.e.s.o.i." stands for "not elsewhere specified or included."

^a Trade in 2006 reported under parts of items contained in Schedule B subheadings 8542.21, 8542.29, and 8542.60.

^b Trade in 2006 reported under parts of items contained in Schedule B chapters 84, 85, and 90.

^c U.S. value is less than \$500,000.

^d Percent change is more than 10,000 percent.

^c Not applicable.

TABLE A.44 Leading imports from Brazil, by HTS subheading, 2006-08

HTS subheading	Description	Millions of \$			% change, 2007-08
		2006	2007	2008	
2709.00	Petroleum oils and oils obtained from bituminous minerals, crude	2,546	2,682	6,522	143.1
7201.10	Nonalloy pig iron containing 0.5 percent or less phosphorus by weight, in primary forms	1,079	1,118	1,990	78.0
8802.40	Airplanes and other aircraft, of an unladen weight exceeding 15,000 kg	708	1,357	1,969	45.1
2710.19	Oils and preparations from petroleum oils and oils from bituminous minerals, minimum 70 percent by weight of such products, not light	693	720	913	26.9
4703.29	Chemical woodpulp, soda, or sulfate, other than dissolving grades, semibleached or bleached, nonconiferous	567	656	836	27.4
0901.11	Coffee, not roasted, not decaffeinated	526	609	718	18.0
2207.10	Ethyl alcohol, undenatured, of an alcoholic strength by volume of 80 percent or higher	968	389	454	16.6
7207.12	Semifinished iron/nonalloy steel products, under 0.25 percent carbon, rectangular/not square, width not less than twice thickness	435	326	449	37.6
8412.90	Parts for engines and motors, n.e.s.o.i.	15	53	446	743.8
6802.93	Worked monumental or building stone n.e.s.o.i., of granite	453	475	409	-13.9
8409.99	Parts for use with compression-ignition internal combustion piston engines	398	358	393	9.9
2713.11	Petroleum coke, not calcined	65	206	348	69.1
6403.99	Footwear not covering the ankles, with outer soles of rubber or plastics or composition leather and uppers of leather	593	486	310	-36.1
2401.20	Tobacco, partly or wholly stemmed/stripped	230	274	292	6.7
1602.50	Other prepared or preserved meat, meat offal, or blood, of bovine animals, n.e.s.o.i.	292	322	283	-12.0
4011.10	New pneumatic tires, of rubber, of a kind used on motor cars, including station wagons and racing cars	94	209	241	15.4
8802.30	Airplanes and aircraft, of an unladen weight over 2,000 kg but not over 15,000 kg	447	297	241	-18.9
2902.20	Benzene	231	300	239	-20.3
7202.93	Ferroniobium	102	165	224	35.9
7601.20	Unwrought aluminum alloys	251	221	212	-3.7
2818.20	Aluminum oxide, other than artificial corundum	22	142	207	45.7
8414.30	Compressors of a kind used in refrigerating equipment, including air conditioning	249	260	194	-25.4
2711.29	Petroleum gases and other gaseous hydrocarbons, other than natural gas, in a gaseous state	32	110	190	72.8
8429.20	Graders and levelers, self-propelled	133	114	177	55.5
2804.69	Silicon, containing by weight less than 99.99 percent of silicon	81	90	171	89.4
	Total of items shown	11,210	11,937	18,429	54.4
	All other	14,959	13,080	11,632	-11.1
	Total of all commodities	26,169	25,018	30,061	20.2

Note: Because of rounding, figures may not add to totals shown. The abbreviation "n.e.s.o.i." stands for "not elsewhere specified or included".

TABLE A.45 U.S. merchandise trade with India, by SITC codes (revision 3), 2006-08

SITC Code No.	Description	2006	2007	2008	% change, 2007-08
		Millions of \$			
Exports:					
0	Food and live animals	264	333	335	0.5
1	Beverages and tobacco	3	4	4	-14.4
2	Crude materials, inedible, except fuels	591	909	975	7.3
3	Mineral fuels, lubricants and related materials	390	397	881	121.9
4	Animal and vegetable oils, fats and waxes	19	15	4	-76.1
5	Chemicals and related products, n.e.s.	1,773	2,233	4,790	114.5
6	Manufactured goods classified chiefly by material	739	1,315	2,173	65.3
7	Machinery and transport equipment	4,071	9,231	6,123	-33.7
8	Miscellaneous manufactured articles	970	1,220	1,210	-0.8
9	Commodities and transactions not classified elsewhere in the SITC	206	653	847	29.6
	Total all exports commodities	9,025	16,309	17,340	6.3
Imports:					
0	Food and live animals	894	905	1,024	13.2
1	Beverages and tobacco	17	21	33	56.2
2	Crude materials, inedible, except fuels	373	358	535	49.5
3	Mineral fuels, lubricants and related materials	284	769	337	-56.2
4	Animal and vegetable oils, fats and waxes	46	58	103	78.4
5	Chemicals and related products, n.e.s.	1,997	2,755	3,892	41.3
6	Manufactured goods classified chiefly by material	8,126	8,830	10,026	13.6
7	Machinery and transport equipment	2,732	3,049	3,633	19.1
8	Miscellaneous manufactured articles	6,877	6,776	5,946	-12.3
9	Commodities and transactions not classified elsewhere in the SITC	328	337	336	-0.3
	Total all imports commodities	21,674	23,857	25,866	8.4

Note: Because of rounding, figures may not add to totals shown. The abbreviation "n.e.s." stands for "not elsewhere specified."

TABLE A.46 Leading exports to India, by Schedule B subheading, 2006-08

Schedule B subheading	Description	2006	2007	2008	% change, 2007-08
		Millions of \$			
3105.30	Diammonium hydrogenorthophosphate (diammonium phosphate)	(^a)	(^a)	2,664	(^b)
8802.40	Airplanes and other aircraft, of an unladen weight exceeding 15,000 kg	1,313	5,682	2,198	-61.3
7102.39	Nonindustrial diamonds, n.e.s.o.i.	232	502	1,217	142.3
7108.12	Nonmonetary gold (including gold plated with platinum), unwrought, excluding powder	(^c)	373	497	33.1
2707.99	Oils and products of the distillation of high temperature coal tar, n.e.s.o.i.; similar products with predominate aromatic constituent	218	191	369	92.9
2701.12	Bituminous coal, whether or not pulverized, but not agglomerated	101	91	361	298.2
7204.49	Ferrous waste and scrap, n.e.s.o.i.	78	145	246	69.0
2809.20	Phosphoric acid and polyphosphoric acids	(^a)	(^a)	228	(^b)
8517.62	Machines for the reception, conversion, transmission or regeneration of voice, images or other data, including switching/routing apparatus	(^d)	191	223	16.9
8431.43	Parts for boring or sinking machinery, n.e.s.o.i.	107	193	183	-5.4
8802.30	Airplanes and aircraft, of an unladen weight over 2,000 kg but not over 15,000 kg	92	144	155	7.3
0802.11	Almonds, fresh or dried, in shell	114	125	141	12.3
7113.19	Articles of jewelry and parts thereof, of precious metal (excluding silver)	101	61	118	91.6
8803.30	Parts of airplanes or helicopters, n.e.s.o.i.	67	101	116	14.6
3105.40	Ammonium dihydrogenorthophosphate (monoammonium phosphate), mixtures thereof with diammonium hydrogenorthophosphate (diammonium phosphate)	(^a)	(^a)	115	(^b)
4801.00	Newsprint, in rolls or sheets	(^c)	21	110	416.7
8471.50	Digital processing units other than those of 8471.41 and 8471.49	54	129	104	-19.1
5201.00	Cotton, not carded or combed	52	79	103	31.2
3815.19	Supported catalysts, n.e.s.o.i.	53	85	100	17.2
4707.10	Waste and scrap of unbleached kraft paper or paperboard or of corrugated paper or paperboard	41	90	93	3.2
8523.40	Optical media	(^e)	163	78	-52.0
8431.39	Parts for lifting, handling, loading, or unloading machinery, n.e.s.o.i.	18	60	78	30.7
8409.99	Parts for use with compression-ignition internal combustion piston engines	36	36	76	112.3
7204.21	Waste and scrap, of stainless steel	44	126	74	-41.5
8517.70	Parts of telecommunications apparatus	(^f)	85	74	-13.3
	Total of items shown	2,723	8,675	9,720	12.0
	All other	6,302	7,634	7,620	-0.2
	Total of all commodities	9,025	16,309	17,340	6.3

Source: Compiled from official statistics of the U.S. Department of Commerce.

Note: Because of rounding, figures may not add to totals shown. The abbreviation "n.e.s.o.i." stands for "not elsewhere specified or included."

^a Exports aggregated with other fertilizer products under 3100.00.0000 to prevent disclosure of individual firm data.

^b Not applicable.

^c U.S value is less than \$500,000.

^d Trade in 2006 reported under parts of items contained in Schedule B subheadings 8517.30 and 8517.50.

^e Trade in 2006 reported under parts of items contained in Schedule B headings 8523 and 8524.

^f Trade in 2006 reported under parts of items contained in Schedule B subheadings 8473.30, 8517.90, and 8529.10.

TABLE A.47 Leading imports from India, by HTS subheading, 2006-08

HTS subheading	Description	2006	2007	2008	% change, 2007-08
		Millions of \$			
7102.39	Nonindustrial diamonds, n.e.s.o.i.	3,256	3,686	3,876	5.2
7113.19	Articles of jewelry and parts thereof, of precious metal (excluding silver)	2,309	2,201	1,338	-39.2
3004.90	Certain medicaments put up in measure doses or in forms or packings for retail sale, n.e.s.o.i.	241	498	1,068	114.4
6302.60	Toilet and kitchen linen, of terry toweling or similar terry fabrics, of cotton	315	389	404	3.9
7305.11	Line pipe for oil or gas pipelines, external diameter over 406.4 millimeters, of iron or steel, longitudinally submerged arc welded	9	153	397	159.8
6302.31	Bed linen, other than printed, of cotton, not knitted or crocheted	264	298	368	23.5
	Sweaters, pullovers, sweatshirts, waistcoats (vests) and similar articles, knitted or crocheted, of cotton	299	346	344	-0.7
6110.20					
2710.19	Oils and preparations from petroleum oils and oils from bituminous minerals, minimum 70 percent by weight of such products, not light	188	702	319	-54.6
7305.19	Line pipe used in oil or gas pipelines, external diameter over 406.4 millimeters, of iron or steel, riveted or similarly closed, n.e.s.o.i.	4	351	315	-10.3
6206.30	Women's or girls' blouses, shirts and shirt-blouses, of cotton, not knitted or crocheted	373	300	261	-13.1
6204.62	Women's or girls' trousers, etc., of cotton, not knitted or crocheted	181	227	251	10.4
8528.71	Reception apparatus for television, not designed to incorporate a screen or video display device	(^a)	110	251	127.7
7210.49	Flat-rolled iron or nonalloy steel, not corrugated, 600 mm or more wide, plated or coated with zinc other than electrolytically	510	155	247	59.8
6105.10	Men's or boys' shirts, of cotton, knitted or crocheted	294	297	245	-17.6
0801.32	Cashew nuts, fresh or dried, shelled	215	197	232	17.7
3004.20	Lead oxides, n.e.s.o.i.	111	201	229	14.2
7207.12	Semifinished iron/nonalloy steel products, under 0.25 percent carbon, rectangular/not square, width not less than twice thickness	2	25	217	781.2
6203.42	Men's or boys' trousers, bib and brace overalls, breeches and shorts not knitted or crocheted, of cotton	183	226	216	-4.3
6205.20	Men's or boys' shirts of cotton, not knitted or crocheted	229	221	211	-4.4
6109.10	T-shirts, singlets, tank tops, and similar garments, of cotton, knitted or crocheted	161	183	197	7.8
8701.90	Tractors, n.e.s.o.i.	126	201	190	-5.7
8504.40	Static converters	174	185	188	2.0
8502.31	Electric generating sets, wind-powered	217	253	179	-29.5
7113.11	Jewelry and parts thereof, of silver, whether or not plated or clad with other precious metal	93	113	160	41.7
5701.10	Carpets and other textile floor coverings, knotted, whether or not made up, of wool or fine animal hair	194	191	156	-18.3
	Total of items shown	9,948	11,710	11,859	1.3
	All other	11,725	12,147	14,006	15.3
	Total of all commodities	21,674	23,857	25,866	8.4

Source: Compiled from official statistics of the U.S. Department of Commerce.

Note: Because of rounding, figures may not add to totals shown. The abbreviation "n.e.s.o.i." stands for "not elsewhere specified or included."

^a Trade in 2006 reported under parts of items contained in HTS subheadings 8528.12 and 8525.13.
