The Latest in U.S. Currency Design

The redesigned $100 note introduces two advanced security features: the **3-D Security Ribbon** and the **Bell in the Inkwell**. It is not necessary to trade in your old-design notes for new ones. All U.S. currency remains legal tender, regardless of when it was issued. Protect yourself — it only takes a few seconds to check the new $100 note and know it's real.

3-D Security Ribbon
Tilt the note back and forth while focusing on the blue ribbon. You will see the bells change to *100*s as they move. The ribbon is woven into the paper, not printed on it.

Bell in the Inkwell
Tilt the note to see the color-shifting bell in the copper inkwell change from copper to green.
