of the 110<sup>th</sup> Congress<sup>1</sup>**

[Date approved: March 26, 2008 ]<sup>2</sup>

**Bill No. and sponsor:** H.R. 4316 (Mr. Joseph Crowley of New York).

**Proponent name,<sup>3</sup> location:** Honeywell International, Inc., Morristown, NJ.

**Other bills on product (110<sup>th</sup> Congress only):** None.

**Nature of bill:** Extend the existing temporary duty suspension through December 31, 2011.

**Retroactive effect:** None.

Black and white or other monochrome monitors with cathode-ray tubes, the foregoing each with a video display diagonal of either: 21.6 cm or more but not more than 24.1 cm, 29.2 cm or more but not more than 31.8 cm or 41.9 cm or more but not more than 44.5 cm (provided for in subheading 8528.49.80).

**Check one:**      Same as that in bill as introduced.  
                   Different from that in bill as introduced (see Technical comments section).

**Product information, including uses/applications and source(s) of imports:**

These products are black and white video monitors with cathode-ray tube displays designed for displaying video signals from security cameras, video storage devices, and other closed-circuit television equipment. The pertinent HTS subheading covers all black and white or other monochrome CRT monitors not of a kind used solely or principally in automatic data processing systems of heading 8471. Unlike video monitors with cathode-ray tubes intended for consumer use, these monitors commonly have BNC<sup>4</sup> input connections and video loop-thru connectors to permit increased flexibility of video signal routing and connectivity. They are used in applications requiring continuous operation and feature higher reliability than monitors intended for consumer use. These three monitors are differentiated by screen sizes--nominally given as 9-inch, 12-inch, and 17-inch diagonal measurements.

China is the principal import source of these monitors.

<sup>3</sup> The sponsor/proponent did not identify any additional beneficiaries to this bill.

<sup>4</sup> A BNC connector is a "male" connector used to connect video components to coaxial cables. The name reportedly stands for British Naval Connector or Bayonet Nut Connector or Bayonet Neill-Concelman connector, according to various Internet sites.
