Product information, including uses/applications and source(s) of imports:

Pyrimethanil is a synthetic organic chemical used as a fungicide to protect various crops, including potatoes and certain fruits and vegetables, from disease such as gray mold. The product is not produced in the United States; imports are sourced from Germany. At the consumer level, there are at least two formulated products that compete with the formulated product containing pyrimethanil.

Technical comments:³

The Commission suggests that the article description given on page 1 of this report be used in the proposed new heading as it reflects a correct chemical name.

³ The Commission may express an opinion on the HTS classification of a product to facilitate consideration of the bill. However, by law, only the U.S. Customs Service is authorized to issue a binding ruling on this matter. The Commission believes that the U.S. Customs Service should be consulted prior to enactment of the bill.
