**MEMORANDUM ON PROPOSED TARIFF LEGISLATION
of the 109th Congress¹**

[Date approved: August 17, 2006]²

Bill No. and sponsor: S. 2967 (Mr. Bill Frist of Tennessee).

Proponent name, location: Lasko Products, Inc., West Chester, PA.

Other bills on product (109th Congress only): S. 2966, S. 2968, and S. 2969.³

Nature of bill: Temporary duty suspension through December 31, 2009.

Retroactive effect: None.

Suggested article description(s) for enactment (including appropriate HTS subheading(s)):

AC electric motors of an output exceeding 74.6 W but not exceeding 105 W, single phase; each equipped with a capacitor, a rotary speed control mechanism, and a motor mounting cooling ring (provided for in subheading 8501.40.40).

Check one: Same as that in bill as introduced.
 Different from that in bill as introduced (see Technical comments section).

Product information, including uses/applications and source(s) of imports:

An electric motor converts electrical energy into mechanical motion. An alternating current (AC) motor typically consists of two parts: (1) an outside stationary stator having coils supplied with AC current to produce a rotating magnetic field, and (2) an inside rotor attached to the output shaft that is given a torque by the rotating field. AC electric motors can be used in a variety of finished products (e.g., medical equipment and household appliances). However, the subject of this request is a specific type of capacitor-start single phase AC electric motor used to power “box” type portable electric fans. The principal import sources for such motors are Mexico, China, and India.

Technical comments:⁴ None.

⁴ The Commission may express an opinion on the HTS classification of a product to facilitate consideration of the bill. However, by law, only the U.S. Customs Service is authorized to issue a binding ruling on this matter. The Commission believes that the U.S. Customs Service should be consulted prior to enactment of the bill.
