Other bills on product (109th Congress only): None.

Nature of bill: Temporary duty suspension through December 31, 2009.

Retroactive effect: None.

Suggested article description(s) for enactment (including appropriate HTS subheading(s)):

Lamp-holder housings of aluminum, containing sockets (provided for in subheading 8536.61.00).

Check one: Same as that in bill as introduced.
 Different from that in bill as introduced (see Technical comments section).

Product information, including uses/applications and source(s) of imports:

Aluminum lamp-holder housings containing sockets are a type of lamp-holder (bulb holder). Lamp-holders provide an electrical housing for bulb insertion in various types of lighting fixtures. Lamp-holders vary in style, electrical rating, and constituent materials and may be used for incandescent and fluorescent lighting devices. There are many configurations, including snap-in, plug-in, and screw-in, based on end-use requirements. Aluminum lamp-holder housings containing sockets are considered to be of a lower quality material type that does not support high heat applications. They are commonly used with lighting that does not generate high levels of heat, such as in table lamps for use in homes. The principal U.S. import sources of this product are China and Mexico.

Technical comments:³

It is suggested that the proposed article description be modified as shown on page 1 of this report, to be more consistent with normal tariff drafting practices.

³ The Commission may express an opinion on the HTS classification of a product to facilitate consideration of the bill. However, by law, only the U.S. Customs Service is authorized to issue a binding ruling on this matter. The Commission believes that the U.S. Customs Service should be consulted prior to enactment of the bill.
