

Congress of the United States  
Washington, DC 20515

July 23, 2009

**Sign H.R. 391 Discharge Petition**  
**Stop egregious action by the EPA**

Dear Colleague:

Please join us in signing a discharge petition for H.R. 391, a bill to prohibit the EPA from regulating greenhouse gases under the Clean Air Act. We cannot let unelected bureaucrats fundamentally change the energy policy of America without the consent of Congress.

As the House version of the Cap-and Trade bill languishes in the U.S. Senate, the EPA continues its progress towards implementing energy and emission restrictions by regulating greenhouse gases under the Clean Air Act.

H.R. 391 will stop the EPA's ability to pursue this plan of action and protect the interests of American farmers, consumers, and businesses. If the EPA is not stopped now, it will issue regulations that will effectively shut down economic growth and expansion in America and pre-empt Congress's consideration of Cap and Trade legislation.

If you share our view that Congress should be the sole authority deciding if greenhouse gases should be regulated, we urge you to sign the discharge petition to bring H.R. 391 to the floor. Please contact us or our staff for further information.

Sincerely,

Marsha Blackburn  
Member of Congress

Mike Conaway  
Member of Congress
