

Appendix

DATA QUALITY

According to the criteria specified by OMB on performance data reliability and completeness, the Corporation considers the performance data in this report **reliable but incomplete**. The Corporation is still in the early stages of developing a complete and robust set of performance measures; however, we are continually improving our ability to demonstrate results.

Limitations

While the Corporation has reasonable confidence that the data contained in this report accurately reflect the performance of the agency, there are several limitations to using the Corporation's data systems for performance reporting. The Corporation is a highly decentralized agency, and responsibility for collecting and reporting performance data often resides with outside sources at the state and local levels. Most of the data systems used by the Corporation derive their data from reports provided by these outside sources, including states, grantees, subgrantees, and members of national and community service programs. Although some of these reports are subject to corroboration through monitoring of local program performance by Corporation representatives, and the Corporation has a strategy for monitoring coverage that includes site visits, program evaluations, and audits, not all reports from outside sources are subject to external corroboration.

Data Certification

The focus of the Corporation's data quality efforts has been on assessing the internal data system controls and their effect on the accuracy of the performance information. Although the Corporation does not independently verify or validate data received from outside sources, the data are managed appropriately and our procedures for analyzing and reporting performance statistics are replicable. In addition, to ensure the Corporation is reporting data accurately, program managers and data managers are required to certify that the procedures used to analyze and report data received from outside sources are appropriate and replicable. As part of this certification, program managers and data managers certify that they are able to provide the source or sources for the data, the names of the person or organization conducting any analysis needed to produce the result, copies of all tables and computer output showing final tabulations, forms used to collect the data, and a description of any steps taken to ensure that the data are reported accurately.

OIG Audit Findings on Performance Indicators

A recent audit report by the Office of Inspector General made several recommendations regarding the Corporation's performance measurement systems.¹ Overall, the auditors concluded that data were "reasonably accurate" based on their assessment of the database controls and their effect on the accuracy of the performance information. The audit did not test the controls over database input from sources outside of the Corporation. The assessment confirmed what was already understood within the Corporation: the quality of the data varies based on the degree of decentralization and the ability of programs to assess information reported by outside sources. While some Corporation programs rely on self-reported and unaudited data, the Corporation successfully initiated new performance measurement and benchmarking systems in Senior Corps, AmeriCorps, and Learn and Serve America to collect information and report annually on the performance of programs.

¹We Care America, Inc was a planning grant for FY 2002. As such, it had no budgeted members.

* As of the publication of this report, these organizations were the legal applicants for the grant.

¹ These AmeriCorps National Direct Grants only represent organizations receiving National Direct funding. Some organizations (as well as other organizations not included in this report) may have received other forms of national funding through the Corporation for National and Community Service, including Education Award Only funds, National Homeland Security Funds, and Promise Fellow Funds.

Data Table: AmeriCorps*VISTA (2002-2003)

| State | July 1, 2003 Population | Completion Rate | Assignments* | Assignments per 100,000 State Residents | Estimated Allocation per State |
|----------------------|----------------------------|-------------------|----------------------|---|--------------------------------------|
| Alabama | 4,500,752 | 59% | 58 | 1.29 | \$691,226 |

**Data Table: Learn and Serve America (2002-2003)
Summary by State***

*The following data have been collected from Learn and Serve America's LASSIE survey, the annual data collection instrument for Learn and Serve America's subgrantees. LASSIE relies upon individual subgrantee self-reporting, and it is estimated that approximately 70% of all subgrantees reported through LASSIE in 2002-03.

| STATE | Number of Projects Responding | Total Number of Service-Learners ² | Total Hours of Service ³ | Median Number of Service-Learners ¹ | Average Service Hours per Student ⁴ | Median Service Hours per Student ⁴ | % with Formal Service-Learning Policy ⁵ | GRANT AMOUNT ⁶ | | |
|----------------------|-------------------------------|---|-------------------------------------|--|--|---|--|---------------------------|--------------------|--------------------|

| North Carolina | 32 | 8,457 | 60,582 | 107 | 22.2 | 12.1 | 43 | 13 | 77 | 10 |

¹The median was used in place of the average number of service learners because of outliers in the number of participants reported

²N=1,476 respondents

³N=1,293 respondents

⁴While the LASSIE survey asks for the total number of service hours by participants, some subgrantees may have misreported the number of service hours. Those cases with less than two service hours per participant were excluded from the average and median; N=1,049.

⁵N=1,591 respondents

⁶N=1,488; percentages based only on those programs reporting grant amount.

Data Table: Learn and Serve America (2002-2003) (continued)
Summary by State*

*The following data have been collected from Learn and Serve America's LASSIE survey, the annual data collection instrument for Learn and Serve America's subgrantees. LASSIE relies upon individual subgrantee self-reporting, and it is estimated that approximately 70% of all subgrantees reported through LASSIE in 2002-03.

| STATE | Number of Projects Responding | Total Number of Service-Learners ² | Total Hours of Service ³ | Median Number of Service-Learners ¹ | Average Service Hours per Student ⁴ | Median Service Hours per Student ⁴ | % with Formal Service-Learning Policy ⁵ | GRANT AMOUNT ⁶ | | |
|------------------|-------------------------------|---|-------------------------------------|--|--|---|--|---------------------------|--------------------|--------------------|

| Montana | 1 | \$66,306 | | | | | | | 1 | \$120,457 | 2 | \$186,763 | |

⁷Formula grants are made available to all U.S. states, except South Dakota, plus the District of Columbia and Puerto Rico. For the 2003 continuation grants, North Dakota and Wyoming did not apply for formula funds. Funds allocated to Puerto Rico are included under U.S. Territories.

⁸School-Based Competitive grants include Community Higher Education and School Partnership (CHESP) and Digital Divide grant funds. Grants given to Tribes within these two competitions are included under the Tribal grants column.

⁹2002-03 grant funds include carry-over from the previous year. Unused funds from 2001-02 in Higher Education and School-Based Competitive sectors were allocated for 2002-03. For this reason, the total grant funds exceeds Learn and Serve America's 2002-03 budget of \$43 million.
