1. Per capita personal income was computed using Census Bureau midyear population estimates.

2. Percent change was calculated from unrounded data.

3. The personal income estimate for the United States is derived as the sum of the county estimates. It differs from the estimate of personal income in the national income and product accounts because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of

source data.

4. The metropolitan area definitions used by BEA for its personal income estimates are the county-based definitions issued by the Office of Management and Budget in June 2003 (with revisions released in February 2004, March 2005, December 2006, November 2007, November 2008, and December 2009) for federal statistical purposes.

Table 3. Personal Income and Per Capita Personal Income by County, 2008–2010—Continues

Table with columns for Area, Personal income (Millions of dollars), Per capita personal income (Dollars), and Rank in state. Rows include United States, Alabama, Alaska, and various counties in both states.

See footnotes at the end of the table.

Table 3. Personal Income and Per Capita Personal Income by County, 2008–2010—Continues

Table with multiple columns for Personal Income (Millions of dollars) and Per capita personal income (Dollars) for various counties in Michigan and Wisconsin. It includes data for years 2008, 2009, and 2010, along with ranks in state.

See footnotes at the end of the table.

Table 3. Personal Income and Per Capita Personal Income by County, 2008–2010—Continues

Table with columns for Area, Personal income (Millions of dollars, 2008, 2009, 2010), and Per capita personal income (Dollars, Rank in state, 2008, 2009, 2010). Rows list counties across various states including Montana, Nebraska, and Missouri.

See footnotes at the end of the table.

NA Not available

1. Per capita personal income was computed using Census Bureau midyear population estimates.

2. The personal income estimate for the United States is derived as the sum of the county estimates. It differs from the estimate of personal income in the national income and product accounts because of differences in coverage, in the meth-

odologies used to prepare the estimates, and in the timing of the availability of source data.

3. Virginia combination areas consist of one or two independent cities with populations of less than 100,000 combined with an adjacent county. The county name appears first, followed by the city name(s). Separate estimates for the jurisdictions making up the combination areas are not available.
