

Energy Efficient House: Answers

4th/5th

NAME:		
INCHE.		

Find ways the house IS and IS NOT energy efficient.

Ways it IS	energy	efficient:
------------	--------	------------

- 1. solar panels
 4 Energy Star certified appliances:
- 2. washer, dryer, refrigerator and stove
- 3. <u>ceiling fans</u>
- 4. thermostat set at 78 degrees
- 5. microwave & toaster oven
- 6. trees around the house

Ways it ${f IS}$ ${f NOT}$ energy efficient:

- 1. running water faucet
- 2. <u>lights switch turned on</u>
- 3. curtains open during the summer
- 4. open front door & curtains
- 5. unwrapped water heater and pipes
- 6. thermostat set at 70 degrees

Energy True or False: Answers

4th/5th

NAME:				
-------	--	--	--	--

[True or False]

Save energy, save dough, no matter where you go! Want your city's water cleaned and pumped to your home? Of course you do, but did you know it takes a whole lot of energy to deliver every gallon of water? It does, so for goodness sake, turn off the water, and then, to save even more energy, replace your light bulbs with energy efficient ones.

True

If every American home replaced just one light bulb with a light bulb that has earned the Energy Star stamp of approval, we would save enough energy to light 3 million homes for a year.

True

A drippy faucet that leaks enough water to fill a soda bottle every 30 minutes will waste 2,192 gallons of water a year.

True

The energy-saving ideas you use at home can also be used in school.

True

The biggest use of electricity in most cities is supplying water and cleaning it up after it has been used. That's why wasting water is wasting energy.

Energy Crossword Puzzle 1: Answers

4th/5th

[Across]

- 1. Photosynthetic organism used to make fuel
- 5. Energy derived from the sun
- 7. Non-polluting energy sources (2 words)
- 8. Inspires awareness and appreciation for Earth (2 words)
- Energy from fission or fusion of atomic nuclei
- 10. Inexhaustible or replaceable
- 11. International standard for energy efficient products (2 words)
- 12. Arises from behavior of electrons and protons

[Down]

- 2. Fuel from renewable biological resources
- 3. Replaces existing fuel sources (2 words)
- 4. Abbreviation for government energy department
- 6. Internal heat of the Earth

Energy Crossword Puzzle 2: Answers

4th/5th

[Across]

- 1. Energy delivered from the sun
- 3. Fuels formed from decomposed organisms (2 words)
- 9. Inexhaustible or replaceable by new growth
- 10. International standard for energy efficient products (2 words)
- 11. Graphite-like carbon material used for fuel

[Down]

- 1. Maintained at a steady level
- 2. Arises from behavior of electrons & protons
- 4. Fuel from renewable biological resources
- 5. Energy from fission or fusion of atomic nuclei
- 6. Photosynthetic organism used to make fuel
- 7. Relating to the internal heat of the earth
- 8. Networked power control centers (2 words)
