30	Public Response to Terrorism: Findings from The National Survey of Disaster Experiences and Preparedness	<a href="http://www.ph.ucla.edu/sciprc/pdf/NC+START+Descriptive+Report.pdf">http://www.ph.ucla.edu/sciprc/pdf/NC+START+Descriptive+Report.pdf</a>	2009	Public	National, with oversampling of households in high-risk areas	April 13, 2007-February 13, 2008	3300	Telephone	California Survey Research Services, Inc.	<ul style="list-style-type: none"> <li>•The National Consortium for the Study of Terrorism and Responses to Terrorism, A Department of Homeland Security Center for Excellence</li> <li>•The U.S. National Science Foundation</li> <li>•The Southern California Injury Prevention Research Center and The Center for Public Health and Disasters, University of California, Los Angeles, School of Public Health</li> </ul>	Academic Institution/ School; Government Organization	X	X	X	<ul style="list-style-type: none"> <li>•Since September 11th, 2001, the majority of the American public has become more vigilant and aware of what is going on around them and have learned more about terrorism. At least a third of the population has duplicated important documents, such as passports and medical prescriptions, developed emergency plans, and stockpiled emergency supplies. About one fifth of the population has invested in things to enhance their safety. In addition, about 10-20% of the population has taken actions that may help reduce or mitigate their risk of being affected by terrorism, such as avoiding travel to certain cities, reducing travel by airplane, and changing mail handling procedures.</li> </ul>
