Work Experience Ft. Lewis Public Works (01/31/2000 - Present) - Utility systems Repairer-Operator Fort Lewis, Washington United States Supervisor; (h)(6) - (b)(6) ; Contact; Yes Pay Grade; WG - 4742 - 9

Salary; \$26.63 per hour Hours per week; 40

Duties; Operate and maintain all units of a sewage disposal plant and other wastewater and stormwater facilities. sewage plant provides for pretreatment, primary and secondary treatment and separate sludge digestion, serve as rotating shift operator-in charge, operate valves, pumps, grates, and other controls and equipment to move sewage or stormwater through various stages of treatment. Collect wastewater samples at prescribed stages in the treatment cycle and make changes in temp.,ph,cl2,and decl2 as needed. Perform lab test's to determine quality of treatment stages and discharge quality/quanitity to meet environmental standards. Trouleshoot, repair, and install process equipment as called for. Perform planned and unplaned maintenance tasks, record data, fill out reports, logs, order and pick-up supplies etc. Use a variety of tools ranging from hand to heavy machinary in accomplishing tasks. Operate, maintain and repair centeralized washracks, stormwater treatment systems, and sewage lift stations.

Ft. Lewis Public Works (10/12/1998 - 01/30/2000) - maintenance mechanic Fort Lewis, Washington United States Supervisor; (h)/6 - na; Contact; Yes Pay Grade; WG - 4749 - 0

Salary; \$23.44 per hour Prurs per week; 40

ies; Assigned to various army units as a repair & utility instructor assisting personel of the unit maintaining, repairing, installing, and modifying assigned facilities. Involves the use of many varying trade skills and supplies for the central supply systems.

Ft. Lewis Public Works (11/01/1993 - 10/11/1998) - water treatment plant supervisor Fort Lewis, Washington United States Supervisor; na - na; Contact; Yes Pay Grade; WS - 5409 - 8

Salary; \$17.98 per hour Hours per week; 40

Duties: Planing, work direction, administration, and perform full range of duties in the operation, repair and maintenance of the water treatment plant in staff shortage situations, Perform other duties as assigned.

Ft. Lewis Public Works (07/05/1987 - 11/27/1993) - water treatment plant operator Fort Lewis, Washington United States Supervisor; na - na; Contact; Yes Pay Grade; WG - 5409 - 9

Salary; \$17.98 per hour Hours per week: 40

Duties; Daily Operate and maintain a water treatment plant, 14 wells, 5 remote water system sites, and 12 reservoirs. Also responsible for maintaining the water quality of 3 large public swimming pools. Maintaining and repairing systems machinary, monitoring chemical additives, sampling systems for proper water quality and health concerns.

62nd Civil Engineering SQ. (05/30/1983 - 07/05/1987) - Maintenance Mechanic McChord AFB, Washington United States Supervisor; na - na; Contact; Yes Pr. Grade; WG - 4749 - 9

Fr Staue; NG - 4/49 - 9

Salary; \$11.13 per hour Hours per week; 40

Duties; Inspect and repair electrical, plumbing, heating, painting, appliances and carpentry in base family housing units.

AFCOMS Northwest commissary complex (07/26/1981 - 05/29/1983) - store worker inspector McChord AFB, Washington United States Supervisor; na - na; Contact; Yes Pay Grade; WG - 6914 - 4 Salary; \$8.51 per hour Duties; Assisted in monitoring contractors performance of shelf stocking and custodial services for the commissary, using check lists, forms and guides outlined in the QAE surveillance plan, evalates daily performance of contractor in accordance air force contract. reported to base contracting officer any problems or mods required. Naval supply systems command (11/25/1980 - 07/25/1981) - storeworker Bremerton naval shipyard, Washington United States Supervisor; na - na; Contact; Yes Pay Grade; WG - 7602 - 4 Salary; \$8.21 per hour Duties; Unload merchandise from trucks to warehouse staging area, checking for quality, quantity and size. checking receipt documents to establish updated pricing, then marking current prices and moving stock into store area and rotating and stocking store selves. National Park Service (01/13/1980 - 08/21/1980) - Maintenance worker John day, Oregon United States Supervisor; na - na; Contact; Yes Pay Grade; WG - 4749 - 5 Salary; \$6.81 per hour Hours per week; 40 Duties; Performed variety of skills maintaining a national park, from picking up trash to constructing trail systems. Maintained small remote water and wastewater systems stationed throughout the park. construction company (08/28/1976 - 12/24/1979) - General Contractor Puyallup, Washington United States Supervisor; [hME] A [hM] - (360)456-8289; Contact; Yes Prv Grade; WG - 4749 - 10 Lulary; \$16,000.00 per year Duties; Performed a variety of building trades work from clearing land with heavy equipment, establishing level grades for building foundations, assembling and pouring concrete forms, framing structures, laying down roof's, interior finishing, plumbing, electrical and telphone cable. Took on most any job opportunity to aquire trade skills that would help stay employed the rest of my life. United States Department of Justice (07/22/1973 - 08/14/1976) - Correctional Officer Mcneil Island, Washington United States Supervisor; na - na; Contact; Yes Pay Grade; GS - 0007 - 7 Salary; \$11,414.00 per year Hours per week; 40 Duties; Worked as a correctional officer in a minimum security penitentiary supervising correctional inmates, as they went about performing assigned tasks and living their daily lives behind a wall with razor wire and gun towers. Performed a vast variety of jobs on a continual 90 day rotating basis and differing shifts, as to never establish a set pattern. Did manage to obtain 6 months experiance operating a inland waters 100 ton passenger vessel transporting inmates, employee's and vistors to and from the island penitentiary. Gained vailable insight to human nature in a negative environment Education College/University (b)(6) (07/01/1973 - 12/31/1975)(b)(6) United States Degree; - Major; Engineering Semester Hours: 38 Description; general elective courses.

Work Experience

Currently employed as an afloat Trainer for Afloat Training Group Pacific Northwest. I hold the 9502 Instructor NEC and am qualifying as a Master Training Specialist. In this position I perform as a course developer and trainer in the field of Anti Submarine Warfare tactics and technology for approximately 150 personnel. Previous position as Lead Surveillance Branch Chief at Ship Repair Facility and Combat Systems Leading Chief Petty Officer in USS CUSHING from 3/08/2002 to 05/20/2005 I led 109 personnel in the maintenance and employment of missile, torpedo, and gun weapon ordnance systems. Managed a \$3,000,000.00 budget, regularly scheduling shipyard and depot level naval weapon system maintenance. Ensured all materials and labor requirements were met through proper planning and coordination of multiple parties. Directly supervised 27 personnel in the maintenance and operation of all shipboard undersea surveillance and underwater electrical and electronic communication systems, specifically the AN/SQQ-89 sonar suite and remote controlled ancillary equipment. Provided substantive technical assistance and training to personnel to enhance learning awareness, professional and personal growth, development, standardization and qualification, and subsequently, quality production emphasizing modern-day electronic principles, theories and techniques. Responsible for planning, diagnosing, designing, operating, testing, integrating, evaluating test results, troubleshooting of electronic systems, subsystems, hydraulic and pneumatic systems, valves and components. I have a proven record of success for organizing resources for maximum productivity and am accustomed to accepting responsibility. I possess a demonstrated record for anticipating requirements, problem definition and producing quick resolution for program improvements. I prepared training reports, evaluated and approved procurement of supplies and equipment and performed data presentations for audiences of up to 60 personnel. Familiar with NEMAIS, SAP and ERP to enhance shipboard system operability and improve maintenance costs. I effectively communicated, orally and in writing, with subordinates, peers and superiors. I fully supported and enforced policies, safety regulations and performance standards. Troubleshot to component level electronic circuit card assemblies utilizing a variety of diagnostic and electronic test equipment. Proficient with oscilloscopes, frequency counters, spectrum analyzers and multi-meters. Performed numerous safe onloads and offloads of underwater ordnance. Maintained ordnancehandling equipment, gauges, pneumatic equipment, and hyperglolic fuel spill kits for emergency use. Operated and maintained high voltage electrical and hydraulic winches and booms to deploy and operate remote controlled underwater cables and handle weapons. I evaluated personnel records to ensure completeness of information and

provided senior level management with key decision making information, during periods of extreme pressure, stress, and extended operations. Completed annual and semi annual performance evaluations for 27 personnel. Responsible for the protective custody of over \$1,000,000.00 in electronic repair parts, material and security equipment. Performed security duties at command level. Familiar with reading and interpreting blueprints, schematics, instructions and manufacturers specification documents. I am able to work with a variety of calibration procedures, calibration tools and their uses. Strong working knowledge of all hand tools, electrical power tools and mechanical uses of tools. Require little or no supervision.

I identified procurement problems and provided alternate sources and/or alternate/substitute material.

Independently identified excess material and local assets to satisfy material requirements, determining interchange-ability and/or substitutions of non-available items. Also provided possible sources for local procurement or manufacture. Identified and referenced applicable Allowance Parts List, Qualified Products List, Military/Federal/Commercial Specifications, and Military Standard drawings as additional material ordering data and documentation. Provided technical assistance to investigate and act on reported malfunctions, deficient conditions, or incorrect equipment or parts issued to the production shops and prevent recurrence. Met with representatives from local suppliers, vendors, and manufacturers to maintain current knowledge of material sources and pricing in the area of material specialization. From 03/1998 to 03/2002 at Ship Repair Facility and in USS CHANCELLORSVILLE I supervised 23 personnel in the maintenance and operation of all shipboard sonar and underwater communication systems. Responsible for providing guidance, technical assistance and support to lower graded technicians and production personnel in resolving technical problems encountered during overhaul/repair, installation, maintenance, and testing. I prepared training reports, approved procurement of supplies and equipment and performed data presentations for audiences of up to 60 personnel. Established and verified test and repair capabilities for sonar systems and their supported equipment. Diagnosed problems and toubleshot to component level peripheral equipment and circuit card assemblies utilizing oscilloscopes, frequency counters, spectrum analyzers and multi-meters. Maintained a torpedo inventory of 24 weapons and kept accurate weight test data for all ordnance handling equipment. Able to read and interpret blueprints, schematics instructions and manufacturers specification documents. Qualified quality control inspector. Repaired and replaced 71 transducer elements.

Provided technical assistance to investigate and act on reported malfunctions, deficient conditions, or incorrect equipment or parts issued to the Production Shops and prevents recurrence. Met with representatives from local suppliers, vendors, and manufacturers to maintain current knowledge of material sources and pricing in the area of material specialization. I provided direct casualty repair assistance to Seventh Fleet electronic sonar systems. Coordinated efforts of contractor and civilian technicians to facilitate repairs to underwater communications and surveillance systems. I researched availability of parts and resources, and made procurement recommendations and approvals to perform repairs. I scheduled repair efforts of shipyard personnel, shipboard personnel and civilian technicians to accomplish effective equipment performance. I possess a thorough

knowledge of electrical and electronic theory, hydraulic equipment operations, electronic test equipment, automatic diagnostic test equipment, and the use of schematics, technical manuals and parts lists for the isolation and repair of electrical, electronic, and hydraulic systems. Repaired or replaced servo/synchro circuits, silicon coded rectifiers, electrical relays, pneumatic and hydraulic valves and power supplies. and underwater transducers. Ability to troubleshoot, isolate and repair defective electrical, hydraulic and electronic components and install new components. I maintained records of sonar test data for combat systems alignment and calibration tests during special operations and testing. I maintained awareness of fleet readiness trends, monitored the development of engineering changes and other equipment modifications to in-service sonar systems, and coordinated the design and installation of prototype, special purpose, and production electronic communication and sonar surveillance equipments in the fleet. I performed scheduled and corrective maintenance and troubleshooting repairs on complex digital and analog underwater surveillance and communications systems. I installed new equipments, and design modifications, performed installation checkout and diagnostic procedures in accordance with established guidelines and schematics. I maintained an inventory of \$500,000 in electronic parts; electrical equipment and office supplies. I developed preventive maintenance schedules and responded to critical emergency repair trouble calls. Performed weight tests using quality controlled work packages, and maintained databases to schedule interval weight tests on ordnance handling equipment. I trained, lead and motivated subordinates in job accomplishment. I closely supervised over 400 maintenance repair actions, 11 Alterations Equivalent Repairs and 15 Ship Alterations. I performed removal and replacement and installation of two AN/SOR-19 Towed Array Cable systems, eliminating further repairs or rework. I was directly responsible for the successful accomplishment of Acoustic/Electro-Magnetic Torpedo Countermeasure (NIXIE) system upgrades and restoration of an AN/SOS-53D digital sonar system. including tranducer element repair. As Combat Systems Project Manager, I directed the accomplishment of 92 maintenance actions requiring over 3500 man-days of repair effort and saved over \$320,000 by installing refurbished OJ-194 operator display consoles.

Provided emergent repairs to three AN/SQR-19 Towed Array Sonar System cables and provided technical training to assist ships force personnel in the proper maintenance of this complex acoustic/electronic equipment. I developed and implemented a hydraulic fluid testing standard that produced hundreds of thousands of dollars in labor and repair material cost savings on tow cable hydraulic systems. Familiar with reading and interpreting blueprints, schematics instructions and manufacturers specification documents. Strong working knowledge of all hand tools, electrical power tools and mechanical uses of tools. Assisted maintenance shops with production support services. Tested and maintained support equipment and instrumentation necessary to perform preventative and corrective maintenance to support continued production. As Ship Repair Facilities Command Career Counselor, I developed a robust retention team program that increased retention to 100 percent. I assimilated a proven record as an effective administrator and manager of personnel issues with the ability to effectively communicate organizational policies, planning goals and objectives, and assisted in the development of reports, analyses, evaluations, recommendations, messages and correspondence.

Provided facility security and protective custody of all dry docks and ship husbandry equipment including cranes, air conditioning facilities, fuel depots, power stations and pump houses. Supervised others in the performance of duties. Assisted with the drydocking of ships using heaving lines and winches. Moored ships to piers as an experienced deckhand.

Prior to US Navy service I was a journeyman cable splicer with Illinois Bell Telephone Company and can splice copper and fiber optic telecommunications cable, locate underground cable using schematics and meters, and can count cable using color codes. I maintain a SECRET security clearance and am eligible for a TOP SECRET security clearance.

Education

Bachelors of Business Administration National University, San Diego, CA. 1992. GPA-3.81 Magna Cum Laude.

Basic Electricity and Electronics Naval Training Center San Diego, CA. 16 Weeks. Completed September 1987: Studies include electrical and electronic theory and principles, AC & DC circuitry, test equipment operation, analog and digital troubleshooting and soldering techniques.

Mk-114 Underwater Fire Control System (NEC 0434) Naval Training Center San Diego, CA. 9 Weeks duration. Completed January 1988. Studies include underwater communication systems and sonar principles, electronic theory, troubleshooting, malfunction identification and repair.

AN/SQQ-89(V) Integrated Towed Array and Sonobouy Sensors (ITASS) Level II Technician, Fleet Training Center San Diego, CA. 18 weeks completed October 1993. Performed equipment light off, operation and shut down of ITASS System. Identify basic and complex electrical and hydraulic system malfunctions, perform corrective and scheduled maintenance.

Fiber Optic Maintenance Technician A-670-0063 Course of instruction focused on both indoor and outdoor cable types including: system design, integration, fiber theory, fiber and cable type

familiarization, mechanical and fusion splicing, hands on training in cable preparation, acceptance testing, termination and mid entry splicing.

LEADERSHIP FOUNDATIONS COURSE US Navy, 80 hrs. Completed May 1999. The course provided training in management responsibilities, authority and accountability, communication concepts, motivation, delegation, evaluation and counseling. Additionally stressed topics were decision

making, risk management, resource planning and management, quality process management and process improvement.

Attended the 7 Habits of Highly Effective People 24 hrs. Completed June 1998.

Instructor Training, Lesson Plan Development NEC 9502 March 2005.

Work Experience

DOD (02/22/2006 - Present) - Manager Human Resources Assistant/GS-0203-07

Fort Lewis, Washington United States

Supervisor: (b) (b)((b)(6) Contact: Yes

Duties: Duties: IAW AR-600-8 and 600-8-1: Manager of a team of twenty clerical personnel and floor supervisor. Serves as a manager Human Resource Assistant for Fort Lewis Installation Soldier Rediness Center (SRC), with responsibility for planning, coordinating, and conduct of the installation Soldier Rediness Processing (SRP) operations. The scope of functions include responsibility for processing of individual soldier, contractor, and civillian readiness programs at Fort lewis concerning mobilization, demobolization, deployment, and redeployment (MDDR) operations. The Fort lewis SRC is a functional portion of the military Personnel Division (MPD), Most Efficient Organization (MEO) that may process in excess of 50,000 customers per year in support of Operation Noble Eagle, Enduring Freedom, and Iraqi Freedom. Developed Standard Operating Procedures for handling deployments mobolization demobilizations and redeployments of soldiers. Provides guidence and supervise works, trains staff, evaluate, counsels for corrections and advancement. Coordinate work associated with Military Personnel Records, Evaluations, Seperations, Retirements, Reassignments, DEERS/RAPIDS ID Cards, soldier In/Out processing, Soldier Readiness and related functions. Guides subordinates and provides leadership to the workers in accomplishing the assigned tasks. As the lead for the front desk operations, I manage the initial entry into the Soldier Rediness Processing site. Inprocess each soldier into the Tactical Personnel Services Databases, tracking each soldier through Mob-plan 2122, IAW AR 600-8-14, Chapter 11: making and issuing identification tags, directing individuals to proper stations for assistance. Brief all incoming soldiers on the Soldier Readiness Processing Site, send daily status reports to all sectors required for tracking _email/hard copies). Insure all rules and regulations are followed by all when in the Soldier Rediness Processing site. Escort and brief VIP's when necessary. Schedule and set-up of all day 1 and 2 briefing for Demobilizing units. Insure that all presdenters are notified of brief times and are on time. Open the facility at the end of the day. Facilitator for computer network system support and training; initiate troubleshooting and repairs; advise management on status on computer system. Point of contact for photocopy, supplies and purchasing, supervise work orders and liaison to the copy contractor. Staff trainer for use of new photocopier. The Fort Lewis SRC is a functional portion of the Military Personnel Division (MPD). Most Efficient Organization (MEO) that may process in excess of 35,000 customers per year. Reviews and interprets Department of the Army,

ŧ

FORSCOM, and USAR regulations, circulars, planning directives, correspondence and other memoranda on matters affecting MDDR missions of the Active Component, National Guard, and contractors mobilizing at Fort Lewis, Washington. Discusses new or changed procedures with manager and advises support activities on solutions developed for past or anticipated problem situations. Sets priorities and quarterly and annual goals. Resolves work problems presented by subordinates and recommends of implements way to improve production/quality of work in the unit. Gives advice, counsel, and instruction to employees and provides or arranges for needed training. Supports Equal Employment Opportunity and other management programs. Coordinates both exercise and real world deployments/mobilizations and provides instructions as required to participating units. Solicits feedback from support agencies and identifies problem areas, internal or external. Works closely with support agencies to develop solutions and provide recommendations to internal and external problem areas. Assists with development of internal quality control procedures, publishes exercise and real world MDDR schedules, and facilitates constant interaction with support agencies and affected units.

VINNELL CORPORATION (05/27/2005 - (11/18/2005 - Rotational Support Operation Supervisor

Fort Irwin, California United States

Supervisor: (b) (b)(6) (b)(6) - (b)(6) Contact: Yes

Duties: Serves as Rotations Operation Section Supervisor responsible for planning, managing, and integrating all tasks and services associated with Rotational ULLS/Prescribed Load List (PLL) Management and related Class IX operations and STAMIS Systems; RSOI and Regenerations AWRPS Fleet Management, plus Bridgade RSOI and Regeneration Services included within the performance Work Statement for Logistics Support Service at Fort Irwin, California. Interfaces with the National Training Center & Fort Iwrin Deputy Commander for Logistic/Theather Support Command Commander and staff, Operation Group, 11th Armored Cavalry Regement, Rotational / Unit Commander and staff, the Project Manager, Project Deputy Manager, Division and Office Manager to plan, organnize and schedule resources against requirements and timeline and apply quality controls and process indicators in the execution of work. Executes all work in compliance with applicable regulations, laws standards, codes, directives, and required permits. RM Data for Edit Module

Part I - Manager

Will this action be sent to another office for review of the Resource Management data? Yes

Part II - Resource Management

INSTRUCTIONS: Click on the Position Seleted hyperlink above to view Organizational and Resource Management data available for this position record. Then provide any RM data that you would like us to change below.

Is there any Resource Management data you would like to edit? Yes

Would you like to edit the AMS code? Yes

Edited AMS code is 131079J2S46

Would you like to edit the TDA Paragraph and Line numbers? Yes

Edited Paragraph number is 052C

Edited Line number is 08

Would you like to edit the Standard Work Center code?

Would you like to edit the APC? Yes

Edited APC is DJP9

Would you like to edit the Cost Center?

Is this a Program Budget Decision 712 (PBD 712) military to civilian position?

Army must track all Military to Civilian conversions that are the result of Program Budget Decision (PBD) 712. While there are other Military to Civilian conversions, this question will be answered "yes" ONLY if the recruitment is a result of PBD712 Military to Civilian conversion.

SUPERVISORY CONTROLS

Supervisor provides broad instructions, priorities, policies, and time limits. Work is reviewed to assure an adequate quantity and quality of work as well as efficient accomplishment of work within established priorities and controls.

MAJOR DUTIES

Supervises workers directly in accomplishing the work of an organizational segment or group.

- 1. Planning. Plans use of subordinate workers, equipment, facilities, and materials on a weekly or month-to-month basis. Establishes deadlines, priorities, and work sequences. Plans assignments based on general schedules, methods, and policies set by supervisor. Coordinates work with supporting or related work functions controlled by other supervisors. Determines the number and types of workers needed to accomplish projects. Redirects individual workers and resources to accomplish unanticipated work (e.g., work resulting from "open and inspect" types of work orders). Informs higher level supervisors of the need to revise work schedules and re-estimate labor and other resources. Participates in initial planning of work schedules, budget requests, staffing needs, and other similar estimates. (25%)
- 2. Work Direction. Investigates work related problems such as excessive costs or low productivity; determines causes. Implements corrective actions to resolve work problems. Recommends solutions to staffing problems, engineering requirements, and work operations directed by other supervisors. Assigns work to subordinates and provides any necessary technical guidance. (30%) 25%
- 3. Administration. Supports and explains management programs to subordinates. Recommends disciplinary actions, promotions, reassignments, awards and other personnel actions. Prepares performance standards and formal appraisals for subordinates. Selects or participates in the selection for vacancies. Advises and counsels workers on how to improve their performance and explain new work techniques. Investigates grievances and complaints; resolves them informally; and notifies supervisors of important/serious ones. As required, participates in union negotiations. Assures safety and housekeeping practices are observed. Maintains work reports and records. Approves sick and annual leave and prepares leave schedules. Determines training needs and arranges for accomplishment of such training. (35%)
- 4. Performs the full range of duties in the operation, repair and maintenance of the water treatment plant in staff shortage situations. (10%)

Performs other duties as assigned.

NOTE: Special Requirements. Must possess and be able to maintain a current State of Washington Water Distribution Manager III certification. Must possess or be able to obtain and maintain a current State of Washington Treatment Plant Operator II certification. Must possess or be able to obtain Washington State driver's license. Position requires normal color vision in order to determine color changes when performing chemical tests.

The incumbent of this job is required to file an annual confidential financial disclosure report (SF-450) and attend annual ethics training.

Grand .

AMENDMENT TO JOB# 42049

Employee also serves as an Equal Employment Opportunity (EEO) Counselor. Listens to and answers the questions of employees who may wish to file an EEO complaint. Obtains relevant facts from the employee and determines if the complaint or the problem is an EEO matter. Explains EEO complaint procedures, including grounds for a complaint, the complainant's rights, and alternate avenues for solving the problem (as appropriate). With the consent of the complainant, obtains additional facts from other employees, the complainant's supervisor, managers, CPO staff members, and pertinent documents. Defines the problem, identifies facts, and attempts to resolve the problem within 30 days. If the complainant agrees, an extension to counseling can be granted. When complaints cannot be resolved informally within 30 days, advises the complainant of various courses of action such as classification appeals, grievances, and formal EEO complaints. Maintains and secures records relating to the case. Summarizes facts gathered in the counselor's report. (20%)

Factor 1 - Knowledge Required by the Position:

- Knowledge of Federal EEO regulations and procedures governing the filing, investigation, and resolution of employment discrimination charges in order to recognize, evaluate, and resolve EEO complaints.
- Basic, general knowledge of Federal personnel management principles and practices relating to such matters as position classification, merit promotion, working conditions, etc., in order to recognize the nature of problems and their means of resolution and to so advise complainants.
- Skill in written and oral communication to provide and obtain information to/from employees, supervisors, and managers.
- <u>Factor 2 Supervisory Controls</u>: The EEO Manager outlines general guidelines, priorities, and limitations. The employee independently carries out recurring assignments without specific instructions but refers unusual problems or cases involving circumstances encountered for the first time to the supervisor for assistance or decision on what to do. Completed work is reviewed for timeliness, accuracy of facts, and adequacy of counseling techniques employed. Review of the work is closer on more difficult and first-time assignments.
- <u>Factor 3 Guidelines</u>: Guidelines include oral and written instructions, guides covering agency-wide and local policies, and manuals governing counseling procedures. Guidelines are specific and generally applicable to counseling procedures. The employee uses judgment in selecting the appropriate instruction or guides to fit the facts of a particular complaint, or to decide when to ask the supervisor for guidance.
- <u>Factor 4 Complexity</u>: The work consists of duties that involve related steps, processes, and methods, including interviewing employees who believe they may have reason to file a complaint of employment discrimination, obtaining relevant facts, advising person of their rights and responsibilities, and

Page 2, Amendment to Job#

explaining procedures of the complaint process. The work also involves obtaining information from persons knowledgeable about the complaint, and attempting to resolve the matter informally through discussions with the parties. Decisions regarding what needs to be done involve choices of several clearly applicable courses of action at each step in the informal complaint process based on the specific facts of each case. Actions taken are restricted by informal complaint processing procedures. They generally involve deciding when to end attempts to informally resolve a complaint based on differences between the parties.

<u>Factor 5 - Scope and Effect</u>: The work involves performing technical assignments to resolve a variety of problems. The work affects the accuracy, timeliness, and efficiency of the formal complaint process, and may result in immediate resolution of less complex problems.

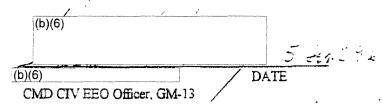

<u>Factor 6 - Personal Contacts</u>: Personal contacts include employees who may have grounds for EEO complaints; their representatives; supervisors; managers; staff officials; employees; and representatives of unions, civil rights or community organizations. Contacts are unstructured and complainants, witnesses, and principal agency witnesses may be unsure about the role and authority of the counselor, uncertain about the ground rules, and emotionally involved in the issue(s). The facts, issues, roles, and authorities of participants may not be clearly understood and must be clarified during the course of interviews and meetings.

Factor 7 - Purpose of Contacts: The purpose of contacts is to obtain factual information concerning the complaint and to explain EEO complaint procedures and requirements. The counselor's goal of clarifying facts and issues most often alleviates the complainants fears and concerns. Some principal agency witnesses may not perceive their goal as being in harmony with those of the counselor, requiring the counselor to exercise tact in obtaining information.

<u>Factor 8 - Physical Demands</u>: Regular work is typically performed in a sedentary position. No special physical demands are required.

<u>Factor 9 - Work Environment</u>: Regular work is performed in a clean, well-lighted office, and typically involves everyday risks and discomforts of an office environment.

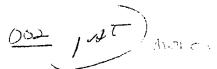

I certify that this is an accurate statement of the major duties and responsibilities of this position and its organizational relationships and that the position is necessary to carry out government functions for which I am responsible. This certification is made with the knowledge that this information is to be used for statutory purposes relating to appointment and payment of public funds and that false or misleading statements may constitute violations of such statutes or their implementing regulations.

ing duties:		· F section and	es amongs (17 Pink)

a. Determines seriousness of problems that occur and takes appropriate action to shut down plant or pools, bypass processes, isolate systems or reservoirs, make repaired or substitute manual processes or operations for automatic ones. Relays instructions to the next shift operator regarding all operations, problems encountered and action

b. Maintains logs of all operating, maintenance and repair data. Operates valvas pumps, sand traps, chlorinators, filters, compressors, f poridators and their controls and equipment to prod potable water in quality and intity needed for domestic use PREVIOUS EDITIONS OF THIS FORM MAY BE USED.

taken.

(25%)

#U.S.GPO:1978-0-765-124/29

DEPARTMENT OF THE ARMY

....OR NUMBER

and fire protection. Collects water samples and analyzes for temperature, hydrogen ion concentration (pH), chlorine residual, fluoride content, turbidity, hardness, alkalinity, and other chemical or physical parameters. Adjusts chlorination, fluoridation and pH adjustment chemical feed rates to control physical, chemical and bacteriological characteristics of potable water within established standards. Observes all safety procedures and regulations. (20%)

- Troubleshoots, disassembles, rebuilds, calibrates, and performs routine and preventive maintenance on a variety of small pumps (piston, vertical shaft turbine, regenerative turbine, centrifugal, diaphragm), filters, reservoirs and tanks, water meters, valves and control systems (either manual or automatic electric, hydraulic or pneumatic), screens, pipe systems, diesel engines (100 HP to 250 HP super- or turbocharged), right angle gear drives, electric motors to 250 HP, batteries, chlorinators, fluoride feeders, hypochlorinators, couplings, and gear drives and transmissions, etc., which comprise the water treatment and storage systems. Performs preliminary diagnosis of problems and notifies supervisor. Uses blueprints, schematics, technical manuals and parts books. Occasionally installs new pumps and piping systems, or modifies existing ones. Test and calibrates equipment using flowmeters, dial indicators, colorimeters, electric meters, etc. Uses drills, propage torches, pipe threaders, grinders, etc. to prepare parts for reassembly or installation. (35%)
- 3. Trains lower graded parsonnel and military reservists in plant procedures, operation and maintenance. (\mathcal{L} %)
 - 4. Operates motor vehicles up to one ton capacity. (/5 %)

Performs other duties as assigned.

SKILLS AND KNIWLEDGES

Must know the treatment processes for potable water and the functions of the various units of equipment. Must have knowledge of a wide variety of pumps, valves, etc., and the purpose of each. Must be skilled in the collection of samples, testing procedures, analyzing results, and adjusting feed rates. Must be able to select and properly use tools such as power drills, grinders and pipe threaders in equipment repair. Must have knowledge of equipment assembly, repair, plumbing systems, and he able to perform a full range of repair on equipment located at the plants and swimming pools. Must be able to read technical manuals and blueprints, and be skilled in using various testing and measuring devices. Required to have knowledge of the use and handling of a variety of water treatment chemicals. Must have normal color vision in order to see color changes when performing chemical tests. Must be able to operate motor vehicles. Must possess or be able to obtain a Government driver's license. Must possess or be able to obtain and maintain a current State of Washington Water Distribution Manager 1 or better certification.

PFSPONSIBILLTY

Works under general supervision of a foreman who assigns work on a shift basis and furnishes instructions and guidance in writing or through the previous shift operator on non-routing procedures and operating or maintenance orchlems. Work is performed independently in accordance with standard plant operating procedures and supervisor instructions. Approximately 20% - 40% of the time, including Saturdays, Sundays, swing and graveyard shifts, incumbent has full charge of the water plant with responsibility for making decisions, etc. Repair work is performed at the direction of the foreman, who plans, lays out and assigns work. May occasionally be called upon to fill in for foreman for brief periods. "he work is reviewed by the supervisor for adequacy and compliance with instructions regulations and requirements.

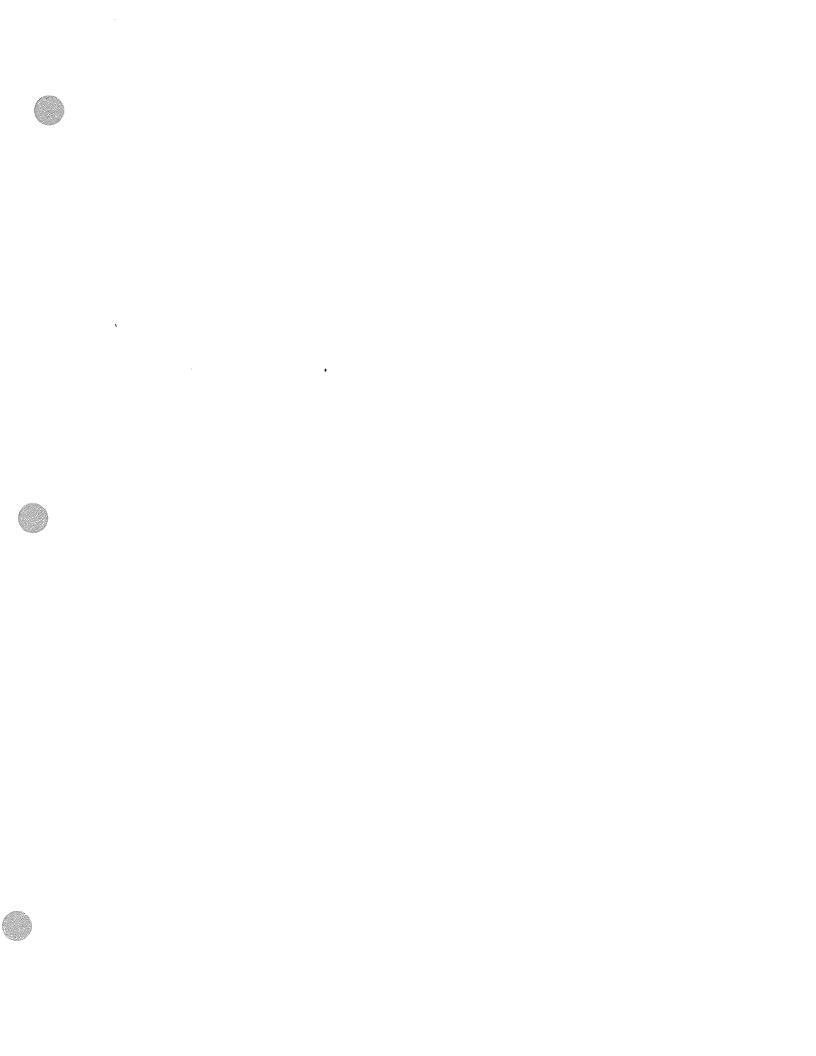

PHYSICAL EFFORT

Duties:

SUPERVISORY CONTROLS

Supervisor provides broad instructions, priorities, policies and time limits. Work is reviewed to assure an adequate quantity and quality of work as well as efficient accomplishment of work within established priorities and controls.

MAJOR DUTIES

Supervises employees directly or through subordinate lead positions in accomplishing the work of an organizational segment or group. The incumbent supervises employees in several stationary locations on the installation and also supervises a mobile team as well. The occupations and nonsupervisory grade levels that best reflect the nature of the overall work operations supervised are WG-4742-09, GS-0404-09, WG-4206-07, and WG-4749-09.

- 1. Planning. Plans use of subordinate workers, equipment, facilities and materials on a weekly or month-to-month basis. Establishes deadlines, priorities and work sequences. Plans assignments based on general schedules, methods and policies set by supervisor. Coordinates work with supporting or related work functions controlled by other supervisors. Determines the number and types of workers needed to accomplish projects. Redirects individual workers and resources to accomplish unanticipated work (e.g., work resulting from 'open and inspect' types of work orders). Informs higher level supervisors of the need to revise work schedules and re-estimate labor and other resources. Participates in initial planning of work schedules, budget requests, staffing needs, and other similar estimates. (35%)
- 2. Work Direction. Investigates work related problems such as excessive costs or low productivity and determines causes. Implements corrective actions to resolve work problems. Recommends solutions to staffing problems, engineering requirements, and work operations directed by other supervisors. Assigns work to subordinates and provides any necessary technical guidance. (20%)
- 3. Administration. Supports and explains management programs to subordinates. Recommends disciplinary actions, promotions, reassignments, awards and other personnel actions. Prepares performance standards and formal appraisals for subordinates. Selects or participates in the selection for vacancies. Advises and counsels workers on how to improve their performance and explains new work techniques. Investigates grievances and complaints, resolves them informally, and notifies supervisors of important/serlous ones. As required, participates in union negotiations. Assures safety and housekeeping practices are observed. Maintains work reports and records. Approves sick and annual leave and prepares leave schedules. Determines training needs and arranges for accomplishment of such training. (20%)
- 4. Quality Control. Works with the Quality Control Manager to establish and implement the shop Quality Control Plan. Performs scheduled and unscheduled inspections of work in progress. Maintains a record of each inspection showing the results, any deficiencies noted and their probable cause (poor workmanship, lack of training, insufficient staff, insufficient skill levels, etc.). Inltiates action to correct deficiencies and to correct their underlying cause (initiates or increases training, increases supervisory control, etc.). Maintains a record of the foregoing actions taken to alleviate quality problems. Develops a training plan for each critical skill level required to generate quality products and services. Performs a trend analysis of shop quality and provides data to supervisor and other engineering and quality control personnel for further analysis and evaluation. Meets with selected customers upon completion of shop work for the purpose of receiving performance feedback. Passes customer comments on to shop employees. (25%)

Performs other duties as assigned.

Must possess a valid Washington State driver's license.

NOTE: The employee must possess and maintain a Group III waste water certification issued by the State of Washington. Special Requirements. Must be able to obtain within 2-years and

Position Description Page 3 of 3

maintain a current State of Washington Water Distribution Manager III certification. Must be able to obtain within 2-years and maintain a current State of Washington Water Treatment Plant Operator II certification.

Evaluation:

- 1. REFERENCES: a. OPM JGS/Supervisors, TS-66, Dec 92
- b. OPM JGS Utility Systems Repairer-Operator, 4742, Jul 93
- c. OPM JGS Plumber, 4206, Mar 69
- 2. DETERMINATION OF TITLE AND CODE: This job involves the supervision of employees engaged in trades and labor work. The occupation that best reflects the overall nature of work operations supervised is Utility Systems Repairer-Operator. Thus, the appropriate title and code is Utility Systems Repairer-Operator Supervisor, WS-4742.
- 3. DETERMINATION OF GRADE:

Factor I, Nature of Supervisory Responsibility. This position carries out supervisory responsibilities that match those described for Situation #2.

Factor II, Level of Work Supervised. WG-09 is selected. Work at this level is performed by Utility Systems Repairer-Operator, WG-4742-09 positions, which carry out the primary mission of the work operations.

Factor III, Scope of Work Operations Supervised. Level C is assigned, as discussed below.

Subfactor A, Scope of Assigned Work Function and Organizational Authority. The position meets the criteria for Level A-2 (45 points).

Subfactor B, Variety of Functions. Level B-4 (60 points) is assigned. The position supervises work in occupations in the WG-4742 and 4749 codes, at grade WG-09. In addition, this position supervises work in occupations in the GS-0404-09 and 1105-05 positions.

Subfactor C, Workforce Dispersion. Level C-2 (15 points) is assigned. The position supervises work at two different plant locations and at various other outlying locations throughout a large military base.

A total of 120 points converts to Level C, for Factor III.

Initial Grade Determination: Situation #2 combined with WG-09 as the Level of Work Supervised and Level C as the Scope of Work Operations Supervised equates to WS-10, according to the Grading Table on page 23 of Reference a.

- 4. FINAL GRADE DETERMINATION: WS-10.
- 5. CLASSIFICATION: Utility Systems Repairer-Operator Supervisor, WS-4742-10.
- 6. FLSA DETERMINATION: Exempt. The position meets all criteria for the Executive category.
