MEMORANDUM FOR KARL GIBSON

SUBJECT: DEFERMENT OF INDOOR AIR QUALITY AND OCCUPATIONAL EXPOSURE TESTING

- 1. This is to inform you that you are to defer further Indoor Air Quality (IAQ) and Occupational Exposure testing until notice to resume is given by the undersigned or LTC C. Preventive Medicine, to resume such testing.
- 2. The results of investigative visits by Scott Bentley, GPRMC Regional Industrial Hygiene Program Manager, on 16-19 July and 20-24 August, 2007, noted that there are fundamental errors in the Munson Army Health Center (MAHC) Industrial Hygiene (IH) program. These errors include, but were not limited to, improper use of sampling techniques, misuse of regulatory standards and IH guidelines, and inappropriate interpretation of sample results.
- 3. In order to compound the impact of the above noted deficiencies within the IH program, you are not to perform routine testing until you have been given the opportunity for refresher training in IH techniques. procedures, and interpretations, and until the CHPPM Assessment and Training visit to MAHC which is scheduled to occur in the middle of September 2007 (dates forthcoming). In the interim, emergency IH testing that is determined necessary by the MAHC Command or your supervisory chain will be considered on a one-forone basis and will be overseen by the first line supervisor or a proxy.
- 4. Your established performance expectations (e.g., the 350 operations expected to be surveyed annually) will be adjusted so that the above discontinuance of IH testing is not counted against your annual performance expectations.
