

## **Notice of Availability**

## **Inner Harbor Navigation Canal Lock Replacement Project**

The U.S. Army Corps of Engineers' final Supplemental Environmental Impact Statement discussing the **Inner Harbor Navigation Canal Lock Replacement Project** in Orleans Parish, LA, will be available for review from Friday, Apr. 3 through Monday, May 4, 2009.

The final SEIS recommends replacement of the existing IHNC Lock with a new deep-draft lock to be constructed north of the Claiborne Avenue Bridge, using the float-in-place construction method. The recommended plan also includes replacement of the St. Claude Avenue Bridge with a new low-level double-bascule bridge, modifications to the Claiborne Avenue Bridge, an off-site construction area for lock module fabrication, improvements to levees and floodwalls, dredging to accommodate project features, and resumption of a community impact mitigation plan. The recommended plan is the same as the plan recommended in the draft Supplemental EIS and includes a detailed human health and risk assessment conducted to address public comments on the draft SEIS concerning the placement of dredged material into an upland confined disposal facility.

The final SEIS and appendices are available at:

## www.nolaenvironmental.gov

Printed copies of the document are available for public review at the following locations:

- St. Bernard Parish Library, 7701 Judge Perez Dr., Arabi, LA
- Orleans Parish Library Main Branch, 219 Loyola Ave. (3rd Floor), New Orleans, LA
