

## Sample Evaluation Plan

### Output Measurements

#### 1. Number of crimes committed against persons with disabilities

Service Provider	2010 (Actual)	2011 (Projected)
SARNCO		
Community partners		

Methods used to capture output data:

- SARNCO will continue collecting data on survivors with disabilities served by our Helpline, Hospital, and LTAS programs.
- SARNCO will continue collecting data monthly from community partners.

#### 2. Number of outreach events

2010 (Actual)	2011 (Projected)

--	--

Methods used to capture output data:

- SARNCO will increase awareness of our program services and survivor-centered events by contributing to newsletters, identified listservs, and mailings; and by distributing linguistically and visually accessible information via fliers, brochures, and so forth.
- SARNCO will reach out to disability service providers to increase our participation in disability-related health fairs, seminars, conferences, and other events through the use of table displays and so forth.

**3. Number of new collaborative partners**

2010 (Actual)	2011 (Projected)

Methods used to capture output data:

- SARNCO will reach out to disability service providers and advocates to increase awareness of our grant project with SafePlace and actively recruit additional partners to enhance our collaboration in improving the coordination of responses to crime victims with disabilities in central Ohio.

- SARNCO will actively participate in disability-related local and statewide advisory councils and task forces by providing information from SafePlace materials and approved resources on improving access to services for crime victims with disabilities.

**4. Number of persons with disabilities educated**

2010 (Actual)	2011 (Projected)

Method used to capture output data:

- SARNCO will use a sign-in sheet at events and evaluations to record the number of persons with disabilities educated.

**5. Numbers of victim services professionals, disability service providers, and law enforcement trained**

	2010 (Actual)	2011 (Projected)
Victim services professionals		
Disability service providers		

Law enforcement		
-----------------	--	--

Method used to capture output data:

- SARNCO will use a registration process and sign-in sheets to record data on the numbers of victim services professionals, disability service providers, and law enforcement trained by SARNCO project coordinators and co-trainers.

## **Outcome Measurements**

### **1. Percentage of persons with disabilities trained on the dynamics of victimization who report an increased understanding of the issue**

Method used to collect outcome data:

- SARNCO will collect, review, and analyze reported data from pre- and post-training surveys completed by individuals with disabilities. The findings will be converted into percentages and summarized in a report for SafePlace.

### **2. Percentage of disability service providers trained on the dynamics of victimization who report an increased understanding of the issue**

Method used to collect outcome data:

- SARNCO will collect, review, and analyze reported data from pre- and post-training surveys completed by disability service providers. The findings will be converted into percentages and summarized in a report for SafePlace.

### **3. Percentage of victim services professionals trained on the dynamics of victimization who report an increased understanding of the issue**

Method used to collect outcome data:

- SARNCO will collect, review, and analyze reported data from pre- and post-training surveys completed by victim services professionals. The findings will be converted into percentages and summarized in a report for SafePlace.

### **4. Percentage of law enforcement trained on the dynamics of victimization who report an increased understanding of the issue**

Method used to collect outcome data:

- SARNCO will collect, review, and analyze reported data from pre- and post-training surveys completed by law enforcement. The findings will be converted into percentages and summarized in a report for SafePlace.

## **Methods of Measurement and Data Collection**

### **1. Pre- and post-class surveys**

### **2. Evaluations**

### **3. Database of community partners (Excel spreadsheet)**

The collection, review, and analysis of data will be managed by Stephanie Smith Bowman and Maytal Russ, with assistance from Heather Herron Murphy and community partners. Data will be reviewed on a monthly basis at community partner meetings.

Changes and improvements to programmatic services and trainings will be based on feedback from Ms. Smith Bowman and Mr. Russ to Ms. Murphy, the SARNCO team, and community partners. Action steps will be led by Ms. Murphy.
