

## AAFES GDS Supplier Data Sheet

AAFES Supplier,

Global Data Synchronization (GDS) is the preferred method of inducting new items into the AAFES merchandise assortment. This process is supported by the Global Data Synchronization Network's® (GDSN®) established data standards for retailers, manufacturers and distributors. It is vitally important that the product data AAFES has is the same as our supplier's data, and GDS will assist with ensuring this goal is achieved.

To begin data syncing with AAFES, please complete the following **AAFES GDS Supplier Data Sheet** and email to [zzHQSDEPrescreen@aafes.com](mailto:zzHQSDEPrescreen@aafes.com). All fields must be completed.

The information provided on the form will be used to set up a profile unique to your company. Once the set up is complete, an AAFES GDS Rollout coordinator will contact your GDS representative to begin testing existing items currently sold to AAFES. All new items must be AAFES Buyer approved.

### **AAFES Global Location Number (GLN)**

GLN: 0614299000018
