

COMPRESSED NATURAL GAS VEHICLES

This section supplies the driving range and fuel economy values for vehicles designed to be operated on compressed natural gas (CNG). For dual-fuel (or bi-fuel) vehicles, the values for both gasoline and CNG are shown. Dual-fuel vehicles are designed to be operated on either of two fuels, in separate tanks, and can switch between the two.

CNG fuel is normally dispensed in “equivalent gallons,” where one equivalent gallon is equal to 121.5 cubic feet of CNG. Therefore, the fuel economy values are shown in miles per gallon-equivalent.

The driving range is shown in miles and represents the distance the vehicle can travel on a full tank (or tanks) of fuel during combined city and highway driving (55% city and 45% highway).

*Driving ranges are shown for both standard and additional fuel tanks.

**Driving range shown for regular cab and super cab models, respectively.

LIQUEFIED PETROLEUM GAS (PROPANE) VEHICLES

This section contains the estimated city and highway fuel economy values and the driving range for passenger cars and light trucks designed to be operated on liquefied petroleum gas (LPG), which is commonly known as propane. For dual-fuel vehicles, both the gasoline and the LPG mpg values and driving ranges are listed, if available. Bi-fuel LPG vehicles have two fuel tanks.

STANDARD PICKUP TRUCKS 2WD

FORD	<u>Trans</u>	<u>Eng/Cyl</u>	<u>Cty</u>	<u>Hwy</u>	<u>Fuel</u>	<u>Range</u>
F150 Pickup 2WD bi-fuel	A-4 ..	5.4/8 ..	12 ..	13	LPG ..	250/220/320*
.....			12 ..	16	Gas ..	390/320**

*Driving ranges are shown for regular cab models, super cab models, and an optional fuel tank available for both models, respectively.

**Driving range shown for regular cab and super cab models, respectively.

DIESEL VEHICLES

This section contains fuel economy values for diesel-fueled vehicles. Diesel fuel contains approximately 10% more energy per gallon than gasoline. In addition, diesel engines have higher compression ratios, run “lean,” and are unthrottled, giving them a substantial fuel economy advantage over gasoline engines.

ELECTRIC VEHICLES

This section contains the driving range and fuel economy values for fully electric-powered passenger vehicles. The fuel economy values for electric vehicles are shown in kilowatt-hours per 100 miles, instead of miles per gallon. **A lower number of kilowatt-hours means a more efficient vehicle.**

The driving range is shown in miles and represents the maximum distance the vehicle can travel under optimum conditions before the battery needs recharging. The actual energy consumption and range of the vehicle will vary depending on driving conditions, battery condition, and accessory usage, and is strongly affected by outside temperature and the use of heating and air conditioning. Fuel costs will vary considerably because of the differences in electricity costs across the United States.

You can calculate the fuel cost (in dollars) of driving your electric vehicle for a year by multiplying the energy consumption for the vehicle as listed below (in kilowatt-hours/100 miles) by your local electricity rate (in dollars per kilowatt-hour), multiplying that by the annual miles the vehicle will be driven, and dividing by 100.

Check with your dealer for availability, as some electric vehicles may be offered for sale or lease only in certain parts of the country.

Electric Vehicle Availability:

Think City electric vehicles are initially available for lease to one major car rental agency, for use in the New York City and San Francisco, California areas. Ranger Electric vehicles are available nationwide. Explorer USPS Electric vehicles are initially available to the U.S. Postal Service, only. RAV4 electric vehicles are available nationwide, initially to fleet buyers, only.

ETHANOL FLEXIBLE-FUEL VEHICLES

This section contains the driving range and fuel economy values for ethanol flexible-fuel passenger cars and light trucks. Ethanol flexible-fuel vehicles (typically have only one fuel tank) are designed to operate on gasoline, E85 (a mixture of 85% ethanol and 15% gasoline), or any mixture of the two fuels.

The driving range and fuel economy values are shown for both gasoline and E85. When operating your FFV on mixtures of gasoline and E85, such as when alternating between using these fuels, your driving range and fuel economy values will be somewhere between those listed for the two fuels, depending on the actual percentage of gasoline and E85 ethanol in the tank.

SAMPLE FUEL ECONOMY LABEL

(Attached to New Vehicle Window)

Use these two estimates to compare to other models.

Compare this vehicle to others by using the **FREE FUEL ECONOMY GUIDE** available in the dealer showroom.

This is the average estimate for city driving.

This is the average estimate for highway driving.

These numbers represent a range of fuel economy that most drivers achieve with this particular model.

These numbers represent the range of fuel economy for other models of this size class.

This fuel cost is based on 15,000 mi/yr at \$1.35 per gallon.

CITY MPG
61

HIGHWAY MPG
68

Fuel Economy Information

2002 GREEN CAR 2WD, 3 CYL, 1.0 LITER, MULTIPOINT FUEL INJECTION, 5-SPEED MANUAL TRANS, CATALYST.

Actual Mileage will vary with options, driving conditions, driving habits and vehicle's condition. Results reported to EPA indicate that the majority of vehicles with these estimates will achieve between
51 and 71 mpg in the city
and between
57 and 79 mpg on the highway.

For Comparison Shopping
All vehicles classified as **TWO SEATERS** have been issued mileage ratings ranging from
8 to 61 mpg city
and
13 to 68 mpg highway.

Estimated Annual Fuel Cost:
\$316

See www.fueleconomy.gov

Check the fuel economy label on the vehicle at the dealer showroom for its specific fuel economy (mpg) ratings. The ratings may vary slightly from the values in this Guide because of engine and fuel system differences not listed here.
