

UNITED STATES OF AMERICA
FEDERAL ENERGY REGULATORY COMMISSION

STAFF NOTICE OF ALLEGED VIOLATIONS

(January 25, 2011)

Take notice¹ that in a nonpublic preliminary investigation pursuant to 18 CFR Part 1b, the staff of the Office of Enforcement of the Federal Energy Regulatory Commission (Commission) has preliminarily determined that Competitive Energy Services, LLC (CES) violated the Commission's Prohibition of Electric Energy Market Manipulation, 18 CFR § 1c.2 (2010).

CES is an energy services firm based in Portland, Maine that provides strategic energy management, energy procurement, renewable energy and consulting services. Staff alleges that CES violated 18 CFR § 1c.2 (2010) by advising an industrial load response participant in Rumford, Maine to engage in a fraudulent practice to collect payments in the Day-Ahead Load Response Program (DALRP) operated by ISO New England, Inc. (ISO-NE). Specifically, staff alleges that CES advised the participant to curtail on-site generation during DALRP program hours when it enrolled in the DALRP. Staff believes that this practice artificially inflated the participant's baseline load and misrepresented the participant's load profile to ISO-NE. Staff also alleges that CES advised and assisted the participant to ensure that its baseline did not appreciably change. The participant was paid for the difference between its inflated baseline load and its normal operational load as a "load reduction" even though no load reduction actually occurred. Staff alleges that CES's violation of section 1c.2 of the Commission's regulations occurred from approximately July 2007 through February 2008.

This Notice does not confer a right on third parties to intervene in the investigation or any other right with respect to the investigation.

Kimberly D. Bose,
Secretary.
