Step-by-Step Guide to Medicare Medical Nutrition Therapy (MNT) Reimbursement

Addendum, March 2012

While using the Step-by-Step Guide to MNT Reimbursement, please reference this addendum for all information in Appendices A, B, C, and F. This addendum was updated in March 2012.

Appendix A – Indian Health MNT and DSMT Coverage and Billing Requirements

Appendix B – Sample Forms

Appendix C – Case study and Electronic Health Record Documentation

Appendix F – Updating references

Appendix A: Summary Chart on IHS Medicare Part A and B Coverage and Billing Requirements for MNT and DSMT

Medicare Benefits and CMS Coverage Guidelines	MNT Medical Nutrition Therapy	DSMT Diabetes Self Management Training
Statute	<p>Section 105 of the Benefits Improvement and Protection (BIPA) Act of 2000 permits Medicare coverage of MNT services when furnished by a registered dietitian or nutrition professional meeting certain requirements, effective January 1, 2002.</p> <p>Effective January 1, 2006, CR4204 expands to include Registered Dietitians and nutrition professionals as practitioners eligible to furnish and receive payment for telehealth. CMS expanded the list of Medicare telehealth services to include individual MNT as described by HCPCS codes G0270, 97802, 97803. CMS -1502-FC.</p>	<p>Section 4105 of the Balanced Budget Act (BBA) of 1997 permits Medicare coverage of outpatient diabetes self-management training (DSMT) services when these services are furnished by a certified provider who meets certain quality standards, effective July 1, 1998.</p> <p>Effective January 3, 2011, CR7049 expands Medicare telehealth services to include individual and group DSMT, as prescribed by HdCPCS codes G0108 (individual per 30 minutes) and G0109 (group per 30 minutes).</p>

Medicare Benefits and CMS Coverage Guidelines	MNT Medical Nutrition Therapy	DSMT Diabetes Self Management Training
<p>Provider Qualifications and Requirements</p>	<ul style="list-style-type: none"> ▪ Registered dietitian (RD) or nutrition professional (NP) who meet the following criteria: ▪ Minimum of BS degree in nutrition or dietetics. ▪ Completion of 900 hours of dietetics practice under supervision of RD or NP. ▪ Licensed or certified as an RD or NP by state in which services are performed (federal employees can be licensed or certified in any state). ▪ RD credential with the Commission on Dietetic Registration (CDR) is proof that education and experience requirements are met. ▪ Grandfathered dietitian, nutrition professionals licensed or certified as of 12/21/00. 	<p>Program must be accredited as meeting approved quality standards- i.e., National Standards for Diabetes Self-Management Education Programs. CMS-approved national accreditation organizations include American Association of Diabetes Educators and the American Diabetes Association.</p> <p>NOTE: A diabetes education program cannot seek reimbursement from Medicare until the program has been accredited.</p>

Medicare Benefits and CMS Coverage Guidelines	MNT Medical Nutrition Therapy	DSMT Diabetes Self Management Training
<p>Qualifying Diagnoses</p>	<p>Diabetes**</p> <ul style="list-style-type: none"> ▪ Type 1 ▪ Type 2 <p>Kidney Disease:</p> <ul style="list-style-type: none"> ▪ Non-Dialysis Kidney Disease ▪ Post-Kidney Transplants within the last 36 months <p>**“Diabetes” is diabetes mellitus, a condition of abnormal glucose metabolism diagnosed using the following criteria:</p> <ul style="list-style-type: none"> ▪ FBS \geq 126 mg/dl on two different occasions or ▪ 2-HR post glucose challenge \geq 200 mg/dl on 2 different occasions or ▪ Or, a random glucose test over 200 mg/dl for a person with symptoms of uncontrolled diabetes. <p>Note: At this printing, Medicare does not cover MNT for people with pre-diabetes.</p> <p>Note: At this printing, Medicare does not accept diagnosis of diabetes using A1C.</p>	<p>“Diabetes” is diabetes mellitus, a condition of abnormal glucose metabolism diagnosed using the following criteria:</p> <ul style="list-style-type: none"> ▪ FBS \geq 126 mg/dl on two different occasions or ▪ 2-HR post glucose challenge \geq 200 mg/dl on 2 different occasions or ▪ Or, a random glucose test over 200 mg/dl for a person with symptoms of uncontrolled diabetes. <p>Kidney Disease:</p> <ul style="list-style-type: none"> ▪ Non-Dialysis Kidney Disease ▪ Post-Kidney Transplant <p>Note: At this printing, Medicare does not cover DSMT for people with pre-diabetes.</p> <p>Note: At this printing, Medicare does not accept diagnosis of diabetes using A1C.</p>
<p>Limitations of Coverage</p>	<ul style="list-style-type: none"> ▪ No coverage for maintenance dialysis. ▪ If beneficiary has diabetes and kidney disease, the number of hours allowed is for diabetes or kidney disease. ▪ Only face-to-face time with patient. ▪ Both DSMT and MNT services cannot be billed even though both services were provided on the same date. ▪ For Telehealth, the originating site must be located in either a non-MSA county or rural health professional shortage area. 	<ul style="list-style-type: none"> ▪ No payment will be made for group sessions not attended (class attendance sheet). ▪ Only face-to-face time with patient. ▪ Both DSMT and MNT services cannot be billed even though both services were provided on the same date. ▪ For Telehealth, the originating site must be located in either a non-MSA county or rural health professional shortage area.

Medicare Benefits and CMS Coverage Guidelines	MNT Medical Nutrition Therapy	DSMT Diabetes Self Management Training
Other Conditions of Coverage	<ul style="list-style-type: none"> ▪ Services can be provided on an individual or group basis. ▪ The number of hours covered in a 12-month period (episode of care) cannot be exceeded. ▪ An exception to the maximum number of hours may be made if the treating physician determines that there is a change of diagnosis, medical condition, or treatment regimen related to diabetes or renal disease. 	<p>The training must meet the following conditions:</p> <ul style="list-style-type: none"> ▪ Following an evaluation of the beneficiary’s need for training, the treating provider must order DSMT. ▪ DSMT is included in a comprehensive plan of care (POC). ▪ It is reasonable and necessary for treating or monitoring the beneficiary’s condition (signed statement of need). ▪ When training under a POC is changed, the provider must sign it. ▪ In the initial DSMT benefit, 9 of the 10 hours must be provided in a group setting (2-20 individuals) unless special conditions exist: ▪ No group class is available within 2 months of the date the training is ordered. ▪ The beneficiary has special needs such as problems with hearing, vision, or language limitations as ordered by physician or non-physician provider. ▪ The beneficiary can be eligible for 2 more hours of follow-up with a written order. The 2 hours of follow-up can be group or one-on-one.

Medicare Benefits and CMS Coverage Guidelines	MNT Medical Nutrition Therapy	DSMT Diabetes Self Management Training
Practice Settings	<p>Included: Hospital outpatient department, free-standing clinics, and Home Health.</p> <p>Excluded: Inpatient stay in hospital or skilled nursing facility.</p> <p>FOHC/RHC: Covered, but included in encounter rate; not separately billable.</p>	<p>Included: Hospital outpatient department and free-standing clinic.</p> <p>Excluded: Inpatient hospital, skilled nursing facility, nursing home, or hospice.</p> <p>FOHC/RHC: Covered, but included in encounter rate; not separately billable.</p> <p>While separate payment is not made for DSMT services to Rural Health Clinics, the service is covered but is considered included in the all-inclusive encounter rate. Effective January 1, 2006, payment for DSMT provided in a Federally Qualified Health Clinic that meets all of the requirements identified in Pub. 100-104, chapter 18, section 120 may be made in addition to one other visit the beneficiary had during the same day.</p>
Basic Coverage	<p>Initial MNT: 3 hours per calendar year in the first year.</p> <p>(MNT services covered by Medicare include: an initial nutrition and lifestyle assessment, nutrition counseling, diet management, follow-up sessions to monitor progress)</p> <p>Follow-up MNT: 2 hours per calendar year in subsequent years.</p> <p>Hours can be spread over any number of visits during the year (1 visit = 15 min.)</p>	<p>Initial DSMT: 10 hours per year in the first year (1 hour individual assessment or specialized training plus 9 hours group classes). Continuous 12-month period need not be on calendar-year basis.</p> <p>Follow-up DSMT: 2 hours per calendar year in subsequent years (individual or group training).</p> <p>Hours can be spread over any number of visits during the year (1 visit = 30 min.).</p>

Medicare Benefits and CMS Coverage Guidelines	MNT Medical Nutrition Therapy	DSMT Diabetes Self Management Training
Second Physician Referral	The number of hours can be increased if the treating physician determines there is a change in medical condition, diagnosis, and/or treatment plan and orders additional hours during that episode of care. If an RD determines that a Medicare consumer needs more time to understand and make behavior changes to meet the MNT goals, then the RD obtains a new referral from the treating physician for additional hours of MNT.	
DSMT and MNT Benefits	The CMS considers DSMT and MNT complementary services. This means Medicare will cover both DSMT and MNT without decreasing either benefit as long as the referring physician determines that both are medically necessary.	Same as MNT
Referring (Licensed) Providers	Treating physician	Treating physician or qualified non-physician practitioner (QNPP): nurse practitioner, clinical nurse specialist, and physician assistant, who is managing the beneficiary's diabetes condition.
Provider Referral	Physician written referral containing qualifying diagnosis and signature for each episode of care.	Provider written and signed referral for training containing diagnosis and a written comprehensive plan of care (POC). The POC must describe the content, number of sessions, frequency, and duration of the training as written by the provider treating the beneficiary's diabetes condition.

Medicare Benefits and CMS Coverage Guidelines	MNT Medical Nutrition Therapy	DSMT Diabetes Self Management Training
Protocols or Standards	RDs and NPs should use nationally recognized protocols such as the American Dietetic Association’s MNT Evidenced-Based Guides for Practice.	American Diabetes Association Recognition Program based on the National Standards for Diabetes Self-Management Education “or” American Association of Diabetes Educators (AADE) Diabetes Education Accreditation Program (DEAP) based on National Standards for Diabetes Self-Management Education
Billable to Fiscal Intermediary: Medicare Part A	Hospital outpatient clinic department and grandfathered clinics MUST bill to the fiscal intermediary on a CMS 1450 (UB-04). Payment is included in the all-inclusive rate; not separately billable. Telehealth: The originating site bills the all-inclusive rate FQHC: Yes, but costs are bundled into the encounter rate.	Hospital outpatient clinic department and grandfathered clinics MUST bill to the fiscal intermediary on CMS 1450 (UB-04). Payment is included in the all-inclusive rate; not separately billable. FQHC: Yes, but costs are bundled into the encounter rate.
Billable to Medicare Carrier: Medicare Part B	Freestanding clinics bill Carrier on CMS 1500. Telehealth: The distant site bills for the professional services using the appropriate CPT code along with the appropriate telehealth modifier.	Freestanding Clinics bill Carrier on CMS 1500. Telehealth: The distant site bills for the professional services using the appropriate CPT code along with the appropriate telehealth modifier.
Enrolling as Medicare Provider	To enroll as a provider in Medicare Part B, complete CMS Form 10114, “National Provider Identifier (NPI) Application/Update Form.”	Referring provider must be enrolled as a Medicare Part B Provider. Once diabetes education program recognition is received, a copy of the ADA or AADE certificate must be submitted to Medicare.
National Provider Identifier (NPI)	RD or NP must enroll in the Medicare program to become a recognized Medicare provider. Upon enrollment, the RD or NP will receive a Medicare NPI, which is used on MNT claims.	N/A

Medicare coverage: 3 hrs initial MNT in the first calendar year, plus 2 hrs follow-up MNT annually. Additional MNT hours available for change in medical condition, treatment and/or diagnosis.

Definition of Diabetes (Medicare)

Medicare coverage of DSMT and MNT requires the physician to provide documentation of a diagnosis of diabetes based on one of the following:

- a fasting blood sugar greater than or equal to 126 mg/dl on two different occasions;
- a 2 hour post-glucose challenge greater than or equal to 200 mg/dl on 2 different occasions; or
- a random glucose test over 200 mg/dl for a person with symptoms of uncontrolled diabetes.

Source: Volume 68, #216, November 7, 2003, page 63261/Federal Register.

Other payors may have other coverage requirements.

Appendix C: Indian Health Case Study Using Electronic Health Record (EHR) and Nutrition Practice Guidelines via Nutrition Care Process

Case Presentation

Mrs. Demo Patient was referred by Dr. Browning on November 1st for uncontrolled Type 2 Diabetes and weight loss.

Mrs. Demo Patient is 66 years old female with Type 2 Diabetes. She was diagnosed with Type 2 diabetes about 10 years ago, but Mrs. Demo Patient states that was unaware she had diabetes.

She remembers being told her sugar was high a few times over the years. She stated she is usually really thirsty and often gets up numerous times during the night to use the bathroom.

Mrs. Demo Patient was brought into the clinic after slipping and falling on the ice injuring her knee. At this time she was told had diabetes.

Lab Reports from 10-18-09

A1c: 11.3

Direct Measure LDL: 130

HDL: 25

Triglycerides: 620

Height: 62"

Weight: 235#

BP: 160/95

Medications: none

Mrs. Demo Patient takes care of her four grandchildren, ages 3, 5, 7, and 10. Her daughter and her four grandchildren live with her. She states she has no alone time, always taking care of everyone else. She has been having financial problems ever since her son was put in jail. She enjoys sewing but her arthritis in her wrist is so painful that she can no longer sew.

Usual Diet History:

Breakfast: Busy with the kids, usually 2 cups of coffee with sugar and cream, large glass of orange drink, sometimes leftover supper

Lunch: Mac-n-Cheese, or hot dogs, or ramen noodles, coke

Supper: Pork Chops, Fried potatoes (fried in lard), 2 slices white bread, sweet tea

Snacks: can't skip dessert every night before bed, usually fruit cocktail. Fruit, candy bars, pastries, sweet tea.

SMBG: none, doesn't have meter

Exercise: housework and running after the kids

Etoh/Tobacco: neither

I. Initial Visit

Appendix C – Initial Visit

MEDICAL NUTRITION THERAPY ASSESSMENT

DEMO PATIENT, 44 year old FEMALE
Referred on 01-Nov-2009 by Dr. Browning.

Purpose of today's visit: nutrition management of
1) Newly DX Diabetes

Chief Complaint: Newly DX DM Here to see the dietitian.

ASSESSMENT

FOOD AND NUTRITION INTAKE

Total energy intake approximately 2500 Kcal/day.
Meal/Snack Pattern: Irregular meals and snacks.

USUAL MEALS

Breakfast: Busy with the kids, usually 2 cups of coffee with sugar and cream, large glass of Orange drink, sometimes leftover supper

Lunch: Mac-n-Cheese, or hot dogs, or ramen noodles, coke

Supper: Pork Chops, Fried potatoes (fried in lard), 2 slices white bread, sweet tea

Snacks: can't skip dessert every night before bed, usually fruit cocktail. Fruit, candy bars, pastries, sweet tea.

KNOWLEDGE/BELIEFS/ATTITUDES

Area(s) and level of knowledge: No DM Knowledge

PHYSICAL ACTIVITY AND FUNCTION

Physical Activity: Sedentary

Physical activity history: limited physical activity

BODY COMPOSITION/GROWTH/WEIGHT HISTORY

Height: 62.00 in [167.64 cm] (NOV 10, 2009@10:01)

Weight: 235.00 lb [83.99 kg] (NOV 10, 2009@10:02)

Blood Pressure 160/95

BMI: 42.98

HgbA1c 11.3 %

HDL - 25 mg/dl

LDL - 130 mg/dl

Triglycerides - 620 mg/dl

CLIENT HISTORY

Social history: four grandchildren live with her. She states she has no alone time, always taking care of everyone else. She has been having financial problems ever since her son was put in jail. She enjoys sewing but her arthritis in her wrist is so painful that she can no longer sew.

COMPARATIVE STANDARDS

Estimated Energy Needs

WT maintenance 2000 Kcal/day

WT loss; 1500 Kcal/day (method Mifflin-St. Jeor (actual weight))

 NUTRITION DIAGNOSIS

NUTRITION DIAGNOSIS: Excess Carbohydrate intake related to regular intake of sugar sweetened beverages as evidence of diet record and A1C.

NUTRITION DIAGNOSIS: Food and Nutrition related to knowledge deficit related to a balanced diabetic diet as evidenced by self reporting knowledge.

 NUTRITION INTERVENTION

Nutrition Prescription: High fiber, low fat, carbohydrate controlled diet
 Carbohydrate Budget: 30-45 g/meals and 15-30g/snacks.

NUTRITION EDUCATION CONTENT

Purpose Of Education: Importance of blood sugar control, carbohydrate control diet and use of home blood glucose monitor.

Recommended Modifications: Modify distribution, type
 Carbohydrate Budget: 30-45 g/meals and 15-30g/snacks.
 Modify and distribute carbohydrate and balance intake.

 Patient Goals:

1. Switch to diet pop
2. Eat regular meals, not skip meals
3. Watch carbohydrate intake, limit to 2-3 servings/meals
4. Check blood sugar 2-3 times/daily.

NUTRITIONAL COUNSELING

STRATEGIES: Motivational Interviewing and Goal Setting

PTED - EDUCATION ASSESSMENT

Signed: 11/10/2009 16:58

3. Follow-Up Visit

MEDICAL NUTRITION THERAPY FOLLOW UP VISIT

Referred on 11/01/09 by Dr. Browning. Initial visit 11/10/2009.

Current Weight: 227 lbs. Current BMI: 41.5
Weight down 5 pounds since last visit on 11/10/09.

MONITORING & EVALUATION

FOOD/NUTRITION-RELATED HISTORY

FOOD AND NUTRITION INTAKE - Energy Intake

Type of Food, meals pattern: 3 regular meals per day and afternoon and evening snack.

CARBOHYDRATE INTAKE - total carbohydrate Intake

Total carbohydrate source of CHO; working to limit to 2-3 servings/meal 30-45 grams, currently 3-5 servings/meal 45-75 grams/meal: including whole grains.

PHYSICAL ACTIVITY - Physical Activity History

Regular exercise, going to wellness center 3-5 times per week with DM Program to increase intensity and duration of cardio and weights.

BEHAVIOR

ADHERENCE - self-management as agreed upon

Self monitoring blood glucose at agreed upon rate: AM fasting and post prandial (after lunch & dinner)

AM; 280, 200, 178, 212, 185

Postprandial; 200, 225, 250, 195, 170.

Plan

Continue to work on nutrition DX. Increase fiber, lower fat, CHO controlled diet.

Nutrition education: More in-depth skills and knowledge of plan (30-45 gram/meal and 15-30 gram/snack). Patient states better understanding and is able to return demonstrate CHO counting principles and how to read the food label to interpret CHO content and servings. Continue to work in reduction in CHO intake and increase diabetes self Care skills and knowledge.

Patient Goals from November 2009:

-
1. Switch to diet pop - Working on goal
 2. Eat regular meals, not skip meals - Goal met (continue to encourage).
 3. Watch carbohydrate intake, limit to 2-3 servings/meals - working on goal.
 4. Check blood sugar 2-3 times/daily - Goal met (continue to encourage).

NEW -Patient Goals from DECEMBER 2009:

-
1. Continue exercising - increase to 5 days per week.
 2. Begin counting carbohydrates and record intake in log book.
