

# **Immunization Test Case IZ\_1\_1.1**

**Admin for Child**

# Test Story

## Description

For purposes of reporting immunizations this clinic has been assigned an id of X68 by the Immunization Information System (IIS). A toddler, Madelynn Ainsley Snow, is brought to the clinic on July 4, 2012 by her mother, Morgan Lam, for a well child visit. A clinician staff collects basic identifying information, including name, birth date, sex, address, phone, SSN, race, and ethnicity. A clinician staff review the patient's vaccination history and determines that the patient needs an Influenza (Fluvin)vaccination. A clinician interviews the mother and determines that the patient qualifies for a Vaccines For Children (VFC) supplied vaccine under the status of VFC eligible - Federally Qualified Health Center Patient (under-insured). The clinic staff gives the mother a Vaccine Information Statement for Inactivated Flu published by the CDC on Jul 2, 2012 to review. After reading the VIS the mother agrees that the child should receive the vaccination. The clinic staff explains that information about this vaccination will be sent to the IIS and ask if the IIS can send a reminder about when the next vaccination is due. The mother indicates that contact should be made by the IIS. The clinic staff then prepares an Influenza vaccination dose, CSL Behring Lot #Z0860BB, from the VFC publicly supplied vaccine stock and administers it to the patient in the left arm. The clinic staff enters the patient demographic information, VFC status, VIS information, contact status, and vaccination administration information into the EHR and transmits it to the IIS, indicating to the IIS that an active patient of the clinic was administered a vaccination.

## Pre Condition

NO PreCondition.

## Post Condition

NO PostCondition.

## Test Objectives

This test case examines the ability of an EHR to create a VXU message for well child visit single vaccination. A maximally populated message is tested for relevant required, required or empty and conditional elements. The message must provide; - Patient demographic information in the PID segment - Responsible party information in the NK1 segment. - VFC status and VIS information in the OBX segments - Contact or publicity status in the PD1 segment - Vaccination administration RXA and RXR segments. The test case provides an example of all the relevant elements.

## Notes to Testers

NO Note.

# Test Data Specification

## Patient Information

Element Name	Data
Patient Name	Snow Madelynn Ainsley
Mother's Maiden Name	Lam Morgan
Date/Time of Birth	07/06/2010
Administrative Sex	Female
Patient Address	32 Prescott Street Ave Warwick MA 02452 USA
Local Number	(657) 555-8563
Race	Native Hawaiian or Other Pacific Islander
Ethnic Group	non Hispanic or Latino
Birth Order	

## Immunization Registry Information

Element Name	Data
Immunization Registry Status	Active
Publicity Code (Text)	Reminder/Recall - any method
Protection Indicator Effective Date	
Publicity Code Effective Date	
Immunization Registry Status Effective Date	

## Guardian or Responsible Party

Element Name	Data
Name	Choy Debby
Relationship	Mother
Address	32 Prescott Street Ave Warwick MA 02452
Address (Country)	USA
Phone Number or E-mail address	657 5558563

## Vaccine Administration Information

Element Name	Data
Administered Code - Text	Influenza, seasonal, injectable, preservative free
Date/Time Start of Administration	07/04/2012
Administered Amount	0.25
Administered Units	milliliters
Administration Notes (Text)	New immunization record
Substance Lot Number	Z0860BB
Substance Expiration Date	11/04/2012
Substance Manufacturer Name	CSL Behring
Substance/Treatment Refusal Reason	
Route	Intramuscular
Administration Site	Left Arm

New immunization record	
Vaccine funding program eligibility category	VFC eligible - Federally Qualified Health Center Patient (under-insured)
vaccine type	Inactivated Flu
Date vaccine information statement published	07/02/2012
Date vaccine information statement presented	08/14/2012
