July/August 2000 Vol. XXV No. 4

working alone can ensure the survival of the wildlife resources we all share. The cooperation of private land owners and a wide variety of other interests is essential if we are to conserve our nation's animal and plant species for the future. Yet when people examine the effects of their activities on the environment, they sometimes face what they see as a choice between conservation and the legitimate use of their land. Congress addressed that issue in 1982 when it amended the Endangered Species Act to authorize Habitat Conservation Plans. When carefully implemented, these plans allow resource managers and property owners to carry out their lawful activities while becoming partners in maintaining wildlife habitat.

The Endangered Species Bulletin welcomes manuscripts on a wide range of topics related to endangered species. We are particularly interested in news about recovery, babitat conservation plans, and cooperative ventures. Please contact the Editor before preparing a manuscript. We cannot guarantee publication.

The Fish and Wildlife Service distributes the Bulletin primarily to Federal and State agencies, and official contacts of the Endangered Species Program. It also is reprinted by the University of Michigan as part of its own publication, the Endangered Species UPDATE. To subscribe, write the Endangered Species UPDATE, School of Natural Resources, University of Michigan, Ann Arbor, MI 48109-1115; or call (734) 763-3243.

Printed with vegetable-based ink on recycled and recyclable paper. If you do not keep back issues, please recycle the paper, pass them along to an interested person, or donate them to a local school or library.
