PS USFWS has asked Danny for copies of some of the surevey/reports that PREPA has been working on. I told Danny I didn't see a problem with sharing a preliminary copy of any report, especially since we are working hard to meet USFWS requests for many of these actions. The final report will be submitted to the Corps along with the appended BA and will be the official information provided for the administrative record. Our goal is to try to finish the appended BA and submit it, and the final reports, to the Corps by the end of March so the Corps can use that information to make an affects determination.

If you have any Qs, please do not hesitate to contact us.
