

06.3 HHS PIA Summary for Posting (Form) / HRSA BHPPr Children's Graduate Medical Education Payment Program [System]

PIA SUMMARY AND APPROVAL COMBINED

PIA Summary

Is this a new PIA 2011? No

If this is an existing PIA, please provide a reason for revision: PIA Validation

1. Date of this Submission: 9/2/2011

2. OPDIV Name: HRSA

3. Unique Project Identifier (UPI) Number: 009-15-01-06-02-1320-00

4. Privacy Act System of Records (SOR) Number (If response to Q.21 is Yes, a SORN number is required for Q.4): N/A

5. OMB Information Collection Approval Number: 0915-0247

6. Other Identifying Number(s): N/A

7. System Name (Align with system Item name): Children's Graduate Medical Education Payment Program (CHGME PP) Database System (GME DS) and Web Application System

9. System Point of Contact (POC). The System POC is the person to whom questions about the system and the responses to this PIA may be addressed: Malena Crawford

10. Provide an overview of the system: The GME DS is a system that: 1) receives initial applications from hospitals that indicate the expected volume and complexity of services provided, 2) determines the initial allocation of available funds to hospitals, 3) forwards initial payment data compiled from the system that has been downloaded onto an Excel spreadsheet to the Division of Grants Management Operations (DGMO) for the issuance of a Notice of Grant Award (NGA). 4) receives mid year reconciliation applications from the hospitals that finalize the volume and complexity of services, 5) recalculates the allocation of funds to hospitals, 6) forwards downloaded reconciliation payment data to DGMO for issuance of NGA, 7) generates reports for the various parties involved, and 8) maintains records of these activities. In the past these activities were conducted manually. The hospitals sent their applications via the mail on a disc which uploaded their applications to the system. The new modifications allow the hospitals to apply for funds via the web based application. The web system has been implemented and went live in April of 2008. The new system has decreased the application process time in half. Auditors can also access the Web system to conduct their annual audit of hospital applications.

13. Indicate if the system is new or an existing one being modified: Existing

17. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system? (Note: This question seeks to identify any, and all, personal information associated with the system. This includes any PII, whether or not it is subject to the Privacy Act, whether the individuals are employees, the public, research subjects, or business partners, and whether provided voluntarily or collected by mandate. Later questions will try to understand the character of the data and its applicability to the requirements under the Privacy Act or

other legislation. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system?):
No

21. Is the system subject to the Privacy Act? (If response to Q.19 is Yes, response to Q.21 must be Yes and a SORN number is required for Q.4): No

23. If the system shares or discloses IIF please specify with whom and for what purpose(s):
N/A

30. Please describe in detail: (1) the information the agency will collect, maintain, or disseminate; (2) why and for what purpose the agency will use the information; (3) in this description, explicitly indicate whether the information contains PII; and (4) whether submission of personal information is voluntary or mandatory: The GME DS and web application are systems that: 1) receives initial applications from hospitals that indicate the expected volume and complexity of services provided, 2) collects information on the amount of FTE's that were trained in each hospital 3) auditors review applications and back up provided by hospital and reconcile the applications, 4) receive mid year reconciliation applications from the hospitals that finalize the volume and complexity of services, 5) recalculate the allocation of funds to hospitals and supply that information to each hospital, 6) generate reports for the various parties involved, and 9) maintain records of these activities.

The information collected is not personal information, the hospitals name, address and the amount of FTE's are included in the application only. There is no financial information included in the application. The financial information and calculations are done on the GME DS that is housed on the server in HRSA and resides only on the H drive within BHPR. There is no personal information on the FTE's being claimed.

31. Please describe in detail any processes in place to: (1) notify and obtain consent from the individuals whose PII is in the system when major changes occur to the system (e.g., disclosure and/or data uses have changed since the notice at the time of the original collection); (2) notify and obtain consent from individuals regarding what PII is being collected from them; and (3) how the information will be used or shared.

(Note: Please describe in what format individuals will be given notice of consent [e.g., written notice, electronic notice, etc.]) N/A

32. Does the system host a website? (Note: If the system hosts a website, the Website Hosting Practices section is required to be completed regardless of the presence of PII):
Yes

37. Does the website have any information or pages directed at children under the age of thirteen?: No

50. Are there policies or guidelines in place with regard to the retention and destruction of PII? (Refer to the C&A package and/or the Records Retention and Destruction section in SORN): No

54. Briefly describe in detail how the IIF will be secured on the system using administrative, technical, and physical controls.: No PII on this system

06.3 HHS PIA Summary for Posting (Form) / HRSA BHPr National Practitioner Data Bank/Healthcare Integrity and Protection Data Bank [System]

PIA SUMMARY AND APPROVAL COMBINED

PIA Summary

Is this a new PIA 2011? No

If this is an existing PIA, please provide a reason for revision: PIA Validation

1. Date of this Submission: 3/7/2011

2. OPDIV Name: HRSA

3. Unique Project Identifier (UPI) Number: 009-15-01-06-01-1010-00

4. Privacy Act System of Records (SOR) Number (If response to Q.21 is Yes, a SORN number is required for Q.4): 09-15-0054

5. OMB Information Collection Approval Number: NPDB: 0915-0126, HIPDB: 0915-0239

6. Other Identifying Number(s): N/A

7. System Name (Align with system Item name): National Practitioner Data Bank (NPDB) and Healthcare Integrity and Protection Data Bank (HIPDB)

9. System Point of Contact (POC). The System POC is the person to whom questions about the system and the responses to this PIA may be addressed: Cynde Grubbs

10. Provide an overview of the system: The NPDB provides a nationwide database that makes adverse information on physicians, dentists, and other health care practitioners available to health care entities, hospitals, professional societies, and State licensing boards. The HIPDB is a national database that provides information on health care related convictions and judgments, licensure actions, exclusions from government programs and other adjudicated actions. The NPDB-HIPDB co-exist as one integrated processing system.

13. Indicate if the system is new or an existing one being modified: Existing

17. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system? (Note: This question seeks to identify any, and all, personal information associated with the system. This includes any PII, whether or not it is subject to the Privacy Act, whether the individuals are employees, the public, research subjects, or business partners, and whether provided voluntarily or collected by mandate. Later questions will try to understand the character of the data and its applicability to the requirements under the Privacy Act or other legislation. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system?):
Yes

21. Is the system subject to the Privacy Act? (If response to Q.19 is Yes, response to Q.21 must be Yes and a SORN number is required for Q.4): Yes

23. If the system shares or discloses IIF please specify with whom and for what purpose(s):
The NPDB/HIPDB program shares information with the Registered Entities, such as Hospitals and Managed Care Organization in accordance with Congressional mandate and Federal law. Federal law also mandates the disclosure of the information to specific user groups. The Data

Banks uses PII to uniquely/personally identify and match a report to a specific physician, dentist, or other practitioner.

30. Please describe in detail: (1) the information the agency will collect, maintain, or disseminate; (2) why and for what purpose the agency will use the information; (3) in this description, explicitly indicate whether the information contains PII; and (4) whether submission of personal information is voluntary or mandatory: Federal law requires that health care entities, hospital, professional societies and State licensing boards report adverse information (health care related convictions and judgments, licensure actions, exclusions from government programs and other adjudicated actions) on physicians, dentists and other health care practitioners to the NPDB/HIPDB. The information must identify the specific practitioner and is not voluntary.

Why We Collect Your Personal Information:

-Information is vital to the existence of the Data Banks. Without collecting the information contained in the Data Banks our mission could not be fulfilled. This information facilitates the tenants of our mission, including protecting the public and providing quality health care.

-We do not use the information for any other secondary purpose.

-We only collect the information necessary to fulfill our mission. No other information is collected.

What personal information we collect:

We only collect enough information to serve the mission of the Data Banks. We collect the following personal information on subjects of NPDB and HIPDB reports and queries.

-Name

-Date of Birth

-Social Security Number

-Mailing Addresses

-Phone Numbers

-E-mail Addresses

-Education Records

The information must identify the specific practitioner and is not voluntary.

31. Please describe in detail any processes in place to: (1) notify and obtain consent from the individuals whose PII is in the system when major changes occur to the system (e.g., disclosure and/or data uses have changed since the notice at the time of the original collection); (2) notify and obtain consent from individuals regarding what PII is being collected from them; and (3) how the information will be used or shared.

(Note: Please describe in what format individuals will be given notice of consent [e.g., written notice, electronic notice, etc.]) The NPDB provides a nationwide database that makes adverse information on physicians, dentists, and other health care practitioners available to health care entities, hospitals, professional societies, and State licensing boards. The HIPDB is a

national database that provides information on health care related convictions and judgments, licensure actions, exclusions from government programs and other adjudicated actions. These entities are required to report information to this database, and the individual that is the subject of the report has the ability to receive a copy of the file. Data is shared only with the Registered Entities, and new entities are investigated before receiving access.

We communicate via data Bank Correspondence, quarterly Newsletters, Informational Web Site Postings, and User Review Panel meetings.

32. Does the system host a website? (Note: If the system hosts a website, the Website Hosting Practices section is required to be completed regardless of the presence of PII):

Yes

37. Does the website have any information or pages directed at children under the age of thirteen?: No

50. Are there policies or guidelines in place with regard to the retention and destruction of PII? (Refer to the C&A package and/or the Records Retention and Destruction section in SORN): Yes

54. Briefly describe in detail how the IIF will be secured on the system using administrative, technical, and physical controls.: NPDB/HIPDB was recertified and accredited in August 2010, including a Privacy Impact Assessment (PIA). NPDB/HIPDB relies on network security controls provided by the contractor managed off-site GSS. The NPDB/HIPDB implements firewalls, network and host base intrusion detection to secure its facilities. Boundary entry points are controlled by firewall rules and protected by Intrusion Detection Servers to prevent unauthorized access. All traffic to the NPDB-HIPDB web servers is encrypted using 128-bit SSL in the production environment. The NPDB-HIPDB system uses pay.gov to process credit card transactions. It is an Internet system where the NPDB-HIPDB originates Secure Hyper Text Transfer Protocol (HTTPS) requests for billing and receives HTTPS responses.

All PII is secured through the use of a secure commercial facility. Physical controls at this facility include sign in logs, badges, hand scan, man trap, and locked cages. All transmission of PII is secured via 128 bit encrypted FIPS 140-2 compliant mechanisms.

The NPDB-HIPDB system supports external (end-user) and internal user groups that are controlled by permissions, rights, and level of access. External users must enter a valid User Id, Password, and Databank Identifier in order to access they system.

Employees of the covered entities are advised of the legal consequences of misuse of NPDB/HIPDB information. NPDB-HIPDB personnel (internal users) are briefed on the sensitivity of NPDB-HIPDB information and the requirements for its protection. Prior to gaining access, employees are required to sign the NPDB-HIPDB Non-Disclosure Statement, acknowledging understanding of their responsibilities and consequential penalties for non-compliance. External users (customers) are required to sign registration forms before they are granted access to the system. Upon accessing the web site, users are also informed, via sign-on

warnings, that unauthorized use can subject the user to fine and imprisonment under Federal Statute. The contractor shall comply with existing federal and departmental laws, regulations, and requirements.

Physical access controls such as, man traps with biometric scanners, badges, etc. in place.

06.3 HHS PIA Summary for Posting (Form) / HRSA BHP The Health Education Assistance Loan/HEAL On-line Processing System [System]
PIA SUMMARY AND APPROVAL COMBINED

PIA Summary

Is this a new PIA 2011? No

If this is an existing PIA, please provide a reason for revision: PIA Validation

1. Date of this Submission: 1/9/2012

2. OPDIV Name: HRSA

3. Unique Project Identifier (UPI) Number: 009-15-01-06-02-1040-00

4. Privacy Act System of Records (SOR) Number (If response to Q.21 is Yes, a SORN number is required for Q.4): 09-15-0044

5. OMB Information Collection Approval Number: 0915-0108: Heal Regulations, 0915-0204: Heal Physician's Certification of Borrowers Total and Permanent Disability, 0915-0036: Heal Lenders Application for Insurance Claim Form and Request for Collection Assistance Form, 0915-0034: Heal Forms (Lenders App. for Contract of Fed. Loan Insurance, Borrower's Deferment Request, Borrower Loan Status Update, Loan Purchase/Consolidation), 0915-0043: Heal Forms (Repayment Schedule form, Call Report)

6. Other Identifying Number(s): N/A

7. System Name (Align with system Item name): Health Education Assistance Loan Program (HEAL) Online Processing System (HOPS)

9. System Point of Contact (POC). The System POC is the person to whom questions about the system and the responses to this PIA may be addressed: Anjum Rishi

10. Provide an overview of the system: HOPS is an automated system that tracks and maintains HEAL-related loan information. HEAL information consists of: Borrowers; Loans; Claims; Litigations against defaulted loans; Lenders; and Educational Institutions receiving loan funds. Loan servicing organizations use HOPS information to update and verify the accuracy or status of loan guarantees.

13. Indicate if the system is new or an existing one being modified: Existing

17. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system? (Note: This question seeks to identify any, and all, personal information associated with the system. This includes any PII, whether or not it is subject to the Privacy Act, whether the individuals are employees, the public, research subjects, or business partners, and whether provided voluntarily or collected by mandate. Later questions will try to understand the character of the data and its applicability to the requirements under the Privacy Act or other legislation. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system?):
Yes

21. Is the system subject to the Privacy Act? (If response to Q.19 is Yes, response to Q.21 must be Yes and a SORN number is required for Q.4): Yes

23. If the system shares or discloses IIF please specify with whom and for what purpose(s):
Loan Servicer personnel for verification of loan data. HEAL and Division of Financial Operations staff to process claims and claim payments.

30. Please describe in detail: (1) the information the agency will collect, maintain, or disseminate; (2) why and for what purpose the agency will use the information; (3) in this description, explicitly indicate whether the information contains PII; and (4) whether submission of personal information is voluntary or mandatory: The purpose of the system is 1) to identify students participating in the HEAL program 2) to determine eligibility of loan applicants and to compute insurance premium for federal insurance 3) to monitor the loan status of HEAL recipients, which includes the collection of overdue debts owed under the HEAL program 4) to compile and generate managerial and statistical reports 5) process claims and 6) produce an annual report that contains aggregate information but no individual borrower can be identified in this report. The categories of records in the system contains name, SSN, birth date, demographic background, educational status, loan location and status, and financial information about the individual for whom the record is maintained, lender and school identification. Disclosure of the applicant's SSN is mandatory for participation in the HEAL program as provided for by Section 4 of the Debt Collection Act of 1982. Submission of PII is mandatory Applicant Form HRSA-700 states the SSN will be used to verify the identity of the applicant and as an account number throughout the life of the loan to record necessary data accurately. Applicants are advised that failure to provide his/her SSN will result in the denial of the individual to participate in the HEAL program.

31. Please describe in detail any processes in place to: (1) notify and obtain consent from the individuals whose PII is in the system when major changes occur to the system (e.g., disclosure and/or data uses have changed since the notice at the time of the original collection); (2) notify and obtain consent from individuals regarding what PII is being collected from them; and (3) how the information will be used or shared.

(Note: Please describe in what format individuals will be given notice of consent [e.g., written notice, electronic notice, etc.]) The HEAL Program obtains PII only from the HEAL Servicers and does not obtain PII directly from individuals. The PII information is used for identification when the program receives claim submissions. Section 709(c)(2) of the Act is directed that HHS may release information on borrowers excluded for Medicare and Medicaid to relevant federal agencies, schools, school associations, professional associations, state licensing board, hospitals that borrowers are associated with and other relevant organizations. We can release defaulters name, SSN, last known address, name and location of school attended and amount of debt. To find out if the system contains records about an individual the system manager is contacted by a request in person that requires at least one tangible identification card; or request by mail containing the name and address of the requester, birth date, at least one tangible identification card, and signature. The HEAL Regulations do not state anything with regard to PII. Each of our Servicers handle PII differently.

32. Does the system host a website? (Note: If the system hosts a website, the Website Hosting Practices section is required to be completed regardless of the presence of PII):
Yes

37. Does the website have any information or pages directed at children under the age of thirteen?: No

50. Are there policies or guidelines in place with regard to the retention and destruction of PII? (Refer to the C&A package and/or the Records Retention and Destruction section in SORN): Yes

54. Briefly describe in detail how the IIF will be secured on the system using administrative, technical, and physical controls.: HEAL-HOPS was accredited and recertified in November 2009. HEAL relies on network security controls provided by the HRSA GSS. The system uses strong encryption for all communications (HTTPS) from the time the user logs on until they log off. Usernames and passwords are sent encrypted as well as all data transferred during the session. This is accomplished using Secure Sockets Layer (SSL) technology. PII data fields in the HOPS system are encrypted while the data is at rest. The system is housed in a government facility with physical controls. Access to the HEAL office space is controlled with a building pass card and cipher locks. PII is transmitted to HRSA using encrypted, secure protocols. The concept of "least privilege" provides users a minimal set of system access rights based on their role. Access to additional resources or information is granted upon approval by the resource owner (supervisor). Unique UserIDs and passwords permit only authorized users to access the system. Select users are individually assigned write, create and update privileges to loan data based on their functional role. Accounts are reviewed annually to ensure that least privilege is granted, and roles and responsibilities have not changed. OIT provides connectivity to the HRSA LAN access to the HEAL-HOPS System by authorized Internal Users, and by authorized Internet Access for External Users. There is no information available for use by the general public. An "inactivity time out" capability disables unattended computers to prohibit unauthorized access to PII. All authorized system users agree to the systems "Rules of Behavior" during the log in process. The Statement of Work (SOW) provides guidance for contractors to comply with HEAL-HOPS security requirements. The contractor shall comply with existing federal and departmental laws, regulations, and requirements. All contractors and federal users are now required to sign a Rules of Behavior agreement approved by the HRSA /OIT security section.

06.3 HHS PIA Summary for Posting (Form) / HRSA HSB Division of Transplantation Research Information System [System]

PIA SUMMARY AND APPROVAL COMBINED

PIA Summary

Is this a new PIA 2011? No

If this is an existing PIA, please provide a reason for revision: PIA Validation

1. Date of this Submission: 2/2/2012

2. OPDIV Name: HRSA

3. Unique Project Identifier (UPI) Number: No

4. Privacy Act System of Records (SOR) Number (If response to Q.21 is Yes, a SORN number is required for Q.4): 09-15-0055

5. OMB Information Collection Approval Number: 0915-0157

6. Other Identifying Number(s): No

7. System Name (Align with system Item name): Division of Transplantation Research Information System (DTRIS)

9. System Point of Contact (POC). The System POC is the person to whom questions about the system and the responses to this PIA may be addressed: Mesmin Germain

10. Provide an overview of the system: The Organ Procurement and Transplantation Network was established by the National Organ Transplant Act of 1984 (NOTA), and the HRSA Division of Transplantation (DoT) has been designated by the Secretary of the Department of Health and Human Services to administer the program.

The OPTN collects pre- and post-transplant clinical information of patients on the national patient waiting lists and living organ donors, histocompatibility information on donated organs, and records of matches run between donated organs and waiting list patients. This information includes SSN, names, and state of residence for patients and included additional address and contact information for living donors. This information has been collected in various forms since the inception of the OPTN in 1987.

This information is collected as a function of the OPTN process of matching donated organs to potential transplant recipients. The OPTN is the only system in the country that serves this function for heart, liver, lung, kidney, pancreas, and intestine transplants.

Information is collected by OPTN member transplant centers, histocompatibility labs and organ procurement organizations (OPO) and is then submitted to the OPTN system for matching. Submission of this information to the OPTN is mandatory for OPTN member transplant centers, histocompatibility labs and OPOs. The collection of this information from individuals takes place at OPTN member transplant centers and OPOs. Concern about individual information included in the OPTN data set may be sent to the OPTN contractor, which would then contact

the relevant OPTN member to make any corrections or changes that would be appropriate. The OPTN does not have direct communication with patients.

The data collected by the OPTN are also used for analysis by HRSA DoT contractors, such as the Scientific Registry of Transplant Recipients (SRTR), and are also shared through approved data use agreements with other Federal agencies such as the Centers for Medicare and Medicaid Services (CMS) and the National Institutes of Health (NIH). HRSA regularly reviews the data collection processes of the OPTN, including linkages of the OPTN data set with other data bases for purposes of validation and enhancement, and confirms that it meets the criteria of the Common Rule for exemption of IRB oversight under the Public Benefit and Service Program provisions of 45 CFR 46.101(b)(5).

The OPTN data are also shared with the HRSA Division of Transplantation (DoT) to conduct analysis in its oversight responsibilities. The Division maintained these data in DTRIS. The OPTN data in DTRIS are not routinely shared with other entities and the system is not linked to any other systems or the internet.

13. Indicate if the system is new or an existing one being modified: Existing

17. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system? (Note: This question seeks to identify any, and all, personal information associated with the system. This includes any PII, whether or not it is subject to the Privacy Act, whether the individuals are employees, the public, research subjects, or business partners, and whether provided voluntarily or collected by mandate. Later questions will try to understand the character of the data and its applicability to the requirements under the Privacy Act or other legislation. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system?):
Yes

21. Is the system subject to the Privacy Act? (If response to Q.19 is Yes, response to Q.21 must be Yes and a SORN number is required for Q.4): Yes

23. If the system shares or discloses IIF please specify with whom and for what purpose(s):
The data collected by the OPTN are also used for analysis by HRSA DoT contractors, such as the Scientific Registry of Transplant Recipients (SRTR), and are also shared through approved data use agreements with other Federal agencies such as the Centers for Medicare and Medicaid Services (CMS) and the National Institutes of Health (NIH). HRSA regularly reviews the data collection processes of the OPTN, including linkages of the OPTN data set with other data bases for purposes of validation and enhancement, and confirms that it meets the criteria of the Common Rule for exemption of IRB oversight under the Public Benefit and Service Program provisions of 45 CFR 46.101(b)(5).

The OPTN data are also shared with the HRSA Division of Transplantation (DoT) to conduct analysis in its oversight responsibilities. The Division maintained these data in DTRIS. The OPTN data in DTRIS are not routinely shared with other entities and the system is not linked to any other systems or the internet.

30. Please describe in detail: (1) the information the agency will collect, maintain, or disseminate; (2) why and for what purpose the agency will use the information; (3) in this description, explicitly indicate whether the information contains PII; and (4) whether submission of personal information is voluntary or mandatory: The OPTN collects pre- and post-transplant clinical information of patients on the national patient waiting lists and living organ donors, histocompatibility information on donated organs, and records of matches run between donated organs and waiting list patients. This information includes SSN, names, and state of residence for patients and included additional address and contact information for living donors. Information is collected by OPTN member transplant centers, histocompatibility labs and organ procurement organizations (OPO) and is then submitted to the OPTN system for matching.

Information is obtained from medical personnel at organ transplantation centers. Submission of this information to the OPTN is mandatory for OPTN member transplant centers, histocompatibility labs and OPOs. The information collected in UNetSM is for the continued operation and improvement of the National Organ Procurement and Transplantation Network (OPTN). This information assists transplant centers, organ procurement organizations and histocompatibility laboratories throughout the United States with matching, transporting and sharing organs. The information entered into UNetSM is used to match transplant candidates to organ donors; electronically notify transplant programs of available compatible organs; and collect data on transplant candidates, deceased and living donors, eligible donors, and transplant recipients. The submission of personal information is mandatory for the OPTN/UNOS member institutions.

The data stored in the system is used to perform statistical research to assist HRSA in meeting with its responsibility in monitoring the effectiveness of the organ transplant programs based on the final rule which is to help achieve the most equitable and medically effective use of human organs that are donated in trust for transplantations.

31. Please describe in detail any processes in place to: (1) notify and obtain consent from the individuals whose PII is in the system when major changes occur to the system (e.g., disclosure and/or data uses have changed since the notice at the time of the original collection); (2) notify and obtain consent from individuals regarding what PII is being collected from them; and (3) how the information will be used or shared.

(Note: Please describe in what format individuals will be given notice of consent [e.g., written notice, electronic notice, etc.]) HRSA, the OPTN, and HRSA contractors qualify as “public health authorities” for the purposes of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) regulation, “Standards for Privacy of Individual Identifiable Health Information” (Privacy Rule), 45 CFR Parts 160 and 164. Under 45 CFR 164.512, a “covered entity” may disclose an individual’s protected health information without the individual’s written consent or authorization when such a disclosure is made to a “public health authority” that is authorized by law to collect information for the purpose of preventing or controlling disease, injury, or disability. Given the legal authority and mandate of the OPTN, it has been determined that a “covered entity” may disclose certain individually identifiable health information to the OPTN without written consent or authorization of the individual, when the disclosure furthers the OPTN’s statutory purposes and functions.

The information is taken from medical records. It is used to correlate those needing organs with donor organs as they become available based on strict guidelines. The UNetSM System is accessed by specified employees of the OPTN/UNOS member institutions. Those member institutions are notified by the UNOS when a major change occurs in the UNetSM System. UNOS does not collect and maintain contact information for individuals. Therefore, consent and notification of collection of data are performed by the member institutions who have direct contact with the individuals on whom IIF is being collected. The System of Records for the OPTN is reviewed annually by HRSA. Any alteration or proposed change to the routine use of OPTN data is published in the Federal Register Notice.

32. Does the system host a website? (Note: If the system hosts a website, the Website Hosting Practices section is required to be completed regardless of the presence of PII): No

37. Does the website have any information or pages directed at children under the age of thirteen?: No

50. Are there policies or guidelines in place with regard to the retention and destruction of PII? (Refer to the C&A package and/or the Records Retention and Destruction section in SORN): Yes

54. Briefly describe in detail how the IIF will be secured on the system using administrative, technical, and physical controls.: Operational controls:

Access to the DTRIS Database is restricted to four people via a valid User-Id and password. The workstation hosting the DTRIS is not available via any network.

Physical security of the Parklawn Building, including security guards for limiting access, as well as monitoring environmental including smoke and fire alarms is provided by the Government Services Administration (GSA).

The workstation is located in a secured room with cipher lock access. Because it is not connected to any network or other computers, no firewall is needed.

Physical Controls:

The CD-ROMs and DLT tape cartridges are received via courier and are kept in a locked room. Access to the data is limited to four individuals.

The data is kept on the hard disk of one workstation, in a locked room. The workstation is not connected to the network. No data is

transmitted directly from the workstation. No IIF is printed from the DTRIS; analytical output is copied to diskette, and printed outside the secured area of the DTRIS.

The data is not backed up for contingency purposes. In the event of a disaster, the authorized user will obtain another copy of the data from the OPTN.

Technical controls:

The DTRIS use Windows 2000 Server login capabilities for User ID and Password verification. No access controls, outside of Identification and Authentication (I & A) are being implemented by the operating system.

The DTRIS is not accessible via any network. Since the DTRIS is a stand-alone workstation, no technical Public Access Controls are in place.

06.3 HHS PIA Summary for Posting (Form) / HRSA HSB National Organ Procurement and Transplantation Network [System]

PIA SUMMARY AND APPROVAL COMBINED

PIA Summary

Is this a new PIA 2011? No

If this is an existing PIA, please provide a reason for revision: PIA Validation

1. Date of this Submission: 2/2/2012

2. OPDIV Name: HRSA

3. Unique Project Identifier (UPI) Number: 009-15-01-02-02-1030-00

4. Privacy Act System of Records (SOR) Number (If response to Q.21 is Yes, a SORN number is required for Q.4): 09-15-0055

5. OMB Information Collection Approval Number: 0915-0157. That package is currently under review by OMB. They issued a brief extension to the approval date for the package until 2/29/2012.

6. Other Identifying Number(s): N/A

7. System Name (Align with system Item name): Organ Procurement and Transplantation Network (OPTN)

9. System Point of Contact (POC). The System POC is the person to whom questions about the system and the responses to this PIA may be addressed: Mesmin Germain

10. Provide an overview of the system: The Organ Procurement and Transplantation Network was established by the National Organ Transplant Act of 1984 (NOTA), and the HRSA Division of Transplantation (DoT) has been designated by the Secretary of the Department of Health and Human Services to administer the program.

The OPTN collects pre- and post-transplant clinical information of patients on the national patient waiting lists and living organ donors, histocompatibility information on donated organs, and records of matches run between donated organs and waiting list patients. This information includes SSN, names, and state of residence for patients and included additional address and contact information for living donors. This information has been collected in various forms since the inception of the OPTN in 1987.

This information is collected as a function of the OPTN process of matching donated organs to potential transplant recipients. The OPTN is the only system in the country that serves this function for heart, liver, lung, kidney, pancreas, and intestine transplants.

Information is collected by OPTN member transplant centers, histocompatibility labs and organ procurement organizations (OPO) and is then submitted to the OPTN system for matching. Submission of this information to the OPTN is mandatory for OPTN member transplant centers, histocompatibility labs and OPOs. The collection of this information from individuals takes place at OPTN member transplant centers and OPOs. Concern about individual information

included in the OPTN data set may be sent to the OPTN contractor, which would then contact the relevant OPTN member to make any corrections or changes that would be appropriate. The OPTN does not have direct communication with patients.

The data collected by the OPTN are also used for analysis by HRSA Division of Transplantation (DoT) and HRSA DoT contractors, such as the Scientific Registry of Transplant Recipients (SRTR), and are also shared through approved data use agreements with other Federal agencies such as the Centers for Medicare and Medicaid Services (CMS) and the National Institutes of Health (NIH). HRSA regularly reviews the data collection processes of the OPTN, including linkages of the OPTN data set with other data bases for purposes of validation and enhancement, and confirms that it meets the criteria of the Common Rule for exemption of IRB oversight under the Public Benefit and Service Program provisions of 45 CFR 46.101(b)(5).

13. Indicate if the system is new or an existing one being modified: Existing

17. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system? (Note: This question seeks to identify any, and all, personal information associated with the system. This includes any PII, whether or not it is subject to the Privacy Act, whether the individuals are employees, the public, research subjects, or business partners, and whether provided voluntarily or collected by mandate. Later questions will try to understand the character of the data and its applicability to the requirements under the Privacy Act or other legislation. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system?):

Yes

21. Is the system subject to the Privacy Act? (If response to Q.19 is Yes, response to Q.21 must be Yes and a SORN number is required for Q.4): Yes

23. If the system shares or discloses IIF please specify with whom and for what purpose(s): United Network for Organ Sharing (UNOS) will share information with HRSA, SRTR and with Medicare according to Federal Law for the purpose of candidate/patient/donor identification.

30. Please describe in detail: (1) the information the agency will collect, maintain, or disseminate; (2) why and for what purpose the agency will use the information; (3) in this description, explicitly indicate whether the information contains PII; and (4) whether submission of personal information is voluntary or mandatory: The OPTN collects pre- and post-transplant clinical information of patients on the national patient waiting lists and living organ donors, histocompatibility information on donated organs, and records of matches run between donated organs and waiting list patients. This information includes SSN, names, and state of residence for patients and included additional address and contact information for living donors. Information is collected by OPTN member transplant centers, histocompatibility labs and organ procurement organizations (OPO) and is then submitted to the OPTN system for matching.

Information is obtained from medical personnel at organ transplantation centers. Submission of this information to the OPTN is mandatory for OPTN member transplant centers, histocompatibility labs and OPOs. The information collected in UNetSM is for the continued operation and improvement of the National Organ Procurement and Transplantation Network

(OPTN). This information assists transplant centers, organ procurement organizations and histocompatibility laboratories throughout the United States with matching, transporting and sharing organs. The information entered into UNetSM is used to match transplant candidates to organ donors; electronically notify transplant programs of available compatible organs; and collect data on transplant candidates, deceased and living donors, eligible donors, and transplant recipients. The submission of personal information is mandatory for the OPTN/UNOS member institutions.

31. Please describe in detail any processes in place to: (1) notify and obtain consent from the individuals whose PII is in the system when major changes occur to the system (e.g., disclosure and/or data uses have changed since the notice at the time of the original collection); (2) notify and obtain consent from individuals regarding what PII is being collected from them; and (3) how the information will be used or shared.

(Note: Please describe in what format individuals will be given notice of consent [e.g., written notice, electronic notice, etc.]) HRSA, the OPTN, and HRSA contractors qualify as “public health authorities” for the purposes of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) regulation, “Standards for Privacy of Individual Identifiable Health Information” (Privacy Rule), 45 CFR Parts 160 and 164. Under 45 CFR 164.512, a “covered entity” may disclose an individual’s protected health information without the individual’s written consent or authorization when such a disclosure is made to a “public health authority” that is authorized by law to collect information for the purpose of preventing or controlling disease, injury, or disability. Given the legal authority and mandate of the OPTN, it has been determined that a “covered entity” may disclose certain individually identifiable health information to the OPTN without written consent or authorization of the individual, when the disclosure furthers the OPTN’s statutory purposes and functions.

The information is taken from medical records. It is used to correlate those needing organs with donor organs as they become available based on strict guidelines. The UNetSM System is accessed by specified employees of the OPTN/UNOS member institutions. Those member institutions are notified by the UNOS when a major change occurs in the UNetSM System. UNOS does not collect and maintain contact information for individuals. Therefore, consent and notification of collection of data are performed by the member institutions who have direct contact with the individuals on whom IIF is being collected. The System of Records for the OPTN is reviewed annually by HRSA. Any alteration or proposed change to the routine use of OPTN data is published in the Federal Register Notice.

32. Does the system host a website? (Note: If the system hosts a website, the Website Hosting Practices section is required to be completed regardless of the presence of PII):
Yes

37. Does the website have any information or pages directed at children under the age of thirteen?: No

50. Are there policies or guidelines in place with regard to the retention and destruction of PII? (Refer to the C&A package and/or the Records Retention and Destruction section in SORN): Yes

54. Briefly describe in detail how the IIF will be secured on the system using administrative, technical, and physical controls.: To support the OPTN business function and

protect PII, OPTN uses a three-tiered system to protect PII (1) the top layer is a web browser (examples include Microsoft's Internet Explorer or Mozilla's Firefox) using SSL technology with 128 bit encryption to protect the data transfer. (2) layer two or the middle layers are the web servers, in this instance OPTN uses multiple web servers running Microsoft's "Network Load Balancing" software to provide redundancy. (3) The third and final layer is the data layer which includes application servers and SQL database servers where OPTN uses Microsoft's Clustering software for the SQL servers. OPTN (developers of the system) made available a "system security policy and rules of behavior document" for all users. The rule of least privilege is executed by having the least amount of ports open, and running the least amount of protocols possible to accomplish tasks. OPTN employs virus protection mechanisms at critical information system entry and exit points. Finally, system accounts are reviewed yearly. UNOS as the OPTN contractor also employs an electronic security system and 24 X 7 security guards that monitor door access and people movement. Physical access point to sensitive facilities, or restricted areas housing information systems that process or display information are controlled during working hours and guarded or locked during non-working hours. Each employee, contractor, temporary employee, consultant, or contractor is issued a security badge. Each person must scan his or her badge to the electronic reader before entering a controlled door on the UNOS premises.

06.3 HHS PIA Summary for Posting (Form) / HRSA HSB OPAIS 340B Database [System]

PIA SUMMARY AND APPROVAL COMBINED

PIA Summary

Is this a new PIA 2011? No

If this is an existing PIA, please provide a reason for revision: PIA Validation

1. Date of this Submission: 3/4/2011

2. OPDIV Name: HRSA

3. Unique Project Identifier (UPI) Number: 009-15-01-02-02-1450-00

4. Privacy Act System of Records (SOR) Number (If response to Q.21 is Yes, a SORN number is required for Q.4): N/A

5. OMB Information Collection Approval Number: N/A

6. Other Identifying Number(s): N/A

7. System Name (Align with system Item name): HRSA Office of Pharmacy Affairs Information System

9. System Point of Contact (POC). The System POC is the person to whom questions about the system and the responses to this PIA may be addressed: Patrick Neubert

10. Provide an overview of the system: The Office of Pharmacy Affairs Information System (OPAIS) consists of a Public Website containing databases for 340B Covered Entities, Manufacturers, and Contract Pharmacies.

The 340B Public Website is an Application that stores information on the Covered Entities, Contracted Pharmacies, and Manufacturers which are participating in the 340B Drug Discount Program. This information is for public dissemination most especially for Manufacturers and Wholesalers who reference the 340B Public Website to check if a Covered Entity or Contracted Pharmacy is participating in the 340B Drug Discount program and eligible for discounted prices. The Public Website supports approximately 15,000 public users who query the system for information, 300-400 public users who log into the system to verify their address information, and approximately 20 administrative users who log into the administrator section of the site for record entry and maintenance purposes. The Public Website is located on two servers (a database and web server) at HRSA OIT headquarters in Rockville, MD. HRSA OIT is responsible for the backup and maintenance of both servers.

13. Indicate if the system is new or an existing one being modified: Existing

17. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system? (Note: This question seeks to identify any, and all, personal information associated with the system. This includes any PII, whether or not it is subject to the Privacy Act, whether the individuals are employees, the public, research subjects, or business partners, and whether provided voluntarily or collected by mandate. Later questions will try to understand the character of the data and its applicability to the requirements under the Privacy Act or other legislation. Does/Will the system collect, maintain (store), disseminate and/or pass

through PII within any database(s), record(s), file(s) or website(s) hosted by this system?):
No

21. Is the system subject to the Privacy Act? (If response to Q.19 is Yes, response to Q.21 must be Yes and a SORN number is required for Q.4): No

23. If the system shares or discloses IIF please specify with whom and for what purpose(s):
N/A

30. Please describe in detail: (1) the information the agency will collect, maintain, or disseminate; (2) why and for what purpose the agency will use the information; (3) in this description, explicitly indicate whether the information contains PII; and (4) whether submission of personal information is voluntary or mandatory: The system collects registration and recertification information for 340B program participants (i.e., "covered entities"). This information is used to manage the covered entities participation status. There is no IIF or PII included in the data collected.

31. Please describe in detail any processes in place to: (1) notify and obtain consent from the individuals whose PII is in the system when major changes occur to the system (e.g., disclosure and/or data uses have changed since the notice at the time of the original collection); (2) notify and obtain consent from individuals regarding what PII is being collected from them; and (3) how the information will be used or shared.

(Note: Please describe in what format individuals will be given notice of consent [e.g., written notice, electronic notice, etc.]) N/A

32. Does the system host a website? (Note: If the system hosts a website, the Website Hosting Practices section is required to be completed regardless of the presence of PII):
Yes

37. Does the website have any information or pages directed at children under the age of thirteen?: No

50. Are there policies or guidelines in place with regard to the retention and destruction of PII? (Refer to the C&A package and/or the Records Retention and Destruction section in SORN): No

54. Briefly describe in detail how the IIF will be secured on the system using administrative, technical, and physical controls.: N/A

06.3 HHS PIA Summary for Posting (Form) / HRSA HSB OPAIS 340B Pricing System [System]

PIA SUMMARY AND APPROVAL COMBINED

PIA Summary

Is this a new PIA 2011? No

If this is an existing PIA, please provide a reason for revision: PIA Validation

1. Date of this Submission: 3/7/2011

2. OPDIV Name: HRSA

3. Unique Project Identifier (UPI) Number: 009-15-01-06-02--1450-00

4. Privacy Act System of Records (SOR) Number (If response to Q.21 is Yes, a SORN number is required for Q.4): N/A

5. OMB Information Collection Approval Number: N/A

6. Other Identifying Number(s): N/A

7. System Name (Align with system Item name): HRSA OPA Pricing System

9. System Point of Contact (POC). The System POC is the person to whom questions about the system and the responses to this PIA may be addressed: Devin Williams

10. Provide an overview of the system: The HRSA OPA 340B Pricing System is an Application that calculates the actual 340B ceiling prices for all drugs in the 340B Drug Discount Program. The calculated ceiling prices are classified information and to be used only by a select number of people within the Office of Pharmacy affairs. Thus, the Pricing System will be hosted on a locked computer with no connection to the Internet located in HRSA headquarters and secured by HRSA OIT. The Pricing System will support approximately 3-5 users who require password access to activate both the computer and the Pricing System.

13. Indicate if the system is new or an existing one being modified: Existing

17. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system? (Note: This question seeks to identify any, and all, personal information associated with the system. This includes any PII, whether or not it is subject to the Privacy Act, whether the individuals are employees, the public, research subjects, or business partners, and whether provided voluntarily or collected by mandate. Later questions will try to understand the character of the data and its applicability to the requirements under the Privacy Act or other legislation. 06.3 HHS PIA Summary for Posting (Form) / HRSA HSB Scientific Registry of Transplantation Recipients [System]

PIA SUMMARY AND APPROVAL COMBINED

PIA Summary

Is this a new PIA 2011? No

If this is an existing PIA, please provide a reason for revision: Significant System Management Changes

1. Date of this Submission: 12/6/2011

2. OPDIV Name: HRSA

3. Unique Project Identifier (UPI) Number:

4. Privacy Act System of Records (SOR) Number (If response to Q.21 is Yes, a SORN number is required for Q.4): 09-15-0055

5. OMB Information Collection Approval Number: OMB Number -0915-0157

6. Other Identifying Number(s): N/A

7. System Name (Align with system Item name): Scientific Registry of Transplant Recipients (SRTR)

9. System Point of Contact (POC). The System POC is the person to whom questions about the system and the responses to this PIA may be addressed: Mesmin Germain

10. Provide an overview of the system: The Organ Procurement and Transplantation Network (OPTN) was established by the National Organ Transplant Act of 1984 (NOTA), and the HRSA Division of Transplantation (DoT) has been designated by the Secretary of the Department of Health and Human Services to administer the program.

The OPTN collects pre- and post-transplant clinical information of patients on the national patient waiting lists and living organ donors, histocompatibility information on donated organs, and records of matches run between donated organs and waiting list patients. This information includes SSN, names, and state of residence for patients and included additional address and contact information for living donors. This information has been collected in various forms since the inception of the OPTN in 1987.

This information is collected as a function of the OPTN process of matching donated organs to potential transplant recipients. The OPTN is the only system in the country that serves this function for heart, liver, lung, kidney, pancreas, and intestine transplants.

Information is collected by OPTN member transplant centers, histocompatibility labs and organ procurement organizations (OPO) and is then submitted to the OPTN system for matching. Submission of this information to the OPTN is mandatory for OPTN member transplant centers, histocompatibility labs, and OPOs. The collection of this information from individuals takes place at OPTN member transplant centers and OPOs. Concern about individual information included in the OPTN data set may be sent to the OPTN contractor, which would then contact

the relevant OPTN member to make any corrections or changes that would be appropriate. The OPTN does not have direct communication with patients.

The data collected by the OPTN are also used for analysis by HRSA DoT and HRSA DoT contractors, such as the Scientific Registry of Transplant Recipients (SRTR), and are also shared through approved data use agreements with other Federal agencies such as the Centers for Medicare and Medicaid Services (CMS) and the National Institutes of Health (NIH). HRSA regularly reviews the data collection processes of the OPTN, including linkages of the OPTN data set with other data bases for purposes of validation and enhancement, and confirms that it meets the criteria of the Common Rule for exemption of IRB oversight under the Public Benefit and Service Program provisions of 45 CFR 46.101(b)(5).

13. Indicate if the system is new or an existing one being modified: Existing

17. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system? (Note: This question seeks to identify any, and all, personal information associated with the system. This includes any PII, whether or not it is subject to the Privacy Act, whether the individuals are employees, the public, research subjects, or business partners, and whether provided voluntarily or collected by mandate. Later questions will try to understand the character of the data and its applicability to the requirements under the Privacy Act or other legislation. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system?):
Yes

21. Is the system subject to the Privacy Act? (If response to Q.19 is Yes, response to Q.21 must be Yes and a SORN number is required for Q.4): Yes

23. If the system shares or discloses IIF please specify with whom and for what purpose(s): Data with identifiers may be provided to other researchers with approval of the SRTR Scientific Advisory Committee, the HRSA project officer and an Institutional Review Board and after execution of a data use agreement. Specific patients of a transplant center may be identified by communications that transplant centers are using their center-specific reports. Data are shared under the following agreements: HRSA-CMS agreements HSB#06-03-06-00 and CMS agreement DUA#11547.

30. Please describe in detail: (1) the information the agency will collect, maintain, or disseminate; (2) why and for what purpose the agency will use the information; (3) in this description, explicitly indicate whether the information contains PII; and (4) whether submission of personal information is voluntary or mandatory: The information received by the SRTR from the OPTN includes pre- and post-transplant clinical information of patients on the national patient waiting lists and living organ donors, histocompatibility information on donated organs, and records of matches run between donated organs and waiting list patients. This information includes SSN, names, and state of residence for patients and included additional address and contact information for living donors.

In addition, when people make a request for information via the Web site, they voluntarily give contact information with an understanding that it will be used to reply. All other Illness, Injuries, Fatalities (IIF) information is obtained from OPTN and is covered by their privacy assessment.

31. Please describe in detail any processes in place to: (1) notify and obtain consent from the individuals whose PII is in the system when major changes occur to the system (e.g., disclosure and/or data uses have changed since the notice at the time of the original collection); (2) notify and obtain consent from individuals regarding what PII is being collected from them; and (3) how the information will be used or shared.

(Note: Please describe in what format individuals will be given notice of consent [e.g., written notice, electronic notice, etc.]) HRSA, the OPTN, and HRSA contractors qualify as “public health authorities” for the purposes of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) regulation, “Standards for Privacy of Individual Identifiable Health Information” (Privacy Rule), 45 CFR Parts 160 and 164. Under 45 CFR 164.512, a “covered entity” may disclose an individual’s protected health information without the individual’s written consent or authorization when such a disclosure is made to a “public health authority” that is authorized by law to collect information for the purpose of preventing or controlling disease, injury, or disability. Given the legal authority and mandate of the OPTN, it has been determined that a “covered entity” may disclose certain individually identifiable health information to the OPTN without written consent or authorization of the individual, when the disclosure furthers the OPTN’s statutory purposes and functions:

- Notify and obtain consent from the individuals whose IIF is in the system when major changes occur to the system (e.g., disclosure and/or data uses have changed since the notice at the time of the original collection).
- Notify and obtain consent from individuals regarding what IIF is being collected from them and how the information will be used or shared. Data about transplant candidates and recipients from the OPTN and from CMS are required. The information will be used for analytical support to HRSA, the OPTN, and outside researchers. Additionally, basic contact information (name, mailing address, telephone number, email address) is collected from data requestors.

Allowing us to respond to email queries is the sole purpose for collecting the basic contact information we gather. Consequently, we have no process for notifying users or obtaining consent for changing data uses. Our Web site privacy policy describes in detail how the information will be used and shared, how users can modify it, and how this information will be used. Please see http://www.srtr.org/data_request/datause_policy.aspx.

We do not collect IIF unless an individual chooses to have us respond to their query. In this case consent is implicit.

The System of Records for the OPTN/SRTR is reviewed annually by HRSA. Any alteration or proposed change to the routine use of OPTN data is published in the Federal Register Notice.

32. Does the system host a website? (Note: If the system hosts a website, the Website Hosting Practices section is required to be completed regardless of the presence of PII):

Yes

37. Does the website have any information or pages directed at children under the age of thirteen?:

50. Are there policies or guidelines in place with regard to the retention and destruction of PII? (Refer to the C&A package and/or the Records Retention and Destruction section in SORN):

54. Briefly describe in detail how the IIF will be secured on the system using administrative, technical, and physical controls.: All SRTR data are maintained on a private system without online interconnections to other systems. Data are received from the OPTN periodically. These data reside on a server with no outside access and access limited to authorized SRTR personnel. The server is logically isolated from the Internet via firewalls and other configured controls. It does not receive or transfer data via the Internet. The server is physically protected from the outside by three locked doors, access is limited to authorized personnel only, and the machine itself is locked and in a locked computer rack. Chronic Disease Research Group (CDRG) receives the password protected data from UNOS (the OPTN) via UPS and FedEx on a monthly basis.

06.3 HHS PIA Summary for Posting (Form) / HRSA HSB Vaccine Injury Compensation Program [System]

PIA SUMMARY AND APPROVAL COMBINED

PIA Summary

Is this a new PIA 2011? No

If this is an existing PIA, please provide a reason for revision: PIA Validation

1. Date of this Submission: 3/14/2011

2. OPDIV Name: HRSA

3. Unique Project Identifier (UPI) Number: None

4. Privacy Act System of Records (SOR) Number (If response to Q.21 is Yes, a SORN number is required for Q.4): 09-15-0056

5. OMB Information Collection Approval Number: 0915-0282

6. Other Identifying Number(s): None

7. System Name (Align with system Item name): Vaccine Injury Compensation Program (VICP) Database

9. System Point of Contact (POC). The System POC is the person to whom questions about the system and the responses to this PIA may be addressed: Carole Marks

10. Provide an overview of the system: This database is used extensively to respond to congressional inquiries and to support ongoing litigation. It tracks case information from the filing of a claim with the U.S. Court of Federal claims until a decision is made by the court and if necessary a payment is made by the Government.

13. Indicate if the system is new or an existing one being modified: Existing

17. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system? (Note: This question seeks to identify any, and all, personal information associated with the system. This includes any PII, whether or not it is subject to the Privacy Act, whether the individuals are employees, the public, research subjects, or business partners, and whether provided voluntarily or collected by mandate. Later questions will try to understand the character of the data and its applicability to the requirements under the Privacy Act or other legislation. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system?):
Yes

21. Is the system subject to the Privacy Act? (If response to Q.19 is Yes, response to Q.21 must be Yes and a SORN number is required for Q.4): Yes

23. If the system shares or discloses IIF please specify with whom and for what purpose(s):
N/A

30. Please describe in detail: (1) the information the agency will collect, maintain, or disseminate; (2) why and for what purpose the agency will use the information; (3) in this description, explicitly indicate whether the information contains PII; and (4) whether

submission of personal information is voluntary or mandatory: The database collects birthdates, names, addresses, medical, legal and payment information to support ongoing litigation. This information is not only federal contact data but personal health information. This information is used for internal purposes only. No PII is shared with anyone outside of this program. Submission of this information is mandatory to participate in the program but participation in the program is not mandatory.

31. Please describe in detail any processes in place to: (1) notify and obtain consent from the individuals whose PII is in the system when major changes occur to the system (e.g., disclosure and/or data uses have changed since the notice at the time of the original collection); (2) notify and obtain consent from individuals regarding what PII is being collected from them; and (3) how the information will be used or shared.

(Note: Please describe in what format individuals will be given notice of consent [e.g., written notice, electronic notice, etc.]) The personal information collected is not disclosed in any way to anyone outside of the program. It is used for tracking purposes and to support ongoing litigation only. We do not notify or obtain consent since the system has not had any major changes since the beginning. There are no notification processes in place to inform individuals about changes to the system, what information is collected, or how the information will be shared.

32. Does the system host a website? (Note: If the system hosts a website, the Website Hosting Practices section is required to be completed regardless of the presence of PII): No

37. Does the website have any information or pages directed at children under the age of thirteen?:

50. Are there policies or guidelines in place with regard to the retention and destruction of PII? (Refer to the C&A package and/or the Records Retention and Destruction section in SORN):

54. Briefly describe in detail how the IIF will be secured on the system using administrative, technical, and physical controls.: The data collected in the system is stored on the sequel server which is on the HRSA network. There is a log in security access for each user.

06.3 HHS PIA Summary for Posting (Form) / HRSA Integrated Clearinghouse System [System]

PIA SUMMARY AND APPROVAL COMBINED

PIA Summary

Is this a new PIA 2011? No

If this is an existing PIA, please provide a reason for revision: PIA Validation

1. Date of this Submission: 1/9/2012

2. OPDIV Name: HRSA

3. Unique Project Identifier (UPI) Number: 009-15-01-06-02-1400-00

4. Privacy Act System of Records (SOR) Number (If response to Q.21 is Yes, a SORN number is required for Q.4): 09-15-0067

5. OMB Information Collection Approval Number: N/A

6. Other Identifying Number(s): N/A

7. System Name (Align with system Item name): HRSA Information Center (IC) Integrated Clearinghouse System (ICS)

9. System Point of Contact (POC). The System POC is the person to whom questions about the system and the responses to this PIA may be addressed: David Bowman

10. Provide an overview of the system: The system is used by people requesting information to be sent to them from the HRSA Information Center. It collects information about what is being ordered and where and to whom to send it.

13. Indicate if the system is new or an existing one being modified: Existing

17. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system? (Note: This question seeks to identify any, and all, personal information associated with the system. This includes any PII, whether or not it is subject to the Privacy Act, whether the individuals are employees, the public, research subjects, or business partners, and whether provided voluntarily or collected by mandate. Later questions will try to understand the character of the data and its applicability to the requirements under the Privacy Act or other legislation. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system?):
Yes

21. Is the system subject to the Privacy Act? (If response to Q.19 is Yes, response to Q.21 must be Yes and a SORN number is required for Q.4): Yes

23. If the system shares or discloses IIF please specify with whom and for what purpose(s): Designated project staff and relevant/appropriate HRSA staff may be able to access PII for customer service purposes. The purpose information might be shared amongst HRSA IC phone ordering staff/supervising HRSA staff is to ensure good customer service. Only the name, address, phone number, e-mail address or personal URL, voluntarily supplied by callers or web requesters, given at the time of order, is kept for a period up to 1 year to ensure that if a person contacts the HRSA IC with questions about their previous orders, our Information Specialists are able to identify them and assist them in getting the materials they want.

30. Please describe in detail: (1) the information the agency will collect, maintain, or disseminate; (2) why and for what purpose the agency will use the information; (3) in this description, explicitly indicate whether the information contains PII; and (4) whether submission of personal information is voluntary or mandatory: The system collects PII information necessary (name, address, telephone number, e-mail address, personal URL, as given by the requestor at the time of request) to address customer service issues and to disseminate free informational materials to people requesting it via phone, fax, e-mail, Web, or in person. All information is provided voluntarily. The information does not include a person's personal health information, education, social security number, financial transactions, medical history, and criminal or employment history.

31. Please describe in detail any processes in place to: (1) notify and obtain consent from the individuals whose PII is in the system when major changes occur to the system (e.g., disclosure and/or data uses have changed since the notice at the time of the original collection); (2) notify and obtain consent from individuals regarding what PII is being collected from them; and (3) how the information will be used or shared.

(Note: Please describe in what format individuals will be given notice of consent [e.g., written notice, electronic notice, etc.]) The information collected from requestors by information specialists from phone or web requests is provided voluntarily when ordering materials. Requestors provide this contact information for the express purpose of making it possible for the Information Center to send (and when appropriate, follow up on) requested materials, and for the requestor to receive them. The HRSA IC/ICS maintains a SORN, posted on the HRSA enterprise site, to give the public information about what information is collected by the HRSA IC/ICS, how it is stored and protected, and how they may make contact with program officials should they have any concerns regarding the information they voluntarily supplied.

32. Does the system host a website? (Note: If the system hosts a website, the Website Hosting Practices section is required to be completed regardless of the presence of PII):

Yes

37. Does the website have any information or pages directed at children under the age of thirteen?: No

50. Are there policies or guidelines in place with regard to the retention and destruction of PII? (Refer to the C&A package and/or the Records Retention and Destruction section in SORN): Yes

54. Briefly describe in detail how the IIF will be secured on the system using administrative, technical, and physical controls.: Policies are in place which limit the retention of personal information from individuals who obtain publications at the HRSA Information Center to a one-year period, after which this information is purged from the database on which it is housed. The information is collected from requestors by information specialists or requestors voluntarily entering the information on a Website for ordering materials. Requestors voluntarily provide contact information for the mutually expressed purpose of making it possible for the Information Center to send (and when appropriate, follow up on) requested materials, and for the requestor to receive them. Note that this information is captured and kept for this period of time to better address customer issues, including previous requests for order information, and to correct customer orders (return mail, etc.) This information is kept secure by means of several technical and physical security safeguards and procedures, including: key card access is required

for all employees to physically access the server on which the information is stored; employee access to the system is controlled and protected by requirements that include having a proper user id and password; while the system itself resides in a secure environment protected by firewall and an intrusion detection system. The contractors also review security logs on a regular basis.

06.3 HHS PIA Summary for Posting (Form) / HRSA National Training and Coordination Collaborative (NTACC)

PIA SUMMARY AND APPROVAL COMBINED

PIA Summary

Is this a new PIA 2011? No

If this is an existing PIA, please provide a reason for revision: New Interagency Uses

1. Date of this Submission: 1/9/2012

2. OPDIV Name: HRSA

3. Unique Project Identifier (UPI) Number: n/a

4. Privacy Act System of Records (SOR) Number (If response to Q.21 is Yes, a SORN number is required for Q.4): N/A

5. OMB Information Collection Approval Number: N/A

6. Other Identifying Number(s): N/A

7. System Name (Align with system Item name): National Training and Coordination Collaborative / NTACC

9. System Point of Contact (POC). The System POC is the person to whom questions about the system and the responses to this PIA may be addressed: Cynthia Arno

10. Provide an overview of the system: The system will assist the Geriatric Education Centers (GECs) in developing, implementing and reporting evaluation data on their various programs as related to their program objectives. It will also serve as a venue to provide ongoing communication to the GECs in providing feedback from the field about the validity and reliability of current data requirements as well as experiences in collecting and reporting such information. Finally, it will provide a venue regarding the different educational opportunities that may be available within the network.

13. Indicate if the system is new or an existing one being modified: Existing

17. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system? (Note: This question seeks to identify any, and all, personal information associated with the system. This includes any PII, whether or not it is subject to the Privacy Act, whether the individuals are employees, the public, research subjects, or business partners, and whether provided voluntarily or collected by mandate. Later questions will try to understand the character of the data and its applicability to the requirements under the Privacy Act or other legislation. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system?):
No

21. Is the system subject to the Privacy Act? (If response to Q.19 is Yes, response to Q.21 must be Yes and a SORN number is required for Q.4): No

23. If the system shares or discloses IIF please specify with whom and for what purpose(s):
N/A

30. Please describe in detail: (1) the information the agency will collect, maintain, or disseminate; (2) why and for what purpose the agency will use the information; (3) in this description, explicitly indicate whether the information contains PII; and (4) whether submission of personal information is voluntary or mandatory:

The website contains educational and informational materials for the GECs on how to develop, implement and report evaluation data on their specific program objectives. The data included is information that can found in a telephone book, (e.g., name, professional credentials, office telephone number, office address, office email address). The website contains No PII.

31. Please describe in detail any processes in place to: (1) notify and obtain consent from the individuals whose PII is in the system when major changes occur to the system (e.g., disclosure and/or data uses have changed since the notice at the time of the original collection); (2) notify and obtain consent from individuals regarding what PII is being collected from them; and (3) how the information will be used or shared.

(Note: Please describe in what format individuals will be given notice of consent [e.g., written notice, electronic notice, etc.]) N/A

32. Does the system host a website? (Note: If the system hosts a website, the Website Hosting Practices section is required to be completed regardless of the presence of PII):
Yes

37. Does the website have any information or pages directed at children under the age of thirteen?: No

50. Are there policies or guidelines in place with regard to the retention and destruction of PII? (Refer to the C&A package and/or the Records Retention and Destruction section in SORN): No

54. Briefly describe in detail how the IIF will be secured on the system using administrative, technical, and physical controls.: N/A

PIA SUMMARY AND APPROVAL COMBINED

PIA Summary

Is this a new PIA 2011? No

If this is an existing PIA, please provide a reason for revision: PIA Validation

1. Date of this Submission: 9/2/2011

2. OPDIV Name: HRSA

3. Unique Project Identifier (UPI) Number: 009-15-02-00-02-1080-00

4. Privacy Act System of Records (SOR) Number (If response to Q.21 is Yes, a SORN number is required for Q.4): N/A

5. OMB Information Collection Approval Number: N/A

6. Other Identifying Number(s): N/A

7. System Name (Align with system Item name): HRSA OIT General Support System (GSS)

9. System Point of Contact (POC). The System POC is the person to whom questions about the system and the responses to this PIA may be addressed: Lynn Dennie

10. Provide an overview of the system: Provides common connectivity and file and print services.

13. Indicate if the system is new or an existing one being modified: Existing

17. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system? (Note: This question seeks to identify any, and all, personal information associated with the system. This includes any PII, whether or not it is subject to the Privacy Act, whether the individuals are employees, the public, research subjects, or business partners, and whether provided voluntarily or collected by mandate. Later questions will try to understand the character of the data and its applicability to the requirements under the Privacy Act or other legislation. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system?):
No

21. Is the system subject to the Privacy Act? (If response to Q.19 is Yes, response to Q.21 must be Yes and a SORN number is required for Q.4): No

23. If the system shares or discloses IIF please specify with whom and for what purpose(s):
N/A

30. Please describe in detail: (1) the information the agency will collect, maintain, or disseminate; (2) why and for what purpose the agency will use the information; (3) in this description, explicitly indicate whether the information contains PII; and (4) whether submission of personal information is voluntary or mandatory: This system does not collect or store PII data. However, the system stores and manages access to shared files on the system disk that contain PII data for multiple major applications (MAs) residing on the GSS.

31. Please describe in detail any processes in place to: (1) notify and obtain consent from the individuals whose PII is in the system when major changes occur to the system (e.g., disclosure and/or data uses have changed since the notice at the time of the original collection); (2) notify and obtain consent from individuals regarding what PII is being collected from them; and (3) how the information will be used or shared.

(Note: Please describe in what format individuals will be given notice of consent [e.g., written notice, electronic notice, etc.] The GSS does not collect or process any PII data. Each MA that collects and uses PII data has its own process to notify and obtain consent from the individuals whose PII data is in the system.

32. Does the system host a website? (Note: If the system hosts a website, the Website Hosting Practices section is required to be completed regardless of the presence of PII): No

37. Does the website have any information or pages directed at children under the age of thirteen?: No

50. Are there policies or guidelines in place with regard to the retention and destruction of PII? (Refer to the C&A package and/or the Records Retention and Destruction section in SORN): Yes

54. Briefly describe in detail how the IIF will be secured on the system using administrative, technical, and physical controls.: Security controls for this system include redundant Cisco firewalls; redundant intrusion monitoring systems including Securify and Proventia; 24x7 monitoring of the perimeter defenses; antivirus systems with automatic updates for both workstations and servers from McAfee and Symantec; Ad-aware anti-spyware software; and routine certification and verification activities. Access is limited to those requiring access to the system and is protected by username/password controls with enforced complexity requirements. Physical controls include card reader access to authorized individuals and cameras for monitoring and recording Data Center activity.

06.3 HHS PIA Summary for Posting (Form) / HRSA OIT HRSA Data Warehouse [System]

PIA SUMMARY AND APPROVAL COMBINED

PIA Summary

Is this a new PIA 2011? No

If this is an existing PIA, please provide a reason for revision: PIA Validation

1. Date of this Submission: 1/9/2012

2. OPDIV Name: HRSA

3. Unique Project Identifier (UPI) Number: 009-15-01-09-02-1350-00

4. Privacy Act System of Records (SOR) Number (If response to Q.21 is Yes, a SORN number is required for Q.4): N/A

5. OMB Information Collection Approval Number: N/A

6. Other Identifying Number(s): N/A

7. System Name (Align with system Item name): HRSA Data Warehouse

9. System Point of Contact (POC). The System POC is the person to whom questions about the system and the responses to this PIA may be addressed: Pete Kusnick

10. Provide an overview of the system: The HRSA Data Warehouse is a publicly-available reporting tool on the Internet. It provides a single point of access to HRSA programmatic information, related health resources, and demographic data including Google Maps, ARRA spending by HRSA, Poison Control Centers, ARF, NHSC, Rural Health, Ryan White, MCHB, Primary Health Care, Grants and Nursing . This promotes information sharing, collaboration, and provides government-to-government, government-to-business and government-to-citizen services that have significantly improved both the efficiency and effectiveness of the agency in delivering its mission.

The result is uninterrupted global access to comprehensive, current data on HRSA programs, the majority of which focus on improving access to care for underserved people, and key health markers.

13. Indicate if the system is new or an existing one being modified: Existing

17. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system? (Note: This question seeks to identify any, and all, personal information associated with the system. This includes any PII, whether or not it is subject to the Privacy Act, whether the individuals are employees, the public, research subjects, or business partners, and whether provided voluntarily or collected by mandate. Later questions will try to understand the character of the data and its applicability to the requirements under the Privacy Act or other legislation. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system?):

No

21. Is the system subject to the Privacy Act? (If response to Q.19 is Yes, response to Q.21 must be Yes and a SORN number is required for Q.4): No

23. If the system shares or discloses IIF please specify with whom and for what purpose(s):
N/A

30. Please describe in detail: (1) the information the agency will collect, maintain, or disseminate; (2) why and for what purpose the agency will use the information; (3) in this description, explicitly indicate whether the information contains PII; and (4) whether submission of personal information is voluntary or mandatory: The information the agency collects relates to HRSA grants, shortage designations, scholarship awards, and loan repayments, nursing surveys, rural health and health care sites.

The information is used for by public and private individuals and agencies to promote health care to underserved areas by studying the data retrieved by the HDW.

The information contained in the system does not house PII.

No PII data is submitted to the agency.

31. Please describe in detail any processes in place to: (1) notify and obtain consent from the individuals whose PII is in the system when major changes occur to the system (e.g., disclosure and/or data uses have changed since the notice at the time of the original collection); (2) notify and obtain consent from individuals regarding what PII is being collected from them; and (3) how the information will be used or shared.

(Note: Please describe in what format individuals will be given notice of consent [e.g., written notice, electronic notice, etc.]) N/A

32. Does the system host a website? (Note: If the system hosts a website, the Website Hosting Practices section is required to be completed regardless of the presence of PII):
Yes

37. Does the website have any information or pages directed at children under the age of thirteen?: No

50. Are there policies or guidelines in place with regard to the retention and destruction of PII? (Refer to the C&A package and/or the Records Retention and Destruction section in SORN): Yes

54. Briefly describe in detail how the IIF will be secured on the system using administrative, technical, and physical controls.: N/A

06.3 HHS PIA Summary for Posting (Form) / HRSA OIT National Hansen's Disease Program (NHDP) General Support System [System]

PIA SUMMARY AND APPROVAL COMBINED

PIA Summary

Is this a new PIA 2011? No

If this is an existing PIA, please provide a reason for revision: PIA Validation

1. Date of this Submission: 2/2/2012

2. OPDIV Name: HRSA

3. Unique Project Identifier (UPI) Number:

4. Privacy Act System of Records (SOR) Number (If response to Q.21 is Yes, a SORN number is required for Q.4): 09-15-0007

5. OMB Information Collection Approval Number: N/A

6. Other Identifying Number(s): N/A

7. System Name (Align with system Item name): National Hansen's Disease Program (NHDP) General Support System

9. System Point of Contact (POC). The System POC is the person to whom questions about the system and the responses to this PIA may be addressed: Louis Banner

10. Provide an overview of the system: A general support system used to assist internal staff in the performance of duties as it relates to the mission of providing service to the patients and population effected by Hansen's Disease.

13. Indicate if the system is new or an existing one being modified: Existing

17. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system? (Note: This question seeks to identify any, and all, personal information associated with the system. This includes any PII, whether or not it is subject to the Privacy Act, whether the individuals are employees, the public, research subjects, or business partners, and whether provided voluntarily or collected by mandate. Later questions will try to understand the character of the data and its applicability to the requirements under the Privacy Act or other legislation. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system?):
Yes

21. Is the system subject to the Privacy Act? (If response to Q.19 is Yes, response to Q.21 must be Yes and a SORN number is required for Q.4): Yes

23. If the system shares or discloses IIF please specify with whom and for what purpose(s):
Internal Staff, performance of duty to provide mission service to patients

30. Please describe in detail: (1) the information the agency will collect, maintain, or disseminate; (2) why and for what purpose the agency will use the information; (3) in this description, explicitly indicate whether the information contains PII; and (4) whether submission of personal information is voluntary or mandatory: (1) Medical examination, diagnostic and treatment data; information for proof of eligibility; social data such as address and

birth date; disease registers, such as Hansen's disease and tumor and surgical procedure registers; treatment logs, medical summaries and correspondence (for example, family to doctor, doctor to doctor, doctor to clinic).

(2) The purposes of this system are:

To serve as a basis for planning patient care and for continuity in the evaluation of the patient's condition and treatment to furnish documentary evidence of the course of the patient's medical evaluation, treatment and change in condition during the hospital stay, ambulatory care or emergency visit, or while being followed in a facility-based home care program;

To document communications between the responsible practitioner and any other health professional's contribution to the patient's care and treatment in order to assist in protecting the legal interests of the patient, the hospital or clinic, and responsible practitioners;

To provide data for use in facility management, continuing education, Department initiatives, quality assurance activities and research at the National Hansen's Disease Program, Baton Rouge, Louisiana

(3) Data collected does contain PII--The system (VisTa) that collects PII is covered under the Department of Veterans Affairs' PIA

(4) Voluntary

31. Please describe in detail any processes in place to: (1) notify and obtain consent from the individuals whose PII is in the system when major changes occur to the system (e.g., disclosure and/or data uses have changed since the notice at the time of the original collection); (2) notify and obtain consent from individuals regarding what PII is being collected from them; and (3) how the information will be used or shared.

(Note: Please describe in what format individuals will be given notice of consent [e.g., written notice, electronic notice, etc.] Patients are provided written notification at the time of service as to the data collected, potential use and disclosure.

A record may be disclosed for a research purpose, when the Department: (a) Has determined that the use or disclosure does not violate legal or policy limitations under which the record was provided, collected, or obtained; (b) has determined that the research purpose (1) cannot be reasonably accomplished unless the record is provided in individually identifiable form, and (2) warrants the risk to the privacy of the individual that additional exposure of the record might bring; (c) has required the recipient to--(1) establish reasonable administrative, technical, and physical safeguards to prevent unauthorized use or disclosure of the record, and (2) remove or destroy the information that identifies the individual at the earliest time at which removal or destruction can be accomplished consistent with the purpose of the research project, unless the recipient has presented adequate justification of a research or health nature for retaining such information, and (3) make no further use or disclosure of the record except--(A) in emergency circumstances affecting the health or safety of any individual, (B) for use in another research project, under these same conditions, and with written authorization of the Department, (C) for disclosure to a properly identified person for the purpose of an audit related to the research project, if information that would enable research subjects to be identified is removed or destroyed at the earliest opportunity consistent with the purpose of the audit, or (D) when required by law; (d) has secured a written statement attesting to the recipient's understanding of, and willingness to abide by these provisions.

32. Does the system host a website? (Note: If the system hosts a website, the Website Hosting Practices section is required to be completed regardless of the presence of PII): No

37. Does the website have any information or pages directed at children under the age of thirteen?:

50. Are there policies or guidelines in place with regard to the retention and destruction of PII? (Refer to the C&A package and/or the Records Retention and Destruction section in SORN):

54. Briefly describe in detail how the IIF will be secured on the system using administrative, technical, and physical controls.: PII is secured on the system using the following controls:

Safeguards:

Authorized Users: Health care practitioners, and other allied health personnel, medical and allied health students and administrative personnel for determination of eligibility for care and facility management; qualified research personnel with approved protocol; Public Health Service Commissioned Personnel Operations Division; and Public Health Service Claims Officer.

Physical Safeguards: Magnetic tapes, discs, other computer equipment and other forms of personal data are stored in areas where fire and life safety codes are strictly enforced. All documents are protected during lunch hours and nonworking hours in locked file cabinets in double-locked storage areas.

Procedural Safeguards: A password is required to access the terminal and a data set name controls the release of data only to authorized users. All users of personal information in connection with the performance of their jobs protect information from public view and from unauthorized personnel entering an unsupervised office. Access to records is strictly limited to those staff members trained in accordance with Privacy Act safeguards. The contractor is required to maintain confidentiality safeguards with respect to these records. These safeguards are in accordance with DHHS Chapter 45-13 and supplementary Chapter PHS.hf: 45-13 of the General Administration Manual, and Part 6 of the DHHS Information Resources Management Manual. The Memorandums of Agreement between the successor organizations and the Public Health Service require the successor organizations to comply with the Privacy Act. Public Health Service and HHS guidelines have been provided to each successor organization.

06.3 HHS PIA Summary for Posting (Form) / HRSA OIT Strategic Work Information and Folder Transfer System [System]

PIA SUMMARY AND APPROVAL COMBINED

PIA Summary

Is this a new PIA 2011? No

If this is an existing PIA, please provide a reason for revision: Not Applicable

1. Date of this Submission: 1/9/2012

2. OPDIV Name: HRSA

3. Unique Project Identifier (UPI) Number:

4. Privacy Act System of Records (SOR) Number (If response to Q.21 is Yes, a SORN number is required for Q.4): N/A

5. OMB Information Collection Approval Number: N/A

6. Other Identifying Number(s): N/A

7. System Name (Align with system Item name): Strategic Work Information and Folder Transfer System (SWIFT)

9. System Point of Contact (POC). The System POC is the person to whom questions about the system and the responses to this PIA may be addressed: Padma Raghavan

10. Provide an overview of the system: The Strategic Work Information and Folder Transfer (SWIFT) system is the electronic document management program for HRSA. The tracking system is used by all Bureaus and Offices throughout the Agency as a means of increasing the efficiency of the controlled correspondence process. The types of correspondence that are entered into SWIFT include HRSA regulations and Federal Register notices; reports to Congress; memoranda and briefings to the Secretary, Deputy Secretary, Chief of Staff, and Executive Secretary of HHS; and Agency controlled correspondence. The SWIFT system stores documents electronically and allows for their quick and easy retrieval, review, and routing.

13. Indicate if the system is new or an existing one being modified: Existing

17. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system? (Note: This question seeks to identify any, and all, personal information associated with the system. This includes any PII, whether or not it is subject to the Privacy Act, whether the individuals are employees, the public, research subjects, or business partners, and whether provided voluntarily or collected by mandate. Later questions will try to understand the character of the data and its applicability to the requirements under the Privacy Act or other legislation. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system?):
No

21. Is the system subject to the Privacy Act? (If response to Q.19 is Yes, response to Q.21 must be Yes and a SORN number is required for Q.4): No

23. If the system shares or discloses IIF please specify with whom and for what purpose(s):
N/A

30. Please describe in detail: (1) the information the agency will collect, maintain, or disseminate; (2) why and for what purpose the agency will use the information; (3) in this description, explicitly indicate whether the information contains PII; and (4) whether submission of personal information is voluntary or mandatory: 1. The SWIFT System stores and disseminates correspondence. The types of correspondence that are entered into SWIFT include HRSA regulations and Federal Register notices; reports to Congress; memoranda and briefings to the Secretary, Deputy Secretary, Chief of Staff, and Executive Secretary of HHS; and Agency controlled correspondence.

2. SWIFT is used by all Bureaus and Offices throughout the Agency as a means of increasing the efficiency of the controlled correspondence process.

3. The information does not contain PII.

4. No personal information is submitted to the system.

31. Please describe in detail any processes in place to: (1) notify and obtain consent from the individuals whose PII is in the system when major changes occur to the system (e.g., disclosure and/or data uses have changed since the notice at the time of the original collection); (2) notify and obtain consent from individuals regarding what PII is being collected from them; and (3) how the information will be used or shared.

(Note: Please describe in what format individuals will be given notice of consent [e.g., written notice, electronic notice, etc.]) N/A

32. Does the system host a website? (Note: If the system hosts a website, the Website Hosting Practices section is required to be completed regardless of the presence of PII):

Yes

37. Does the website have any information or pages directed at children under the age of thirteen?:

50. Are there policies or guidelines in place with regard to the retention and destruction of PII? (Refer to the C&A package and/or the Records Retention and Destruction section in SORN):

06.3 HHS PIA Summary for Posting (Form) / HRSA OO Full Time Equivalent/Employment Management Tracking System [System]

PIA SUMMARY AND APPROVAL COMBINED

PIA Summary

Is this a new PIA 2011? No

If this is an existing PIA, please provide a reason for revision: PIA Validation

1. Date of this Submission: 2/8/2012

2. OPDIV Name: HRSA

3. Unique Project Identifier (UPI) Number: N/A

4. Privacy Act System of Records (SOR) Number (If response to Q.21 is Yes, a SORN number is required for Q.4): OPM/GOVT-1 (This system is already covered under the Internal, Government and Central umbrella SORN, <http://oma.od.nih.gov/ms/privacy/pa-files/OPMGOVT1.htm>)

5. OMB Information Collection Approval Number: N/A

6. Other Identifying Number(s): N/A

7. System Name (Align with system Item name): Full-Time Equivalent Management Tracking System (FEMTS)

9. System Point of Contact (POC). The System POC is the person to whom questions about the system and the responses to this PIA may be addressed: Cora Wyatt

10. Provide an overview of the system: FEMTS provides, in a single location, personnel and payroll information drawn directly from the official systems of record for both CC and CS employees. On the personnel, or FTE, side, some important elements are equal employment opportunity (EEO) information such as pay plan, grade, series, step, position title, race, gender, supervisory status, administrative code, common accounting number (CAN), and regular and overtime hours worked by the employee. On the payroll side, several data elements are available, including pay date, gross pay, net pay, gross expenditures, and pay period. The system generates year-to-date payroll information monthly and quarterly, as requested by the user. Timeliness is ensured through regular extracts from time-attendance and payroll servers; the extracts are timed with the running of the official payroll programs.

13. Indicate if the system is new or an existing one being modified: Existing

17. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system? (Note: This question seeks to identify any, and all, personal information associated with the system. This includes any PII, whether or not it is subject to the Privacy Act, whether the individuals are employees, the public, research subjects, or business partners, and whether provided voluntarily or collected by mandate. Later questions will try to understand the character of the data and its applicability to the requirements under the Privacy Act or other legislation. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system?):

Yes

21. Is the system subject to the Privacy Act? (If response to Q.19 is Yes, response to Q.21 must be Yes and a SORN number is required for Q.4): Yes

23. If the system shares or discloses IIF please specify with whom and for what purpose(s): HRSA bureaus will review and edit reports within the FEMTS system for accuracy of data. The bureaus will only be able to view and edit data specific to their own bureau.

30. Please describe in detail: (1) the information the agency will collect, maintain, or disseminate; (2) why and for what purpose the agency will use the information; (3) in this description, explicitly indicate whether the information contains PII; and (4) whether submission of personal information is voluntary or mandatory: (1)

Name

SSN

Date of Birth

Mailing Address

Phone Number

Email Address

Education Records

Military Status

Employment Status

(2 & 3) The data is used to search, view and report on FTE and payroll elements in the database. The PII data elements are required to sort data, provide criteria to do searches, copy records and export to Excel, and print reports. Users cannot overwrite existing data, create or delete records; all the data elements are locked to prevent input.

(4) New PII data is not being collected. This data is being extracted from existing systems so voluntary/mandatory concerns are not relevant.

31. Please describe in detail any processes in place to: (1) notify and obtain consent from the individuals whose PII is in the system when major changes occur to the system (e.g., disclosure and/or data uses have changed since the notice at the time of the original collection); (2) notify and obtain consent from individuals regarding what PII is being collected from them; and (3) how the information will be used or shared.

(Note: Please describe in what format individuals will be given notice of consent [e.g., written notice, electronic notice, etc.]) No process is in place to notify individuals that PII data that exists in the current source systems is being extracted into the FEMTS system to facilitate reporting, analysis and forecasting System owners will examine the need to add additional notification

32. Does the system host a website? (Note: If the system hosts a website, the Website Hosting Practices section is required to be completed regardless of the presence of PII): No

37. Does the website have any information or pages directed at children under the age of thirteen?:

50. Are there policies or guidelines in place with regard to the retention and destruction of PII? (Refer to the C&A package and/or the Records Retention and Destruction section in SORN):

54. Briefly describe in detail how the IIF will be secured on the system using administrative, technical, and physical controls.: System is only accessible within HRSA.

User accounts must be approved by the Deputy Director , Office of Budget

System access requires authentication

06.3 HHS PIA Summary for Posting (Form) / HRSA OO Integrated Resources Management System [System]

PIA SUMMARY AND APPROVAL COMBINED

PIA Summary

Is this a new PIA 2011? No

If this is an existing PIA, please provide a reason for revision: PIA Validation

1. Date of this Submission: 2/2/2012

2. OPDIV Name: HRSA

3. Unique Project Identifier (UPI) Number: 009-15-01-06-02-1440-00

4. Privacy Act System of Records (SOR) Number (If response to Q.21 is Yes, a SORN number is required for Q.4): N/A

5. OMB Information Collection Approval Number: N/A

6. Other Identifying Number(s): N/A

7. System Name (Align with system Item name): Integrated Resource Management System

9. System Point of Contact (POC). The System POC is the person to whom questions about the system and the responses to this PIA may be addressed: Simeon P. Tarawali

10. Provide an overview of the system: This investment provides automated procedures for the recording, monitoring, and tracking of commitment, obligation, and disbursement transactions against allowances, and to determine the availability of funds. The investment provides reporting capabilities to support financial analysis and reporting. The centralized data, facilitates the timely sharing of budget information Agency-wide providing improved information for resource management decisions. IRMS supplements the Unified Financial Management System.

13. Indicate if the system is new or an existing one being modified: Existing

17. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system? (Note: This question seeks to identify any, and all, personal information associated with the system. This includes any PII, whether or not it is subject to the Privacy Act, whether the individuals are employees, the public, research subjects, or business partners, and whether provided voluntarily or collected by mandate. Later questions will try to understand the character of the data and its applicability to the requirements under the Privacy Act or other legislation. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this system?):
No

21. Is the system subject to the Privacy Act? (If response to Q.19 is Yes, response to Q.21 must be Yes and a SORN number is required for Q.4): No

23. If the system shares or discloses IIF please specify with whom and for what purpose(s):
Not Applicable

30. Please describe in detail: (1) the information the agency will collect, maintain, or disseminate; (2) why and for what purpose the agency will use the information; (3) in this description, explicitly indicate whether the information contains PII; and (4) whether

submission of personal information is voluntary or mandatory: 1. HRSA will receive through automated transfer of Unified Financial Management System (UFMS) Extract Files, budget and accounting transactions which includes allowances (funding); commitments (reservations of funds); obligations (uses of funds); disbursements (liquidation of obligations); and the related accounting codes (e.g., Common Accounting Number/Budget and Accounting Classification Structure).

2. The integrated budget, accounting, and administrative data are collected to facilitate the tracking and monitoring of each commitment, obligation, and disbursement against allowances (available funds). IRMS collects, maintains or disseminates data only for authorized users

3. IRMS does not collect, maintain or disseminate PII

4. Not Applicable

31. Please describe in detail any processes in place to: (1) notify and obtain consent from the individuals whose PII is in the system when major changes occur to the system (e.g., disclosure and/or data uses have changed since the notice at the time of the original collection); (2) notify and obtain consent from individuals regarding what PII is being collected from them; and (3) how the information will be used or shared.

(Note: Please describe in what format individuals will be given notice of consent [e.g., written notice, electronic notice, etc.] (1) There is no process in place to notify and or gain consent from individuals because the system does not contain PII

(2) & (3) Because we do not collect PII there is no need to notify, obtain consent or notify individuals of how their info is being used or shared.

32. Does the system host a website? (Note: If the system hosts a website, the Website Hosting Practices section is required to be completed regardless of the presence of PII): No

37. Does the website have any information or pages directed at children under the age of thirteen?: No

50. Are there policies or guidelines in place with regard to the retention and destruction of PII? (Refer to the C&A package and/or the Records Retention and Destruction section in SORN): Yes

54. Briefly describe in detail how the IIF will be secured on the system using administrative, technical, and physical controls.: IRMS does not collect, maintain or disseminate PII. However, all records are stored in computer data files on secure GSS Tape as part of a backup process by HRSA IT. Access to data is limited to authorized personnel in the performance of their duties. Authorized personnel include: system managers and their staff; financial and fiscal management personnel; computer personnel; and HRSA contractors. A password is required to access computer files. All users of the system's records do so only in accordance to their job responsibilities, thus allowing the protection of records from public view and from unauthorized personnel entering an unsupervised area. All authorized users sign a nondisclosure statement. All passwords, keys and/or combinations are changed when a person leaves or no longer has authorized duties. Access to records is limited to those authorized

personnel trained in Government security procedures, including the Privacy Act. Contractors are required to maintain, and are also required to ensure that subcontractors maintain, confidentiality safeguards with respect to these records. Contractors and subcontractors are instructed to make no further disclosure of the records except as authorized by the System Manager and permitted by the Privacy Act.
