

Summer High School Internship Program

Interested in scientific
research?
Spend your summer
at NIST!

- The National Institute of Standards and Technology offers unique research experiences that can set you apart from your college-bound peers.
- Students work with staff in physics, chemistry, biochemistry, materials science, engineering, mathematics, statistics, information technology, and computer science. Science at NIST focuses on measurement and advanced technology.
- Some past participants have been included as authors on scientific papers.
- SHIP lasts six to eight weeks, 40 hours per week, over the summer months. It's an unpaid volunteer program for high school juniors and seniors.
- NIST is an MCPS Student Service Learning Site located in Gaithersburg, MD.
