Patient & & Family Education Codes

(PEPC)

17th Edition 2011

Forward to the 17th Edition of the Patient Education Protocols and Codes

NOTE: This booklet contains the mnemonics (codes) only. The written guidelines (protocols) are found at **http://www.ihs.gov** under Non-Medical Programs—Health Education.

The PEP-C (Patient Education Protocols and Codes) committee has diligently worked to add all protocols that were requested by providers or programs. The Indian Health Services would like to sincerely thank all the members and guests of this committee. As usual, the committee spent long hours preparing for the annual committee meeting and even longer hours in committee. They all deserve our appreciation. Without these dedicated committee members this would not be possible. Thank you to: Mary Wachacha, IHS Health Education Program, for ensuring support for the education of our Native American and Alaskan Native clients; to Liz Dickey, R.N. and other Tucson IHS staff for envisioning an easier way to document education; to Shirley Teter for her assistance in formatting and ensuring consistency in our document; to Trish Price, Elko Service Unit, Phoenix Area, for the original concept of this booklet for publication; and to Dr. Chris Lamer, Medical Informatics. The 17th Edition welcomes three new physicians to our committee: Drs. Michael and Dominique Toedt and Dr. Emmett Chase.

With great regret, this 17the Edition bids a fond farewell and a sincere thank you to Dr. Michale Ratzlaff, Southcentral Foundation, and Dr. Kelton Oliver, formerly with Southcentral Foundation, now, with the US Air Force, for their 10-year commitment to providing guidance and direction to the National Patient Education committee. Finally, we are indebted to our colleagues in the Indian Health Service for their support, encouragement and input.

If you have new topics or codes you would like to see in future editions of the Patient Education Protocols and Codes please email your submission to a committee member – submissions are requested and encouraged!! The submissions will be reviewed by the committee and may be changed extensively prior to their publication for general use. New submissions can be sent to any committee member:

Documenting Goal Setting

| OBJECTIVE | DEFINITION | ACTION | MNE- MONIC |
|-----------------|--|---|---------------|
| Goal Set | The preparation phase defined as "patient ready to change" (patient is active) | State a plan State a plan how to maintain at least one State a plan of management Plan to change (blood sugar) Choose at least one change to follow Demonstrate and state a personal plan for | SS |
| Goal Not Set | The pre-contemplation phase defined as "patient is not thinking about change" | Goal Not Set | GNS |
| Goal Met | The action phase defined as "patient activity making the change" or maintenance phase defined as "patient is sustaining the behavior change" | Behavior Goal Met Patient maintains Goal | GM |
| Goal Not Met | The contemplation phase defined as "patient is unsure about the change" or relapse when the patient started making the change and did not succeed due to ambivalence or other factors. | Behavior Goal Not Met Patient set a goal but is ambivalent about change Relapse Patient set a goal but is unable to meet the goal | GNM |

- When you get to the Support (Non-Medical) Programs; scroll down to
 - Education/Training (click on this link)
 - Health Education (click on this link)
 - Click on National Patient Education Initiative
 - Click on Protocols and Codes
- Volume I contains the information you need to know when documenting patient/health education
 - 2011 Documenting Patient Education Volume I (PDF 1MB)
- Volume II contains the actual protocols and codes 2011 Volume II Patient and Family Education Protocols and Codes (PDF 3MB)

Use and Documentation of Patient Education codes

Use the Patient Education Protocols and Codes when providing health/patient education; individual, group or community education or ambulatory or in-patient education is documented using the same process. The education should be documented using the codes found in this booklet. Correct documentation requires the completion of the following elements: (*denotes required documentation)

- 1. Readiness to Learn (a JCAHO Requirement)
- 2. *Disease state, Illness, or Condition
- 3. *Education Topic Discussed
- 4. *Level of Understanding
- 5. *Time (spent providing the education)
- 6. *Provider Initials
- 7. *Behavior Goal: Goal Not Set, Goal Set, Goal Met, Goal Not Met
- 8. Comments

EXAMPLE:

- 1. **RL-RCPT** (Readiness to Learn—Receptive)
- 2. **ASM** = Asthma
- 3. **HM** = Home Management
- 4. **G** = Good Understanding
- 5. **10** (Minutes) = Time
- 6. **XYZ** = Provider Initials
- 7. **GS:** Pt. to avoid indoor triggers (tobacco smoke)
- 1. Comments: Spouse smokes in home/car

Patient Education "String": !

ASM-HM-G-10-XYZ-GS: Pt. to avoid indoor triggers (tobacco smoke). "

Documenting Readiness to Learn (RL)

Remember the first step to providing education is assess whether or not the patient is ready/willing to learn about their illness or condition. This is accomplished by asking the patient if they are willing to learn information about their disease, illness or condition? If the patient is agreeable, document their response using the RL mnemonic (Readiness to Learn) See page 6 of this booklet for more information.

Documenting Time

Providers should estimate the amount of time spent providing the education; document in whole minutes.

Level of Understanding

Providers have 4 choices to document the patient understanding of the education: Good, Fair, Poor or Group

Goal Setting

Providers should educate the patient and providers should also assist the patient to set goals that will help them to become healthier. (See page 36 for more information on setting goals.)

GS Goal Set
GNS Goal Not Set
GM Goal Met
GNM Goal Not Me

ICD-9 or General Education Codes - Guidelines For Use -

This booklet was developed to provide ease in the documentation of education for the most common disease state, illness or conditions that providers encounter within the Indian Heath Service. Obviously, this booklet does not contain codes for every diagnosis, illness or condition for which a provider might provide education. However, should providers find the need to document education for a disease state, illness or condition not found in this booklet, the provider may document the education provided by documenting through the use of ICD-9 Codes (or by simply writing down the diagnosis, disease state, illness or condition.) The Patient Resource Management System (RPMS) will accept both the codes found in this booklet as well as ICD-9 codes.

The provider will write out the following: "

- 1) ICD-9 code or diagnosis,
- 2) Education subtopic,
- 3) Level of understanding (G, F, P, R, Gp),
- 4) Provider Code or Initials,
- 5) Time spent providing the education,
- 6) Goal Setting: GS for Goal Set, GNS for Goal Not Set, GM for Goal " Met, and GNM for Goal Not Met if the patient does not meet a goal.

EXAMPLE

(132.9) Pediculosis – TX – F provider initials> 10 min. – GS: Pt. will wash linens

This would show up on the Health Summary under the Patient Education section as:

(132.9) Pediculosis – Treatment – fair understanding, 10 minutes, <Provider Initials>Goal Set: Pt. will wash linens.

Below is a listing of generic subtopics that can be used in conjunction with any ICD-9 diagnosis to document patient/family education. The list below is NOT exhaustive, nor is it intended to be.

| General Education Topics | | | | | |
|--|--|--|--|--|--|
| AP C DP EQ EX FU HM HY L | Anatomy and Physiology Complications Disease Process Equipment Exercise Follow-up Home Management Hygiene Literature | LA M MNT N P PRO S TE TX | Lifestyle Adaptations Medications Medical Nutrition Therapy Nutrition Prevention Procedures Safety Tests Treatment | | |

AP - ANATOMY AND PHYSIOLOGY

The patient and/or family will understand the anatomy and physiology as it relates to the disease state or condition.

C - COMPLICATIONS

The patient and/or family will understand the effects and consequences as a result of this disease state/condition, the failure to manage this disease state/condition, or those that are a result of treatment.

DP - DISEASE PROCESS

The patient/family will understand the condition/disease.

EQ - EQUIPMEN

The patient/family will understand and demonstrate (when appropriate) the proper use and care of home medical equipment.

End of 2011 PEPC Codes

Balancing Your Life with Diabetes

The patient/family will understand the role of physical activity to the patient's disease state.

FU - FOLLOW UP

The patient/family will understand the importance of follow-up.

HM-HOME MANAGEMENT

The patient/family will understand the home management of the disease process/ condition and will make a plan for implementation.

HY - HYGIENE

The patient will recognize good personal hygiene as an aspect of wellness.

The patient/family will receive literature about the disease process literature about the disease process or condition.

LA - LIFESTYLE ADAPTATIONS

The patient will understand the lifestyle adaptations necessary to prevent complications of the disease state/condition or to improve mental or physical health.

M - MEDICATIONS

The patient/family will understand the purpose, proper use, and expected outcomes of their drug therapy.

MNT- MEDICAL NUTRITION THERAPY

For use by registered dietitians ONLY

The patient/family will understand the specific nutritional interventions needed in the disease state/condition.

N - NUTRITION

The patient will understand the need for balanced nutrition and will plan for the implementation of dietary modification if needed.

The patient/family will understand that healthy lifestyle behaviors can reduce the risk of developing diseases, conditions, or complications.

PRO - PROCEDURES

The patient/family will understand the proposed procedure, including the indications, complications, and alternatives, as well as, possible results of nontreatment.

The patient/family will understand the principles of injury prevention and will plan a safe environment.

The patient/family will understand the tests to be performed, including indications and their impact on further care.

TX - TREATMENT

The patient/family will understand the mutually agreed upon treatment plan.

IMPORTANT CHANGES IN THE 17TH EDITION

Consistency In Wording of Standards: Word consistency was increased across protocols, when specificity was not required. For example, the exercise standards are similar in many protocols.

For 2011, the sub-topic DC has been changed from Dental Caries (DC) to **Dental Care (DC)**

MNEMONIC CHANGES: The mnemonic for Lead Exposure/Lead Toxicity has changed from PB to **LEAD**. The mnemonic for Fetal Alcohol Spectrum Syndrome has changed from FAS to **FASD**.

Adjustment Disorders (ADD): Education provided on stressors that cause emotional or behavioral symptoms that do not meet criteria for more specific disorders.

Amputations (AMP): This code is to be used when providing patient/health education about amputations.

Alcohol Screening Brief Negotiated Interview (AOD-ASBI):

Documentation of ASBI will be documented under Alcohol and Other

Drugs—ASBI (AOD-ASBI)

Antibiotic Associated Diarrhea (ABXD): Diarrhea that occurs when antibiotics disturb the natural balance of "good" and "bad" bacteria in the intestinal tract causing harmful bacteria to grow beyond their normal numbers with the result of frequent bowel movements.

Bipolar Disorders (BD): Education to treat mood disorders involving manic episodes.

Case Management (CM): The code previously associated with the mnemonic CM was *Care* Management has been changed throughout the Manual to **Case** Management.

Celiac Disease (CEL): Celiac Disease (CEL) is a new code.

Central Line Catheter (CVC): Education provided to explain the placement of a catheter in a large vein in the neck, chest or groin.

Cerebral Palsy (CERP): This is a new code to provide education on this disorder.

Chemical Dependency Change: Reminder: The mnemonic CD for Chemical Dependency has been changed to AOD - Alcohol and Other Drugs. Questions/concerns about this change should be addressed to Gabriel.longhi@ihs.gov, BH representative.

Conduct Disorder (COND): Providing education on a pattern of repetitive behaviors.

Cultural/Spiritual Aspects of Health (CUL): CUL is to be used to document education/counseling that reflects an integration of the impact and influences that cultural and spiritual traditions, practices, and beliefs have on health and wellness.

Dental Care (DC): Dental Caries has been changed to Dental Care.

Delirium:(DEL): This is characterized by a disturbance of consciousness accompanied by a change in cognition, such as memory loss and disorientation, that develops over a short time and is caused by a medical condition, substance intoxication or withdrawal, use of medication, or toxin exposure.

Depression (DEP): changed from Depression, Major to Depressive Disorder.

Dementia (DEM): This is characterized by the development of multiple cognitive deficits, including memory impairment, and at least one other disturbance, such as aphasia, apraxia, or agnosia, that develops over time due to a medical condition, the persistent effects of a substance use, or a combination of factors.

Domestic Violence Victim (DVV): Domestic Violence (DV) has been changed to DVV for Domestic Violence Victim (DVV)

Domestic Violence Perpetrator (DVP): Domestic violence has also been expanded to include Domestic Violence Perpetrator.

Dissociative Disorders (DISSD): Education regarding the treatment of disorders involving a disruption in usual integrative functions of consciousness and perception.

Eating Disorders (EAT): Education on abnormal eating habits.

Electrolyte Imbalance (ELEC): These are general codes for documenting education provided regarding electrolyte imbalances of all kinds.

Enuresis (ENU): Education on the inability to control urination.

Factitious Disorder (FACT): These are characterized by physical or psychological symptoms that are intentionally produced or feigned in order to assume the sick role without any external incentives or reward.

Fetal Alcohol Spectrum Disorder (FASD): The mnemonic for Fetal Alcohol Spectrum Syndrome has changed from FAS to **FASD**

Gout (GOUT): Education on recurrent attacks of acute inflammatory arthritis in joints, tendons, and surrounding tissues.

Grief /Bereavement GRIEF): In addition to the grief associated the loss experienced at the "end of life" GRIEF was added to address the education provided to patients who are grieving because of other losses. The losses may include a home a spouse through divorce, a job or even a favorite pet. The standards are general so they can be adapted to wide variety of situations.

Heart Failure Change (HF): The PEP-C previously contained a mnemonic called Congestive Health Failure (CHF). This will be inactivated and the topic/mnemonic is HF—Heart Failure. A Discharge Literature code (HF-DCHL) was added to address the CMS requirement of discharge literature to Congestive Heart Failure patients.

Home IV Therapy (IV): These codes may be used to document all aspects of education needed for the patient who will receive IV therapy at home.

Impulse Disorders (IMPLS): these disorders are considered to be a part of the obsessive-compulsive disorder spectrum.

RST-SM

Stress Management

Juvenile Rheumatoid Arthritis (JRA): New protocols and mnemonics has been developed for Juvenile Rheumatoid Arthritis. Most other "Rheumatic Diseases" can be covered with the mnemonic ATO- Autoimmune Disorders.

Kidney Stones (STONE): This is the patient/family education on kidney stone formation within the kidney or urinary tract.

Lead (PB): The mnemonic for Lead Exposure/Lead Toxicity has changed from PB to **LEAD**.

Learning Disorders (LD): is a disorder in which a person has difficult learning in a typical manner, usually caused by an unknown factor or factors.

Lyme Disease (LYME): Education on the most common tick-borne disease.

Medical Nutrition Therapy (MNT): Only Registered Dietitians are permitted to use the MNT code. Questions concerning the MNT protocols and codes should be directed to Cecelia.butler@ihs.gov

Mental Retardation (MR): impaired cognitive functioning and deficits in two or more adaptive behaviors.

Multidrug-resistant Organisms (MDRO): is any kind of bacteria that has become resistant to many different antibiotics.

Muscular Dystrophy (MD): This is a group of disorders that involve muscle weakness and loss of muscle tissue that get worse over time. The goal of treatment is to control symptoms and there are known cures.

Occupational Health:(OCCU): These education codes were developed for the Occupation Health Nurses to document topics of education they frequently provide for employees.

Organ Donation/Transplant (TPLNT): the removal of tissues and organs of the human body for the purpose of transplanting the tissues and/or organs in another human body.

Obsessive Compulsive Disorder (OCD): Patient/Health education on this anxiety disorder characterized by involuntary intrusive thoughts.

Oppositional Defiant Disorder (ODD): Patient/health education on an ongoing pattern of disobedient, hostile, and defiant behavior towards authority figures.

Obstructive Sleep Apnea (OSA): Patient/ health education on this sleep disorder.

Osteoarthritis (OA): We have developed new patient/health education protocols for this degenerative arthritis.

Otitis Externa (OEX): an inflammation of the outer ear and ear canal.

Periodontal Disease (PERIO): Previously, periodontal disease was listed under the mnemonic code PD. The mnemonic code for periodontal disease has been changed to PERIO.

Personality Disorders (PERSD): Patient/health education on personality styles which deviate form the contemporary expectations.

Pervasive Development Disorders (PDD): refers to a group of disorders: autism, Asperger Syndrome, Rett Syndrome, childhood disintegrative disorder and

Parkinson Disease (PRK): Patient/health education on this degenerative disease of the brain (central nervous system).

Phobias (PHOB): Patient/health education on fear.

Pre-Conception Care (PCC): The PCC subtopic was added to many medical protocols to address the pre-conception care to be considered in the particular condition.

Psychotic Disorders (PSYD): Patient/health education on abnormal conditions of the mind.

Pyelonephritis (PYELO): This is a serious bacterial infection of the kidney that can be acute or chronic.

Reactive Attachment Disorder (REACT): This is a markedly disturbed and developmentally inappropriate social relatedness in most contexts that begins before the age of 5 years and is associated with grossly pathological care.

Scabies (SCBE): Patient/health education on this contagious skin condition.

Separation Anxiety Disorders (SAD): anxiety regarding separation from home or from people to whom the individual has a strong emotional attachment.

Sexual Disorders (SEX): This includes a disturbance in sexual desire and psychophysiological changes that characterize the sexual response cycle (sexual dysfunctions) and a recurrent, intense sexual urges, fantasies, or behaviors that involve unusual objects, activities, or situations (Paraphilias).

Sleep Disorders (SLEEP): These are disruptions in sleep patterns that are characterized by abnormalities in the amount, quality, or timing of sleep (Dyssomnias), abnormal behavioral or physiological events occurring with sleep (Parasomnias), problems with the sleep wake-cycle (general medical condition), or those that result from the effects of concurrent use of a substance, or discontinuation of a substance.

Snake Bite (SNAKE): Patient/health education on snake bites.

Somatoform Disorder (SOMA): a mental disorder characterized by physical symptoms that mimic physical disease or injury for which there is no identifiable physical cause.

Syncope (SYN): This is: patient/health education on managing episodes of Syncope (fainting).

West Nile Virus (WNV): Patient/health education on the bite of an infected mosquito.

New 2008 Subtopic Codes:
ISEC: Infant Security
LP: LEEP

New 2009 Subtopic Codes:
BH Behavioral and Emotional
Health

MR: Medication HELP Help Lines
Reconciliation IB Insurance & Benefits

New 2010 Subtopics:
ABST: Abstinence

New 2011 Subtopics:
ALL: Allergies

DPH: Diaphragm ASBI: Alcohol Screening and RRT: Rapid Response Brief Intervention
Team INF: Infant Care

m INF: Infant Care
ORAL: Oral Care

PCC: Pre-Conception Care

New Health Factors Added: Barriers To Learning Codes:

DEMN: Dementia

ESLA: An additional barrier English as a Second Language (ESLA) has also been added.

LOWLIT: Low Health Literacy

New 2008 Protocols

ABNG: Abuse/neglect adult/child

ASLT: Assault

BITE: Bites, animal/human
CO: Constipation
ENCOP: Encopresis
FOOT: Foot, podiatry
FTT: Failure to thrive
LICE: Head Lice

NOSE: Epistaxis

OBSC: Obesity Childhood

PTSD: Post traumatic stress disorder RMSF: Rocky Mountain Spotted Fever

SINUS: Sinus Infection STING: Insect Stings YEAST: Yeast Infection

New 2009 Protocols:

AMP Amputations

JRA Juvenile Rheumatic Arthritis

LYME Lyme Disease

OSA Obstructive Sleep Apnea

OA Osteoarthritis
PERIO Periodontal Disease
PRK Parkinson Disease
RA Rheumatic Arthritis

SCBE Scabies
SNAKE Snake Bite
WNV West Nile Virus

New 2009 Behavioral Health Protocols and Codes:

BD Bipolar Disorder
COND Conduct Disorder
DISSD Dissociative Disorder
DVV Domestic Violence Victim
DVP Domestic Violence Perpetrator
OCC Obsessive Compulsive Disorder
OCD Oppositional Defiant Disorder

PANIC Panic Disorder
PERSD Personality Disorder

PHOB Phobias

PSYD Psychotic Disorders

| New 20 | 10 Protocols: |
|--------|---------------|
| GOUT | Gout |
| ENII | Enurocic |

RH Reactive Hypoglycemia

OEX Otitis Externa

ABXD Antibiotic Associated Diarrhea
MDRO Multidrug-resistant Organisms
CVC Central Line Catheter

New 2010 Behavioral Health Protocols and Codes:

ADD Adjustment Disorders
EAT Eating Disorders
IMPLS Impulse Disorders
LD Learning Disorders
MR Mental Retardation

PDD Pervasive Development DisordersSAD Separation Anxiety Disorder

SOMA Somatoform

New 2011 Protocols:

CERP: Cerebral Palsy
DEL: Delirium
DEM: Dementia

ELEC: Electrolyte Imbalance
IV: Home IV Therapy
MD: Muscular Dystrophy
OCCU: Occupational Health
PYELO: Pyelonephritis
SYN: Syncope

New 2011 Behavioral Health Protocols:

DEL: Delirium **DEM:** Dementia

FACT: Factitious Disorder SEX: Sexual Disorders SLEEP: Sleep Disorders

Please discard old PEP-C Manuals; download the new FY 2011 PEPC Manual from http://www.ihs.gov and assure that your local Information Technology Department /Computer Department has installed all current patches for RPMS.
