### NRC NAMES NEW RESIDENT INSPECTOR AT DIABLO CANYON NUCLEAR POWER PLANT

The U.S. Nuclear Regulatory Commission has selected Laura Micewski as the new resident inspector at the Diablo Canyon nuclear power plant located near San Luis Obispo, Calif.

“Laura Micewski’s background and experience will assist the NRC in carrying out its mission of protecting people and the environment and ensuring the safe operation of nuclear power plants,” said NRC Region IV Administrator Elmo E. Collins.

Micewski joined NRC Region IV in September 2009 as a project engineer. She has served on numerous inspection teams in the region, performing inspections at San Onofre Nuclear Generating Station, Comanche Peak nuclear power plant, and Fort Calhoun Station. Prior to joining the agency, she served as a surface warfare officer (nuclear) and engineering duty officer in the U.S. Navy. Micewski holds a bachelor’s degree in chemistry from the United States Naval Academy and a master’s degree in mechanical engineering from Naval Postgraduate School.

Each U.S. commercial nuclear power plant site has at least two NRC resident inspectors. Micewski joins senior resident inspector Michael Peck. They serve as the agency’s eyes and ears at the facility, conducting inspections and monitoring significant work projects.

The Diablo Canyon resident inspectors can be reached at: (805) 595-2354.
