NRC, CENG MANAGERS TO DISCUSS COMPANY'S FLEET OF NUCLEAR PLANTS AT PUBLIC MEETING ON JULY 26

Managers from the Nuclear Regulatory Commission and Constellation Energy Nuclear Group (CENG), LLC, will conduct a public meeting on Tuesday, July 26, to discuss the company's three nuclear power plants. Those facilities are Calvert Cliffs, in Lusby, Md.; Ginna, in Ontario, N.Y.; and Nine Mile Point, in Scriba, N.Y.

The session will provide NRC senior managers responsible for oversight of the plants with an opportunity to discuss them simultaneously – providing a perspective on fleetwide activities and initiatives -- with the company's senior management. Such meetings are routinely held on an annual basis.

The meeting is scheduled to begin at 9 a.m. at CENG's headquarters, located at 100 Constellation Way in Baltimore, Md. It will take place in the Candler Building's second-floor main conference room. Portions of the meeting may be closed due to discussions of security-related information.

Members of the public are invited to observe the meeting. Those in attendance will be able to ask questions or offer comments to NRC officials after the business portion has been concluded but before the overall session has been adjourned. The [meeting notice](#) is available on the agency's website.

Information about the NRC's assessment of performance at the respective plants is available on the agency's website by clicking [Calvert Cliffs 1](#), [Calvert Cliffs 2](#), [Ginna](#), [Nine Mile Point 1](#), or [Nine Mile Point 2](#).
