## **NRC SEEKS PUBLIC INPUT ON ENVIRONMENTAL REVIEW OF COLUMBIA GENERATING STATION LICENSE RENEWAL; MEETINGS APRIL 6**

Nuclear Regulatory Commission staff will hold two public meetings on April 6, in Richland, Wash., to discuss the agency's environmental review of the Columbia Generating Station license renewal application.

The Columbia Generating Station is a boiling-water nuclear reactor. The plant is located 12 miles northwest of Richland, Wash. The licensee, Energy Northwest, submitted the renewal application Jan. 19 for the plant. The current operating license expires on Dec. 20, 2023.

"This is the first of several opportunities for the Columbia Generating Station community to let us know what issues the NRC should look at while we review the potential environmental impacts of renewing the license," said Daniel Doyle, a project manager in the NRC's Division of License Renewal. "We'll consider all the comments and publish them in a 'scoping summary' as we move forward with our review."

The staff will start the first session at 1:30 p.m., and hold a second session at 6 p.m. Both sessions will be held at the Richland Public Library, 955 Northgate Dr. Both sessions will follow the same format and cover the same material. The staff will briefly describe the agency's process for reviewing license renewal applications. Members of the audience will then have the opportunity to comment on environmental issues they feel the agency should consider in the review of the Columbia Generating Station application.

NRC staff will be available for informal discussions during an "open house" session an hour before each meeting. However, formal comments on the renewal will be accepted only during the meetings. Members of the public may register to present oral comments at these meetings by March 30, by contacting NRC Project Manager Daniel Doyle by telephone at 1-800-368-5642, extension 3748, or by e-mail at [Daniel.Doyle@nrc.gov](mailto:Daniel.Doyle@nrc.gov). Those who wish to make comments may also register at the meeting within 15 minutes of the start of each session.

Individual oral comments may be limited by the time available, depending on the number of persons who register. Those with special needs should contact Doyle by March 23.

The application is available on the NRC Web site at: <http://www.nrc.gov/reactors/operating/licensing/renewal/applications/columbia.html> and is available for viewing at the Richland Public Library and at the Kennewick branch of Mid-Columbia Libraries.

Members of the public may send written comments on issues to be considered in the environmental review by May 14 to: Michael T. Lesar, Chief, Rulemaking and Directives Branch, Office of Administration, Mailstop TWB 05-B01M, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. Comments may also be submitted electronically to the NRC via the Federal rulemaking website: <http://www.regulations.gov>. Search for documents filed under Docket ID NRC-2010-0029. Additional information on the license renewal process is available on the NRC's Web site at: <http://www.nrc.gov/reactors/operating/licensing/renewal.html>.
