[feveform.html](http://www.loc.gov/flicc/feveform.html).

Integrated Pest Management (IPM) is the general term used for pest management programs in many libraries and other institutions. IPM focuses on preventive techniques to minimize food, moisture and environmental conditions required for pest survival.

Learn about the different types of pests and how to create an in-house IPM program in your agency.

Topics will include

- A review of pests attacking collections of all types including
 - o Cockroaches
 - o Silverfish
 - o Carpet Beetles
 - o Rodents
 - o Bookworms
 - o Clothes Moths
- Creation of an effective, low-cost in-house IPM.

Leading the workshop is Thomas A. Parker, Ph.D., a recognized expert on biohazards in cultural institutions. To view his Web site, point your browser to <http://www.museumpestcontrol.com>.

Register for this workshop plus *Demystifying Mold* (see Meeting Announcement MA2007-29) and save \$50!
(\$310 for FT Accounts/\$340 for all others.)
