^a See Appendix A, Explanatory Note 9, for discussion of wellhead prices.^b The natural gas liquids (NGL) composite spot price, shown in dollars per million Btu (\$/MMBtu), is derived from daily Bloomberg spot price data for natural gas liquids at Mont Belvieu, Texas, weighted by gas processing plant production volumes of each product as reported on Form EIA-816, "Monthly Natural Gas Liquids Report." See Appendix A, Explanatory Note 10, for full discussion.^c The natural gas spot price, shown in \$/MMBtu, represents the average of the daily closing spot prices for natural gas at the Henry Hub in Louisiana, taken from Thompson Reuters. See Appendix A, Explanatory Note 10, for full discussion.^d Percentage of total deliveries represented by onsystem sales (see Figure 6). See Table 24 for State data.^e The electric power sector comprises electricity-only and combined-heat-and-power plants within the NAICS 22 category whose primary business is to sell electricity, or electricity and heat, to the public. Data include nonregulated members of the electric power sector.^R Revised data.^E Estimated data.

-- Not applicable.

Notes: Prices are in nominal dollars. Data for 2007 through 2009 are final. All other data are preliminary unless otherwise indicated. Geographic coverage is the 50 States and the District of Columbia. Published residential, commercial, and industrial prices are considered to be total prices paid by end-users per thousand cubic feet of natural gas in the respective sectors, inclusive of all tax, delivery, commodity, demand and other charges.**Sources:** 2007-2009: Energy Information Administration (EIA), Natural Gas Annual 2010.
