NOED requests have been evaluated and decisions made jointly by the regional and NRR staffs. Thus, the distinction is unnecessary.

The Enforcement Policy revision specifies that the associated regional and headquarters staff will together determine the appropriateness of granting a requested NOED. If the NOED is determined to be appropriate, regional staff will complete the documentation process associated with granting the NOED.

PROVIDES THAT, FOR ALL POWER REACTOR NOED DETERMINATIONS, THE REGIONAL ADMINISTRATOR, OR HIS OR HER DESIGNEE, MAY ISSUE A NOED AFTER CONSULTATION WITH HEADQUARTER

The revision establishes a single focal point and therefore eliminates the need to categorize NOEDs as ^{to} regional- or headquarters-lead. This clarification will provide a more predictable, clear, and consistent process for licensees when requesting NRC to consider granting a NOED.

This policy revision, as well as other NOED process improvements, was discussed with representatives of the Nuclear Energy Institute (NEI) and other stakeholders at a public meeting with the NRC staff on July 14, 2004. The NRC plans on completely revising and reissuing its Part 9900 guidance later in the year. In addition to the Enforcement Policy revision, other process improvements include emphasizing that the license amendment process should be used in preference to NOEDs whenever possible and developing improved guidance to address the NOED request requirement to demonstrate no net increase in radiological risk. In addition, other concurrent improvements to the NOED process will result in most NOEDs having follow-up license amendments regardless of the NOED duration.
