

ASFPM 2012 Annual National Conference

The Association of State Floodplain Managers will convene the world's largest and most comprehensive floodplain management conference the week of May 20 - 25, 2012, in San Antonio, Texas. Throughout the week, 200 of the industry's experts will conduct plenary and concurrent sessions and share the state-of-the-art in techniques, programs, and resources to accomplish flood mitigation, watershed management, and other community goals. A three-day comprehensive exposition features the materials, equipment, accessories, and services vital to get the job done. Supplementary technical field tours and training workshops provide in-depth training. Numerous networking activities offer additional opportunities to learn from each other.

For more conference information: <http://www.floods.org>

In conjunction with this national conference, a half day nonstructural workshop will be conducted. See information below for details.

Nonstructural Workshop

This four-hour workshop will provide an overview of common techniques used for nonstructural mitigation of flood risk and flood damages. Instructors from the National Nonstructural Flood Proofing Committee will lead participants through a step by step process from data collection through benefit analysis utilizing USACE's Hydrologic Engineering Center-Flood Damage Reduction Analysis (HEC-FDA) computer model. These Instructors will provide detailed discussion on the input requirements to successfully conduct a nonstructural assessment. The workshop is appropriate for planners and engineers who are interested in learning about an approach to developing a recon level assessment for justifying nonstructural mitigation measures.

Instructors: Members of the US Army Corps of Engineers' National Nonstructural Flood Proofing Committee
