

## **Lesson Plan: Student Guide**

### **1-Hour Hazard Communication Overview**

#### **Overview**

This lesson will review the basic elements of the hazard communication standard and the workplace safety and health requirements for the 3<sup>rd</sup> shift sanitation work. The Hazard Communication Standard 29 CFR 1910.1200 contains many of the provisions for written hazard communication program and the required elements including: 1) written hazard communication program; 2) labels and other forms of hazard warning; 3) Material Safety Data Sheets (MSDS); 4) training requirements; and 5) health hazards and effects. This lesson provides appropriate awareness-level safety and health training that addresses the chemical hazards for the 3<sup>rd</sup> shift worker through the following actions: anticipation, recognition, evaluation, and control.

In this lesson all facets of the standard are covered and reviewed, but emphasis is placed on chemical hazards, MSDSs, and labeling.

#### **Content/ Topics**

- 29 CFR 1910.1200
- Safety and health hazard communication checklist
- Types of emergency response employees designated

Upon completion of this course module, the student should be able to:

- Describe the elements of a hazard communication program
